The Risk Management structure at Bank Mandiri consists of the Risk Management Directorate in charge of Independent Risk Management and Credit Approval Risk units comprising Wholesale Risk and Retail Risk. The Risk Management Directorate is led by the Director of Risk Management assisted by SEVP of Wholesale Risk.

2. Policies and Procedures

The Risk Management Policy (KMNR) is set as the main guidelines on the implementation of risk management at the operational level and the capital management at the Bank covering :

- a. Prudential Principle, which entails capital adequacy, fulfillment of prevailing laws and regulations, and an early warning system.
- b. Risk Management, which entails Risk Appetite, Risk Profile, Bank Soundness Rating, Stress Testing, Recovery Plan, and Resolution Plan, as well as Integrated Risk Management.
- c. Risk Management for each type of risks, which entails processes of risk identification, measurement, oversight, and control.

- d. Risk Oversight, which entails monitoring of activities/ methodologies of risk management at Bank Mandiri, and the Internal Control System.

This Risk Management Policy is the basis for making procedures and technical guidelines concerning risk management at Bank Mandiri.

3. System & Data

The risk management system is developed to support more efficient business processes so that decision-making is faster yet prudent. To maintain integrity and data quality, Bank Mandiri has adopted an Integrated Processing System and a Loan Origination System to increase the efficiency of credit processes and maintain data quality in the Corporate, Commercial, and Retail segments. To increase collection productivity level particularly in the Consumer and Retail segments, the Bank adopts an Integrated Collection System. Bank Mandiri utilizes Summit System and New Core Treasury System (NTCS) to manage risks in the trading book and Fundamental Review of the Trading Book (FRTB) and Ambit Focus System to manage banking book risks in the activities of treasury and assets & liabilities management.

To assess the Risk Profile and the Soundness Level of Mandiri Group at individual and consolidated/ integrated levels, the Bank has adopted a web-based tool called Risk Assessment Consolidation Generator System (RACER) so that the risk assessment processes are more effective, efficient, accurate, and accountable and that the authorized access to the system is maintained.

4. Methods/Model & Analytics

Bank Mandiri has continuously implemented a risk measurement that adheres to international best practices by using quantitative and qualitative methods and developing risk models such as rating, scoring, Value at Risk (VaR), portfolio management, stress testing, and others as support for judgmental decision-making.

RISK AWARENESS PROGRAM

Periodically, available models are validated by an independent Unit Model Validator to ensure the quality and validity of such models. These risk models are managed through a model risk management framework inherent in the function of the Model Governance Guiding Unit. The management of model risk is done to ensure control over every component in the model used in business processes and decision-making. This model management framework includes:

a. Model Inventory

Through the model inventory, an inventory of the existing models is carried out at Bank Mandiri. This model inventory includes information related to the model including a description of the model's statistical results, the purpose of using the model, model owner, model developer, model user, validation results, and model-related documentation. In addition, in the model inventory system, we will be able to identify if a model is in a certain model cycle according to the Model Lifecycle, including model initiation, model development, model validation, model implementation, model use and model monitoring.

b. Model Risk Assessment

An assessment of the level of risk of the models based on quantifiable observations about the materiality and complexity of the models.

c. Model Control

The process of monitoring of models and control over models constitutes a continuous assessment. The control process is done by validating models based on first-time validation or ongoing validation. The first-time validation is validation conducted for the first time after the model development process takes place to ensure that the developed models adhere to academic requirements, best practices, and regulatory requirements. The ongoing validation is validation conducted periodically to ensure the performance of models.

With the adoption of the model management framework, there is a segregation of duties between the first line (model owner, model developer, and model user), the second line (model validator and model management guiding unit), and the third line (Internal Audit) based on three-line models.

Bank Mandiri also continues to implement Basel II, III, and ERM in compliance with the Financial Services Authority and the BCBS (Basel Committee on Banking Supervision) as well as the best practices, which cover Credit Risk, Market Risk, Liquidity Risk, Interest Rate Risk on Banking Book Position, Operational Risk, Capital Management, and Internal Capital Adequacy Assessment Process (ICAAP), as well as Stress Testing and Recovery Plan.

TYPES OF RISKS AND ITS MITIGATIONS

There are 10 (ten) types of risks managed by Bank Mandiri in an integrated manner:

1. Credit Risk
2. Market Risk
3. Liquidity Risk
4. Operational Risk
5. Legal Risk
6. Reputation Risk
7. Strategic Risk
8. Compliance Risk
9. Intra-Group Transaction Risk
10. Insurance Risk

CREDIT RISK MANAGEMENT

Credit risk management and mitigation are carried out at every stage of lending. Bank Mandiri's credit risk management process for the Wholesale segment begins with determining the target market referring to the Loan Portfolio Guideline, which categorizes the industrial sector into an Industry Classification (attractive, neutral, selective, vigilant) based on the outlook and portfolio quality, and Industry Limit which aims at minimizing the credit risk concentration in a particular sector.

