## Trump's Policies Will Determine The Course Of Growth, Labor Market, Inflation, And Interest Rates

### United States: Fed's rate cuts likely to slow with inflation pressures still elevated

- The annual inflation rate in the US rose for a 2<sup>nd</sup> consecutive month to 2.7% in Nov-24 from 2.6% in Oct-24.** The rise is partly influenced by low base effects from last year. On a monthly basis, the CPI rose by 0.3%, the most since Apr-24. The index for shelter rose 0.3%, accounting for nearly 40% of increase. The core CPI rose 3.3% yoy and 0.3% mom.
- The Fed announced another 25 bps cut to the federal funds rate in Dec-24.** The decision marking the third consecutive reduction this year and bringing borrowing costs to the 4.25% - 4.5% range. The newest Fed Guidance per Dec-24 indicates that policymakers now anticipate just two rate cuts in 2025, totaling 50 bps.
- Fed Guidance Dec-24: Higher GDP growth and inflation rate outlook.** The Fed also revised its GDP growth forecasts upward for (2.5% vs 2% in the Sep-24 projection) and 2025 (2.1% vs 2%), while remaining steady at 2% for 2026. Similarly, PCE inflation projections have been adjusted higher for (2.4% vs 2.3%), 2025 (2.5% vs 2.1%), and 2026 (2.1% vs 2%).

### Euro Area: The ECB remains focused on ensuring inflation returns to its 2% target

- The European Central Bank (ECB) has decided to cut its key interest rates for the fourth time this year by 25 bps in Dec-24.** This move reflects a more favorable inflation outlook and improvements in monetary policy transmission. Inflation is expected to gradually decrease, with forecasts of 2.4% in , 2.1% in 2025, and 1.9% in 2026. Core inflation, excluding energy and food, is also expected to fall, with a target of 2% in the medium term.
- The HCOB Eurozone Manufacturing PMI was at 45.1 in Dec-24, edging lower from 45.2 in the previous month.** It was the sharpest decline in manufacturing activity in three months to extend the ongoing two-year contractionary streak. Lower demand led manufacturers to reduce their workers, especially in Germany and France.

### Asia Pacific: Rising concerns on growth and trade outlooks, particularly with the threat of US tariffs.

- The Caixin China General Manufacturing PMI edged down to 50.5 in Dec-24 from November's 5-month high of 51.5.** Both output and new orders expanded at slower rates while foreign orders shrank after increasing at the fastest pace for seven months in the prior month. Also, employment dropped for the fourth month, resulting in the third month of backlog accumulation.
- China's annual inflation rate unexpectedly eased to 0.2% in Nov-24.** This slowdown highlighted mounting deflation risks in the country despite recent stimulus measures from Beijing and the central bank's supportive monetary policy stance.

Global Economic Indicators	Oct-24	Nov-24	Dec-24
<b>United States</b>			
Inflation Rate (% yoy)	2.60	2.70

# Latest Development – Indonesia

## Indonesia's Economic Resilience: Inflation Manageable, Trade Surplus record for 55 consecutive months

- Bank Indonesia Board of Governors meeting on 17 - 18 December decided to hold the BI Rate at 6.00% amidst rising global volatility.** The Deposit Facility (DF) and Lending Facility (LF) rates also stayed at 5.25% and 6.75%, respectively.
- Indonesia's recorded modest inflation at 1.57% yoy by year-end , lower than the 2.61% yoy recorded in 2023.** It marked the lowest inflation rate since 2021, at slightly above Bank Indonesia's lower target range of 1.5–3.5%. It highlights the effectiveness of the government's coordinated efforts in maintaining price stability for goods and services, which has supported consumer purchasing power amid turbulent global economy. On average, inflation in was recorded at 2.30%, lower than the 3.73% recorded in 2023
- Indonesia's foreign exchange (FX) reserves at USD 150.2 bn in Nov-24, slightly declining from a record high of USD 151.2 bn in Oct-24.** This decrease was primarily due to government foreign debt payment. Indonesia's FX reserves were sufficient to cover 6.5 months of imports or 6.3 months of imports and government foreign debt payments, exceeding the international adequacy standard of about 3 months of imports.
- Indonesia recorded a trade surplus for 55 consecutive months in Nov-24.** The trade surplus in Nov-24 widened to USD4.42 bn from USD2.48 bn in the previous month. Export slightly slowed to 9%yoy, while import growth generally stable in Nov-24. OG imports dropped 29.88% mom or -26.32% yoy. The decrease in non-OG imports was driven by a drop in imports of electrical machinery and equipment
- Indonesia's loan growth in Nov-24 grew to 10.79% yoy (vs. 10.92% yoy in Oct-24).** Meanwhile, deposits grew to 7.54% yoy in Nov-24 (vs 6.74% in Oct-24). Liquidity remains tight reflected in the LDR at 87.34%, compared to the previous month at 87.49%.

# US Leading Economic Indicators

The Fed may adopt a more cautious approach to the monetary policy as inflation risk re-appear

- In the third quarter of , the U.S. economy experienced a 2.8% annualized growth in GDP, slightly below the 3.0% growth observed in the second quarter, indicating a steady yet moderating economic expansion.
- Inflationary pressures persisted, with the annual Consumer Price Index (CPI) rising to 2.7% in November from 2.6% in October.
- At the December 2024 Federal Open Market Committee (FOMC) meeting, Federal Reserve Chair Jerome Powell announced a 25 basis point reduction in the federal funds rate, bringing it to a target range of 4.25% to 4.5%. Looking ahead, the Fed's projections indicate a more cautious approach for 2025, with expectations of only two additional quarter-point cuts, totaling 50 basis points, by the end of next year. This adjustment reflects the Fed's assessment of persistent inflationary pressures and a robust labor market, suggesting a measured pace of monetary easing to balance economic growth with price stability.

# Trump's Policies: What to Anticipate?

## Trump's Policy: "America First"

**Trade Protectionism**

**More support on the wealthy  
(business sector)**

**Immigration restriction**

**Less Support for climate change  
policies**

## Dampak ke Ekonomi Global

### US Economy

Expansionary Fiscal Policy → Rising US Debt → Higher UST Yield → Strong US Growth → Higher Inflation

Higher tariff on China's product → Rising Input Cost → Higher Inflation

### US Monetary Policy

Higher UST Yield and inflation → Slowing pace of FFR cut

### China Economy

#### **Higher risk of China's economic slowdown**

A trade war can severely hit Chinese exports, a large portion of which goes to the US.

### Global Economy

#### **Rising global volatility**

US Populist Policies and trade war with China will trigger market volatility

#### **Declining global trade**

China and US now have 21.2% share to world's export and 23.8% share of total import.

Declining commodity price due to deeper slowdown

## Dampak ke Indonesia

### Trade Channel

(-) Lower export performance due to:

- Declining demand from China
- Declining export to US, if US implement tariff to non-China including Indonesia

(+) Higher export if Indonesia can take advantage by replacing China's export to US

### Investment Channel

(-) Lower investment flows:

- China economic slowdown
- Shifting US foreign investment policies

### Financial Market Channel

#### **Rising Volatility due:**

Trade war sentiment

Expectation of a slowing pace of FFR cuts

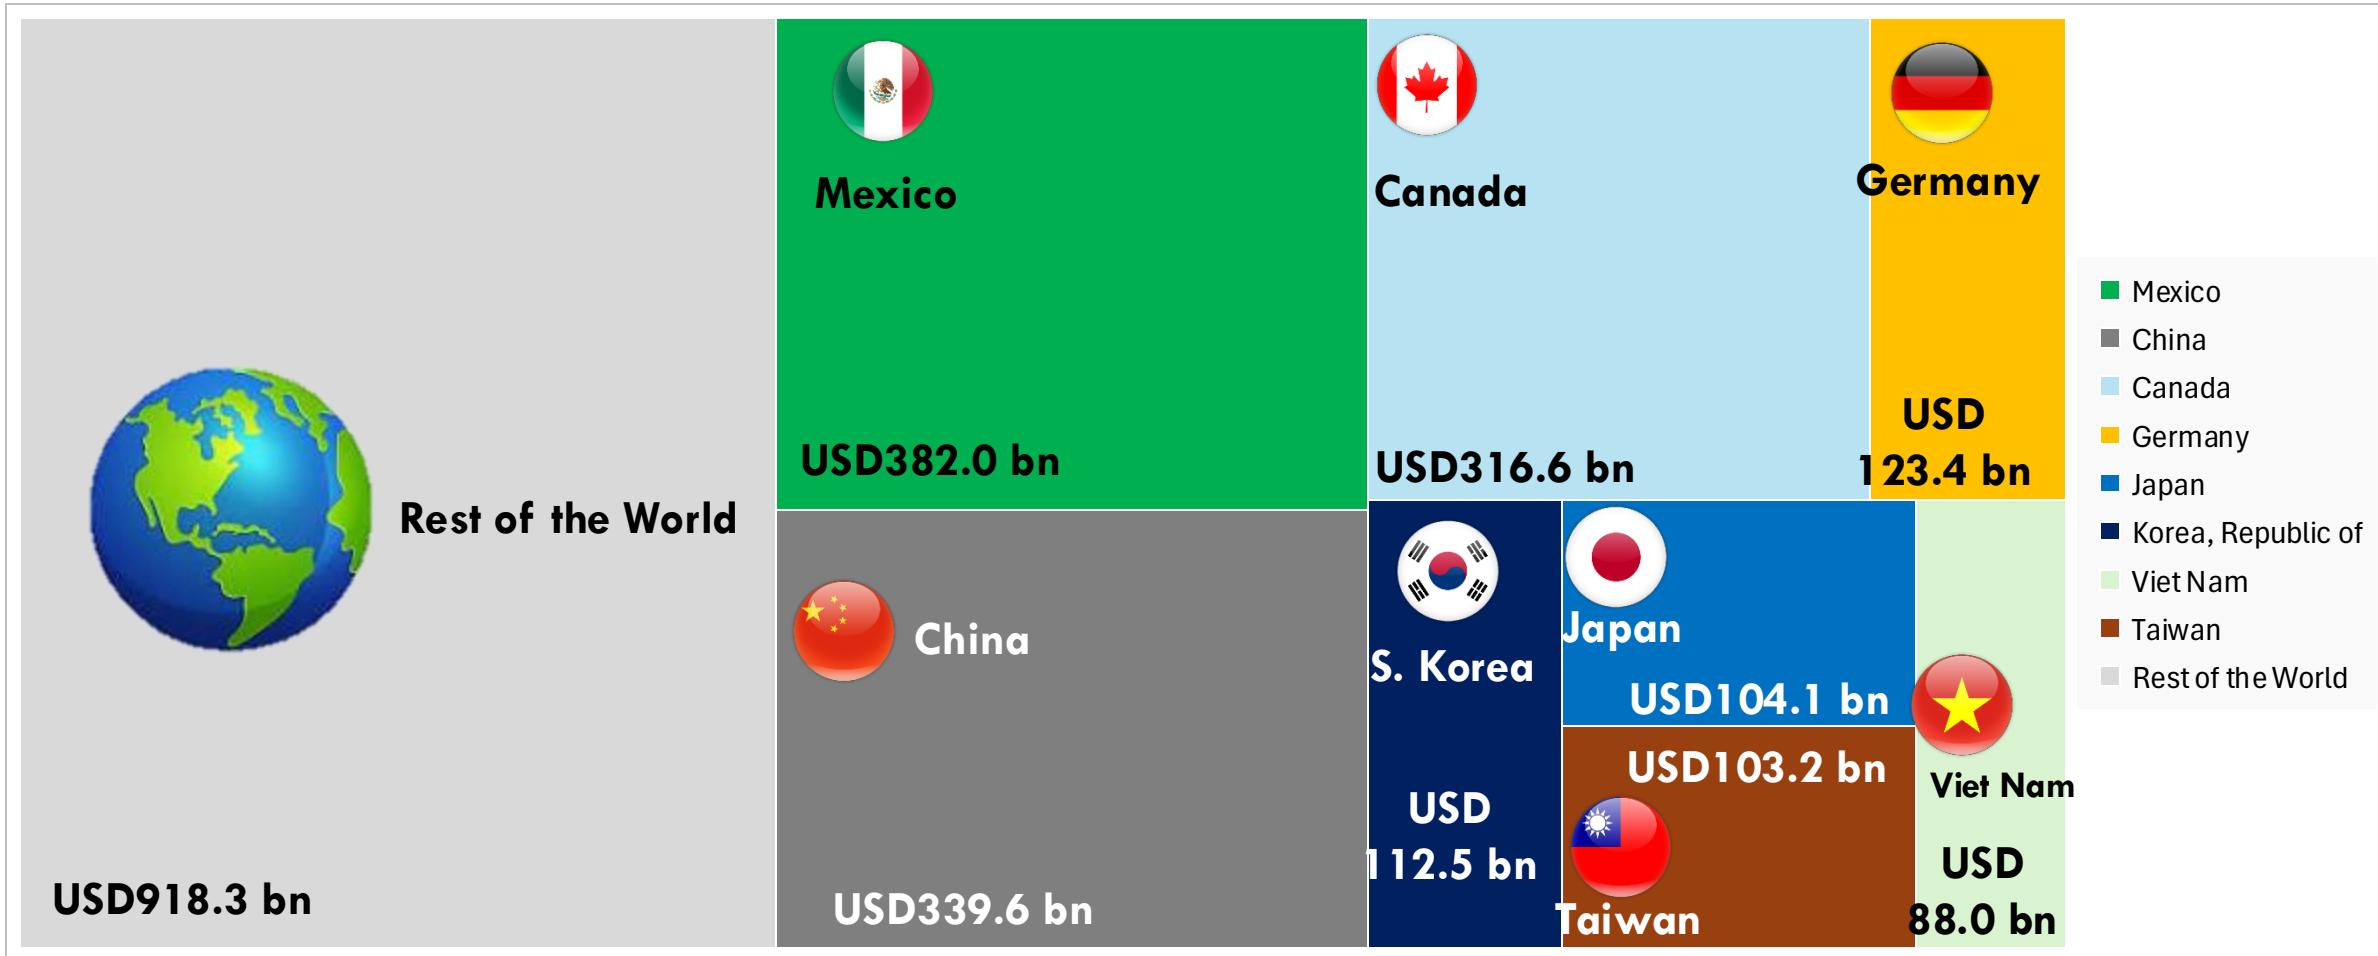

**Indonesia's Economic Growth**

# The Challenge: U.S. Stricter Protectionism Policies

China, Indonesia's largest export market, may experience pressure due to Trump's stricter protectionist policies

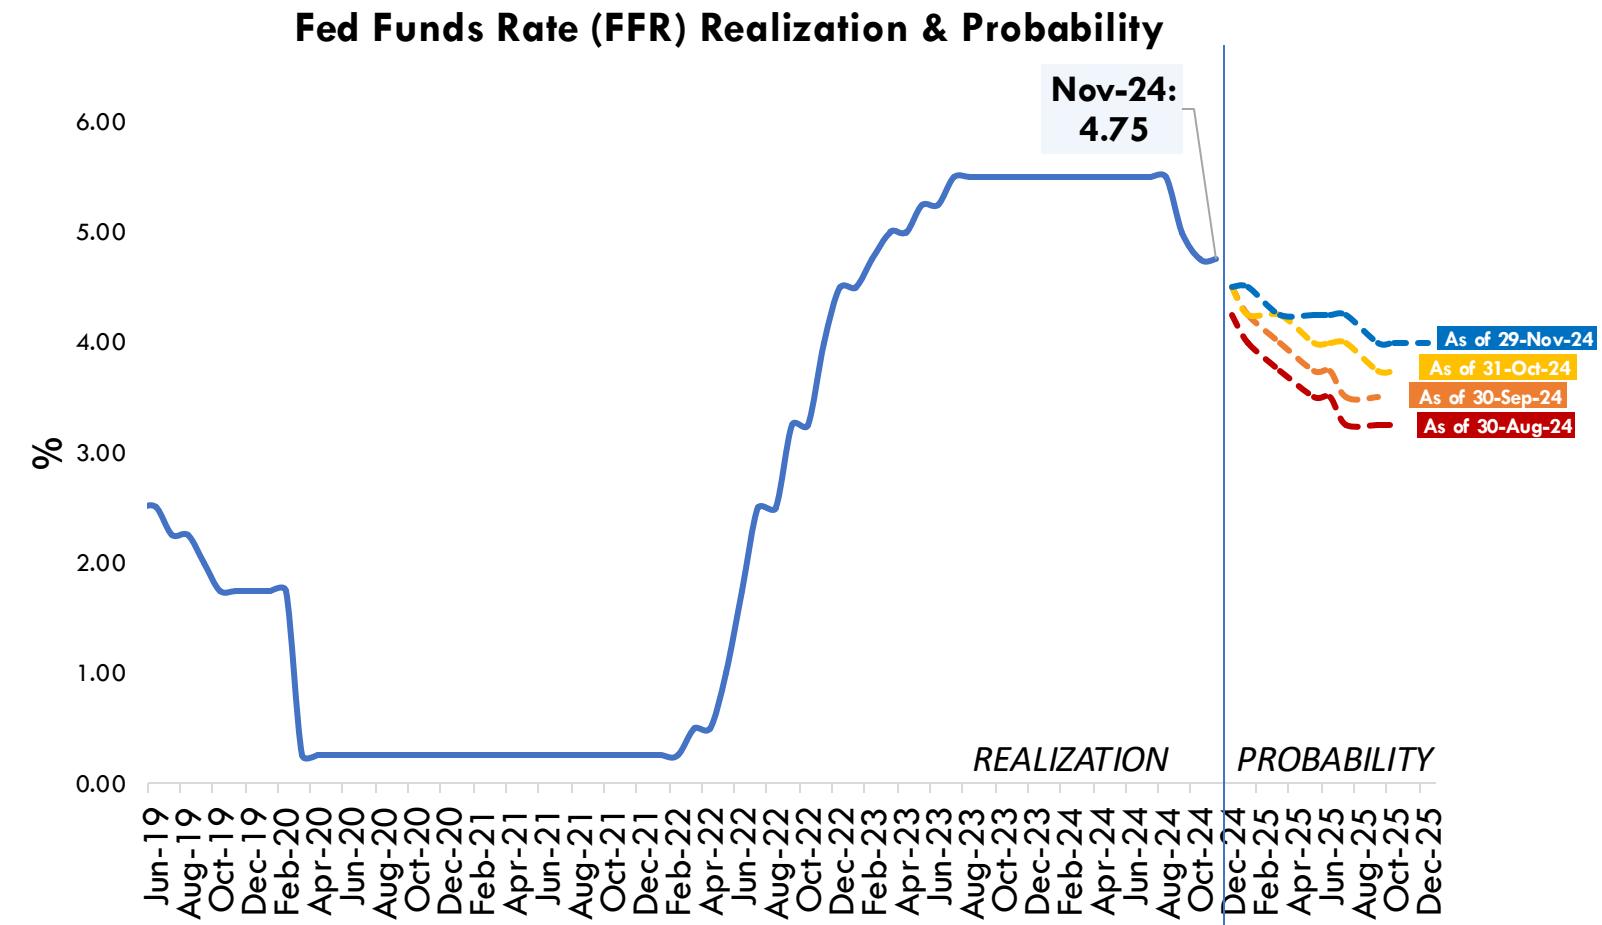

U.S. Import Share By Country Of Origin (9M24)

# Shifting Market Expectation of the Fed Rate Cut

- A The market sees that Trump's victory will have an impact on rising US inflation, the US dollar strengthens.
- B The geopolitical situation will remain unstable and will cause fluctuations in oil prices
- C Markets now see the potential for a smaller cut in the benchmark interest rate than previously expected
- D The sell-off of foreign investors in the stock market is largely due to the election of Donald Trump and domestic issues

**"The economy is not sending any signals that we need to be in a hurry to lower rates." (Jerome Powell)**

# The Fed Meeting Target Rate Probabilities

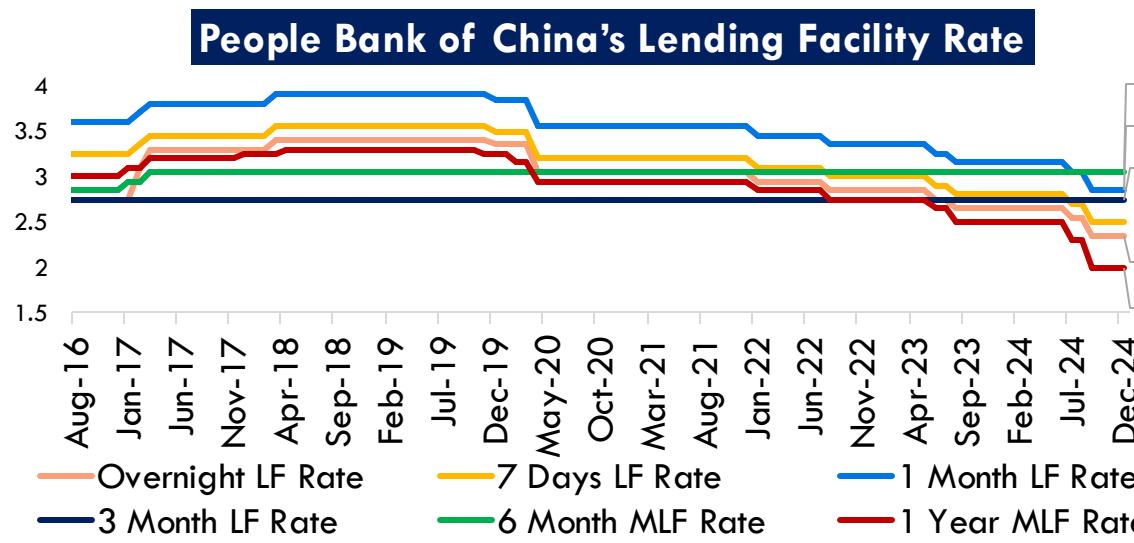

Market expects another 25bps rate cut in FOMC Dec-

# China's Leading Economic Indicators

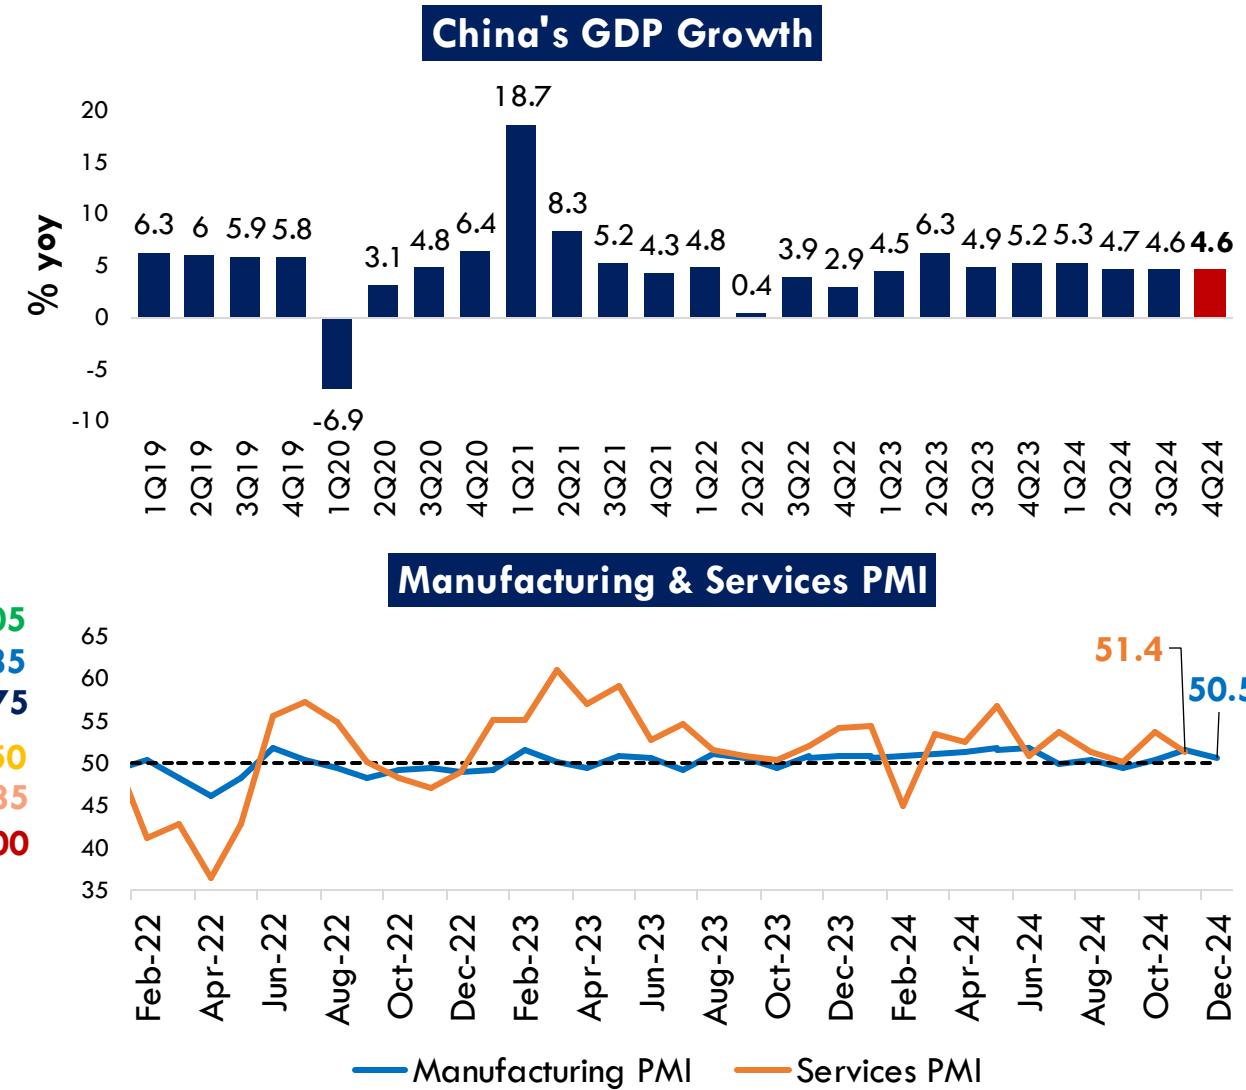

**China plans to revive the economy through various fiscal and monetary stimulus**

- China's economic growth decelerated to 4.6% yoy in 3Q24 due to weak domestic demand and a prolonged property downturn, despite stable industrial production. The economy continues to face structural imbalances, with supply-side growth outpacing demand-side recovery.**
- The Chinese government introduced a tax reduction policy to stimulate the housing market.** Residential properties up to 140 square meters now incur a deed tax of 1%, while properties exceeding this size face a reduced rate of 1.5%, down from the previous 3%. These measures aim to bolster domestic demand and mitigate economic challenges.

Source: CEIC, as of 2-Jan-25

Note: MLF Rate = Medium-term lending facility rate

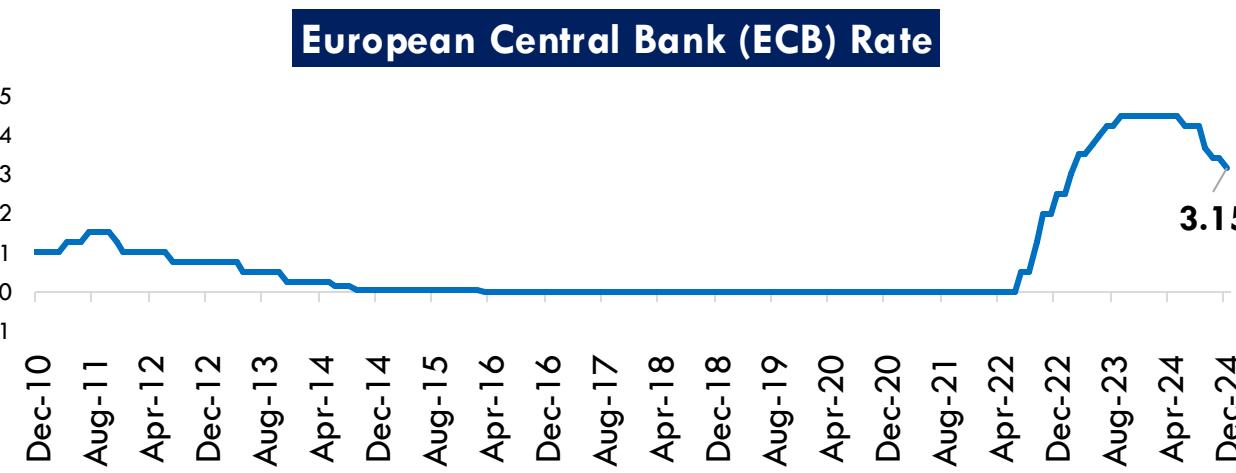

Office of Chief Economist

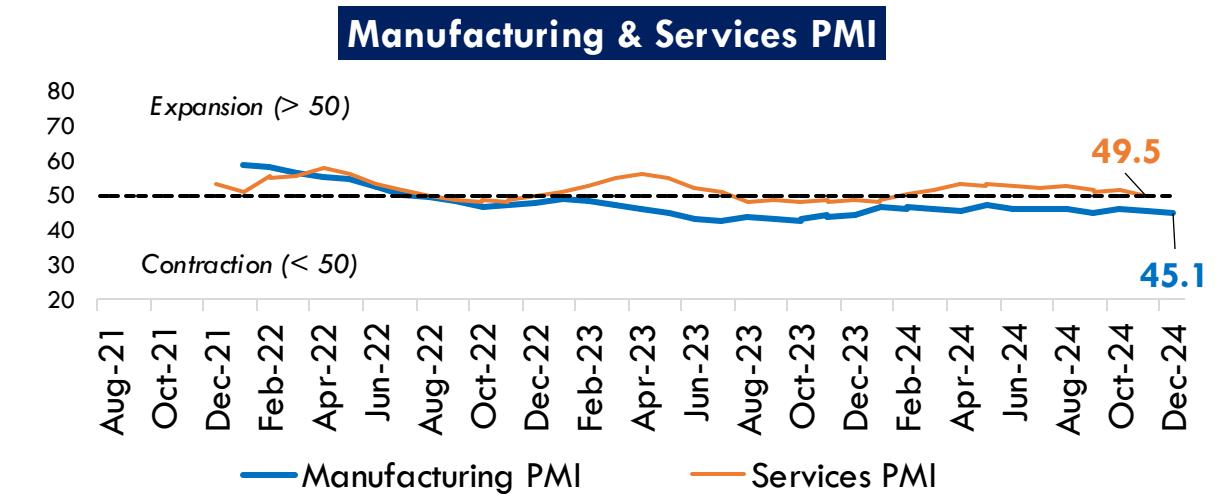

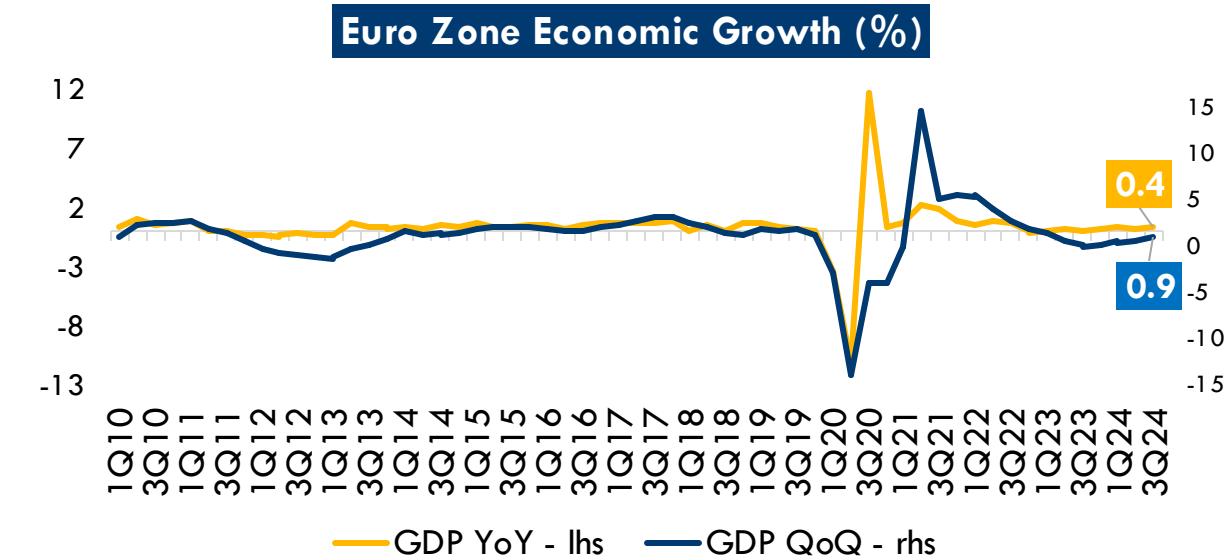

# Eurozone's Leading Economic Indicators

The euro area is showing signs of gradual recovery, although industrial activity is still contracted

- Eurozone GDP growth remained subdued, with 0.4% YoY growth in 3Q24 and a modest 0.9% QoQ increase, reflecting gradual recovery amid global uncertainties.**
- European Central Bank (ECB) cut rates by 25 basis points, reducing the main refinancing operations rate to 3.15%, the deposit facility rate to 3.00%, and the marginal lending facility rate to 3.40%. ECB officials emphasized that future rate decisions will be data-dependent, focusing on inflation and economic trends. Despite this adjustment, the eurozone continues to face significant risks from weak manufacturing activity and external trade pressures.**