Furthermore, in order to obtain a list of qualified and prospective pipeline, a pre-approval process is carried out through a number of stages using credit risk tools. These stages include the Clearance process which includes an initial analysis of targeted customers which includes reputation, business, finance which is then followed by a credit risk assessment by taking into account ratings, financial conditions, analysis of prospective borrowers, etc. The results of this assessment are then decided by the Credit Approval Authority with a four-eye principle involving the Business Unit and Credit Risk Management Unit independently.

Following the credit disbursement process, regular monitoring (early warning signal) is carried out to detect early borrowers that have the potential to become non-performing; hence an appropriate action plan can be prepared, including collection, recovery and restructuring activities.

In the Retail segment, as it is a mass market, the credit process is carried out more automatically using a credit risk scorecard, by referring to the Risk Acceptance Criteria of each product, and processed through an automated

work-flow (loan factory). The monitoring process is carried out on a portfolio basis through Portfolio Quality Review, which can be continued with the collection and recovery process for non-performing portfolios.

To anticipate the deterioration of macroeconomic conditions, a what-if analysis of wholesale and retail portfolios is carried out through a process of stress testing and sensitivity analysis using certain macroeconomic scenarios.

In disbursing its loans, Bank Mandiri always prioritizes the prudential principle by placing a credit analysis function carried out by independent business units and credit risk units. Bank Mandiri is always guided by the Credit Policy (KPKD) in managing credit risk end-to-end. Operationally, this policy is stated in the form of Credit Standard Procedures (SPK) and Product Manuals.

In carrying out credit concentration risk management at the borrower level, Bank Mandiri consistently monitors the Legal Lending Limit (LLL) and the application of Management Limit and for large business groups. In general, the credit process and credit risk management at Bank Mandiri have been carried out end-to-end and integrated by the Business Unit, Credit Operation Unit and Credit Risk Management Unit.

The Bank periodically reviews and improves credit policies in general, credit procedures per business segment and risk management tools. The work guidelines provide complete credit risk management instructions, to identify risks, measure and mitigate risks in the end-to-end credit process starting from determining the target market, credit analysis, approval, documentation, credit withdrawal, monitoring/supervision, to the process of resolving/restructuring non-performing loans.

To increase the Bank's social role and concern for environmental risks and in applying the principle of responsibility in Good Corporate Governance, Bank Mandiri has integrated Environmental, Social and Governance (ESG) aspects into the Industry Acceptance Criteria Technical Guidelines which are used to select qualified prospective debtors and prospective debtors who have applied ESG principles in their business activities. This is in line with the Financial Services Authority Regulation No.40/POJK.03/2019 concerning Asset Quality Assessment of Commercial Banks which stipulates that the assessment

TYPES OF RISKS AND ITS MITIGATIONS

of the debtor's business prospects also considers the debtor's efforts in maintaining the environment. In addition, in order to maintain the environment, the Bank has prepared a Sustainable Finance Action Plan as stipulated in the Financial Services Authority Regulation on the Application of Sustainable Finance for Financial Service Institutions, Issuers and Public Company.

In principle, credit risk management is applied at the transactional level as well as the portfolio level. At the transactional level, a four-eyes principle is applied, namely every credit approval involves the Business Unit and Credit Risk Management Unit independently to obtain an objective decision. The four-eyes principle mechanism is carried out by the Credit Committee in accordance with the limit of authority with the credit approval process carried out through the Credit Committee Meeting mechanism.

Credit risk from borrowers and products has been covered and reserved through impairment losses provision, which is currently calculated based on PSAK 71 as of 1 January 2020, and monitored through indicator cost of credit.

Throughout 2023, the Bank continued to conduct regular monitoring of the portfolio of debtors affected by the Covid-19 pandemic. The outstanding balance of the Covid-19 restructuring portfolio in December 2023 has improved significantly to Rp17.2 trillion compared to December 2022 of Rp35.9 trillion. This decrease is the result of debtors making normal payments as before the pandemic so that the Covid-19 restructuring flag can be removed and also due to the repayment of credit facilities.

OJK through the decision of the Board of Commissioners No. 34/KDK.03/2022 determined new criteria for the extension of Covid-19 restructuring which regulates the granting of a stricter extension of Covid-19 restructuring. This has the potential to increase NPL if not managed properly. Bankwide's NPL (Excluding Bank) percentage has been successfully reduced from 1.88% as of December 2022 to 1.02% as of December 2023. This NPL improvement is supported by the optimization of efforts to upgrade collectibility and collection for NPL debtors throughout 2023. In the aspect of LAR Including Covid-19, the Bank has also succeeded in reducing LAR Including Covid-19 from 12.10% as of December 2022 to 8.74% as of December 2023 as a result of declining NPLs and Covid-19 restructuring portfolio. Going forward in 2024, the Bank projects NPLs to remain stable with a tendency to improve.

MARKET RISK MANAGEMENT

Market risk management is carried out by an independent unit by implementing the segregation of duties principle, the separation of functions and responsibilities consisting of the front office, middle office, and back office. The Market Risk Management Organization comprises two parts, namely Market Risk Management – Trading Book and Market Risk Management – Banking Book.

The framework for and governance of market risk management at Bank Mandiri consist of:

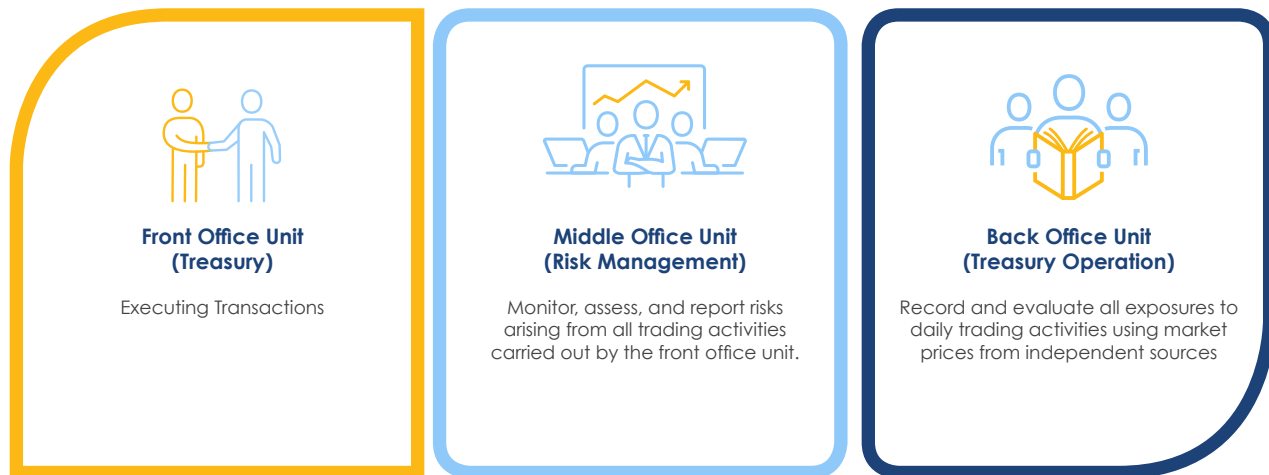

1. The Board of Commissioners, who are responsible for market risk oversight through the Risk Monitoring Committee, Integrated Governance Committee, and Audit Committee.
2. Directors, who are responsible for the risk policy function through the Executive Committee with respect to market risk management and recovery plan, the Assets & Liability Committee, and Risk Management and Credit Policy Committee.
3. Risk Management Unit together with the business units and compliance unit, who perform risk identification, risk calculation, risk monitoring, and risk control.

The Risk Management Framework of Bank Mandiri is developed based on internal and external factors including but are not limited to the Bank's business, regulatory provisions, development of methodologies and best practices, as well as risk data. The authority and responsibilities regarding the implementation of risk management are regulated in the Risk Management Policy (RMP). Meanwhile, the guidelines on market risk management in both the trading book portfolio and banking book are outlined in the Standard Treasury Procedure (STP) and the Standard Asset & Liability Procedure Management (SALPM).

Management and Mechanism of Market Risk Measurement – Trading Book

Trading book market risk is a risk arising from potential losses due to trading book activities, changes in interest rates, and exchange rates (including derivative instruments). Bank Mandiri's market risk management is carried out by applying the segregation of duties principle, i.e. separating functions and responsibilities of the treasury unit trade transactions, which consist of:

TYPES OF RISKS AND ITS MITIGATIONS

The measurement of trading book risk is done according to regulatory provisions and some internal indicators, which include Value at Risk, sensitivity simulation, and stress testing. Monitoring is conducted by implementing some types of transaction limits at the dealer level to ensure exposures from Treasury transactions remain consistent with the risk appetite set by the management.

Management and Mechanism of Market Risk Measurement – Banking Book

The banking book market risk is a risk that arises because of changes in interest rates and exchange rates for banking book activities that can affect the Bank's profitability (earning perspective) and the economic value of Bank capital (economic value perspective). The management of Bank Mandiri's banking book market risk is done by optimizing the balance sheet structure to obtain maximum returns per the level of acceptable risk. It is also done by setting a limit that is in accordance with internal provisions and the applicable laws and regulations, which is monitored periodically by the relevant work unit.

LIQUIDITY RISK MANAGEMENT

Liquidity risk is arising from the Bank's inability to fulfill due obligations using cash flow financing and/or high-quality collateral liquid assets without disrupting the Bank's activities and financial conditions.

Liquidity risk can be divided into two categories:

1. Funding Liquidity Risk, which is a risk caused by the Bank's inability to liquidate its assets or secure funding from other sources. The inability to secure cash flow financing that causes liquidity risk can be explained by (1) the Bank's inability to generate cash flow from productive assets or asset liquidation including liquid assets; and/or (2) the Bank's inability to generate cash flow from funding, interbank transactions, and received loans.
2. Market Liquidity Risk, which is a risk caused by the Bank's inability to close out certain positions at a market price due to inadequate market liquidity conditions or disruptions in the market.