Source: CEIC, as of 3-Jan-25

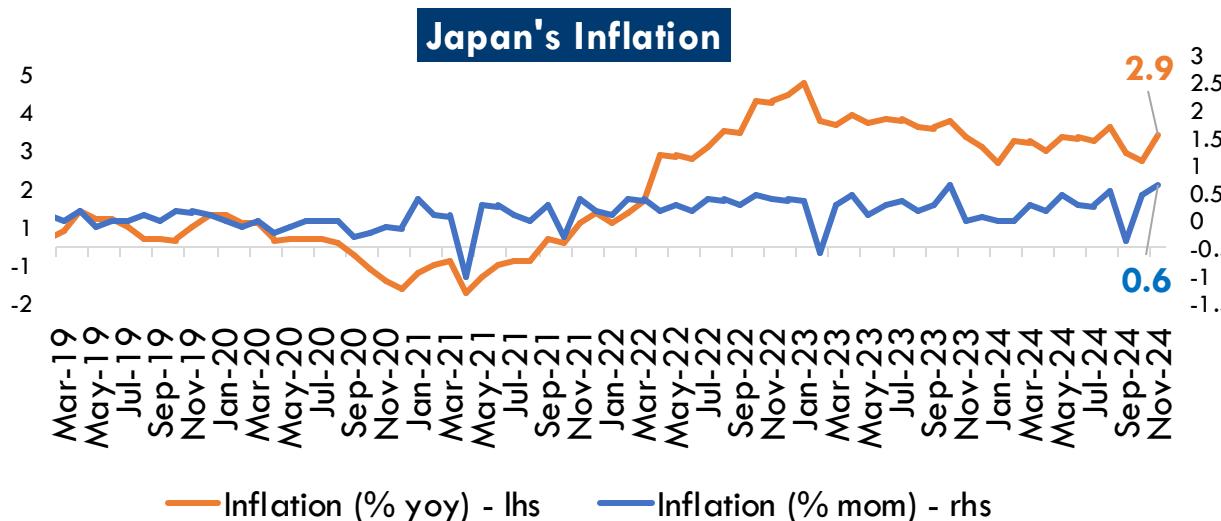

Office of Chief Economist

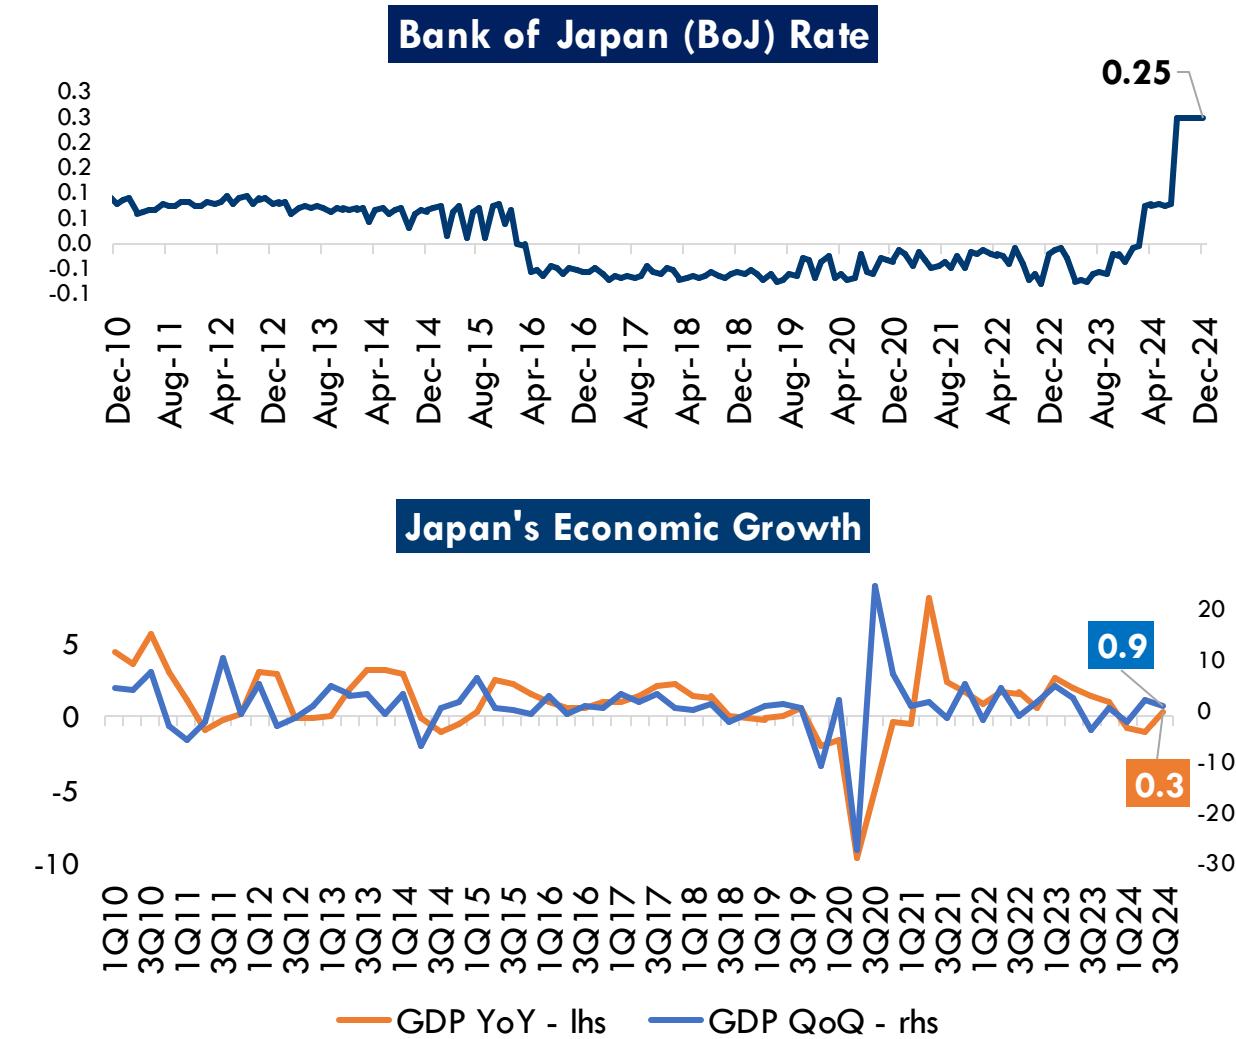

# Japan's Leading Economic Indicators

**Unlike other countries, Japan is likely still hawkish**

- The Bank of Japan (BoJ) kept interest rates unchanged at 0.25% in November, citing the need for continued economic support. Inflation rose to 2.9% YoY in October, surpassing the BoJ's 2% target, while GDP grew by 0.9% YoY in 3Q24, with a modest 0.3% QoQ increase, reflecting limited recovery momentum. The slow growth was driven by weak global demand and constrained exports, compounded by subdued domestic consumption and sluggish wage growth.
- With inflation consistently above target and signs of economic stabilization, speculation has intensified that the BoJ may consider raising rates in the near future. However, the central bank remains focused on monitoring inflation dynamics and broader economic trends before making any definitive policy moves.

# INDONESIA ECONOMIC UPDATE

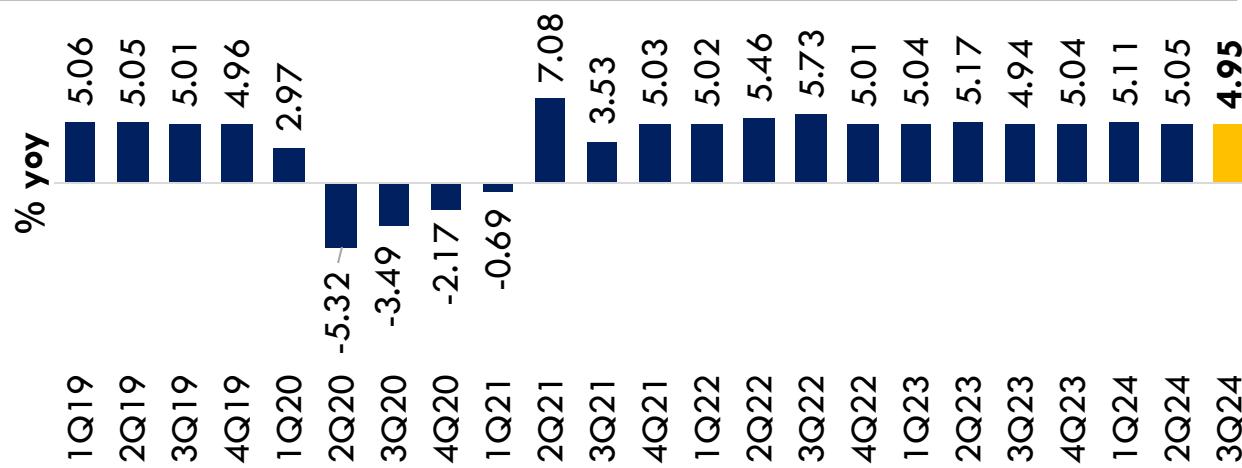

# Indonesia's GDP Growth

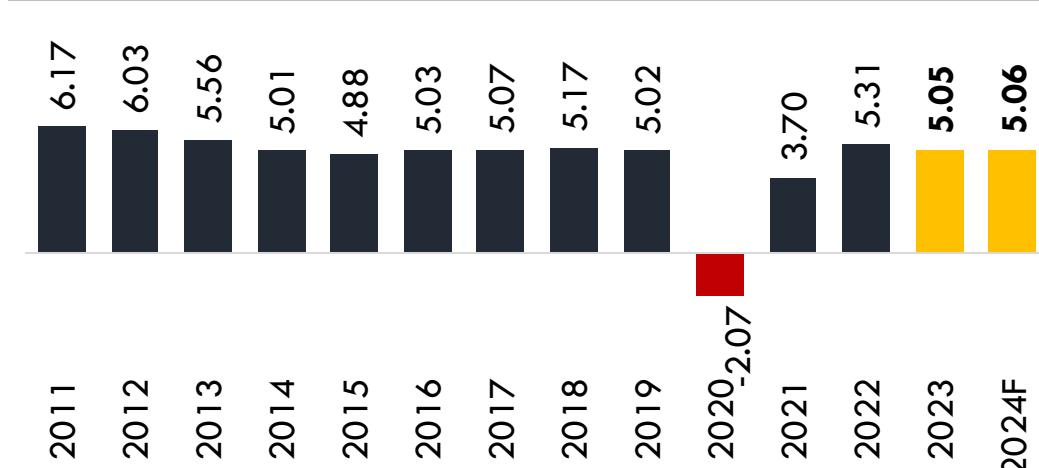

Indonesia's economy recorded softer growth in 3Q24 due to seasonal factors. Yet domestic activities remained resilient, as reflected in higher growth in investments and spending by the government and non-profit institutions.

# Indonesia's Economic Growth Forecast

# Mandiri Leading Economic Index (MLEI)

**MLEI prediction confirmed slower economic growth in 3Q24**

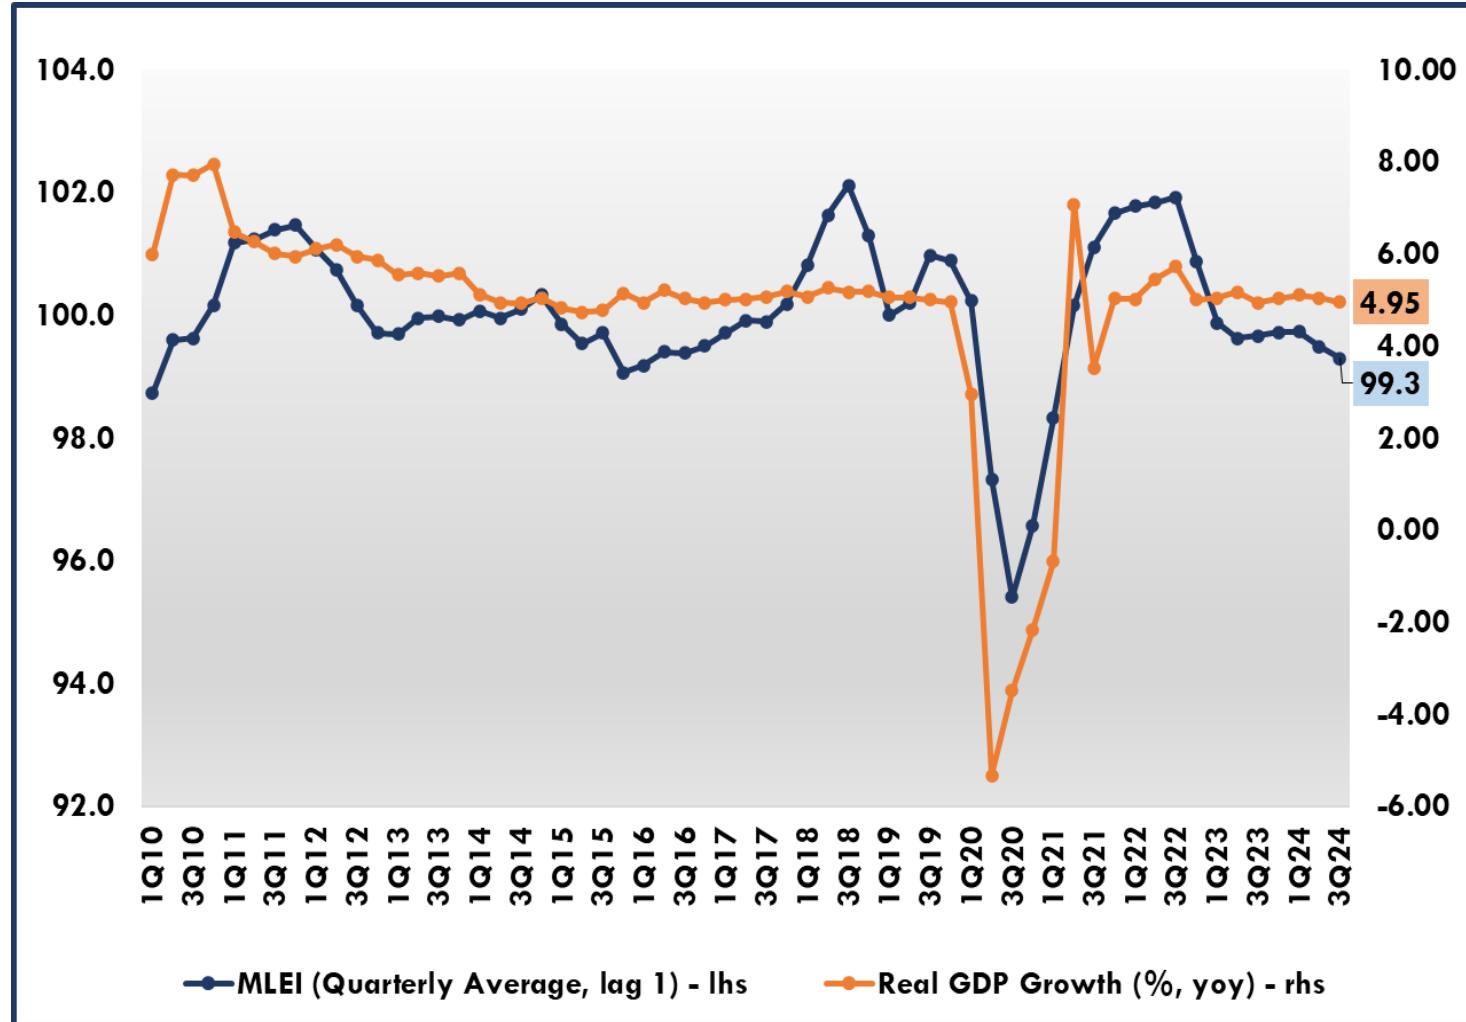

Source: Office of Chief Economist (as of Dec-24)

- **MLEI increased by 0.1% to 99.9 in Aug-24.** External pressure is still high after the election of Donald Trump as US President. Trump's policy is expected to make US inflation rise again and the movement of foreign funds to the US becomes even higher. This condition can affect Indonesia's economic activities in the future. Meanwhile, MCEI slightly up by 0.2% to 99.9 in Dec-24.
- **The 2Q24 MLEI quarterly average was 99.3, lower than the 1Q24 MLEI of 99.6.** This value indicates that the economic growth in 3Q24 grew lower than 2Q24. In realization, Indonesia's economy grew by 4.95% yoy in 3Q24, lower than 5.05% yoy in 2Q24.
- **Early indications of the 3Q24 MLEI show the possibility that economic growth in 4Q24 will grow higher than in 3Q24 (99.9 vs. 99.3).** This is along with the influence of public and government consumption which can be higher seasonally.
- Bank Mandiri's economic research team estimates that economic growth in will grow in the range of 5.00 - 5.05%.

Office of Chief Economist

# MLEI indication was relatively in line with GDP growth realization

The economic growth remains solid in 3Q24, grew by 4.95% (yoY)

- Indonesia's economy grew by 4.95% YoY in 3Q24. Household consumption, the economy's backbone, slightly eased from 4.93% YoY in 2Q24 to 4.91% in 3Q24, primarily due to seasonal factors. Non-Profit Institutions Serving Households saw an increase from 9.98% YoY in 2Q24 to 11.69% YoY in 3Q24 driven by heightened activities in preparation for local elections at the end of the year.
- Gross Fixed Capital Formation (GFCF), or investments, rose from 4.43% YoY in 2Q24 to 5.15% YoY, supported by infrastructure projects undertaken by both the government and private sector, including toll road construction and the development of the new capital city.
- Government spending also increased from 1.42% YoY in 2Q24 to 4.62% YoY in 3Q24 due to higher spending realization towards the end of the year, driven by capital expenditure on infrastructure.
- Conversely, imports grew at a faster rate than exports, indicating stronger domestic demand relative to global demand. Imports surged from 8.57% YoY in 2Q24 to 11.47% YoY in 3Q24, driven by higher demand for capital goods and raw materials due to increased domestic activities.

# Mandiri Financial Performance Index (MFPI)

The Banking Sector Still in Normal Condition

Period	2017 Dec	2018 Dec	2019 Dec	2020 Dec	2021 Dec	2022 Dec	2023 Dec	2024 Nov*
MFPI	122.11	92.43	96.08	88.59	97.38	82.98	83.61	91.31
Chg (%mom)	3.92	0.32	0.15	2.55	(6.88)	(2.42)	0.35	(3.59)

note: \* preliminary

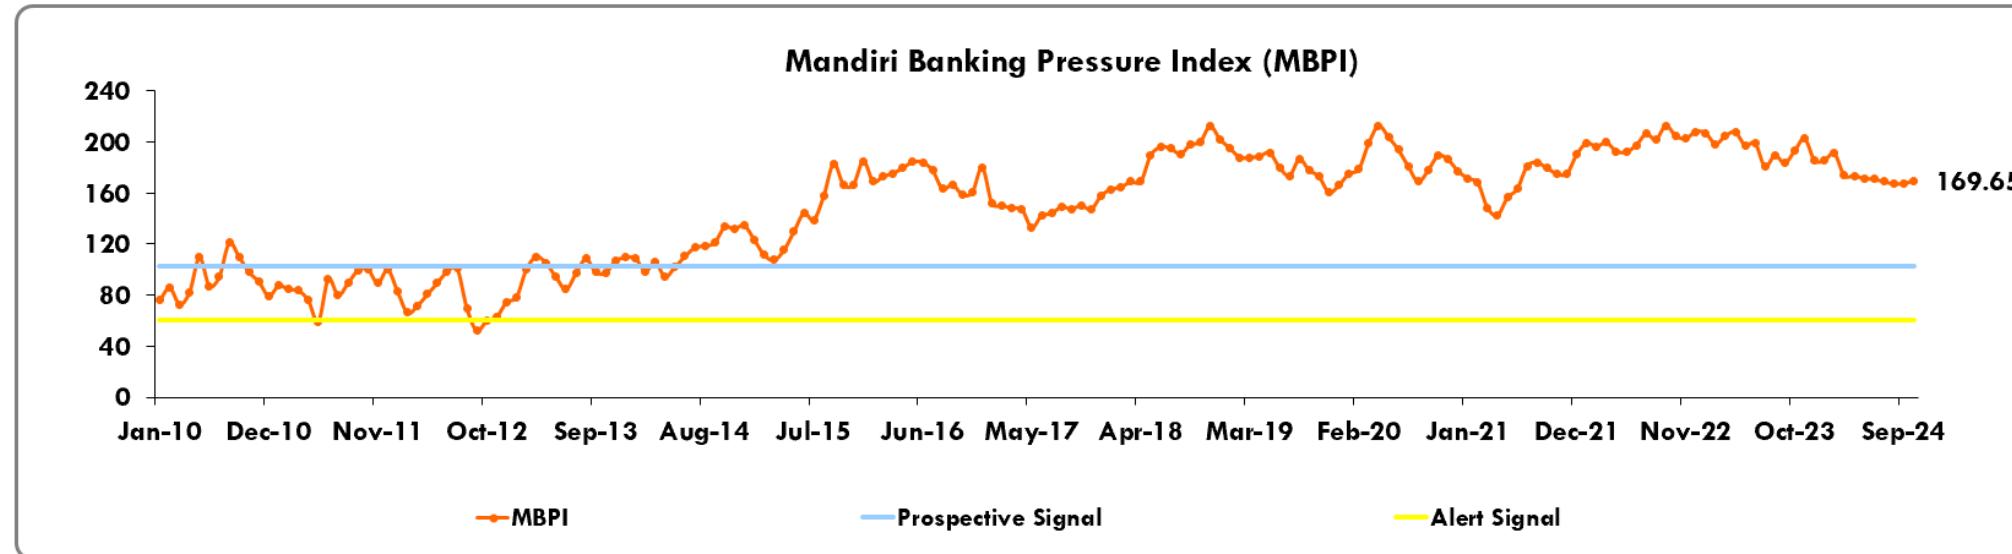

MFPI Threshold	
Prospective :	MFPI > 113
Normal :	77 < MFPI < 113
Alert :	MFPI < 77

**MFPI in Nov-24 decelerated by -3.59% (mom) to 91.31 level.** This position indicates that the Indonesian banking sector is in normal condition. In Oct-24, the Capital Adequacy Ratio (CAR) stood at 25.57%, while non-performing loans (NPL) reached 2.20% (gross) or 0.77% (netto). The Board of Governors of Bank Indonesia decided to hold the benchmark interest rate at 6.00%. The BI RDG on 17-18 Dec-24 also maintained the Deposit Facility rate at 5.25% and the Lending Facility rate at 6.75%. This decision is consistent with pro-stability monetary policy to ensure inflation remains under control within the  $2.5 \pm 1\%$  target in 2025, including the effectiveness of maintaining foreign capital inflows and rupiah exchange rate stability. Meanwhile, macroprudential policies and the payment system remain pro-growth to support sustainable economic growth amid global uncertainty.

# Mandiri Banking Pressure Index (MBPI)

Maintain Prospective Outlook in Next 6-9 months

Period	2017	2018	2019	2020	2021	2022	2023	2024
	Dec	Oct*						
MBPI	157.87	201.98	166.05	177.41	190.09	207.93	188.66	169.65
Chg (%mom)	7.20	(4.81)	3.53	(4.73)	8.57	2.62	(0.48)	1.33

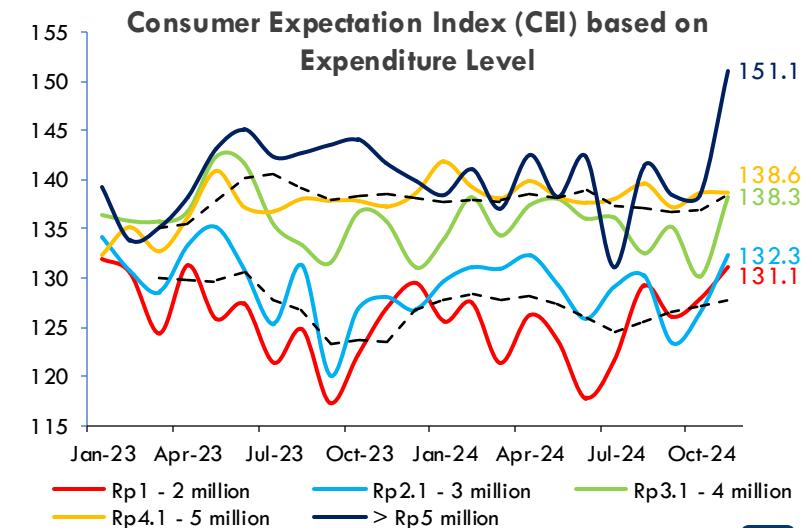

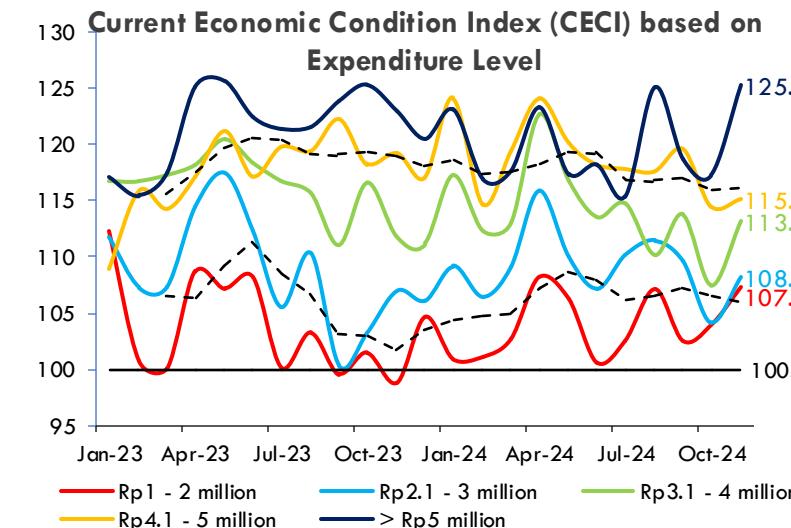

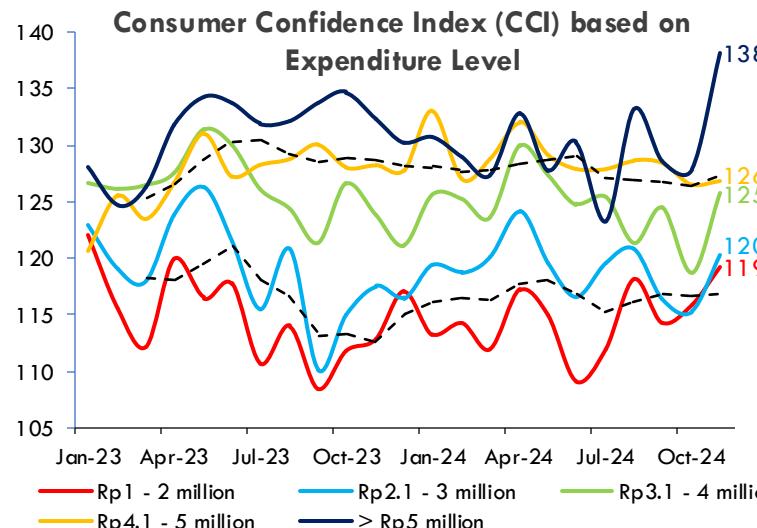

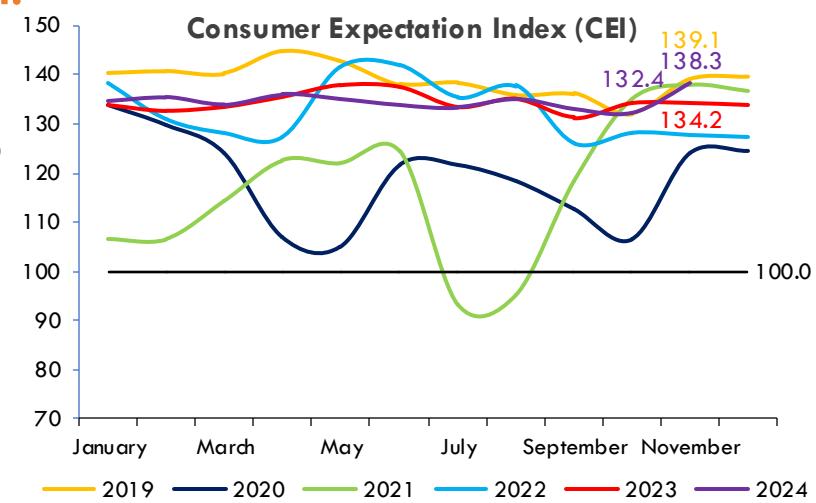

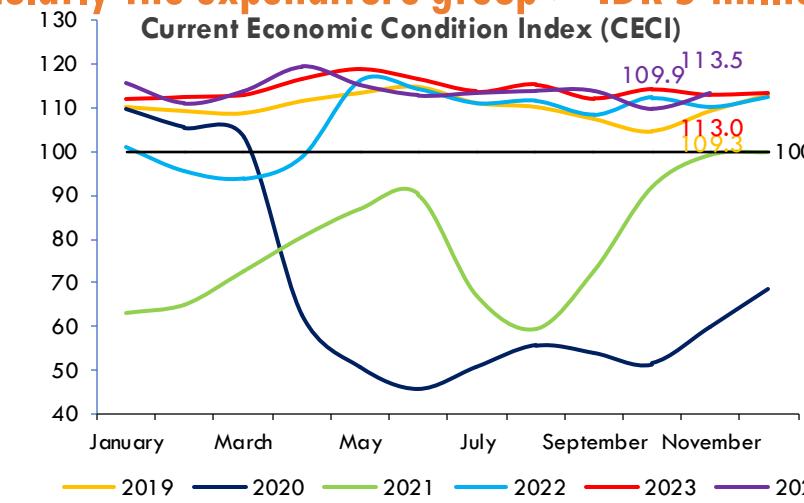

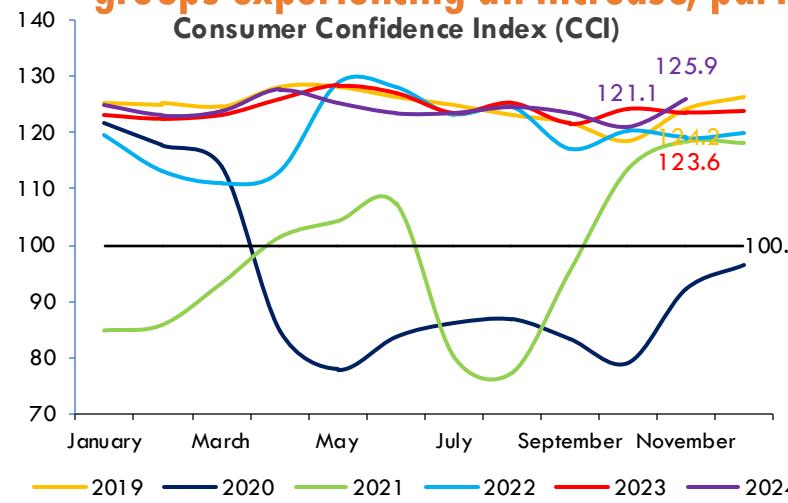

note: \* preliminary

MBPI Threshold	
Prospective :	MBPI > 103
Normal :	61 < MBPI < 103
Alert :	MBPI < 61

**Mandiri Banking Pressure Index (MBPI)** is a leading indicator of the banking sector in Indonesia. It is an indicator that provides a predicted direction of MFPI's movement in the next 6-9 months. On Oct-24, MBPI increased by 1.33% (mom) to 169.65. The position of MBPI was still above the 103 level, which means we still predicted the Indonesian banking sector to be in the prospective condition in the period from Mar-25 to Jun-25 as Bank Indonesia maintained policies to support economic growth and rupiah stabilization through triple intervention and issuing Bank Indonesia Rupiah Securities (SRBI), Bank Indonesia Foreign Currency Securities (SVBI) and Bank Indonesia Foreign Currency Sukuk (SUVBI) as (contractionary) pro-market instruments to attract capital inflows.