TYPES OF RISKS AND ITS MITIGATIONS

Liquidity Risk Management is carried out in the following 4 (four) stages:

1. Identification, to determine risk and sources of liquidity risk and the problems it poses so that it may be controlled and mitigated. The identification of liquidity risk can be conducted by identifying balance sheet components and administrative account components that may affect the Bank's liquidity and identifying market parameters such as crises and other things.
2. Measurement, to measure liquidity risk, which is done using 2 (two) approaches, namely (1) Nominal Stock-Based (Liquidity Ratio) which entails the use of various financial ratios as an indicator of the level of liquidity risk and (2) Flow-Based (Liquidity Gap Analysis).
3. Monitoring, which is conducted using a limit system to monitor the indicators of liquidity risk.
4. Control, which is an activity that aims to minimize the impact of liquidity risk by considering the level of income earned.

Tools and Method

Bank Mandiri manages liquidity risk by measuring the liquidity risk using some indicators, such as primary reserve ratio (minimum statutory reserves and Cash ratio), secondary reserve (liquidity reserves), Macprudential Intermediation Ratio (MIR), Liquidity Coverage Ratio (LCR), and Net Stable Funding Ratio (NSFR).

To manage liquidity risk in a measured and comprehensive manner, Bank Mandiri implements the following strategies:

1. Determine limits that refer to internal provisions and regulatory provisions.
2. Perform periodic liquidity risk stress testing to determine the impact of changes in market factors and internal factors in extreme conditions (crises) on liquidity conditions.
3. Arrange and conduct a periodic review of the Liquidity Contingency Plan (LCP) and Recovery Plan that regulate the Company's procedure for handling worsening liquidity conditions including alternative financing strategies such as sale/purchase of FX, Money Market instruments, and Interbank Securities Repo, Government Bond sale, and the use of Standing Facility and repo of the Bank Indonesia. The determination of liquidity conditions and financing strategies in the LCP and Recovery Plan has considered internal and external conditions.

4. Monitor external indicators such as Jakarta Interbank Offered Rate (JIBOR), USD Interbank, Rupiah interest rate, yield from SUN and UST with a 10-year tenor, Outstanding IDR banking liquidity, USD/IDR exchange rate, credit spread of default swaps (CDS), Composite Stock Price Index (CSPI), as well as current market information. This monitoring aims to increase awareness of less stable economic conditions, either due to a global crisis or various domestic issues.

Liquidity Adequacy Ratio

Bank Mandiri's liquidity adequacy can be identified through Liquidity Coverage Ratio, Net Stable Funding Ratio, Macprudential Intermediation Ratio (MIR), and Liquidity Reserves. The Liquidity Coverage Ratio (LCR) is a ratio of High-Quality Liquid Assets (HQLA) to the estimated net cash outflow within the next 30 (thirty) days in a crisis scenario. The LCR aims to improve the short-term liquidity of a bank during a crisis. In December 2023, Bank Mandiri's LCR reached 176.24% (Bank Only) and 169.58% (consolidated), above the minimum LCR fulfillment target set by the Regulator which was 100%.

Another indicator used by Bank Mandiri to determine liquidity adequacy is the Net Stable Funding Ratio (NSFR). The Net Stable Funding Ratio (NSFR) is a ratio of available stable funding to required stable funding. As of December 2023, Bank Mandiri's NSFR reached 116.59% (Bank Only) and 118.07% (consolidated), above the minimum NSFR fulfillment target set by the Regulator which was 100%.

The Macprudential Intermediation Ratio (MIR) is a ratio of distributed credit and corporate commercial paper fulfilling certain requirements and are owned by the bank to third-party funds, commercial paper fulfilling certain requirements issued by the bank, and loans fulfilling certain requirements received by the bank. As of December 2023, Bank Mandiri's RIM (Bank Only) reached 83.73%.

In addition, Bank Mandiri has liquidity reserves, which serve as a liquid asset above minimum statutory reserves that are used to meet unscheduled liquidity needs. In managing its liquidity reserves, Bank Mandiri sets a limitation in the form of safety level, which is a projection of liquidity reserves for the next 1 (one) month. As of December 2023, the Bank's liquidity reserves were above the safety level.

TYPES OF RISKS AND ITS MITIGATIONS

RISK OPERATIONAL MANAGEMENT

An operational risk arises from the inadequacy and/or malfunction in internal processes, human error, system failure, and/or external events that affect the Bank's operations. Operational risks can lead to the onset of other risks such as reputational risk, strategic risk, legal risk, market risk, credit risk, compliance risk, and liquidity risk. Effective and consistent operational risk management is important to minimize the emergence of those other risks.

Operational risks are inherent to every product/activity/operational process of the Bank as part of its business activities. The risks are also the responsibility of every person within the Bank. Risk & Control Owner have the primary responsibility to carry out an optimal operational risk management to minimize this risk.

In developing an Operational Risk Management Strategy, the Bank applies the following principles:

1. Long-term oriented to ensure the Bank's business continuity, by maintaining the Bank's risk exposure managed in a controlled manner in accordance with the Bank's internal regulations, as well as prevailing laws and regulations and other stipulations.

2. Comprehensive and extensive in all parts of the Bank, and remains focused on material and or significant risks and the most effective mitigation processes.
3. Proactive in identifying and detecting potential control weaknesses and the occurrence of risks hence risks can always be minimized.
4. Comply with the provisions for the fulfillment of capital adequacy operational risks in accordance with regulations and the development of risks appetite.

Operational risk management is implemented through layered lines of defense where each line of defense has its own role and method in countering operational risks based on the principle of combined assurance hence a balance between risk & reward is also achieved.

The Risk & Control Owner is fully responsible for the risks and the implementation of daily internal controls to ensure that existing risks are mitigated, including making continuous improvements to existing control designs in accordance with process changes.

To ensure effective operational risk management, the process is carried out in four stages:

TYPES OF RISKS AND ITS MITIGATIONS

1. Identification – a process to identify potential inherent risks to a product/activity/process, taking into account internal and external factors, such as data of operational risk incidents, regulatory changes, and audit findings. This stage includes identifying risk mitigation and control measures.
2. Assessment, which is the process of evaluating by considering the potential impact and likelihood of a risk can inherently occur. This aims to find out which risks are more material/significant compared to others to ensure more focused control measures can be prepared. In addition, an assessment is also carried out on quantitative control through control testing activities to determine whether the control design regulated in the prevailing regulations at the bank has been effectively implemented (operating effectiveness) and or can still be effectively used (design effectiveness). The assessment produces a residual risk value which is the risk value after considering the controls.
3. Monitoring – a process to monitor risks that have been identified and assessed for their likelihood. Risk monitoring is carried out at all times in every work unit and by its members. The activity follows a hierarchy and is done collectively, including by the unit's head, adhering to the applicable procedures. Monitoring activities include the early warning systems in existing tools/reporting.
4. Risk Control/Mitigation, which is a process to control and mitigate before a risk event occurs through the implementation of adequate and consistent control procedures, as well as implementing follow-up actions plans on control weaknesses found (thereby potential risks occur) in the monitoring process and follow-up on incidents. The purpose of this process is to ensure that residual risk to the Bank is kept to a minimum. Controls must be consistently implemented according to existing control designs but must also be continuously reviewed to ensure existing control designs are still effective for mitigation of emerging risks.

Operational Risk Management Tools

To enable work units in implementing operational risk management, the Bank provides the following risk management tools:

1. Risk & Control Self-Assessment (RCSA)

RCSA is a register of key risks and control measures that inform risk-based control testing to identify potential weaknesses as early on as possible. The tool allows its user to maintain minimum level of residual risks and to take necessary mitigation measures.

2. Loss Event Database (LED)

A database of operational risk incidents that are recorded on a risk-based approach with the aim of being lesson learned, monitoring follow-up remediation and future improvements, and as one of the components of the calculation of operational risk capital (regulatory capital charge) of the Standardized Approach (SA) method.

3. Key Indicator (KI)

KI contains key risk indicators (KRIs) and Key Control Indicators (KCI) and serves as an early warning signal that encourages early control actions to be undertaken.

4. Issue & Action Management (IAM)

IAM is a tool to monitor if known issues are follow-up using a range of activities, such as control testing, incidents, key indicators, and self-identified issues.

5. Capital Modelling

A tool to calculate regulatory capital charge in accordance to applicable regulations and as part of operational risk mitigation.

To improve its operational risk management effectiveness, the Bank has developed an integrated Operational Risk Management System that covers all of the tools above. The system is also implemented in all work units at the head office and regions.

The output of operational risk management activities is an Operational Risk Profile Report that describes operational risk exposure. The report is submitted periodically to the Bank's Board of Commissioners and Board of Directors, and supports the boards' active role in operational risk management. The report also informs the Bank's risk management report to regulators as part of Risk-Based Bank Rating (RBBR) in accordance with applicable provisions.

TYPES OF RISKS AND ITS MITIGATIONS

Operational Risk Management Organization

Operational risk management is carried out by all of the Bank's elements, including the Board of Directors with active supervision from the Board of Commissioners. The Boards understand existing risks and have a key role in supporting and overseeing risk management activities at the operational unit level.

The operational risk management organization and their duties and responsibilities are:

1. Risk Management & Credit Policy Committee (RMPC)
RMPC leads the preparation, adjustment/ improvement of risk management and credit policies. RMPC's membership, duties, and authority are stipulated in a Board of Directors' Decision on RMPC.
2. Director Tasked with Risk Management Function
The duties, responsibilities, and authority of the Director with Risk Management Function as set out in the Risk Management Policy.
3. Internal Audit Unit
IAU carries out independent assurance function to ensure that all operational defense lines are functioning effectively and properly.
4. Work Unit on Operational Risk Management Development (Bankwide/Enterprise)
A unit that is responsible to formulate and disseminate policies, strategies, frameworks, and operational risk management tools.
5. Operational Risk Management Unit (Senior Operational Risk by Business Area)
A unit (attached to a business area) that is responsible for implementing operational risk management policies, strategies, frameworks and tools in collaboration with the Risk & Control Owner.
6. Risk & Control Owner
A unit that is fully responsible for operational risk management and ensuring the effectiveness and compliance of control measures in every operational activity. A Risk & Control Owner maintains the Bank's operational risk appetite at a level that has been identified, thereby allowing the Bank to achieve its goals and keep an optimal level of regulatory capital charge.