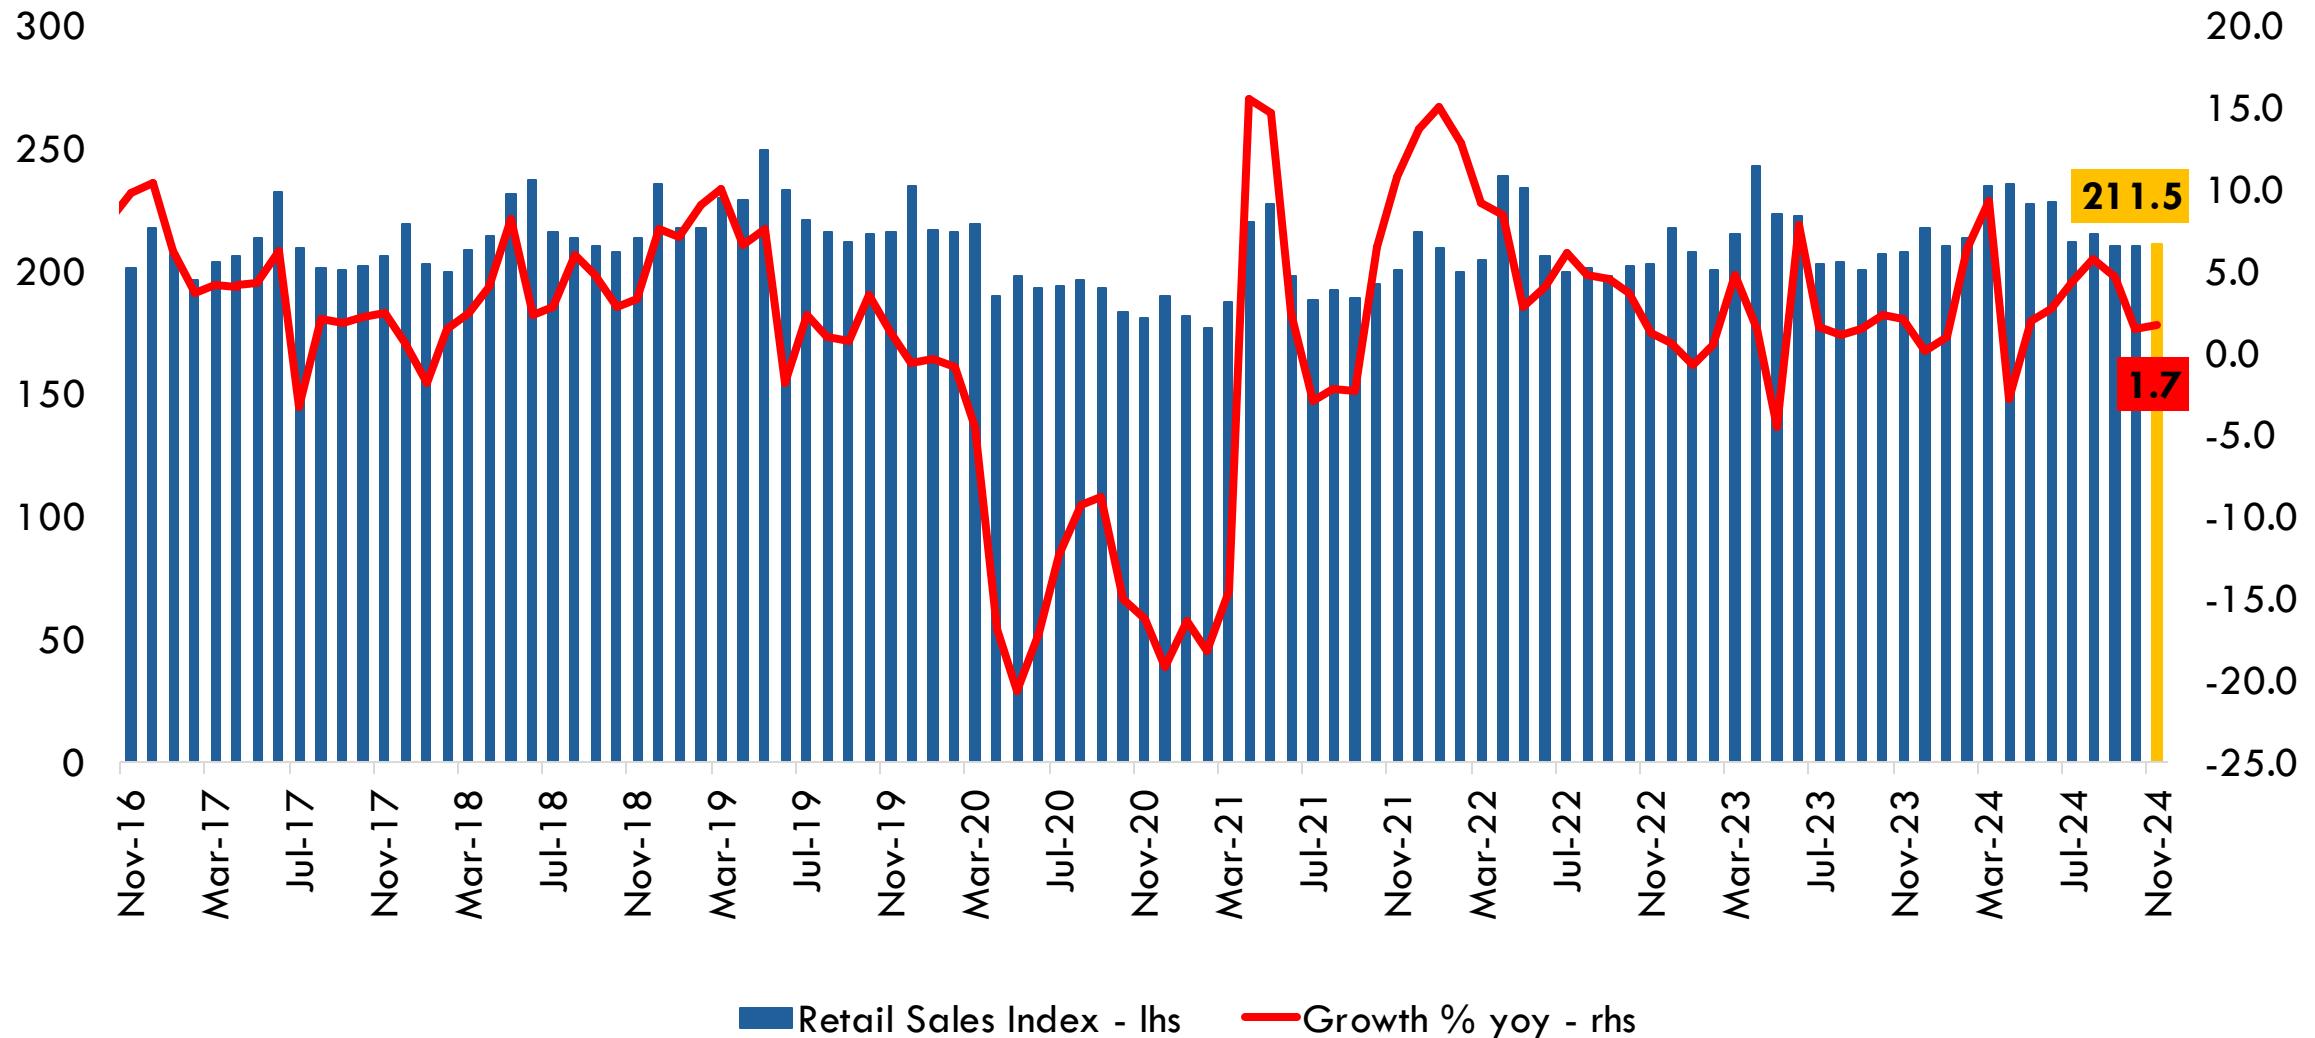

# Consumer Confidence Index Trend

The Consumer Confidence Index (CCI) rose to 125.9 in November, the highest level since July 2023, with all groups experiencing an increase, particularly the expenditure group > IDR 5 million.

# Retail Sales Index (RSI)

BI expects annual retail sales growth to increased in Nov-24

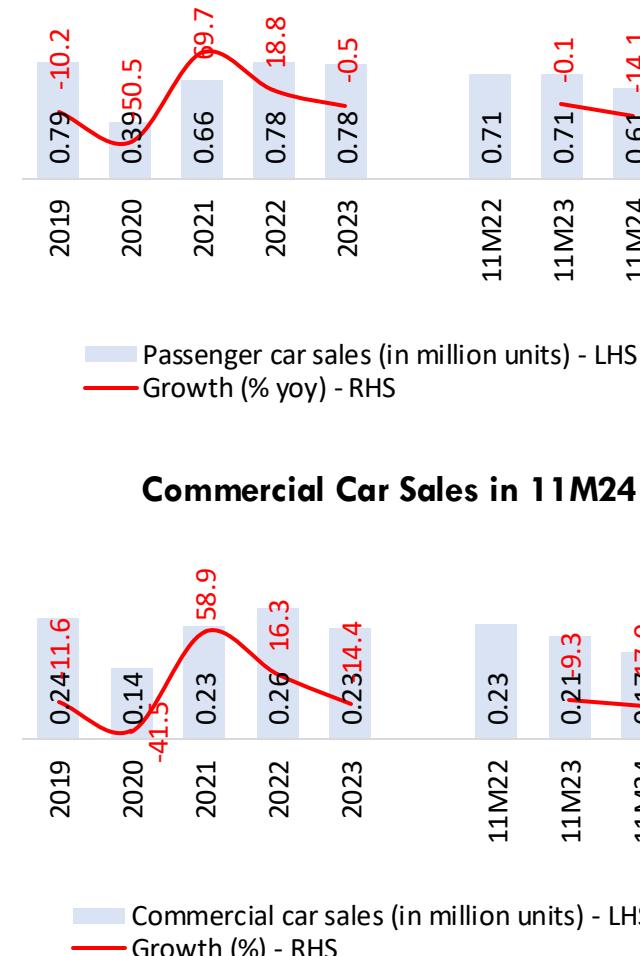

# Wholesale Car and Motorcycle Sales

Car sales continue to contract, indicating that consumers are holding back on spending for big-ticket items.  
Meanwhile, motorcycle sales are growing steadily.

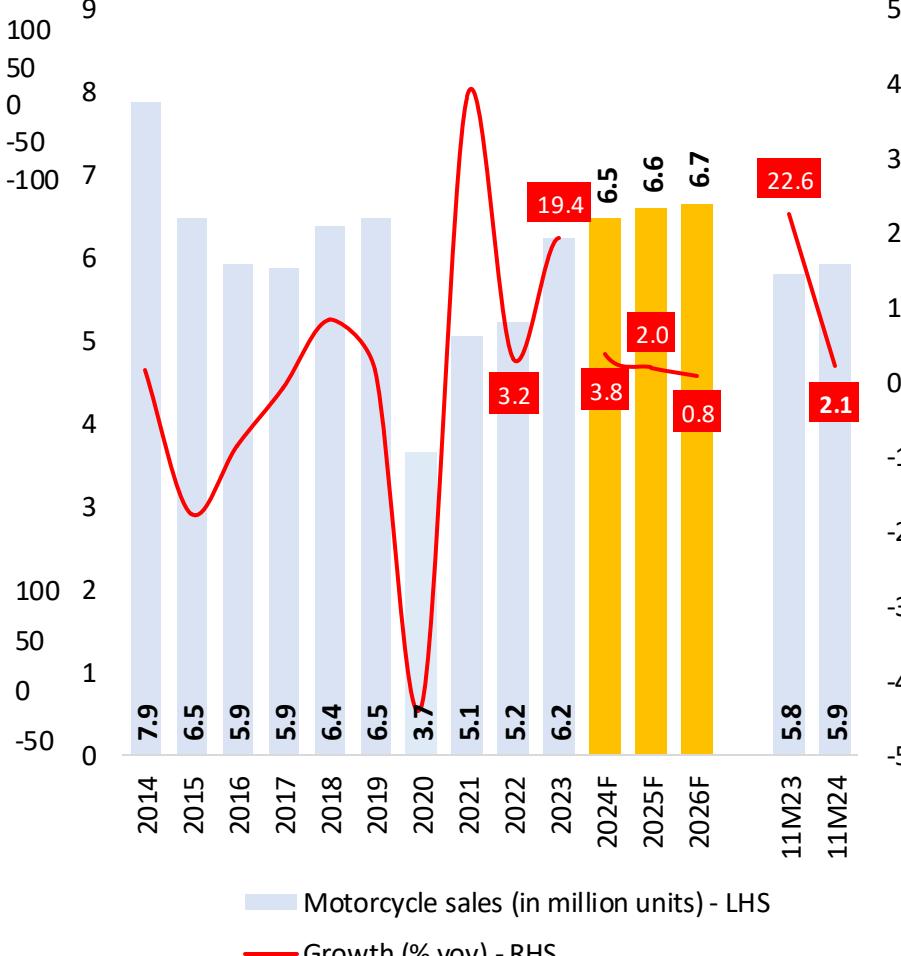

**Wholesale Car Sales in 11M24**

**Passenger Car Sales in 11M24**

**Motorcycle Sales in 11M24**

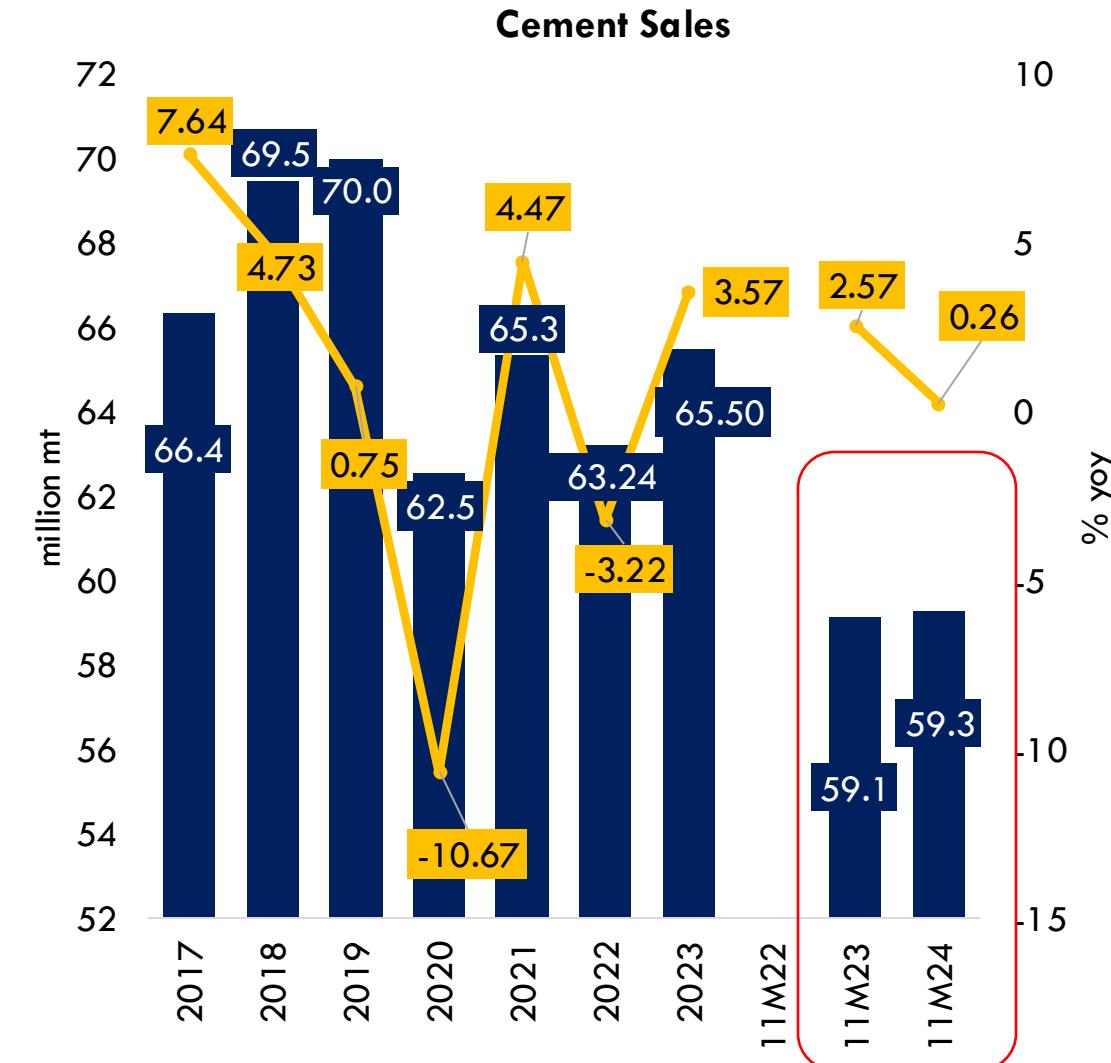

# Indonesia Cement Consumption by Area

Cement consumption increased in 11M24 (yoY)

Cement Sales by Region (million mt)

# United Tractors Sales Volume

Sales volume decreased in November-24

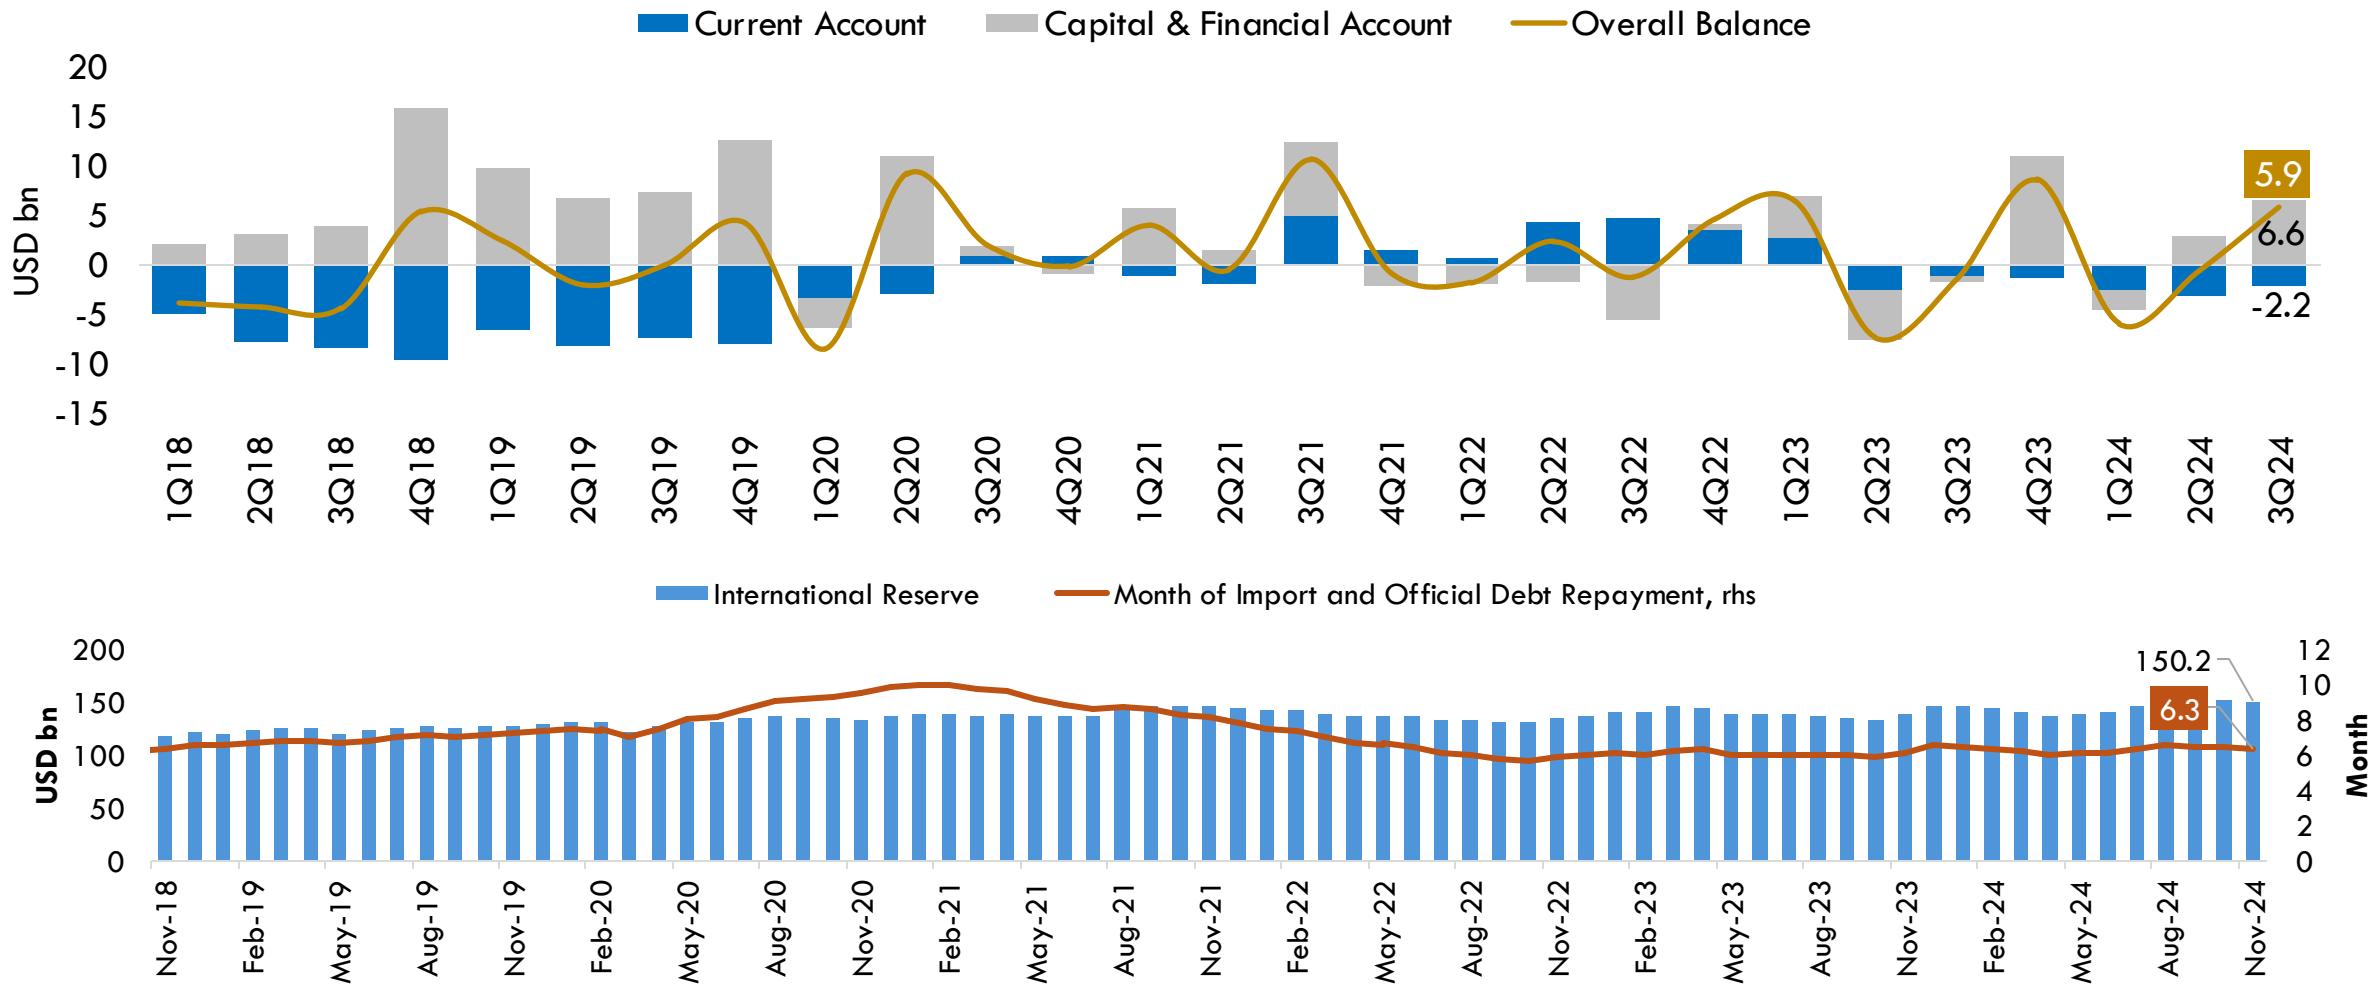

# BALANCE OF PAYMENT AND EXTERNAL TRADE

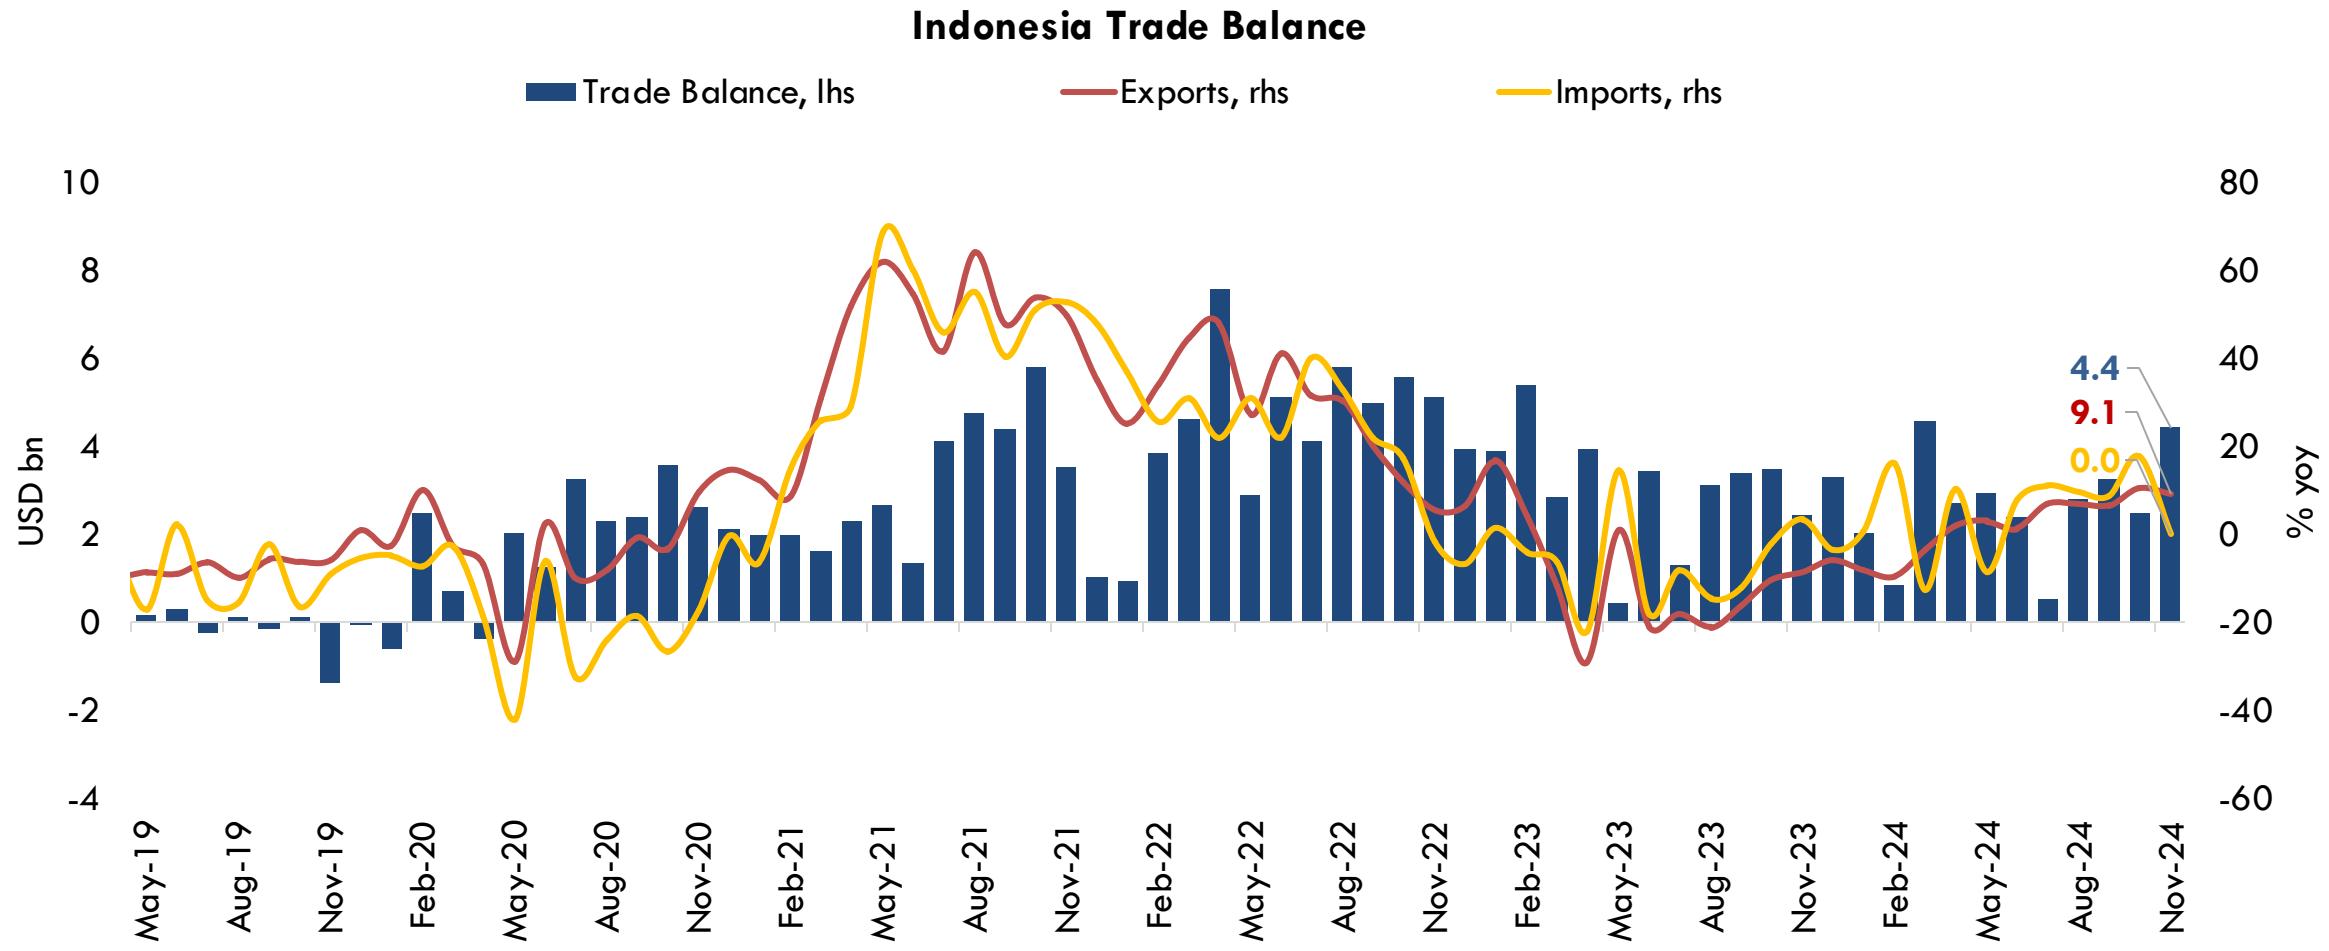

# Indonesia's Balance of Payment and FX Reserves

- Indonesia's Balance of Payments (BOP) expanded in 3Q24 underpinned by higher capital inflow
- FX reserves position remained robust at USD150.2 bn in Nov-24, equivalent to 6.3 months of imports and debt repayment

# Indonesia's Trade Performance

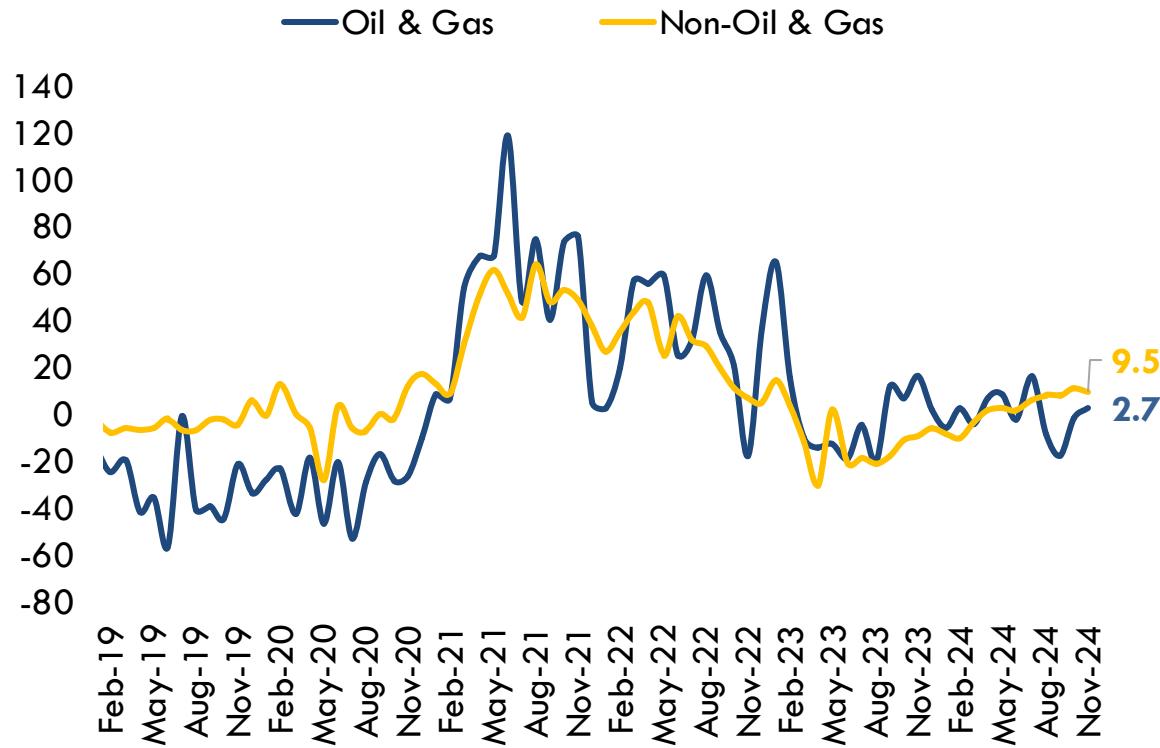

Indonesia's trade surplus continued for 55 consecutive months in Nov-24, underpinned by steady export performance