LEGAL RISK MANAGEMENT

Legal risk is a type of risk encountered by Bank Mandiri as a result of lawsuits, both carried out by internal and external parties and/or the discovery of weaknesses from juridical aspects, such as the absence of supporting laws and regulations, weaknesses in engagement such as non-fulfillment of valid contract conditions, or imperfect binding of collateral.

The legal risk management organization is carried out by the Legal unit at the Head Office by carrying out functions, duties and responsibilities related to regulatory, advisory, litigation, advocacy and legal assistance, education and transformation in the legal aspect, as well as the Bank's legal risk management.

In carrying out these functions, duties and responsibilities, the Legal unit at the Head Office coordinates with the Legal Unit in the Work Unit and in the Region. The Legal Unit of the Head Office is the supervisor of the system and supervises the Legal Unit in the Work Unit and the Legal Unit in the Region.

Risk management mechanisms that include the process of identifying, measuring, controlling and monitoring refer to the applicable provisions regarding risk management. Each work unit of the owner and/or product administrator or activity operator must identify and manage risks to the maximum including but not limited to legal risks that are basically attached to every product or activity made or carried out by the Company, thereby the inherent legal risks do not have a broad impact and trigger the emergence of other risks including but not limited to reputational risks.

Bank Mandiri's preventive and repressive legal risk management is sufficient to protect its legal interests and minimize the significant financial impact on the Bank, as reflected in the 2023 Legal Risk Profile Report which is at Low rating.

TYPES OF RISKS AND ITS MITIGATIONS

REPUTATIONAL RISK MANAGEMENT

Reputational risk arises as a result of declining stakeholder trust due to negative sentiments surrounding the Bank.

Reputational risk is managed via monitoring, supervision, handling, and settlement coordinated by the Corporate Secretary with support from relevant work units, such as Customer Care, Legal, Retail Product & Fraud Risk Management, IT Application Development & IT Application Support, and Business Continuity Management. The management of reputational risk follows internal provisions and applicable laws. In its implementation, reputational risk management is done by creating positive images via conventional media and positive content on social media.

The Mechanism for Managing Reputational Risk

Reputational risk is managed via monitoring, supervision, handling, and settlement coordinated by the Corporate Secretary Group which follow the provisions of the Corporate Secretary Standard Guidelines. Based on the Guidelines, there are 4 (four) stages of reputational risk management, namely identification, measurement, monitoring, and control of risk. The realization of those four stages can be seen in each activity performed by the Corporate Secretary handling reputational risk, such as the Bank's activity as a public company.

Based on that activity, reputational risk in its several forms is evident, such as lateness, errors, and incongruency in report submission caused by individuals who are not aware of or do not understand the principle of disclosure of information or negligence by supervisors. To mitigate that, the Company may take risk mitigation steps such as providing a list of mandatory information for disclosure and/or encouraging supervisors to check and recheck the work.

Should the reputational risk happen and lead to a negative perception of the Company, an action to minimize the ruin caused by such reputational risk can be taken. One action would be to commission positive articles for printed media, online media, or electronic media as well as positive content for social media to counter the negative perception that has taken shape. These positive articles can be based on business and social activities of the Company or the Company's support of government programs per the Corporate Secretary Standard Guidelines.

Implementation of Reputational Risk Management

One approach to managing reputational risk taken by the Company is ensuring that all work units perform their functions well and follow the applicable regulatory provisions. If there is a mistake that potentially affects the reputational aspect of the main duties and functions of a certain work unit, the work unit must provide detailed information to the Corporate Secretary Group immediately so the risk can be managed and its impact minimized.

At present, Bank Mandiri operates internal channels for handling complaints and questions from customers, such as branch offices, Call Center 14000, website, and the Company's official social media accounts. All complaints and questions are then forwarded to the Customer Care Group to be addressed and resolved. The Customer Care Group manages complaints and questions not only from internal channels but also from external sources such as printed media, online media, electronic media, and social media.

In doing its duties, the work unit of the Customer Care Group coordinates with the Corporate Secretary Group, especially in handling customer complaints from conventional media and social media.

The Corporate Secretary Group also monitors and evaluates various news items on print, online, and electronic media as well as social media periodically to measure the effectiveness of publications and communications of the Company. Next, the result of the monitoring and evaluation becomes a reference point to which media publications and communications are made in the next period to strengthen the Company's reputation continually.

For that purpose, the Corporate Secretary Group also performs a series of communications activities to bolster government programs such as the addressing of Job Creation Law to the public, Sovereign Wealth Fund Creation, and the Formation of a Government-Owned Sharia Bank. These are executed by inviting editors in chief and organizing other gatherings with several media groups.

In addition, the Corporate Secretary Group also prepares a series of communications activities involving state-owned enterprises to support the National Discount Festival

TYPES OF RISKS AND ITS MITIGATIONS

(NDF) that is part of the national program *Bangka Buat*an Indonesia (BBI). The Corporate Secretary Group manages schedules and the involvement of each state-owned enterprise in the NDF.

All those activities reflect the commitment of the Corporate Secretary Group to support the strengthening of the Company's reputation, especially in the main shareholders' perspective.

In the event of a crisis so massive that it erodes the Company's reputation as well as the trust placed by the Stakeholders, the Company will immediately implement an action plan to minimize ruin, for instance formulating problem-solving strategies, determining internal sources, and making a schedule for crisis management and conducting the overall evaluation.

STRATEGIC RISK MANAGEMENT

Strategic Risk Management Organization

The Bank has formed a Risk Management Committee and a Risk Management Work Unit that aim to support comprehensive, integrated, measured, and controlled risk management. Each committee is supported by a working group consisting of groups that are directly involved in the risk management issues handled by the said committee.

Strategic Risk Management Mechanism

The Bank's risk management is regulated by a bank risk management policy per the Bank of Indonesia Regulation (PBI), the Financial Services Authority Regulation (FSAR), Basel provisions, and international best practices. This policy is regularly reviewed to anticipate changes in business conditions, regulations, and the Bank's internal conditions.

In managing strategic risk, Bank Mandiri always reviews its performance and evaluates its business target planning and takes corrective steps in developing a strategic plan and business targets by considering internal and external conditions, if necessary.

The Implementation of Strategic Risk Management

Bank Mandiri's strategic direction is in line with the Corporate Plan prepared by taking into account the Bank's core competencies and considering business shifting patterns and people's behavior that switch to digital. In the midst of economic uncertainty, Bank Mandiri also needs to pay attention to profitability and quality of loan disbursement in order to mitigate future risks. As such, in addition to implementing initiatives according to the corporate plan, Bank Mandiri sharpens its business strategy with a focus on:

1. Foster prudent credit growth to potential industrial sectors in accordance with portfolio guidance by taking into account the potential, capacity, and capability of each segment. In addition, Bank Mandiri also manages the quality of its credit portfolio at the bank-wide, segment and product levels to achieve synergistic growth amidst the challenges of the political year and uncertainty in international economic and geo-political conditions.
2. Optimization of Fee Based Income as a driver of revenue, among others, through increasing e-channel productivity, recurring & transactional fee-based income, and intensification in the business ecosystem of existing customers and top players in each industry sector.
3. Control of operational costs and investment costs, namely through prioritization programs for the use of costs for OPEX and CAPEX strategic initiatives to ensure the added value received by the Bank, utilizing shifting customer behavior through digitalization of more scalable services and making continuous improvements in business processes, as well as focusing on increasing resource productivity supported by employee development programs in line with the company's spirit in digitizing and evaluating its effectiveness into productivity KPIs.

Measures and Plans in Anticipating Strategic Risk

In terms of anticipating the risk factors faced by Bank Mandiri, it is necessary to implement independent and prudent risk management but not limit the Company's business expansion process. Here are the strategic risk management strategies in 2024:

1. Review strategies regularly (through stress-tests and sensibility analysis) by considering external and internal factors to ensure the achievement of leading indicators in terms of revenue and costs for each financial indicator. One example is in order to maintain prudent credit expansion, the Bank focuses and selectively pays attention to industrial sectors that remain recording positive and sustainable growth while considering internal capabilities and resources in accordance with Bank Mandiri's Risk Acceptance Criteria, monitoring watch lists and high-risk debtors end to end for better credit management.
2. Regarding industry trends leading to digitalization, Bank Mandiri's Corporate Plan 2020-2024 has a focus on digitalization, namely to become Indonesia's #1 Modern Digital Bank and ensure the progress of IT projects can perform according to the timeline.

TYPES OF RISKS AND ITS MITIGATIONS

3. Controlling reserve formation (CKPN) by reviewing and maintaining the Coverage Ratio & Cost of Credit at an optimal level to anticipate deterioration in credit quality that has an impact on the Bank's performance.
4. The Bank focuses on maintaining and fostering sustainable CASA Ratio and CASA volume improvement to support credit expansion, by:
 - a. Optimizing the use of Kopra by Mandiri through the main operating account strategy (Kopra Portal and Kopra H2H) in capturing the entire customer transaction ecosystem.
 - b. Maintaining Cost of Fund (CoF) realization while paying attention to liquidity, maintaining current account growth through transactional solutions for Business and Corporate customers, and increasing savings market share through Livin' as an everyday financial app.
5. Capital growth derived from retained earnings (Tier-1) through optimization of revenue and overhead costs, as well as a more in-depth assessment of initiatives that have an impact on increasing productivity, providing added value, and are long-term.

To manage compliance risk, Bank Mandiri has established policies, rules, systems, and procedures to build compliance culture as one of the keys to successful compliance risk management at Bank, consolidated, and Financial Conglomerates levels.