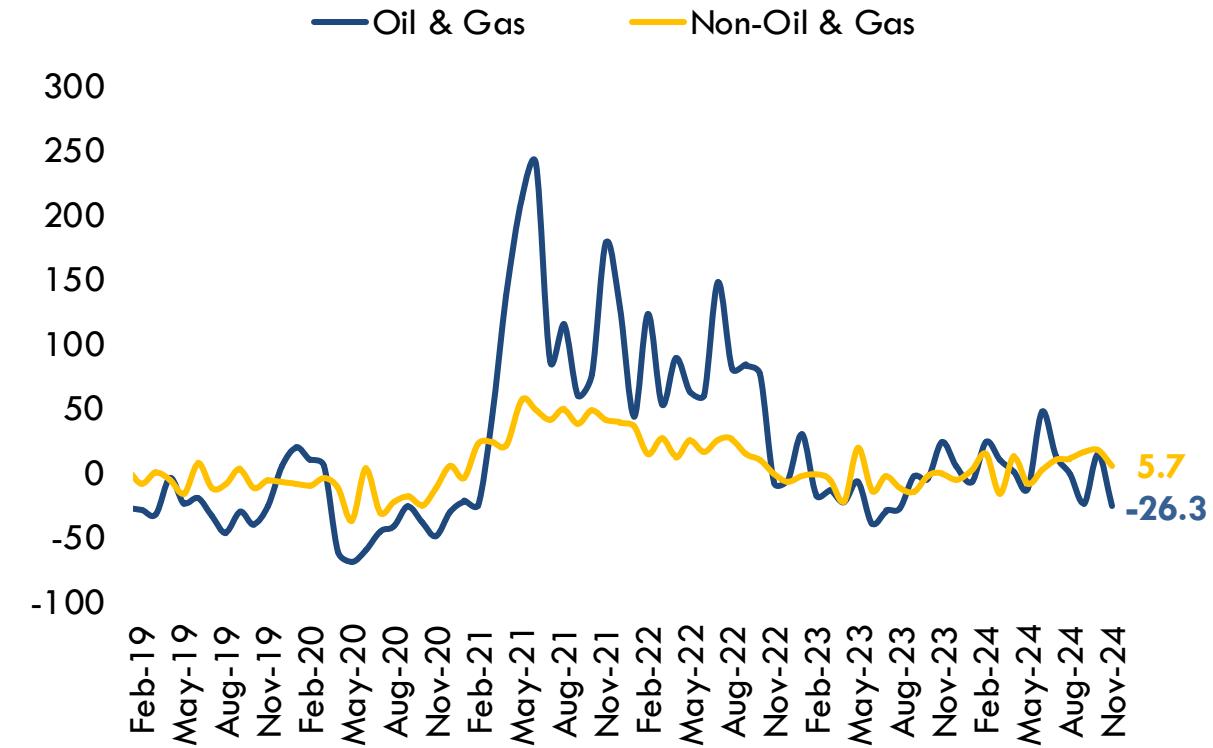

# Indonesia's Trade Performance by Type of Goods

**Non-OG exports accelerated underpinned by CPO commodity, while non-OG imports grew 5.7% yoy driven by machinery products**

**Indonesia Exports Performance (% yoy)**

**Indonesia Imports Performance (% yoy)**

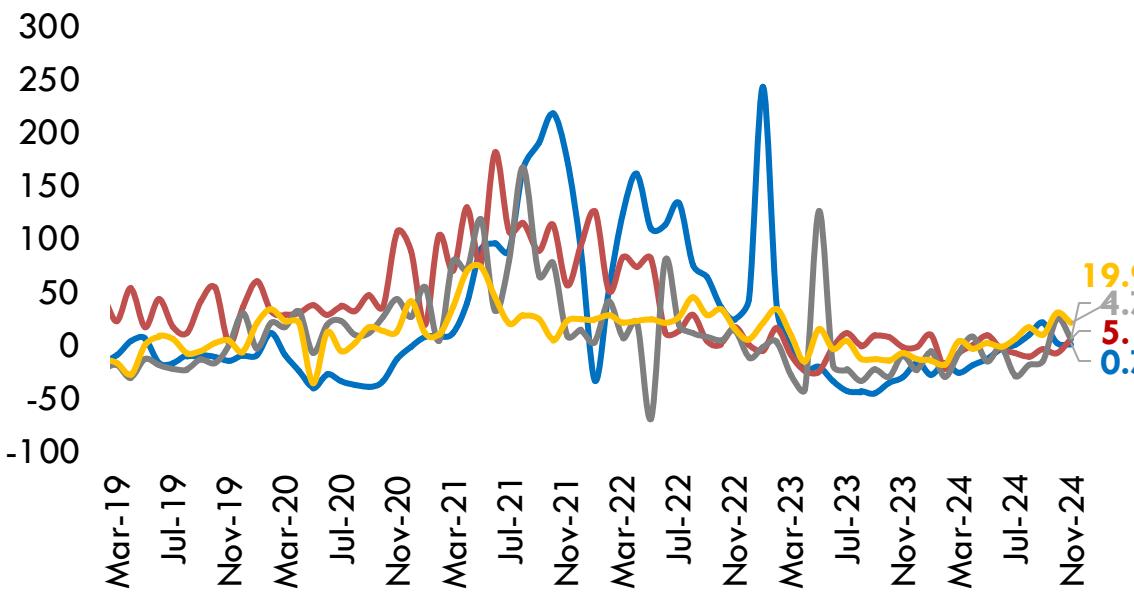

# Indonesia's Trade Performance by Commodity

CPO exports accelerated due to higher demand and prices, while imports of plastic products expanded in line with increased demand ahead of the election and year-end

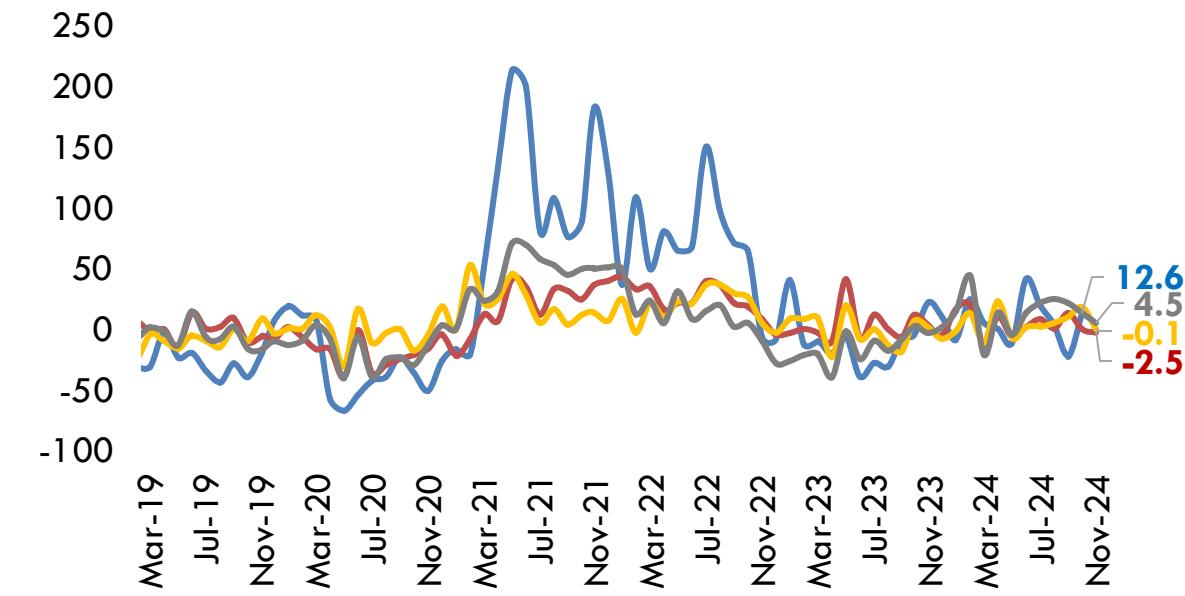

## Indonesia's Exports by Major Commodity (% YOY)

- Mineral Fuels Excluding Oil & Gas Products (Mostly Coal)
- Iron and Steel
- Animal or vegetable oils/fats (Mostly CPO)
- Electrical machinery and equipments

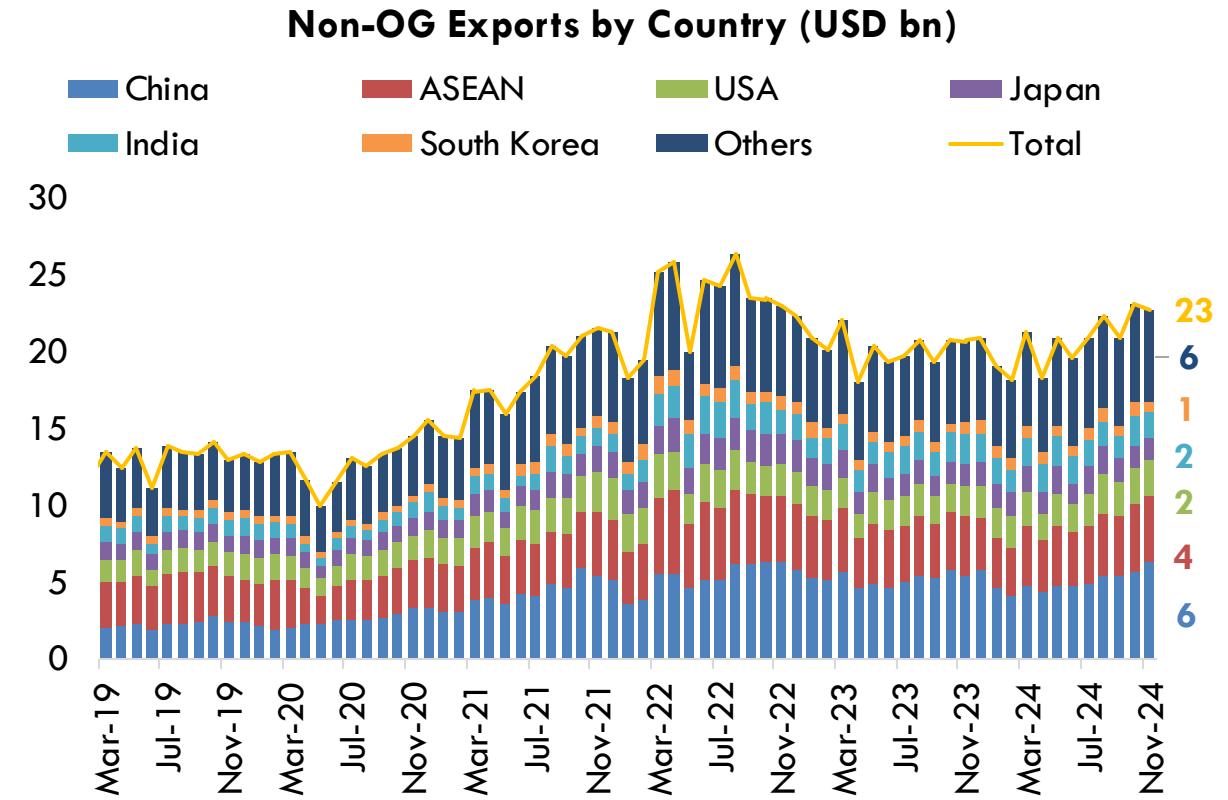

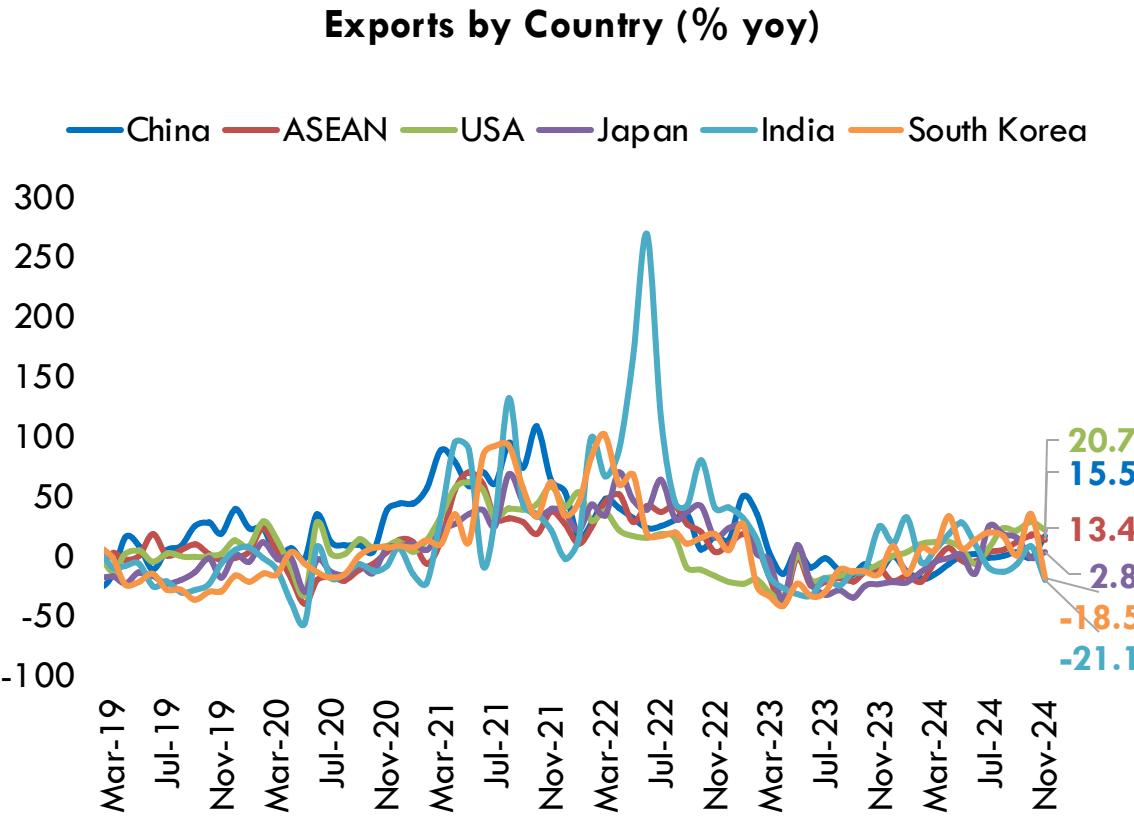

## Indonesia's Imports by Major Commodity (% YOY)

- Mineral Fuels, Mineral Oils and Products of Their Distillation
- Nuclear Reactors, Boilers, Machinery and Mechanical Appliances; Parts
- Electrical Machinery and Equipments; Sound Recorders/Reproducers
- Plastics and Articles Thereof

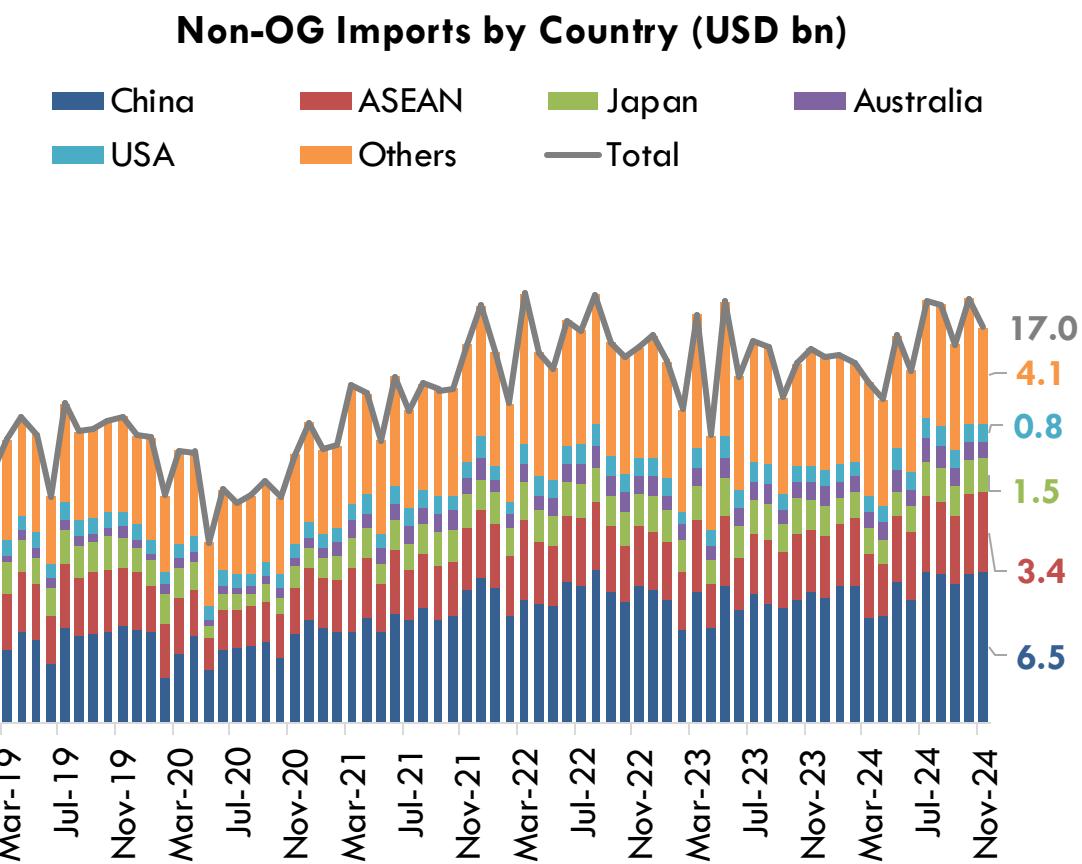

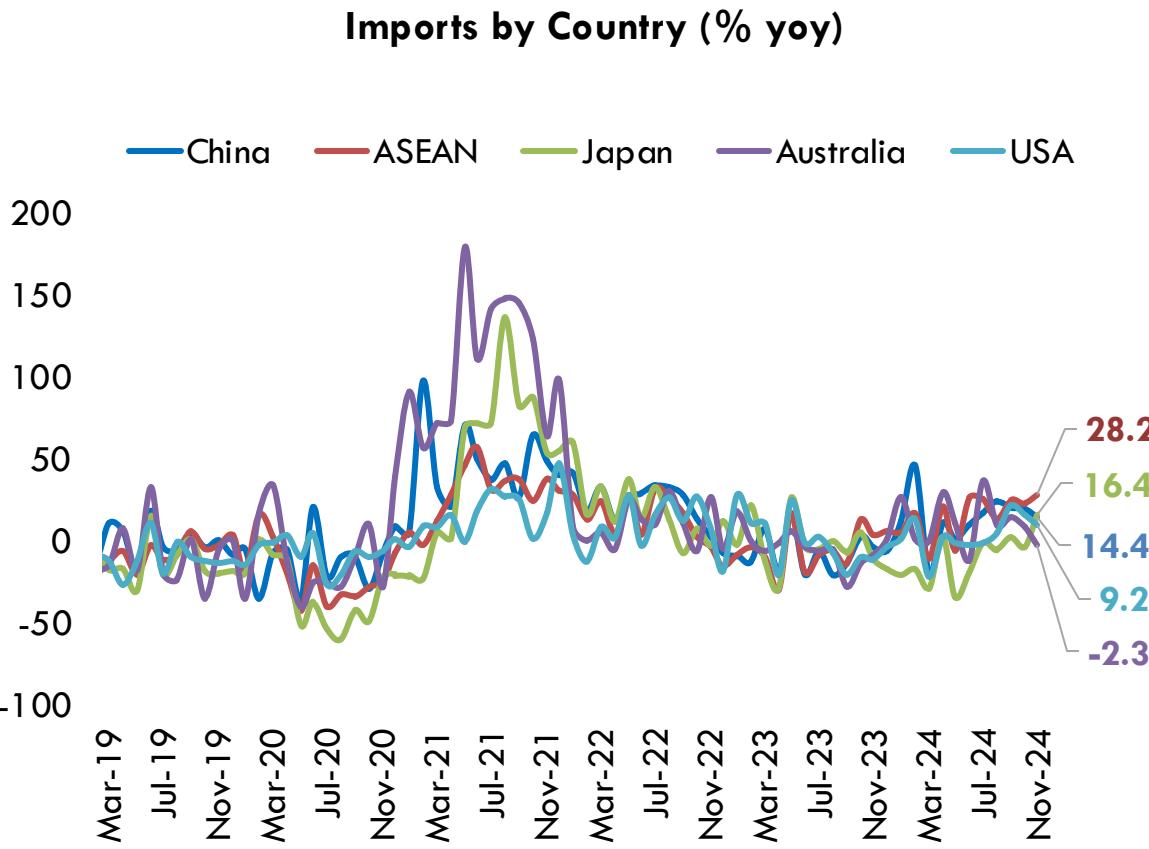

# Non-OG Exports by Country

**Non-OG export grew 9.5% yoy in Nov-24, underpinned by higher demand from USA, China, and ASEAN**

# Non-OG Imports by Country

**Non-OG imports grew 5.7% yoy in Nov-24 underpinned by accelerated imports from ASEAN, Japan, China, and USA**

# Indonesia's Trade Balance

Indonesia's trade surplus expanded in Nov- on the back of steady demand from Indonesia's main trading partners

\*Estimation refer to recent macro variable indicators

# Monthly Fiscal Balance

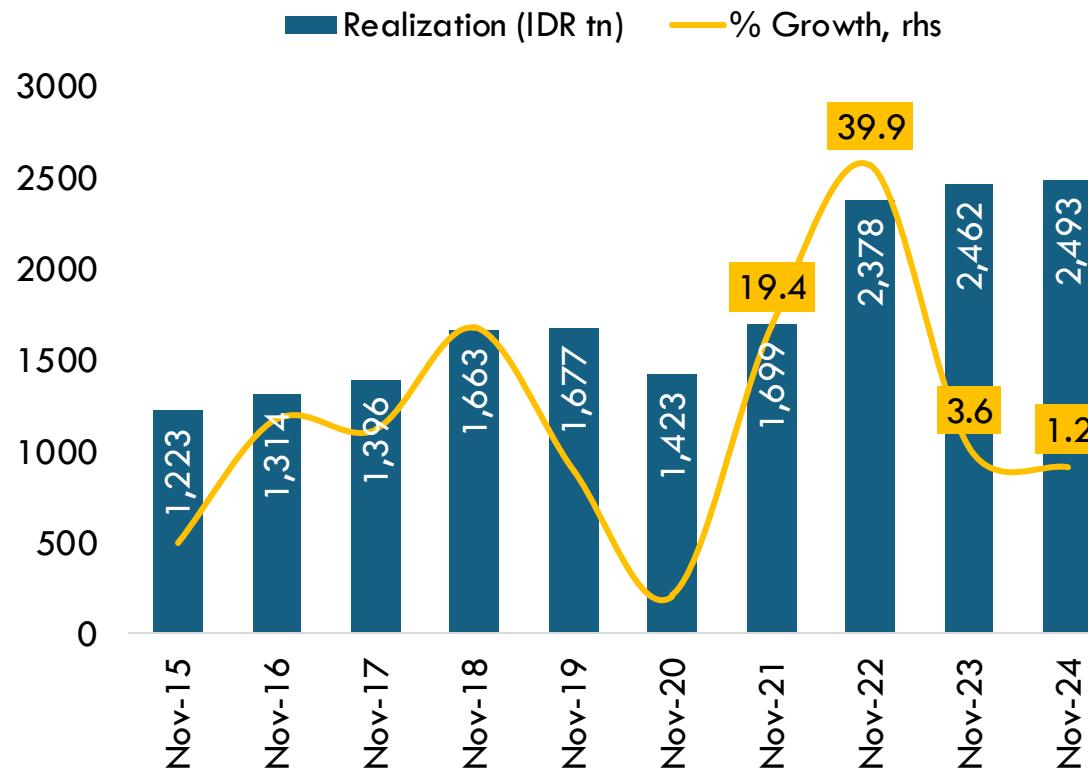

Fiscal deficit in Nov recorded at IDR402 tn (-1.81% to GDP), notably lower from the targeted deficit by the government at -2.70% to GDP

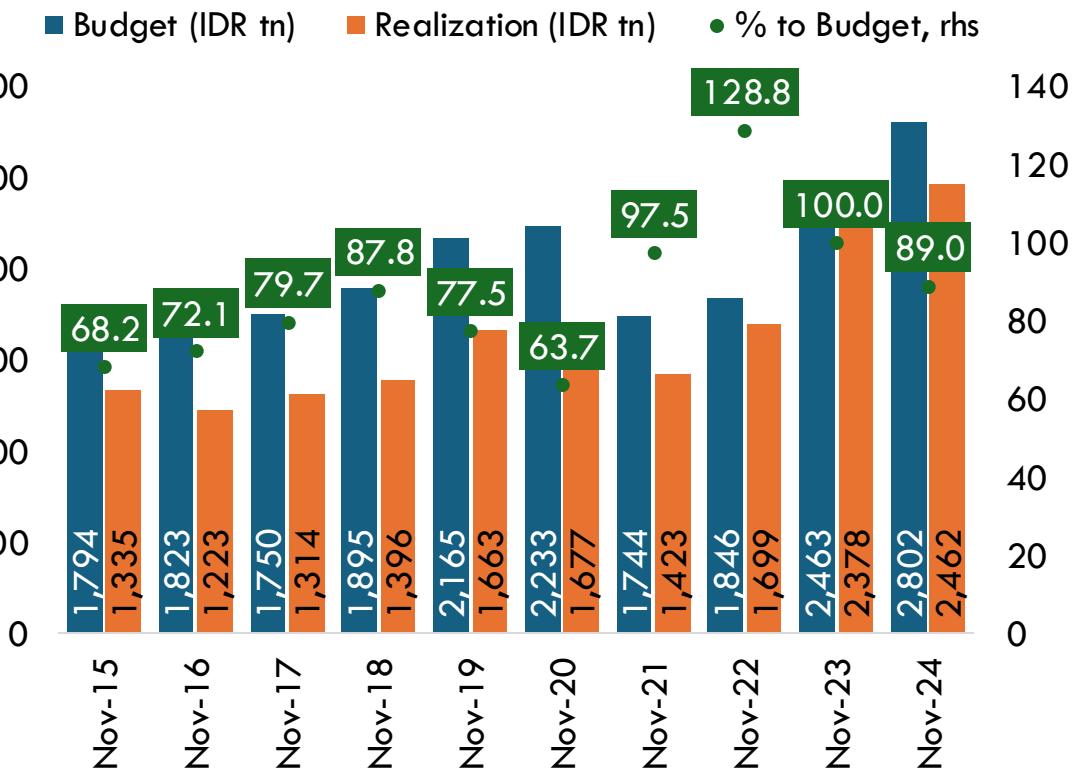

# Government Revenue Realization

Government revenue grew 1.2% yoy underpinned by higher income in VAT as well as land & building tax

**Government Revenue Realization Growth**

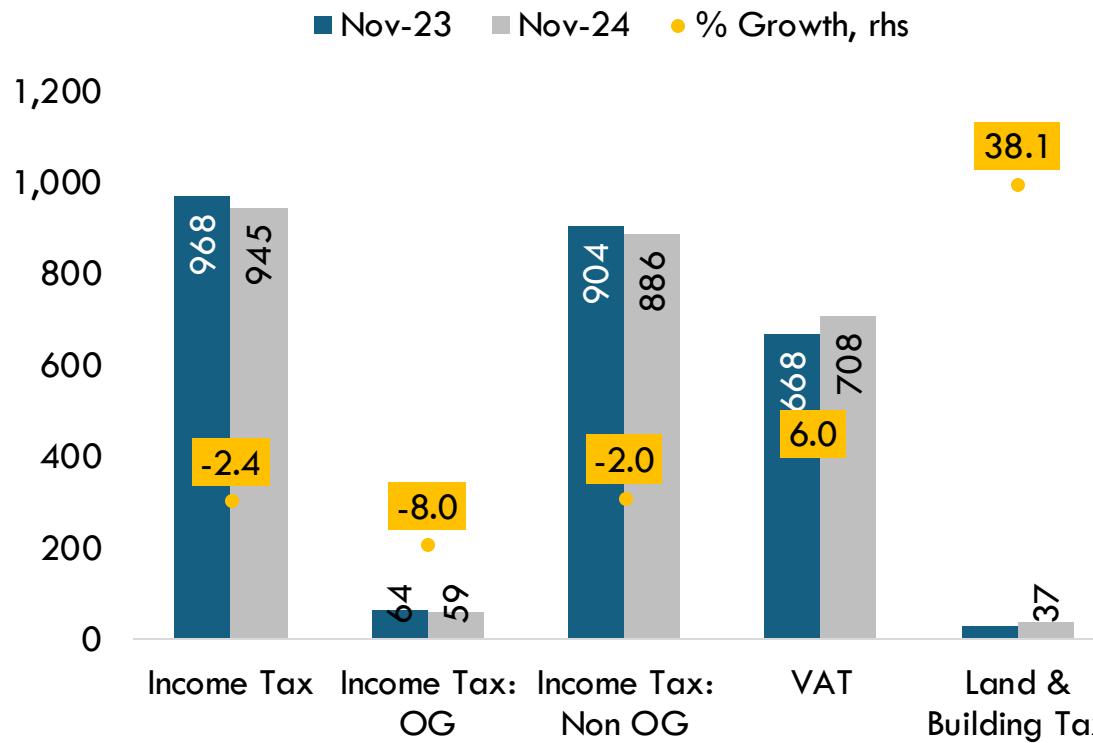

**Government Revenue Realization to Budget**

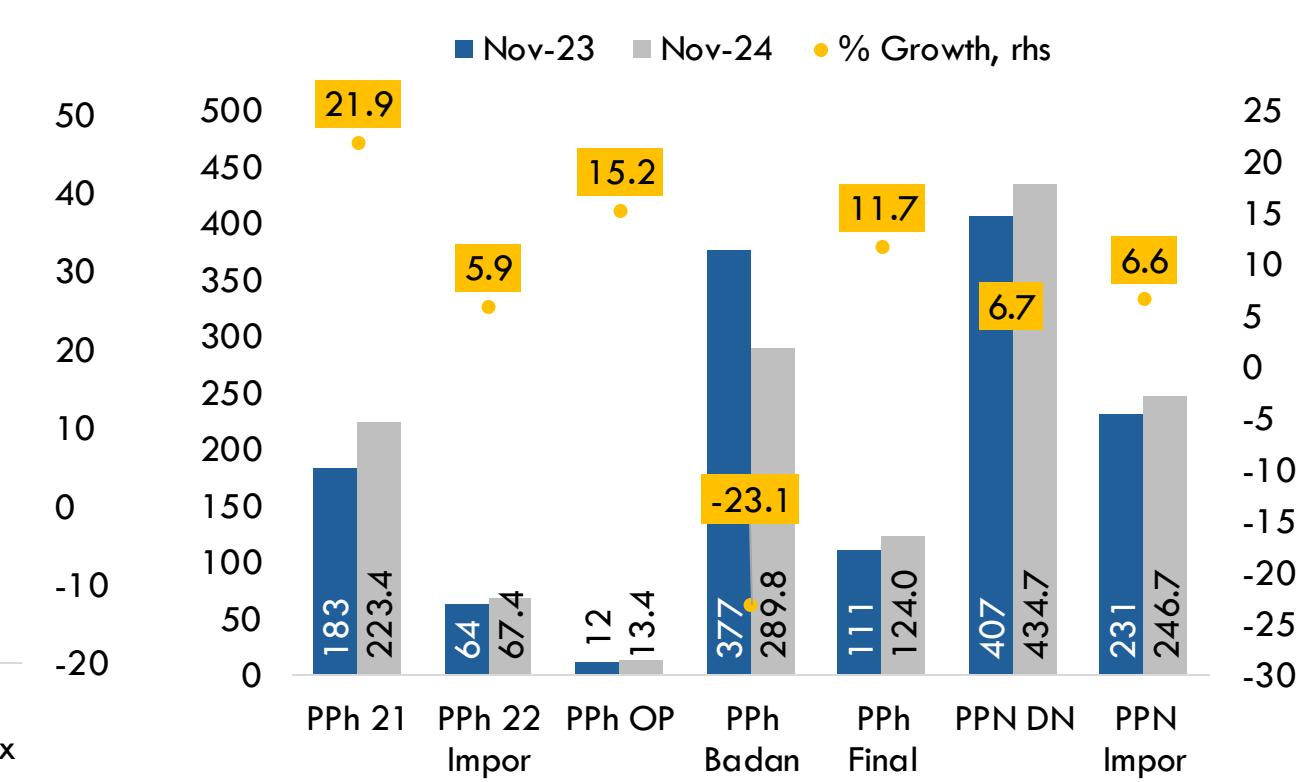

# Tax Revenue by Type

VAT and land & building tax revenue accelerated underpinning an improvement in government revenue

## Tax Revenue by Type

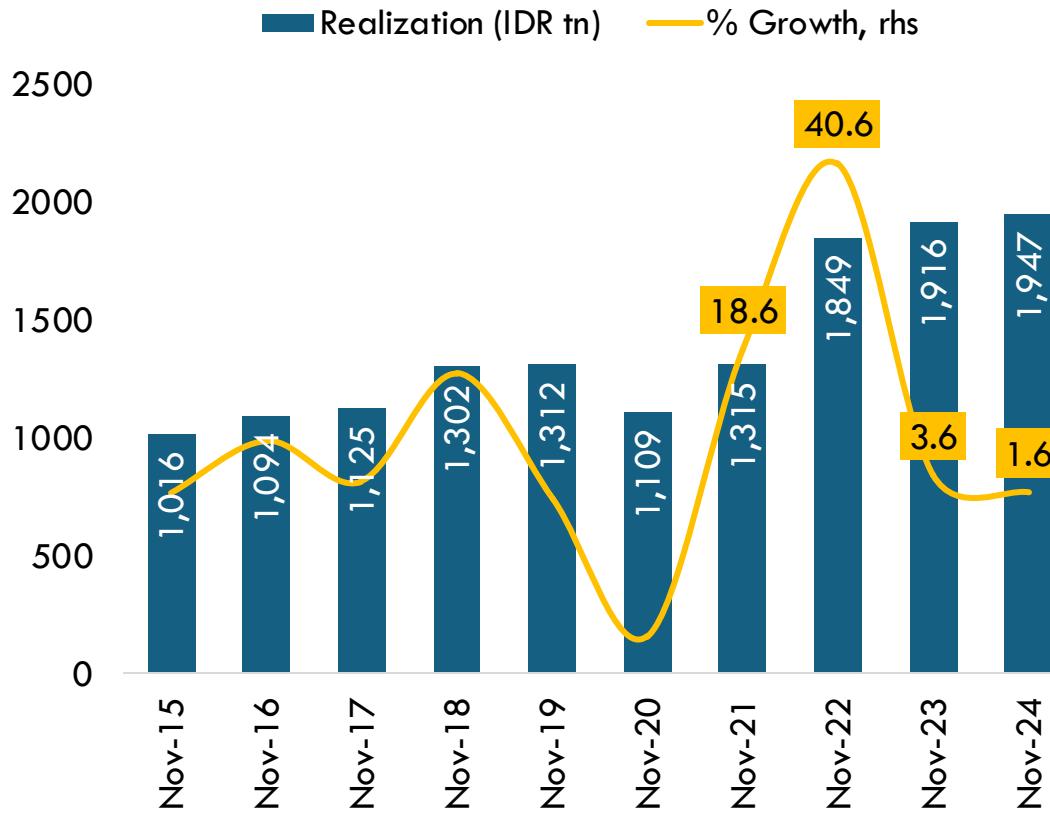

## Tax Revenue by Source

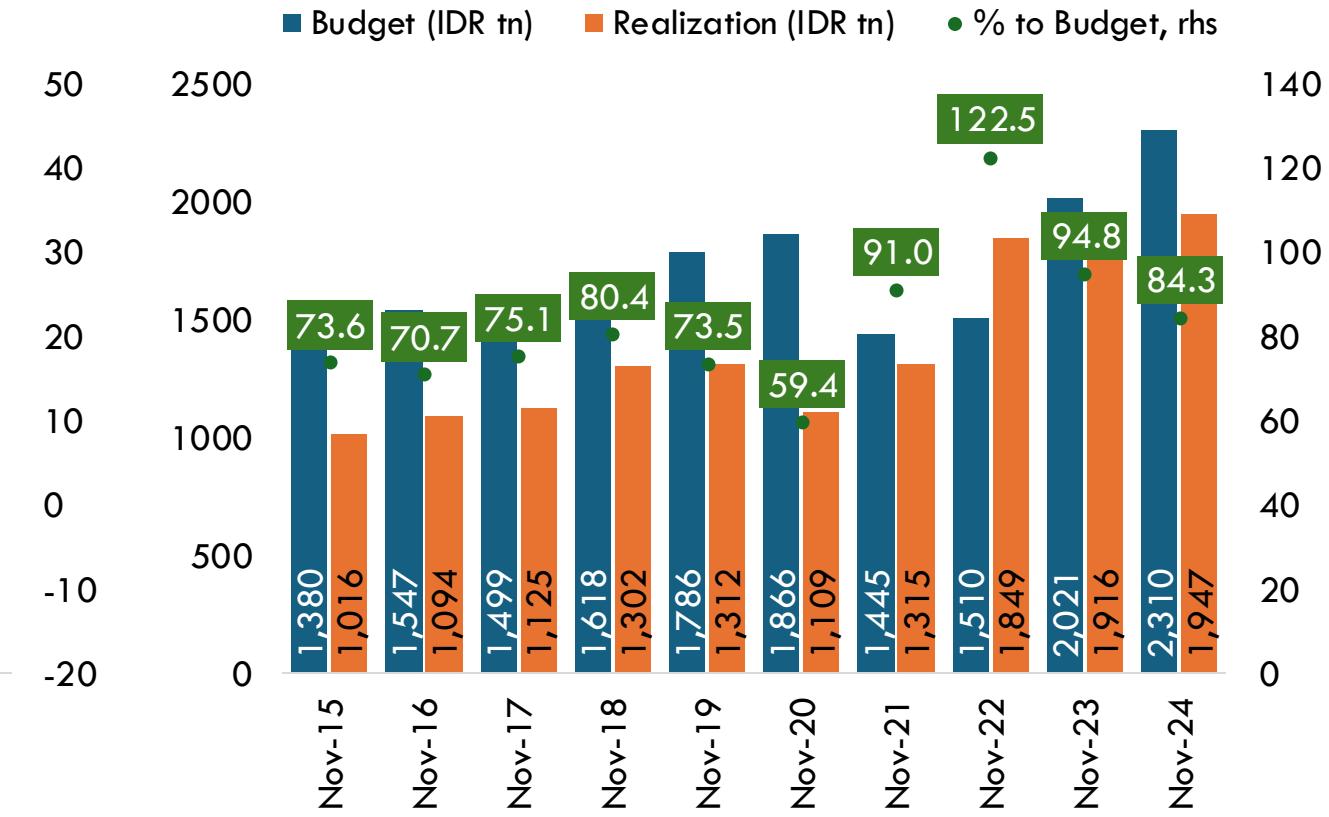

# Tax Revenue Realization

Tax revenue realization remains below the levels of the past two years, due to moderation in commodity price

**Tax Revenue Realization Growth**

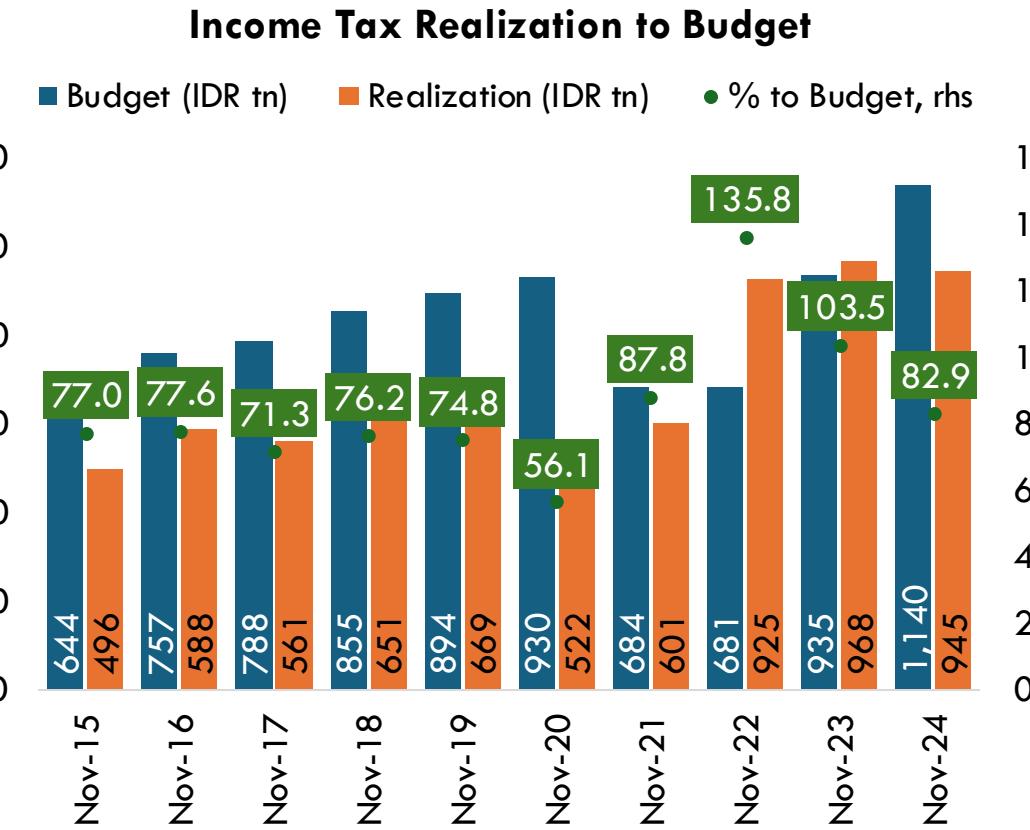

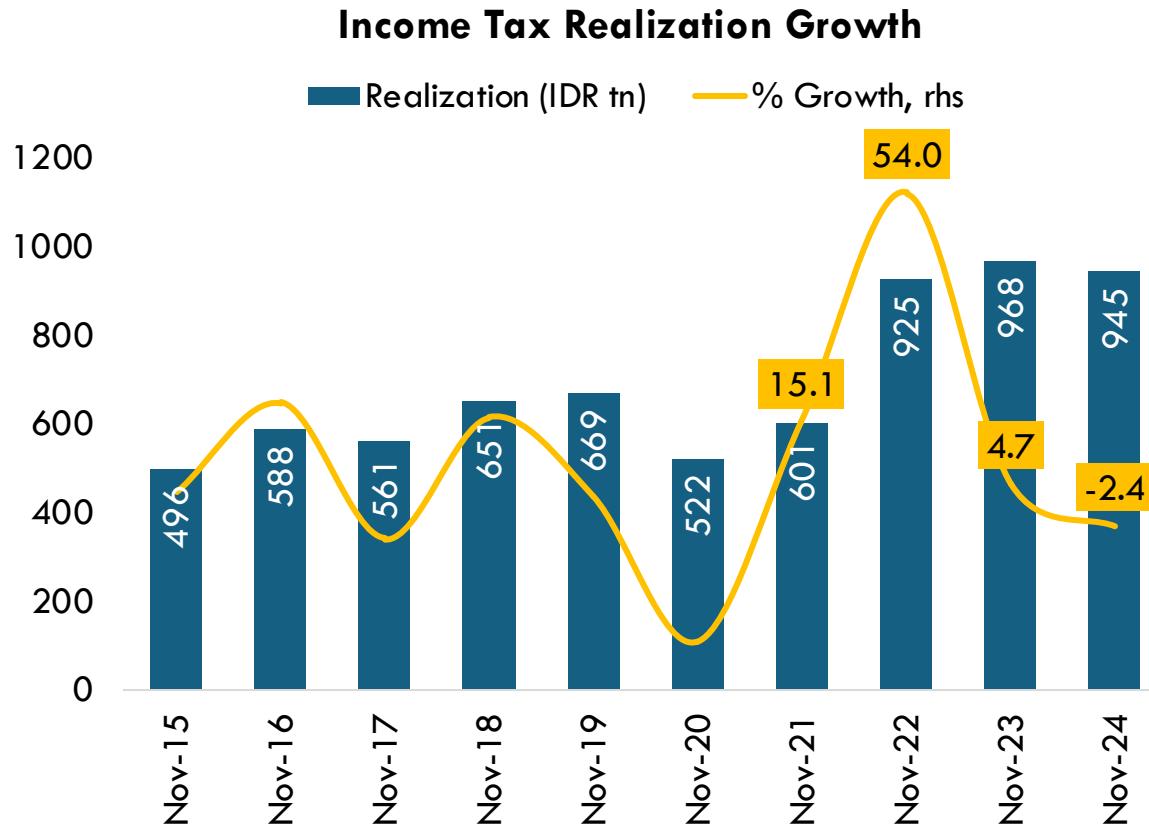

**Tax Revenue Realization to Budget**

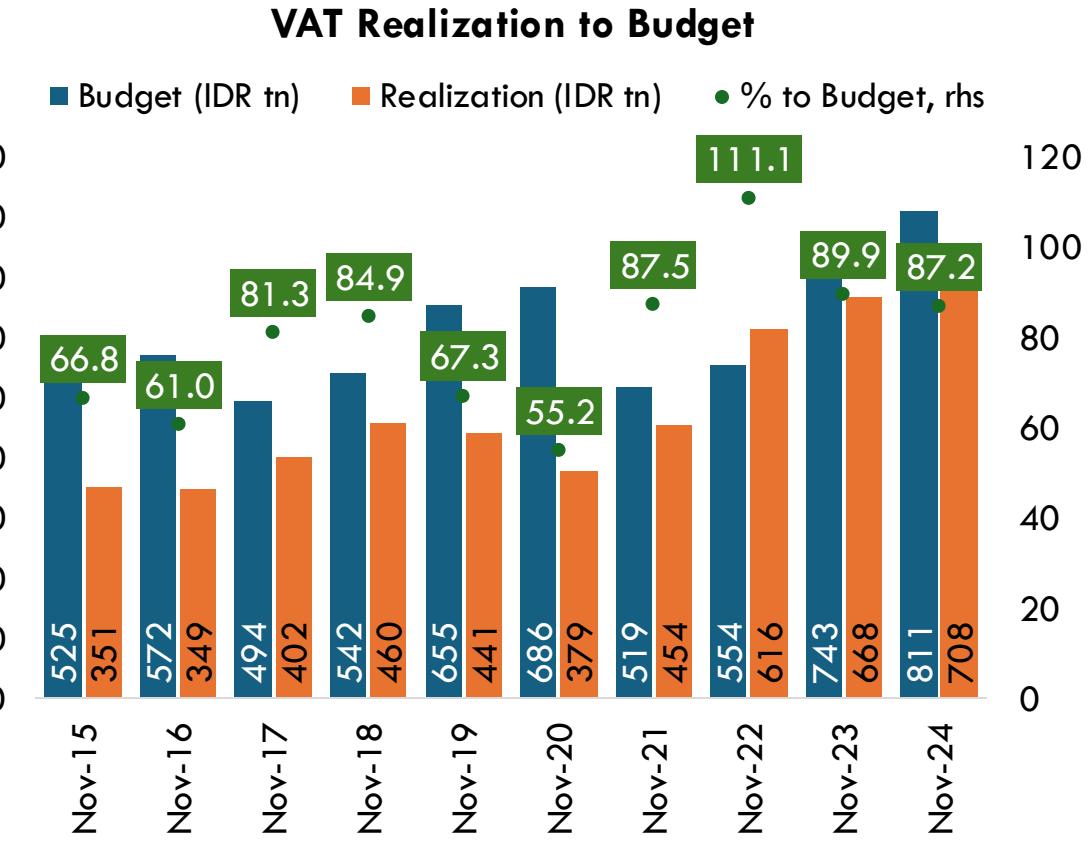

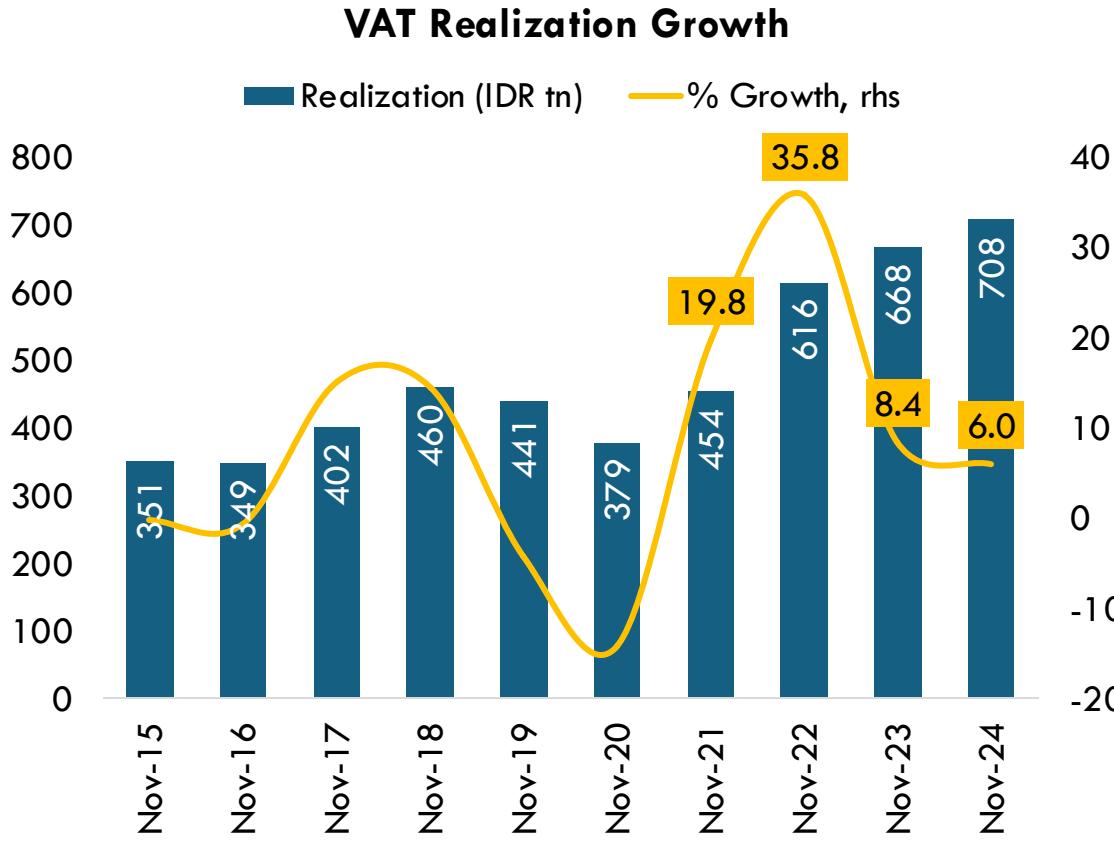

# Income Tax Revenue Realization

The decline in income tax revenue was driven by reduced tax collection from the formal sector, resulting from a shift in labor from the formal to the informal sector

# Value Added Tax (VAT) Revenue

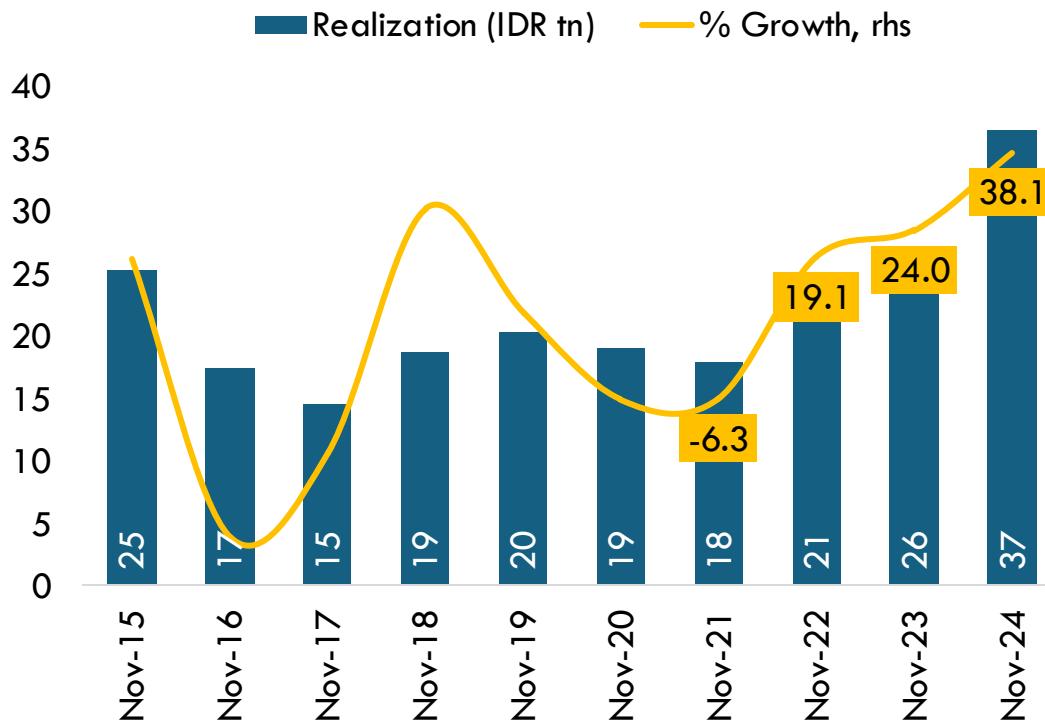

Sluggish consumption, particularly among the middle-income class, led to lower VAT revenue realization in Nov-24.

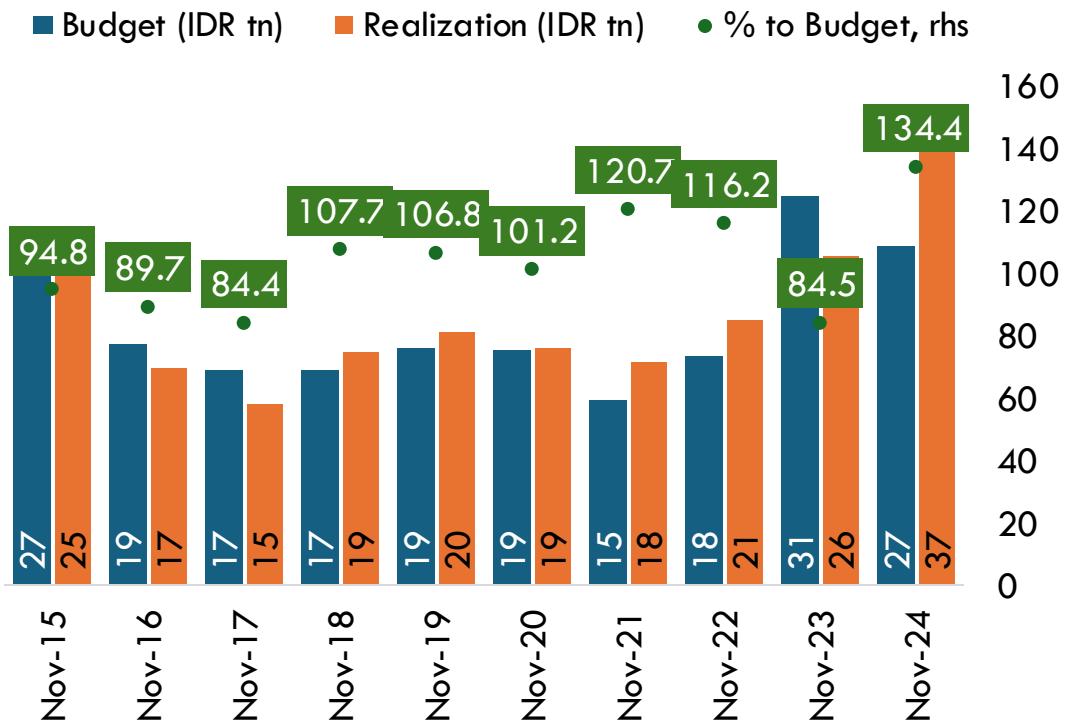

# Land and Building Tax Revenue

**Land and Building Tax Revenue accelerated on higher demand for housing, reflecting people purchasing power remains steady**

**Land and Building Tax Realization Growth**

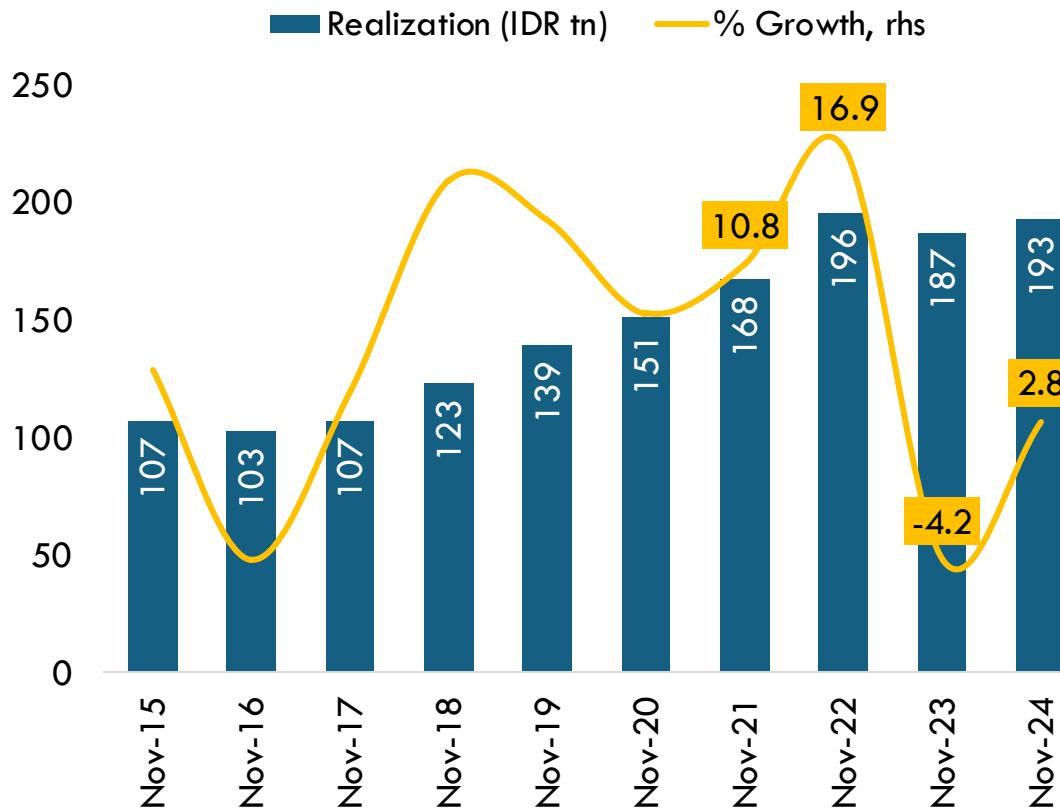

**Land and Building Tax Realization to Budget**

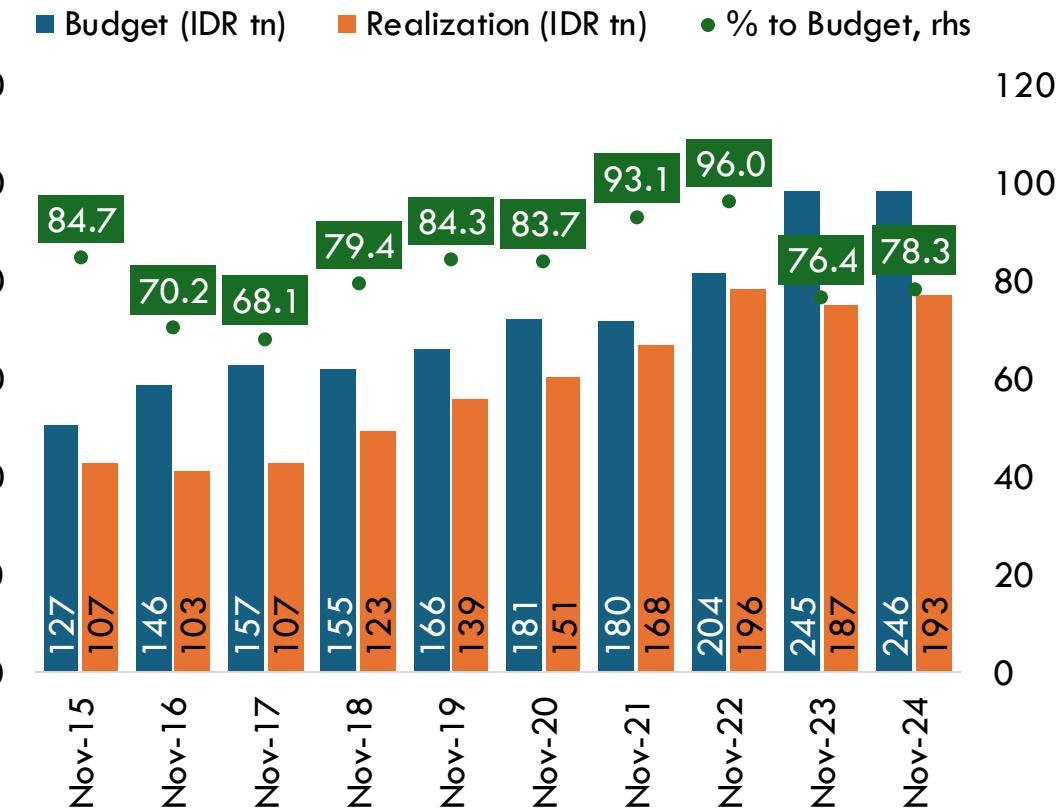

## Excise Duties Revenue

Excise and duties grew 2.8% yoy driven by higher imports and exports in Nov-24, also increased rates and stronger enforcement

**Excise Duties Revenue Growth**

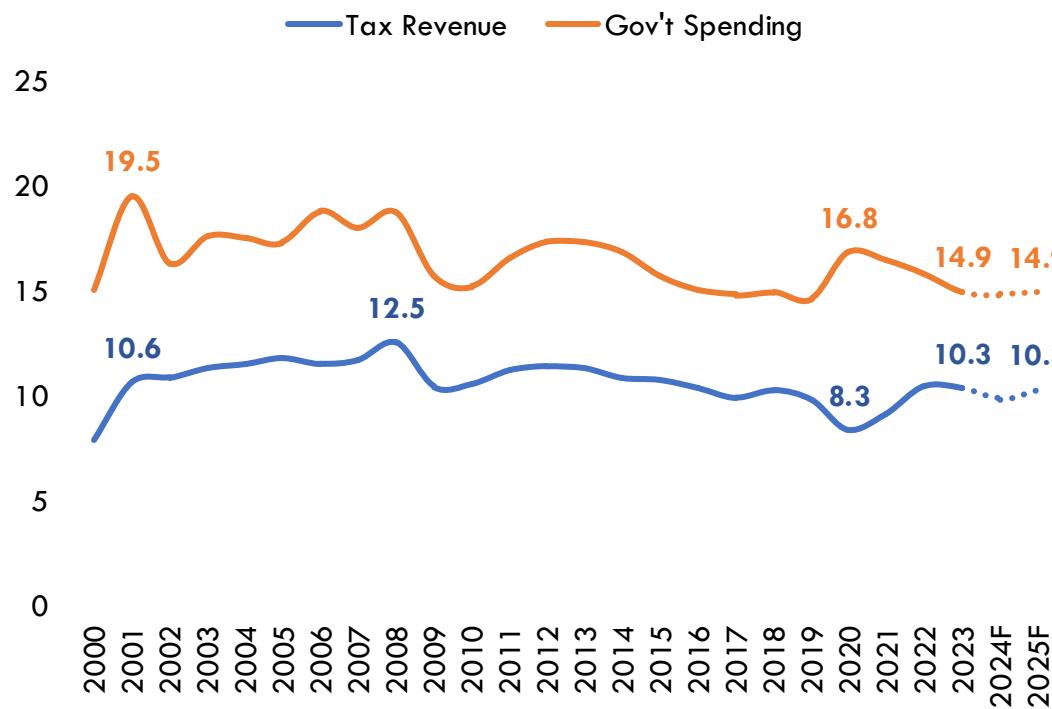

**Excise Duties Realization to Budget**

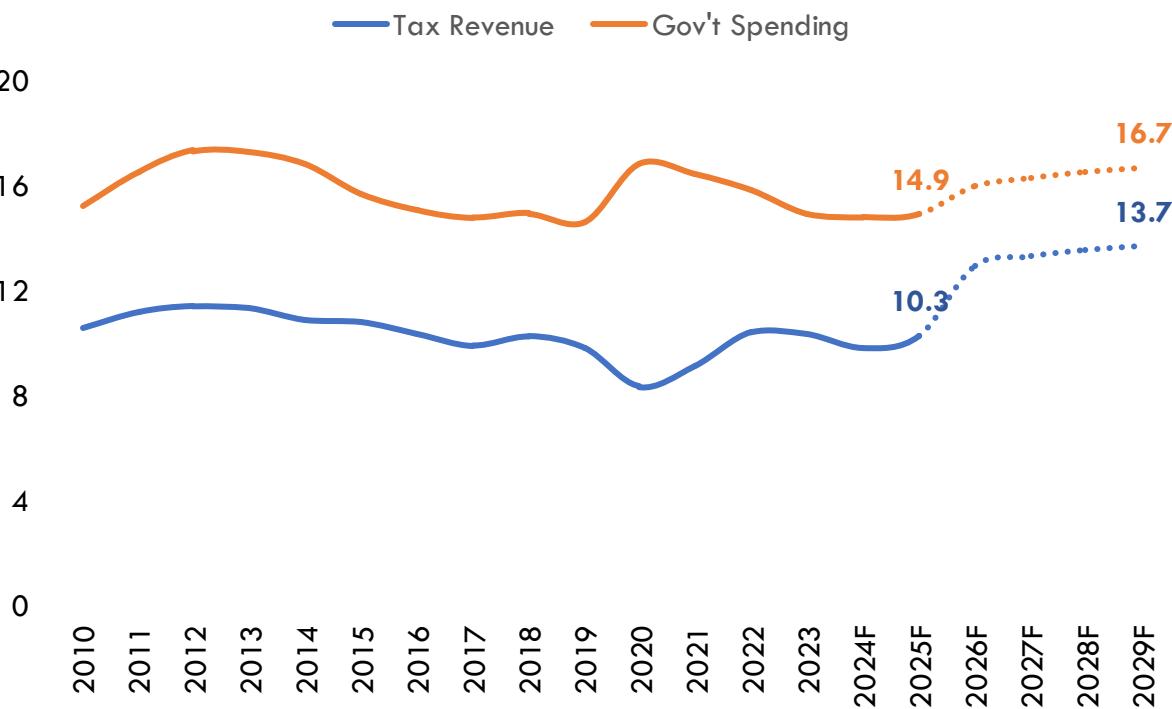

# To Achieve 8% GDP Growth, Indonesia Needs to Boost Tax Ratio

Indonesia's tax ratio in the past decade has stagnated

Gov't Revenue and Spending Gap in BAU (% to GDP)

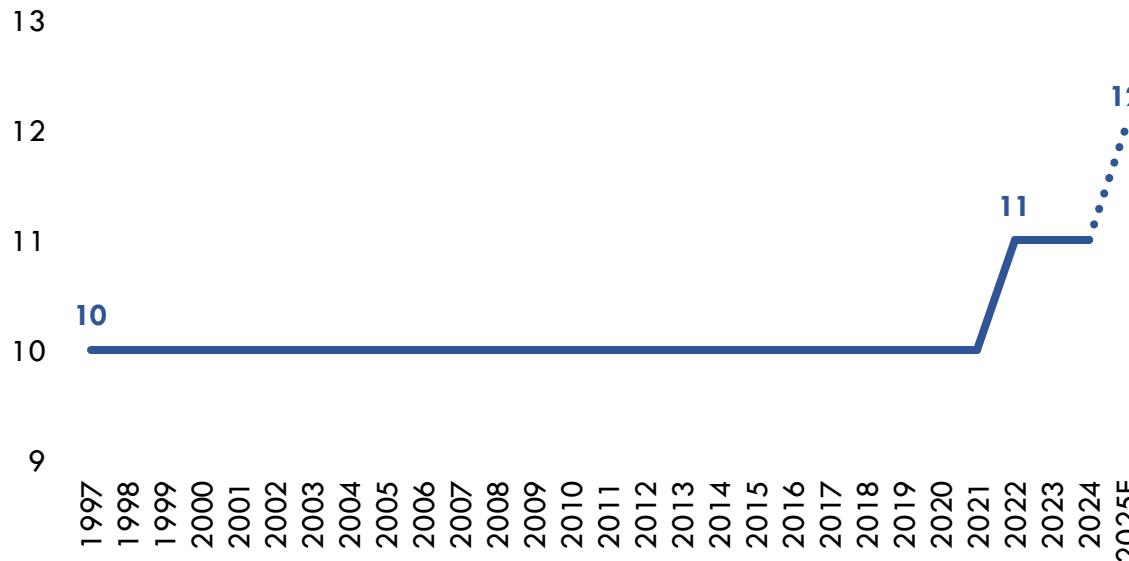

Gov't Revenue and Spending Gap to Achieve 8% GDP Growth (% to GDP)

# Harmonization of Tax Rates in 2025 as an Effort to Boost Tax Revenue

The government is harmonizing taxes to optimize tax revenue sources

## VAT Tariff in 1997 - 2025

### Notes:

- Referring to Law (UU) Number 7 of 2021 about the Harmonization of Tax Regulations (HPP)
- The Directorate General of Taxes on 12 Oct-24 said that the implementation of the 12% VAT will start on 1 Jan-25.

## Other Tax Adjustment in 2025

### Final Income Tax for MSMEs at 0.5% (Currently)

MSMEs with revenue up to IDR 4.8 billion annually can use the Final Income Tax scheme at 0.5% of gross revenue.

### Tax Calculation Based on Net Income (Effective 2025)

Tax calculation refers to net income.

- **The 1<sup>st</sup> layer**, income up to IDR60 mn per year, tax rate of 5%
- **The 2<sup>nd</sup> layer**, income above IDR60 mn to IDR 250 mn per year, tax rate of 15%
- **The 3<sup>rd</sup> layer**, income above IDR250 mn to IDR 500 mn per year, tax rate of 25%
- **The 4<sup>th</sup> layer**, income above IDR500 mn to IDR 5 bn per year, tax rate of 30%
- **The 5<sup>th</sup> layer**, income above IDR5 bn per year, tax rate of 35%

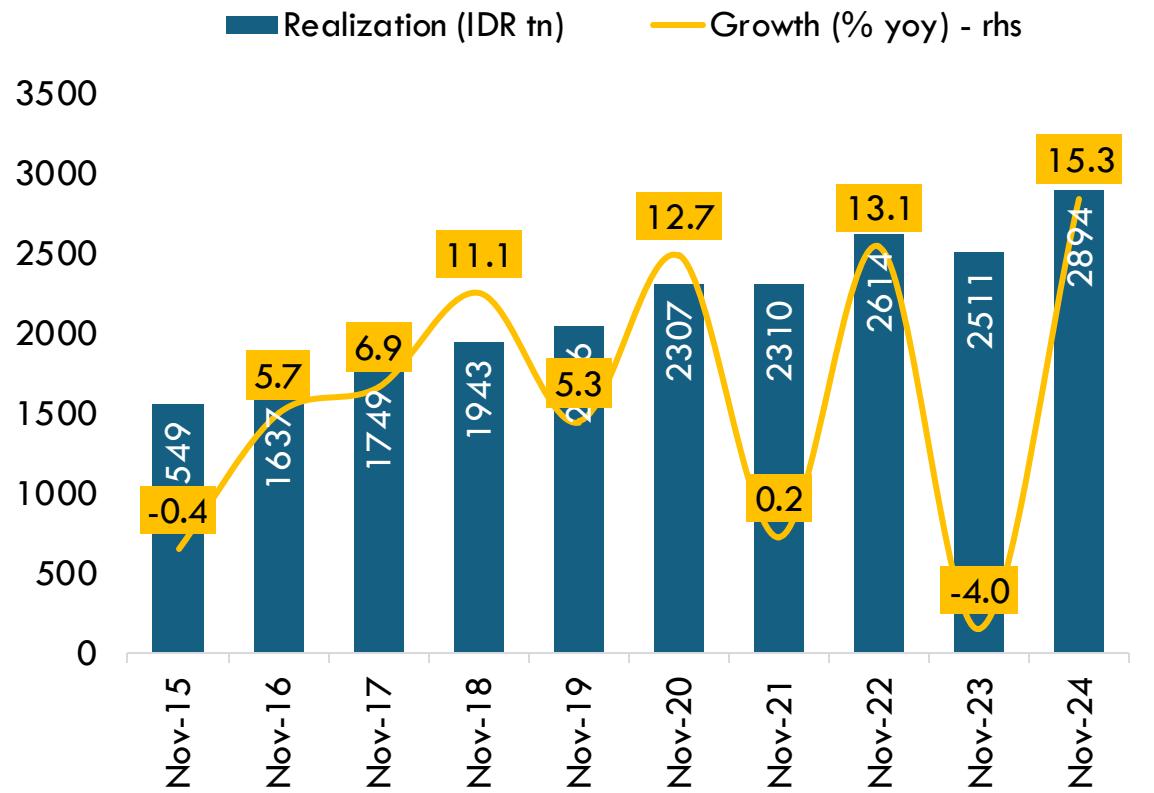

### Sugar-Sweetened Beverage Tax

- **Object of Excise**, sweetened beverages with a sugar content of 5-6% per 100ml
- **Excise Rate**, 2.5% of the price
- **Tax Exemption**, drinks for health and drinks consumed on the premises (restaurant/stall)

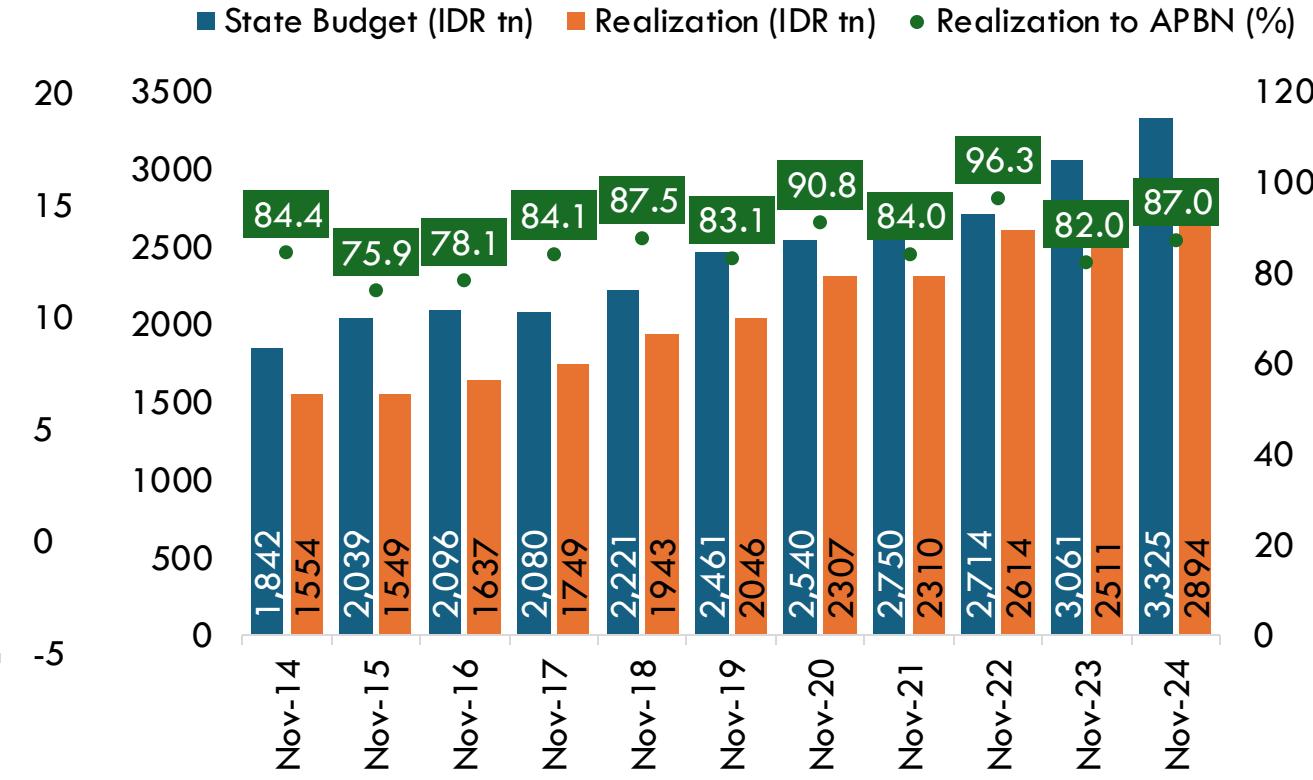

# Government Expenditure

**Government spending accelerated 15.3% yoy on the back of acceleration in capital spending and general elections**

**Government Spending Realization in Oct (IDR tn)**

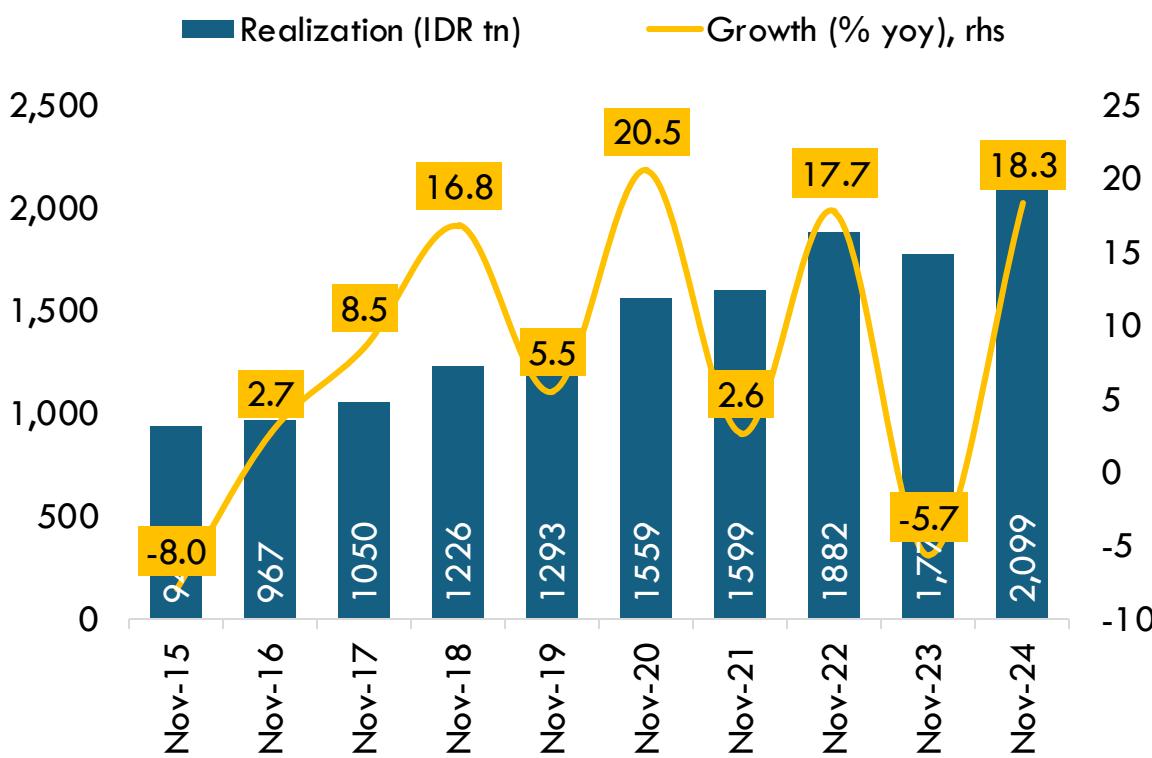

**Government Spending Realization to Budget in Nov**

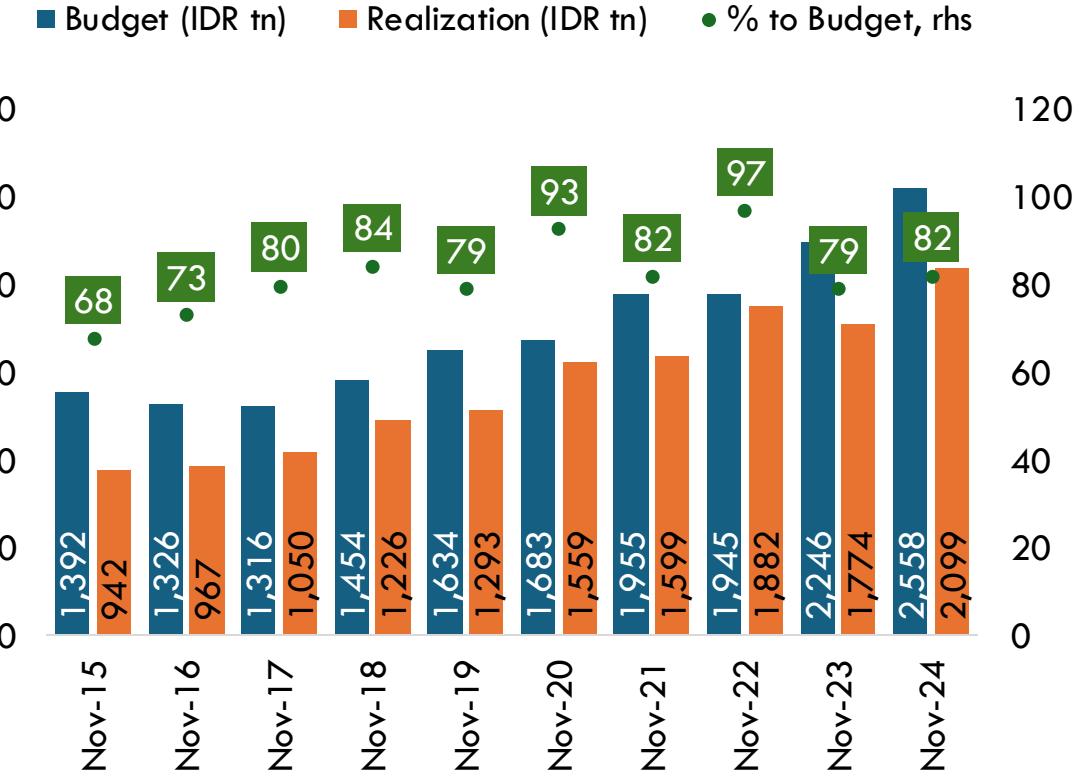

# Central Government Expenditure

Central gov't spending expanded on capital, materials, and personnel spending

**Central Gov't Expenditure Growth**

**Central Gov't Expenditure Realization to Budget**

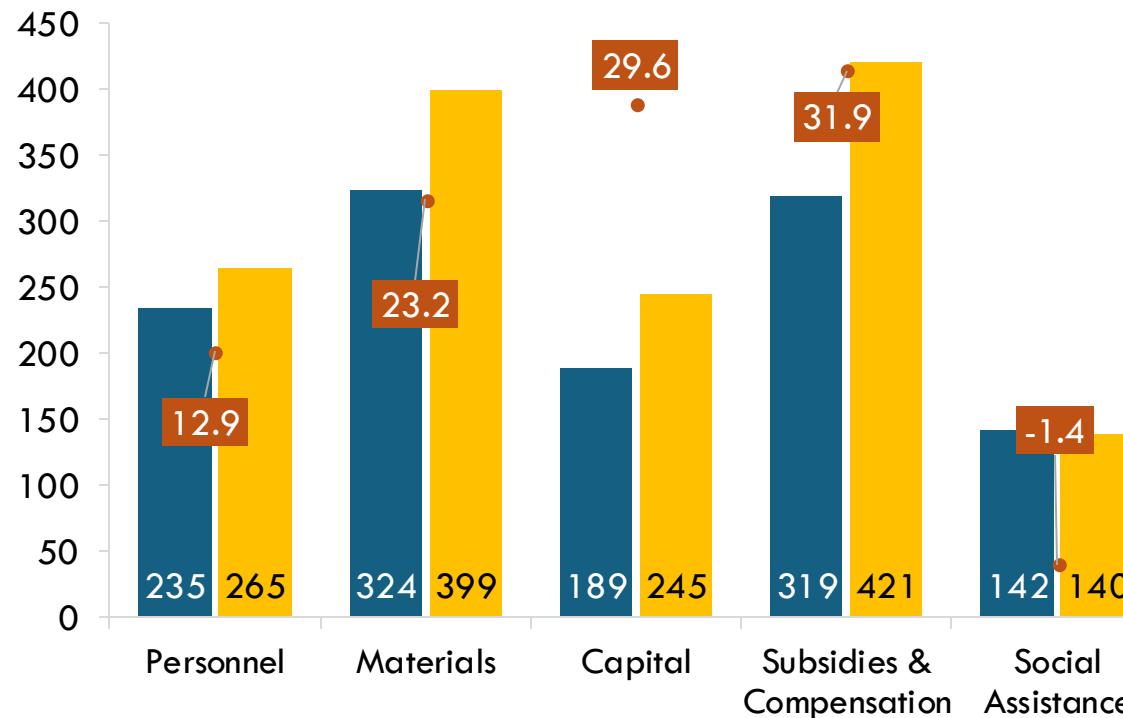

# Government Expenditure by Type

Capital spending accelerated 29.6% yoy on higher spending in infrastructure

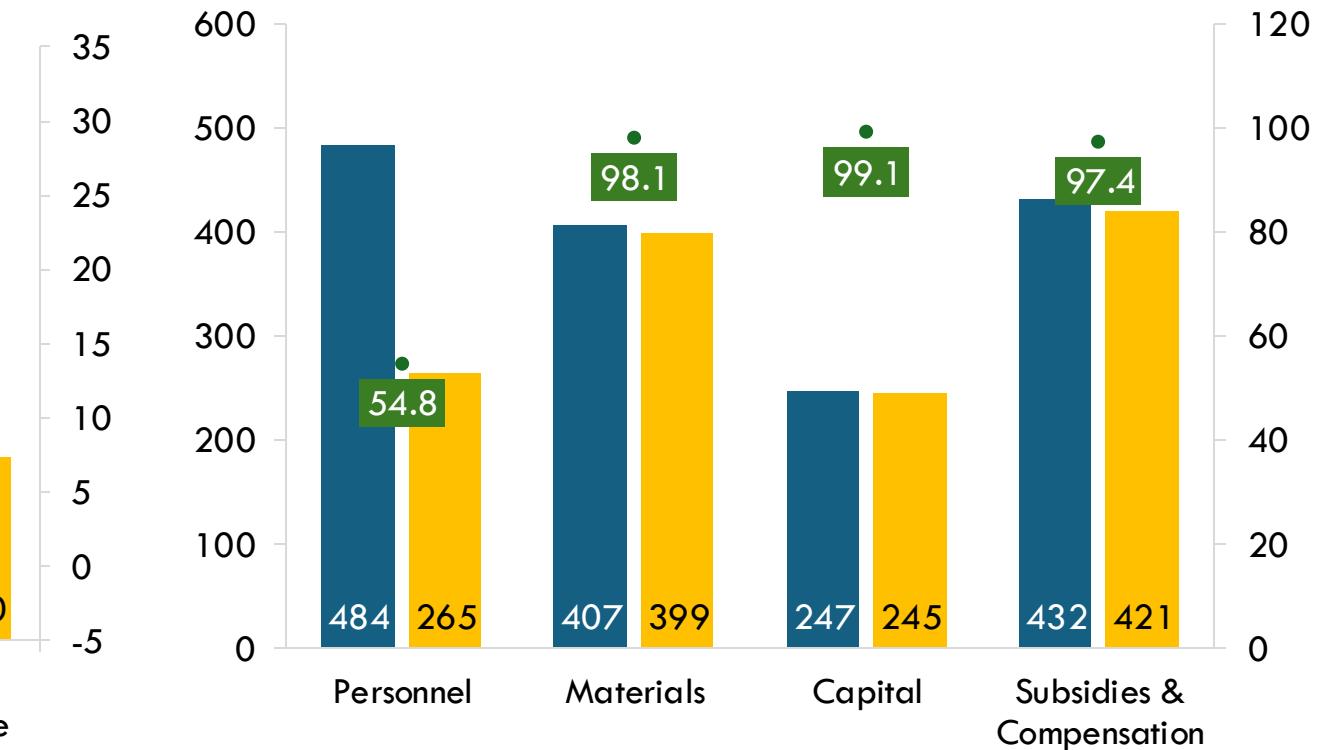

**Central Gov't Expenditure Growth by Type**

■ Nov-23 ■ Nov-24 ● Growth, rhs

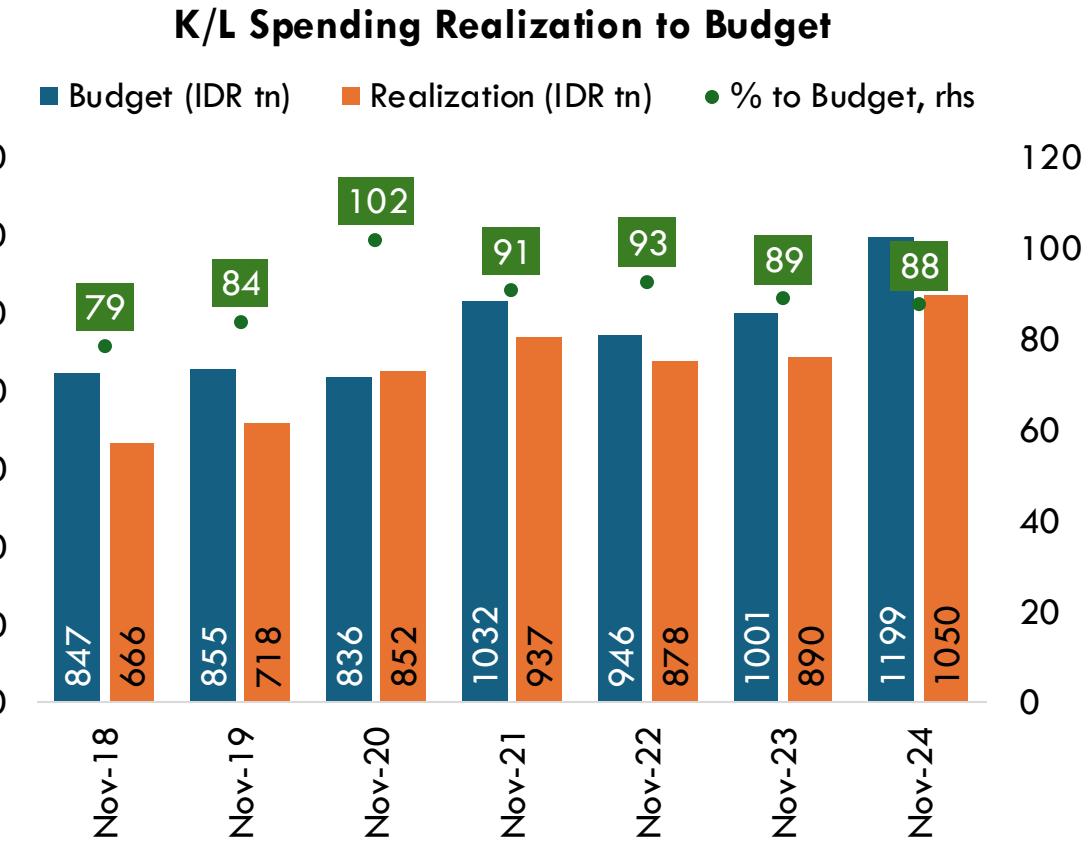

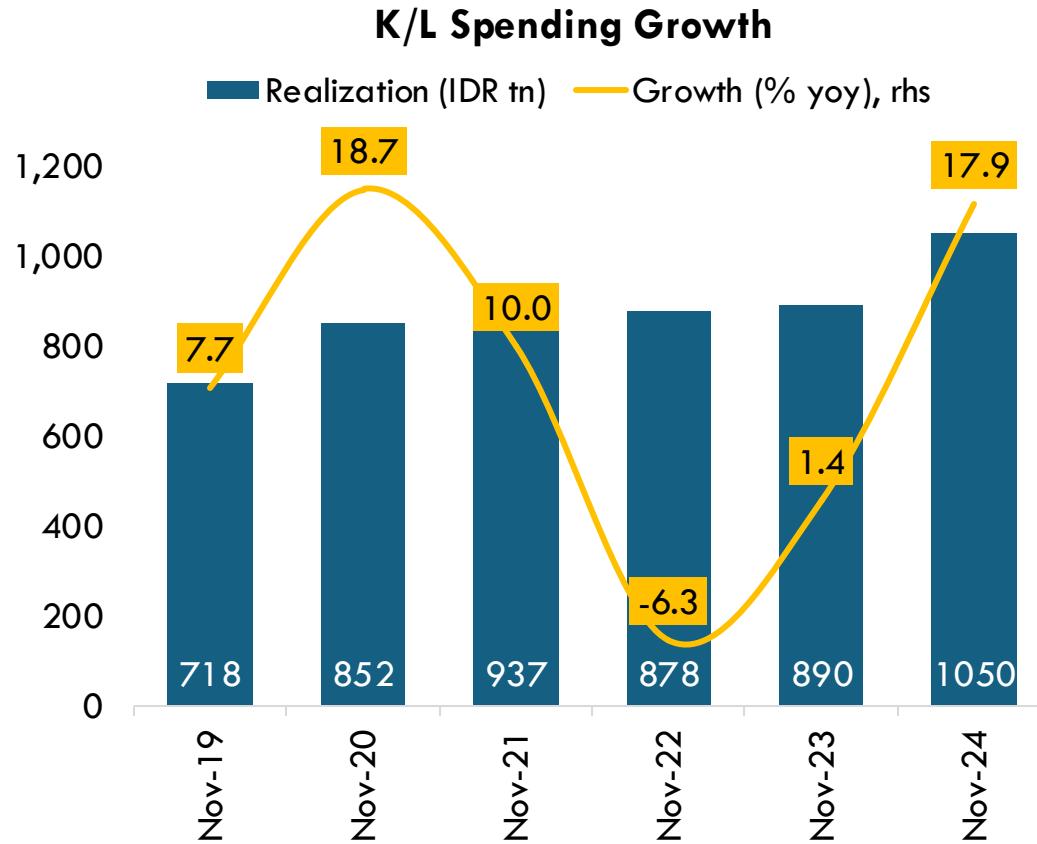

**Central Gov't Expenditure % Realization by Type**

■ 2024 Budget ■ Nov-24 ● % to Budget, rhs

# Ministries/Agencies Spending

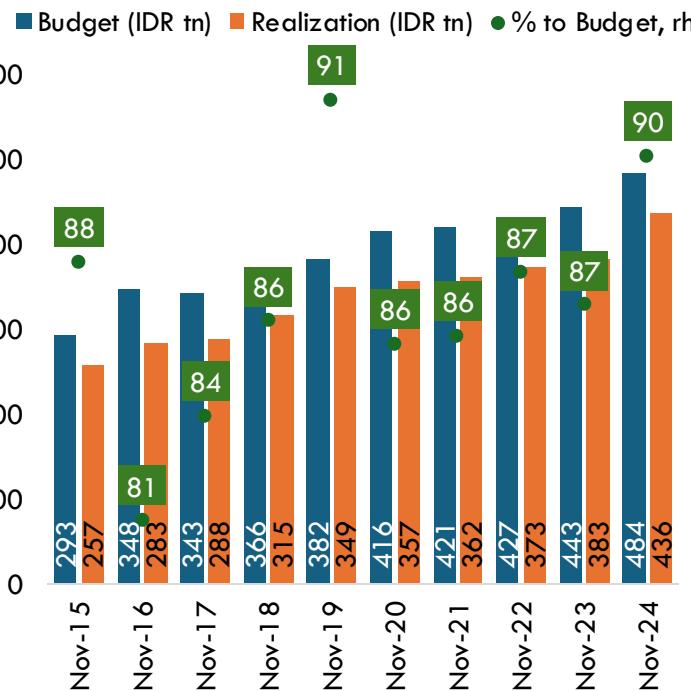

**Ministry spending increased by 17.9% yoy underpinned by higher spending in capital and materials**

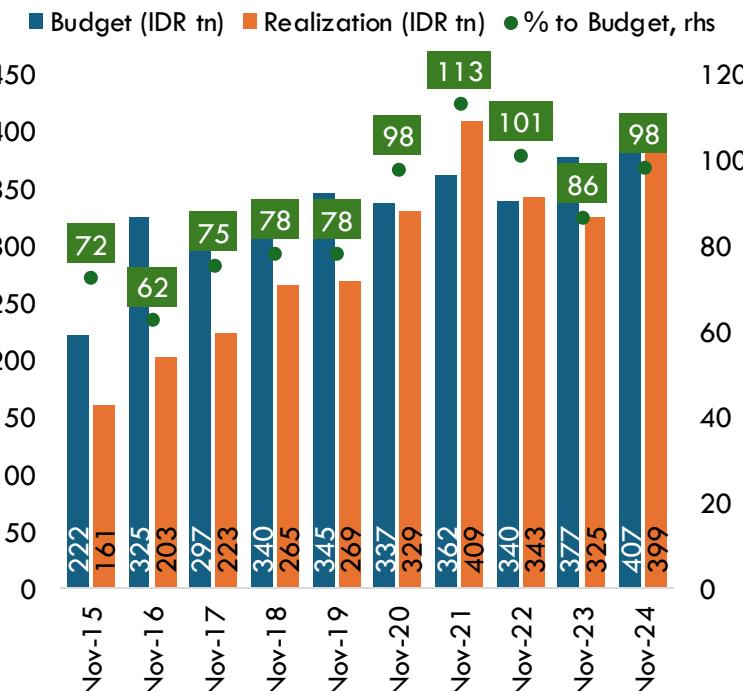

# Ministries/Agencies Spending by Type

**Accelerated spending in personnel, materials, and capital can be attributed by acceleration in infrastructure and elections**

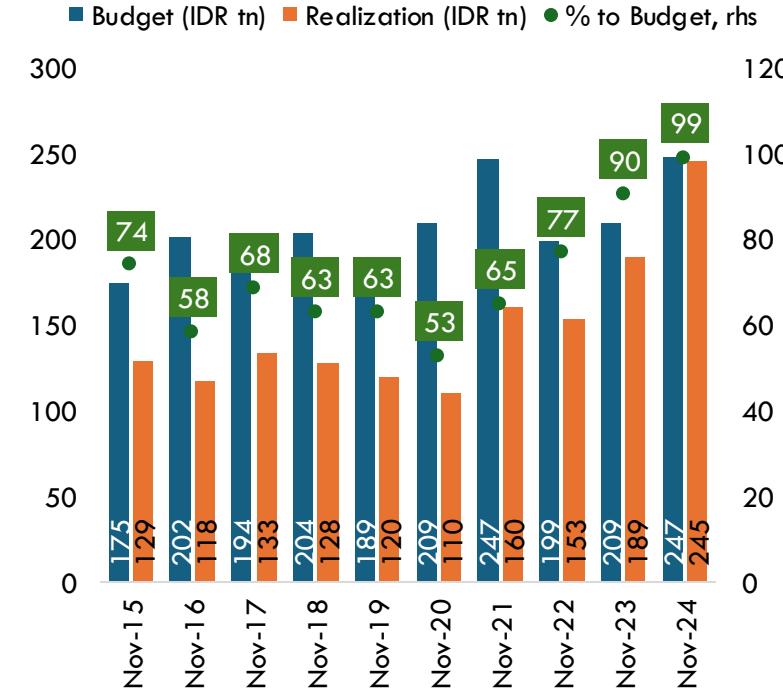

**Personnel Realization to Budget**

**Materials Realization to Budget**

**Capital Realization to Budget**

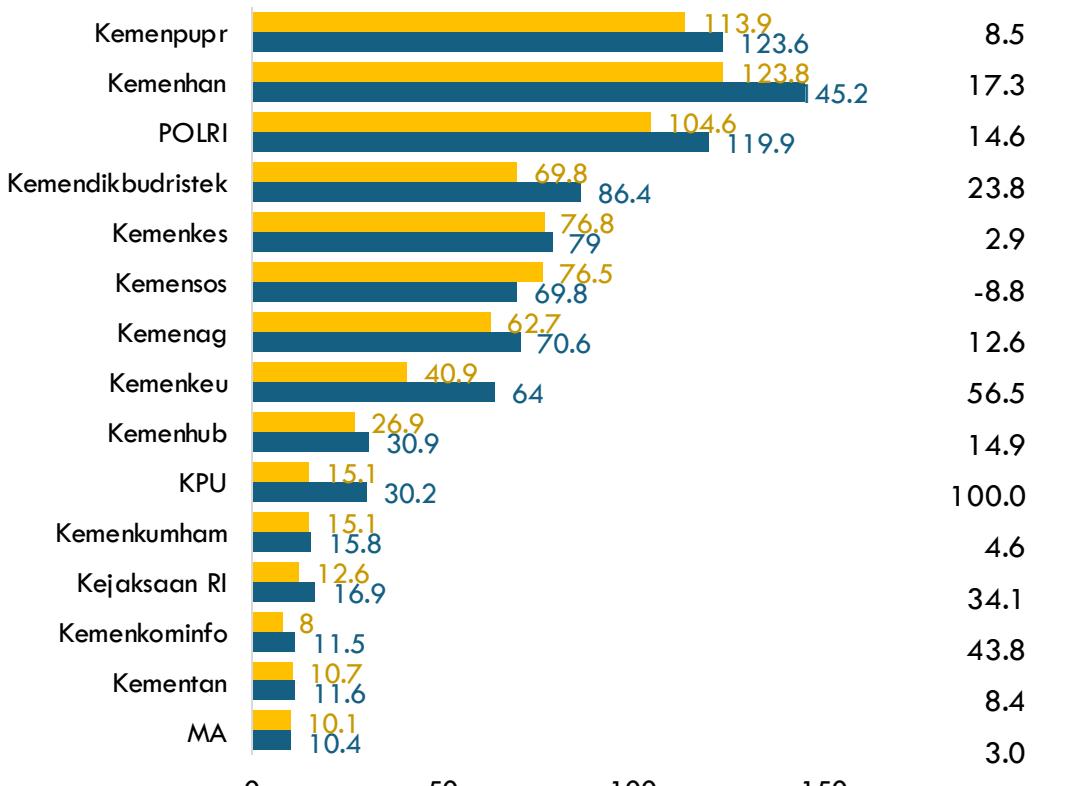

# Government Expenditure by Ministries

Spending by the Ministry of Defense and the National Police reached more than 100%, driven by the acceleration spending for defense equipment.

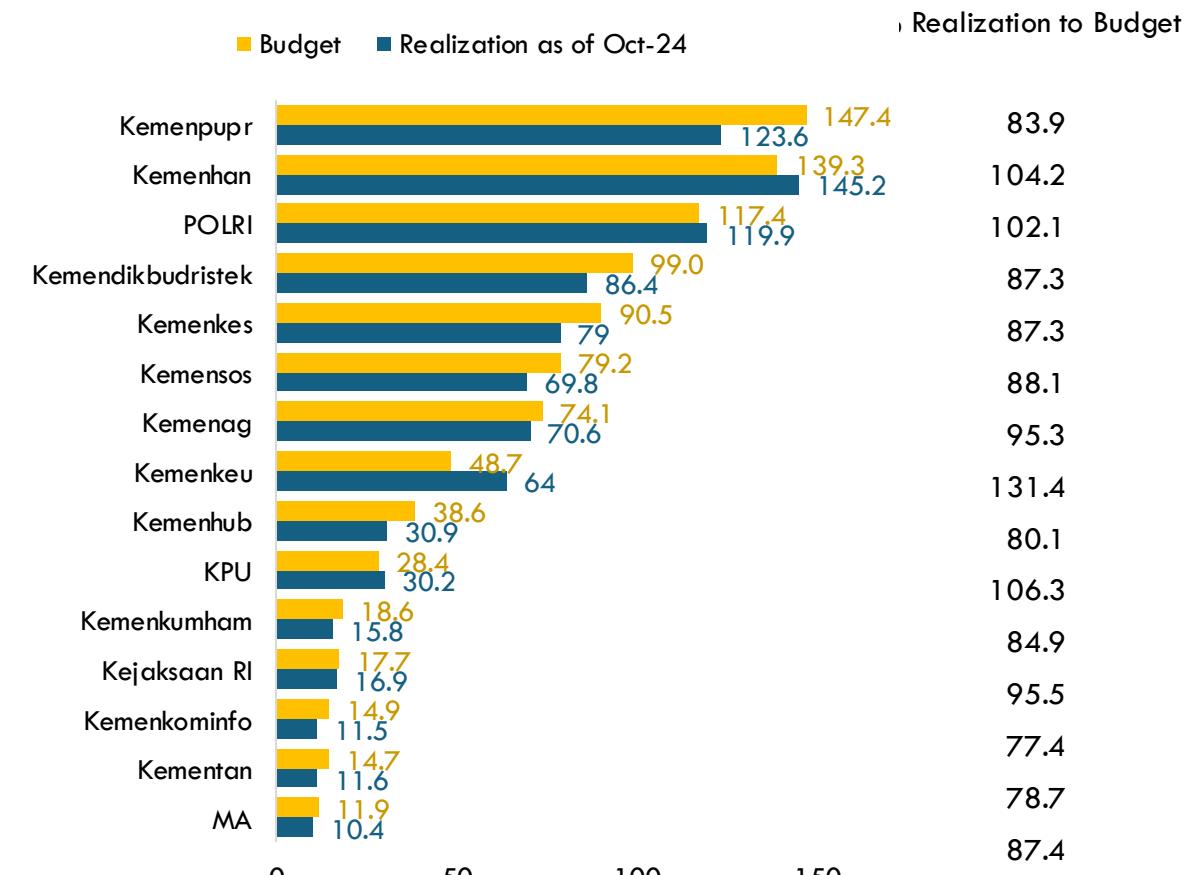

Spending by Ministries Growth (IDR tn)

■ Nov-23 ■ Nov-24

Spending by Ministries % to Budget (IDR tn)

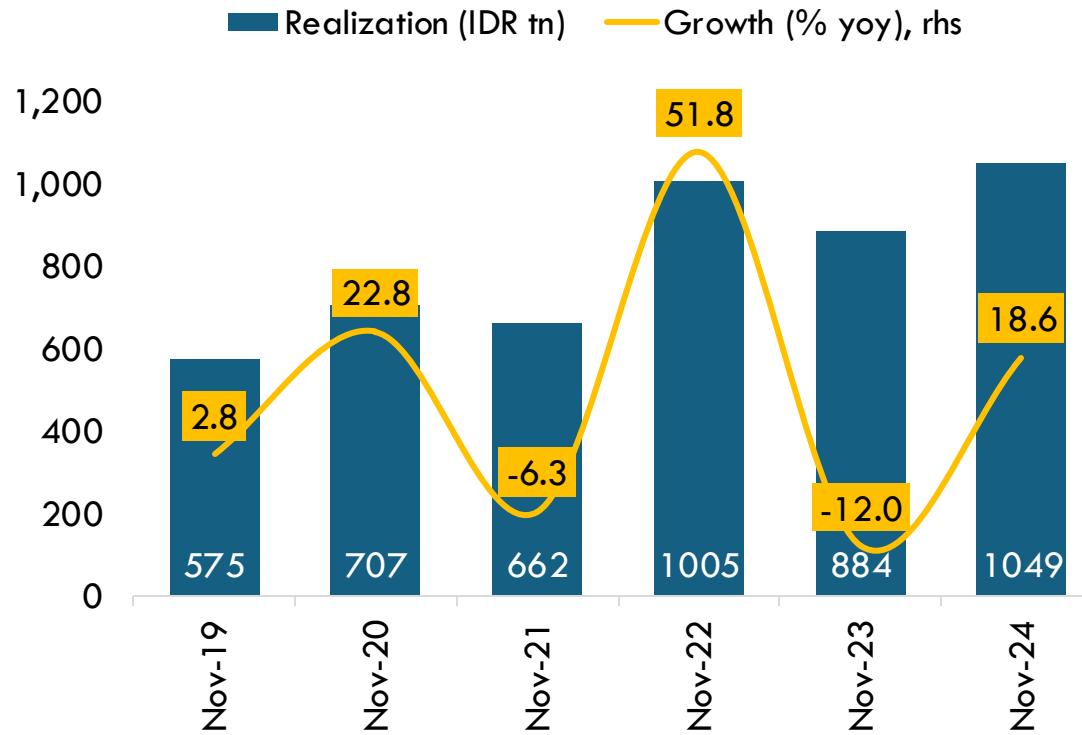

■ Budget ■ Realization as of Oct-24

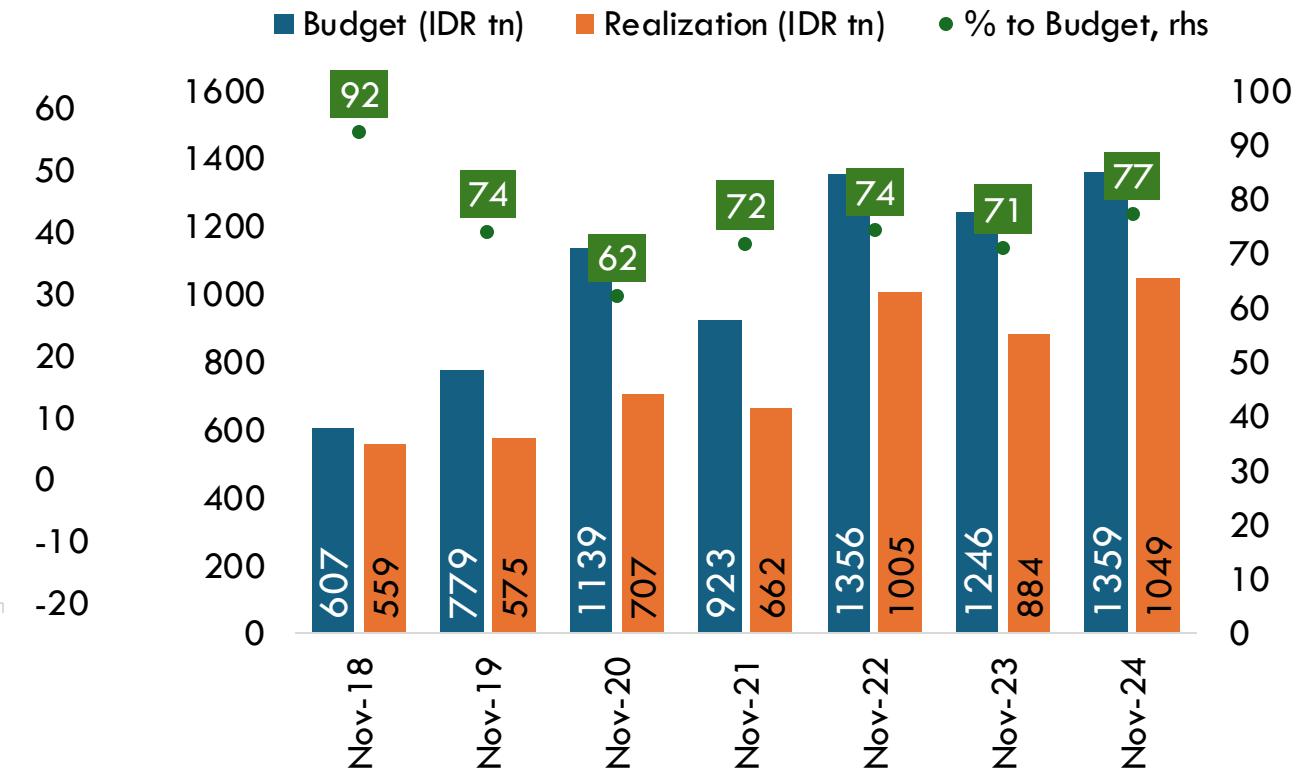

# Non-Ministries/Agencies Spending

**Non-K/L spending rose 18.6% yoy driven by acceleration in subsidies**

**Non-K/L Spending Growth**

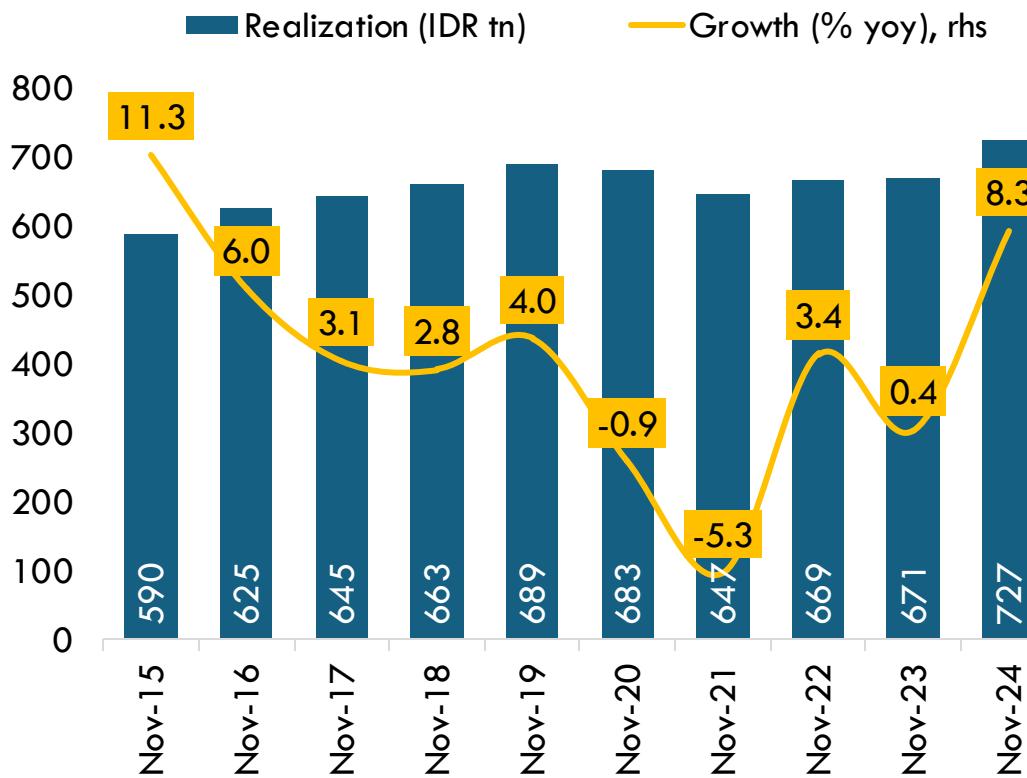

**Non-K/L Spending Realization to Budget**

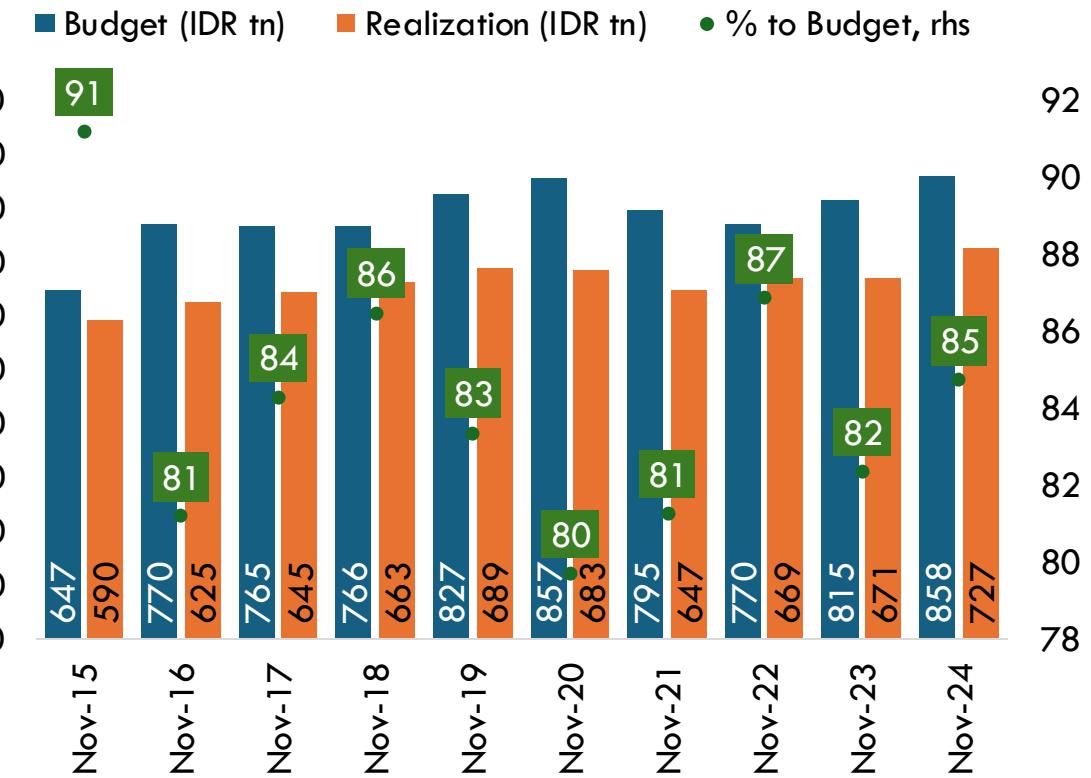

# Regional Transfer

**Regional transfers increased as local governments increased compliance in completing general allocation fund transfer requirements**

**Regional Transfer Growth**

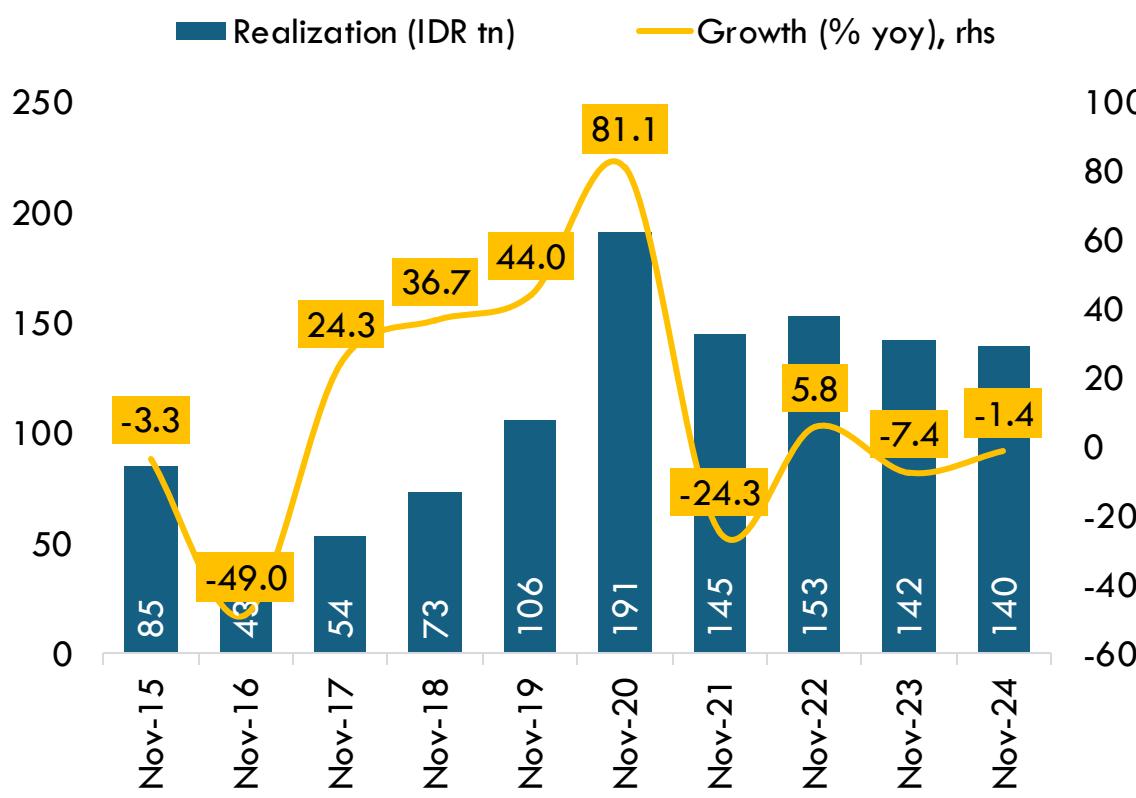

**Regional Transfer Realization to Budget**

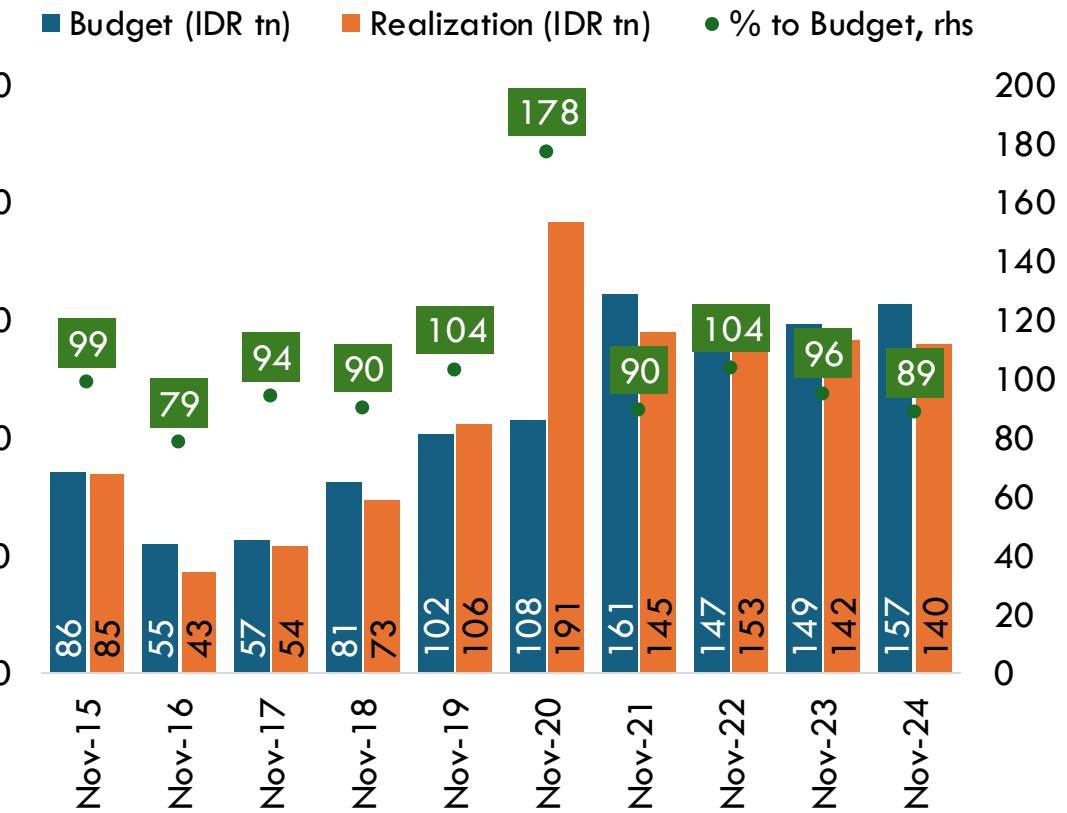

# Social Assistance Budget Realization

The lower-than-target social assistance budget was due to the delay in the realization of social assistance at the end of the year

## Social Assistance Growth

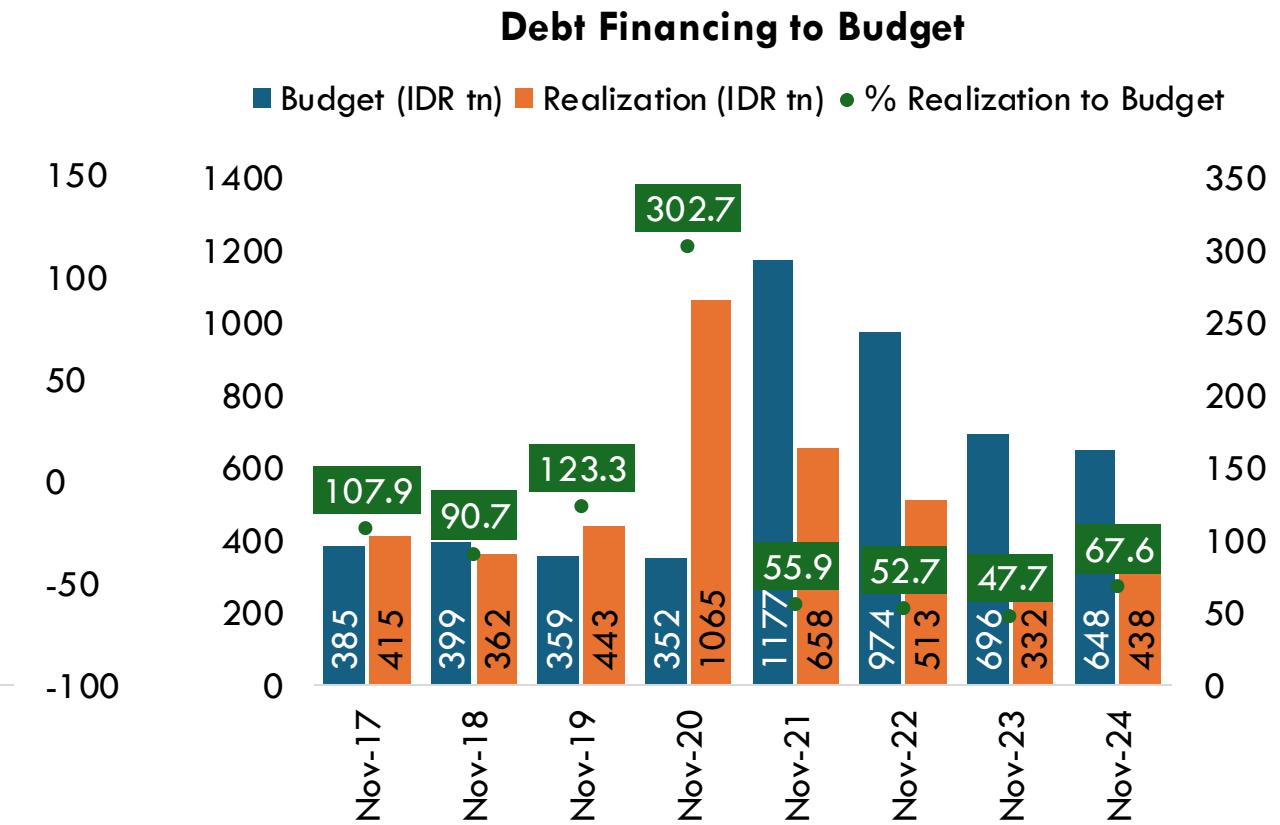

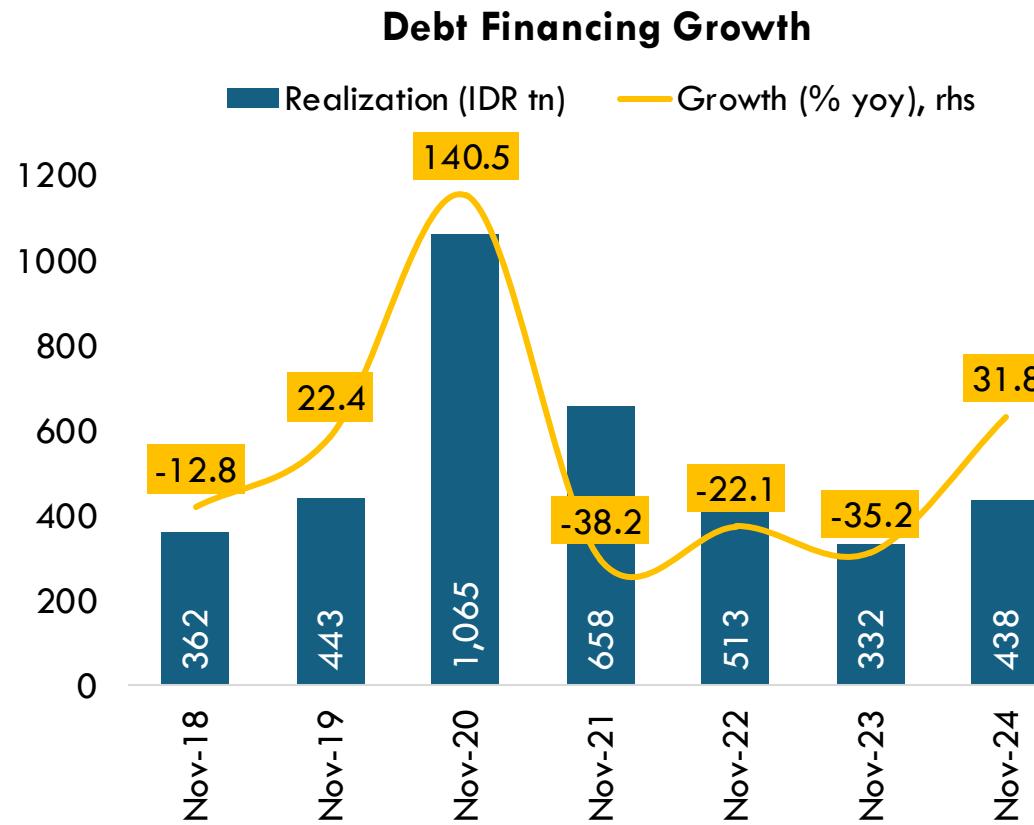

## Social Assistance Realization to Budget

# Government Financing

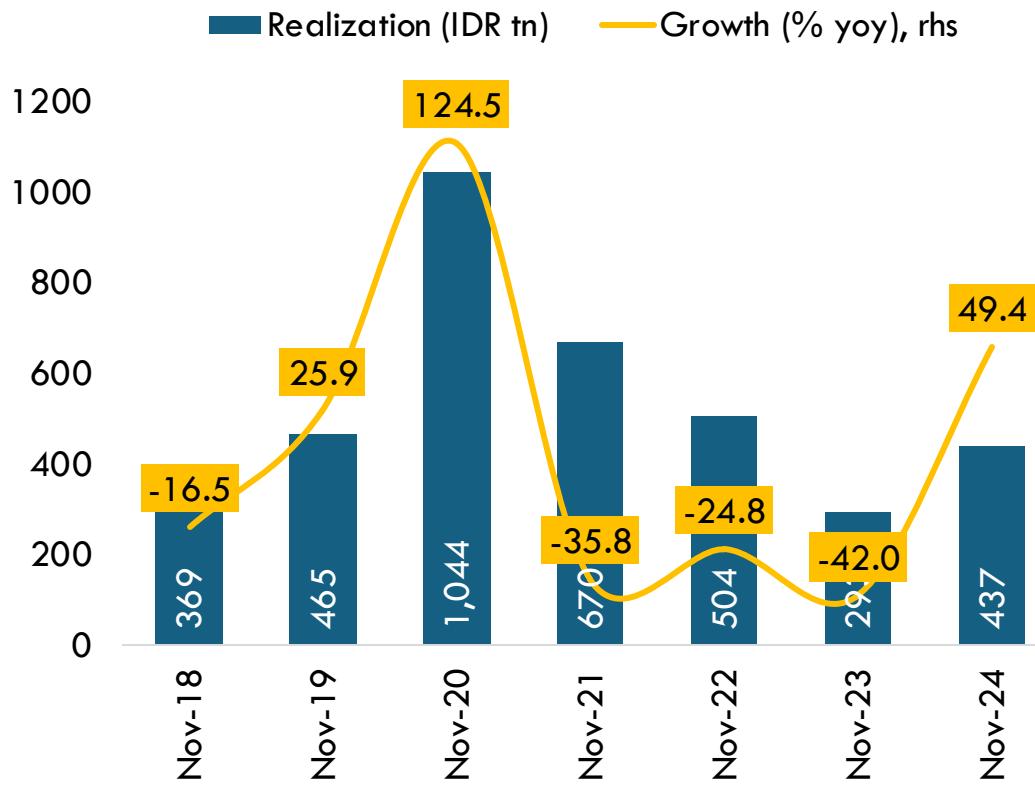

Budget financing reached 67.6% of the target, still relatively well-maintained as the government optimized other financing source (SAL)

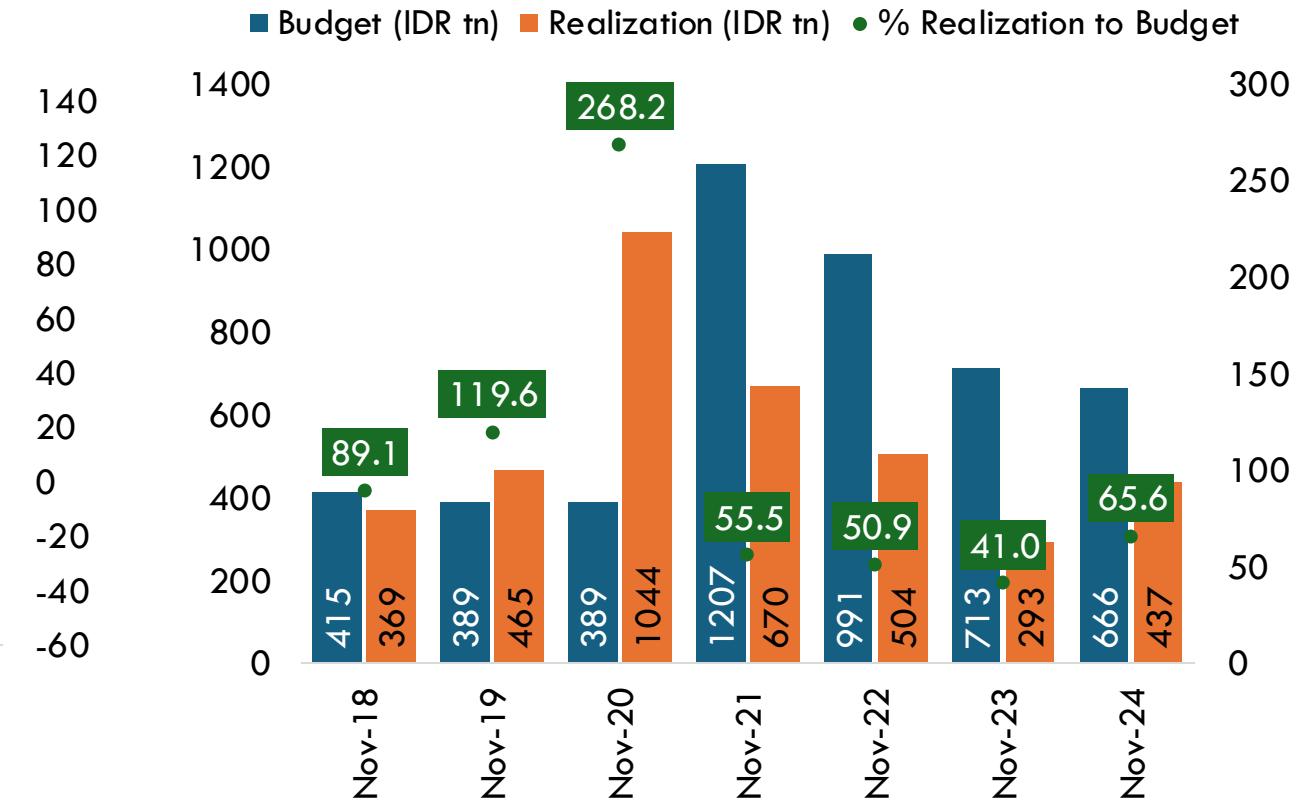

# Bond Securities Financing

**Bond issuance increased around 49.4% yoy, edged higher than previous year which was only IDR293 tn, driven by higher tax revenue**

**Government Securities (Nett) Growth**

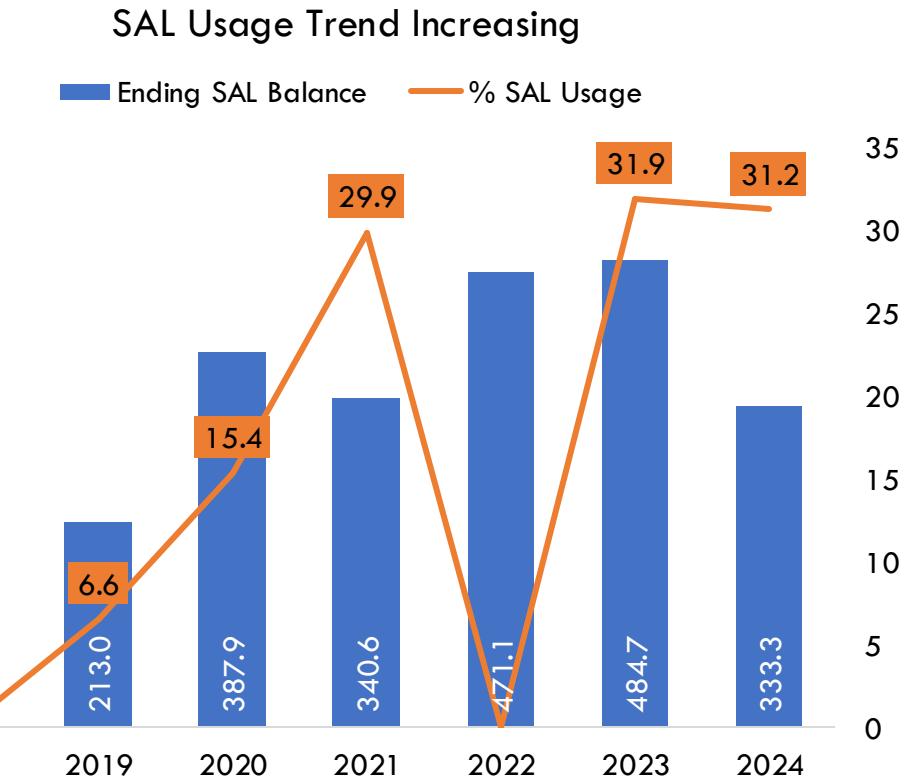

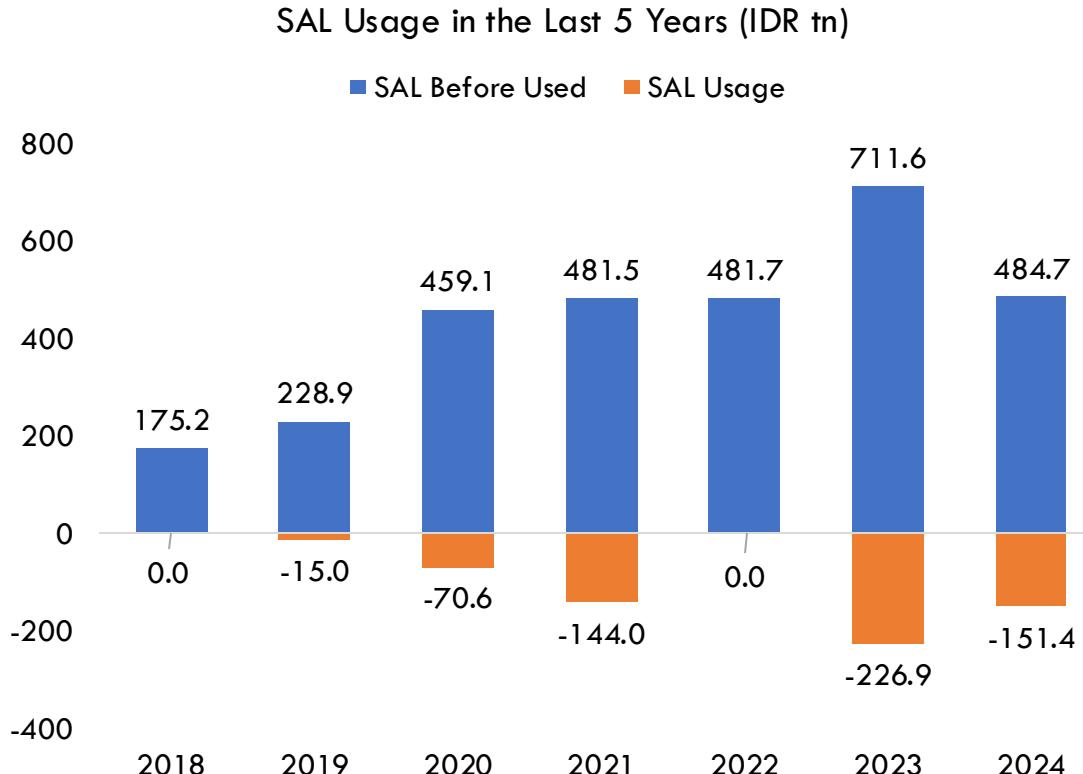

**Government Securities (Nett) % Realization**

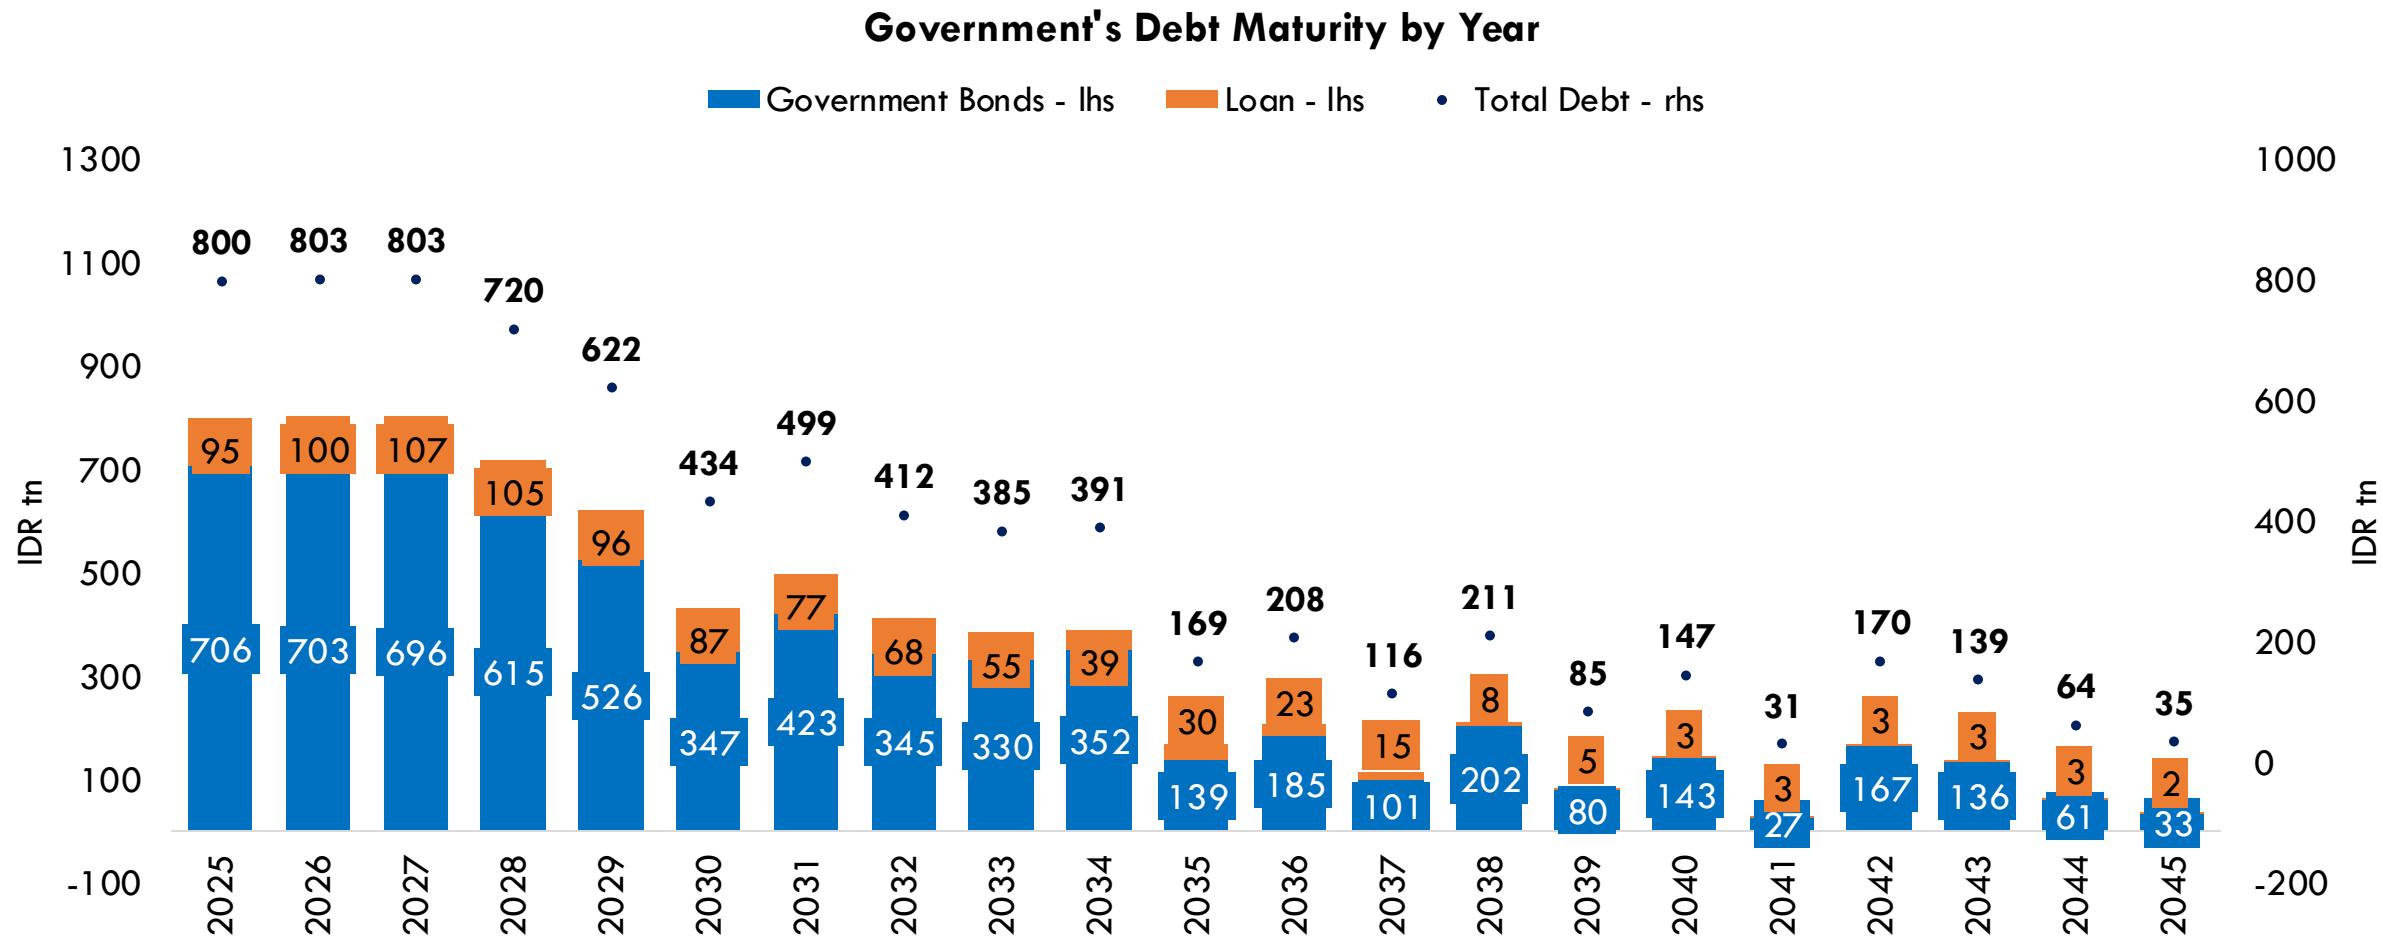

# Excess Budget Financing

The trend of SAL use is increasing, in line with the government's efforts to maintain the financing burden through bonds

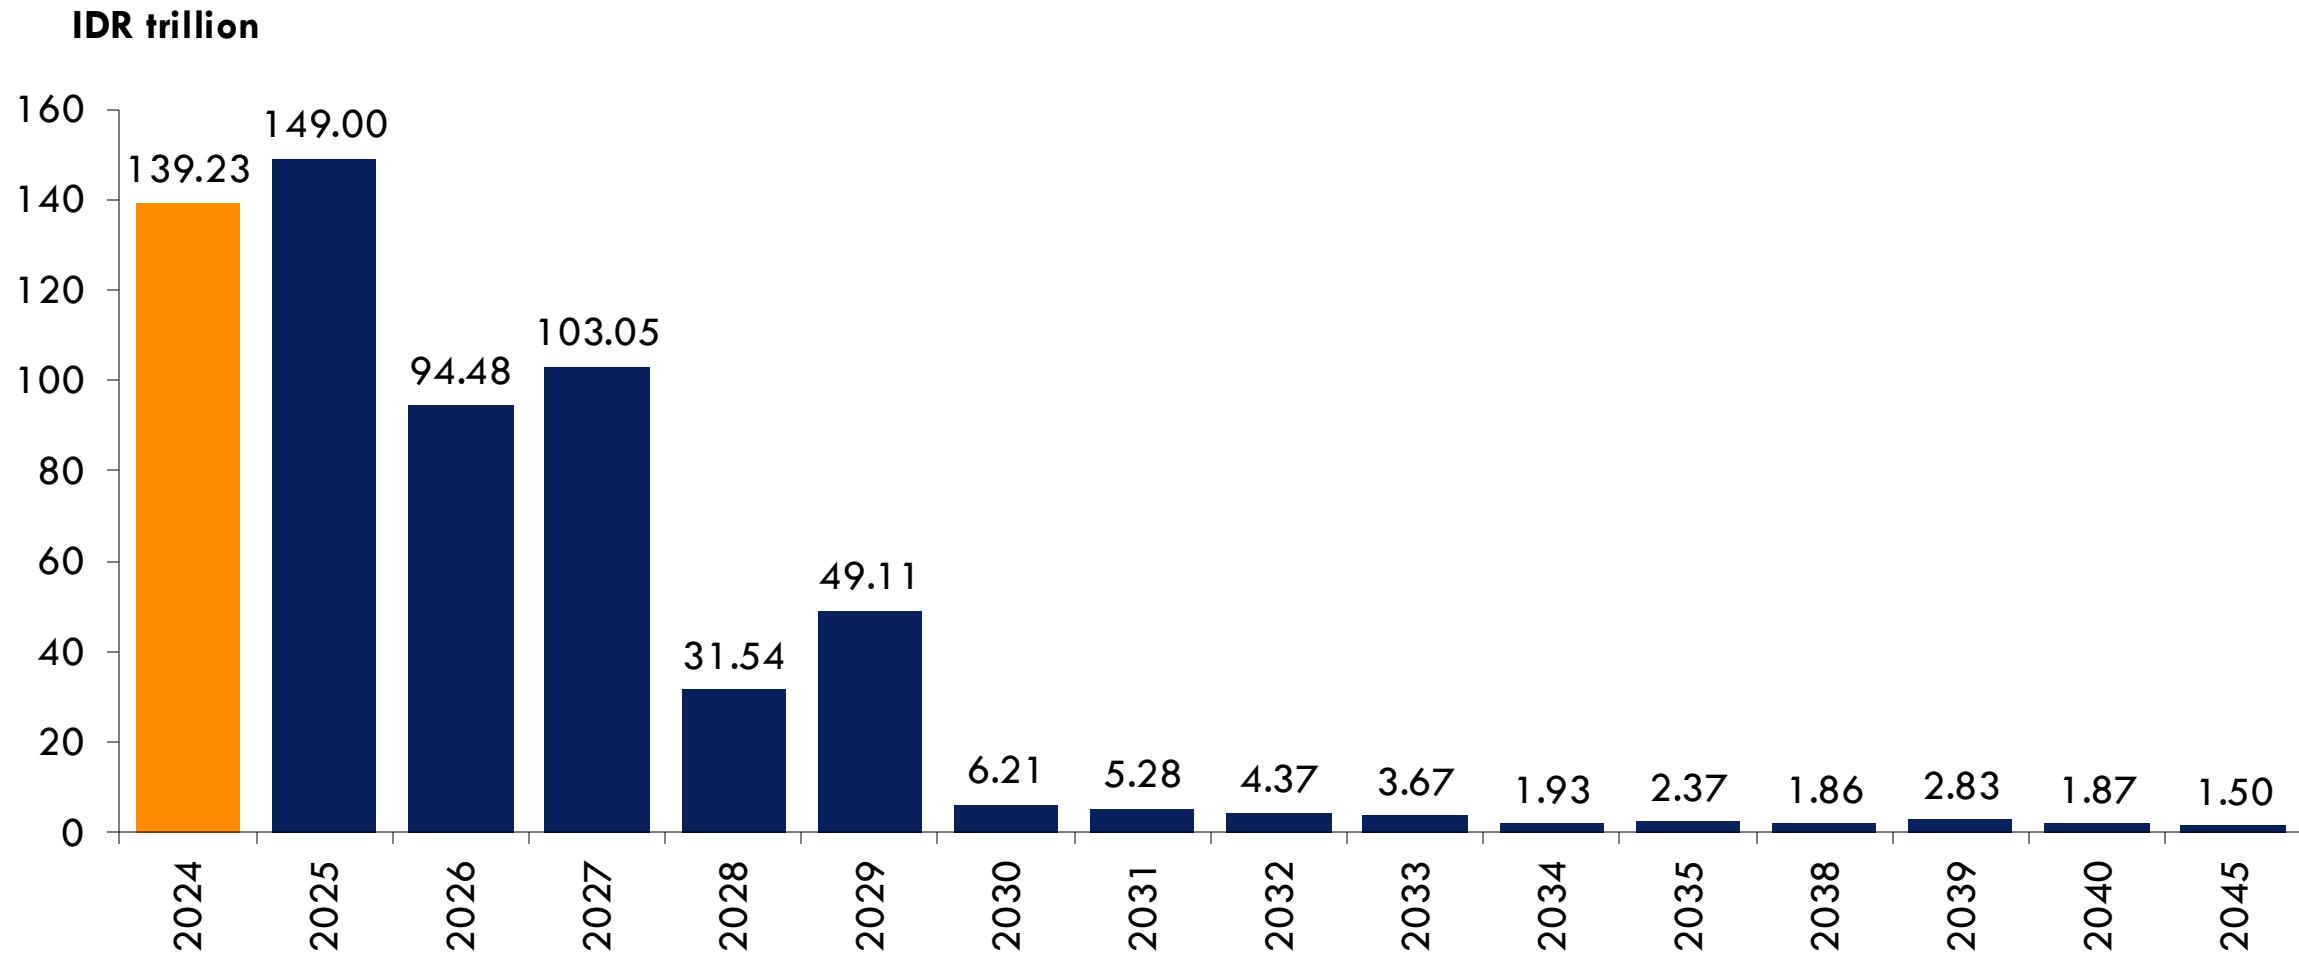

# 2025 Budget Challenge: Higher Debt Maturity in 2025

Indonesia's government debt maturity in 2025 reach IDR 800 tn

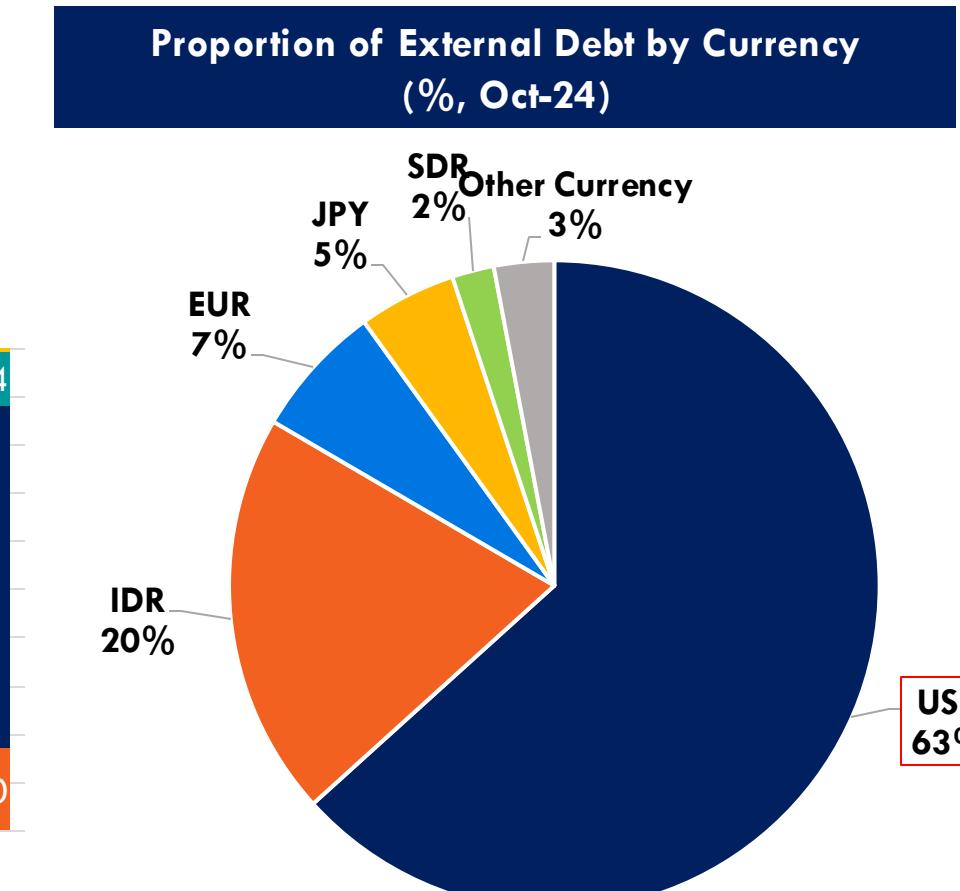

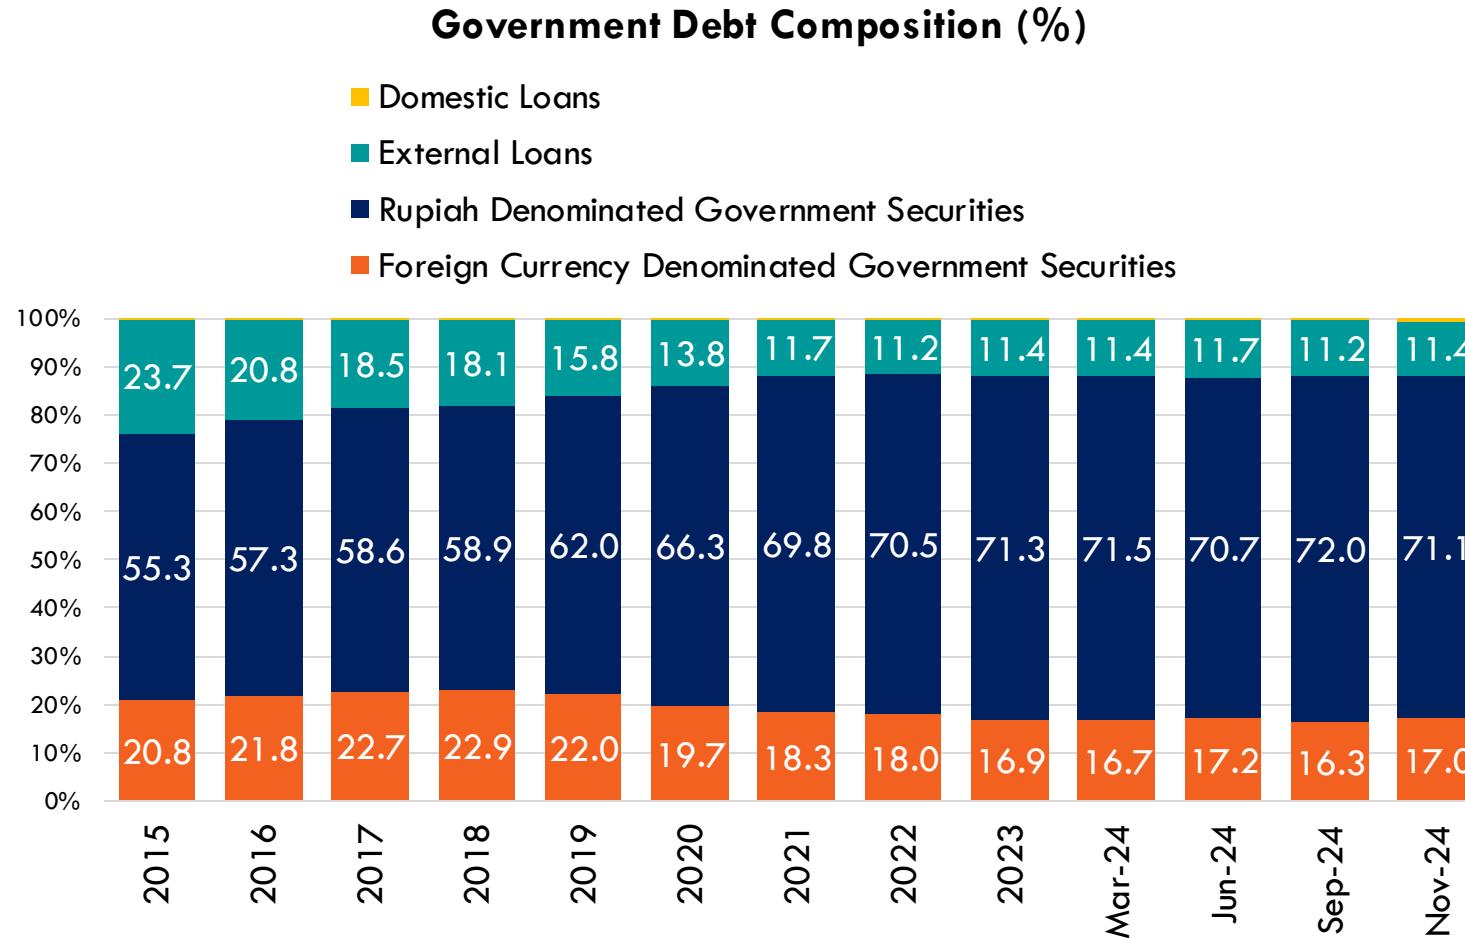

# Long-Term Corporate IDR Bond Maturity

Bond maturity expected to decline in the next 5 years, easing policy rate will encourage lower bond yield

# Indonesia's Government Debt by Type

The portion of foreign bonds increased, while rupiah-denominated remained stable at around 70% of the total government debt position

# Government Debt to GDP Ratio in Several Countries

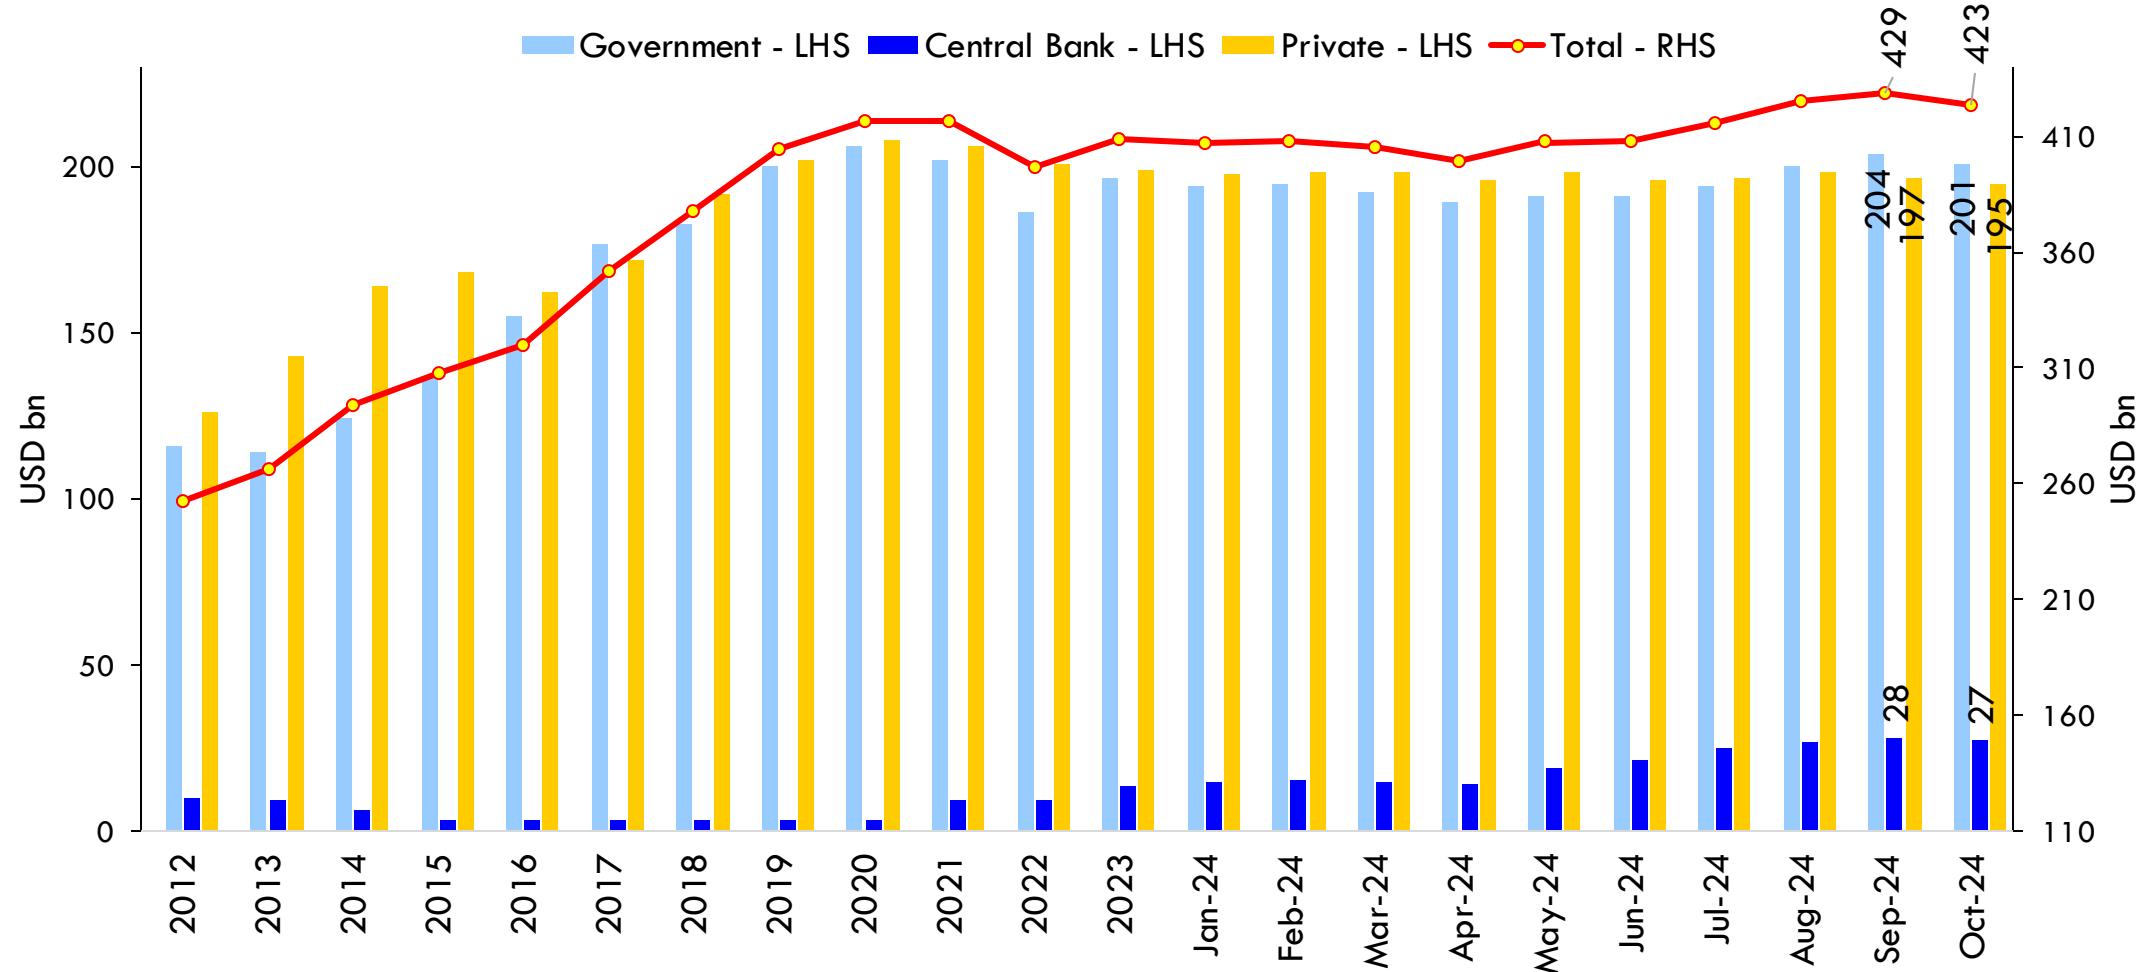

Indonesia's government debt to GDP is relatively lower than other countries