1. Identification
Identification of compliance risk is articulated in the Compliance Risk Statement (CRS). CRS entails reference of regulations, risk cause, risk control, and action plans for prevention purpose.
2. Evaluation
All identified risks are assessed by each risk owner. The output of assessment is a compliance risk profile for every work unit. Risk assessment is carried out based on the risk's occurrence likelihood and its potential impacts. Risk owners also assess the effectiveness of control measures.

TYPES OF RISKS AND ITS MITIGATIONS

3. Monitoring

Risk monitoring is part of an adequate compliance risk management. Monitoring activities include identifying and overseeing compliance risk appetite statement (RAS).

4. Mitigation

Compliance risk mitigation is carried out by:

- b. Reviewing the appropriateness of control and mitigation activities.
- c. Reviewing the appropriateness of compliance risk assessment process, including that the process has considered historical sanction data.

Compliance Risk Management Implementation

Compliance risk management activities in 2023 were as follows:

1. Defining Risk Appetite Statement (RAS)

In 2023, Bank Mandiri defined its compliance Risk Appetite Statement (RAS) at 4 (four) violations per month. Throughout the year, the Bank received 2 (two) sanction per month, which was well below the RAS threshold.

2. Compliance Risk Assessment

Compliance risk assessment is carried out on a quarterly and semi-annual basis and submitted to the OJK as part of the Bank's Risk Profile Report. According to the self-assessment conducted in Quarter IV 2023, the Bank's compliance risk level was 2 (low to moderate). Several issues of concern for improvement were employees' compliance risk awareness, data quality, and monitoring of report submission to regulators.

TYPES OF RISKS AND ITS MITIGATIONS

INTRA-GROUP TRANSACTION RISK MANAGEMENT

The risk management of intragroup transaction risk is at the level of the Group with Subsidiaries per the business strategies of Bank Mandiri. Bank Mandiri identifies and analyses the activities that may increase exposures to Intragroup Transaction Risk and affect the Company's performance. This risk identification is at the business activity and Subsidiary levels of Bank Mandiri by considering the complexity of transactions. Bank Mandiri may combine qualitative and quantitative methods to measure the Intragroup Transaction Risk for further periodic monitoring according to established procedures.

INSURANCE RISK MANAGEMENT

Insurance risk is a risk due to the failure of insurance company to fulfill its obligations to policyholders as the effect of inadequacy in underwriting, pricing and the use of reinsurance and/or claim handling. Insurance Risk Management is conducted in Subsidiaries of Bank Mandiri that are engaged in the insurance business, namely AXA Mandiri Financial Services, Mandiri AXA General Insurance and Mandiri Inhealth. But Mandiri AXA General Insurance has no longer been a member of Mandiri Group Financial Conglomerates since 4 October 2023. Bank Mandiri identifies and analyzes activities that can increase insurance risk exposure and affect the company performance. The risk identification is performed in the

business activities of Subsidiaries engaged in the insurance business by considering its characteristics. Bank Mandiri can combine qualitative and quantitative approaches in the process of measuring insurance risk which will then be subject to periodic risk monitoring in accordance with the established procedures.

The assessment of the Integrated Insurance Risk Profile throughout 2023 was at Low to Moderate level. This reflects low potential loss faced by Financial Conglomerates due to Integrated Insurance Risk at a certain time in the future. The quality of the implementation of the Integrated Management of Insurance Risk is adequate, there are some weaknesses but these weaknesses can be resolved in the normal course of business.

TYPES OF RISKS AND ITS MITIGATIONS

ENVIRONMENTAL, SOCIAL, & GOVERNANCE (ESG) RISK MANAGEMENT

ESG Risk Management Coverage

Alignment of ESG aspects is also one of Bank Mandiri's priorities in long-term business transformation. Through the stream "Conduct Sustainable Business", Bank Mandiri has developed ESG frameworks, roadmaps and initiatives with a target focus on the transition to a low-carbon economy, emission reduction and net zero in bank operations and increasing social impact in achieving SDGs targets.

To achieve this target, particularly in fostering the transition to a low-carbon economy, Bank Mandiri continues to identify, measure and evaluate ESG risks including climate risks, specifically in the financing aspect.

The ESG risk management system in the loan process includes Bank Mandiri's loan services for the wholesale and retail segments. Bank Mandiri establishes and applies the Technical Guidelines for Environmental and Social Analysis in Lending which is used as a reference in conducting environmental analysis in lending analysis.

This is in line with the efforts made by the Financial Services Authority (OJK) regarding the Asset Quality Assessment of Commercial Banks, which regulates that the assessment of the debtor's business prospects is also associated with the debtor's efforts in maintaining the environment.

ESG Risk Management System

ESG risk assessment on loan is carried out at each stage of loan disbursement end-to-end and integrated by the Business Unit, Credit Operation Unit and Credit Risk Management Unit. Each Business Unit conducts an assessment based on the Portfolio Guideline then carries out a pre-approval process using credit risk tools including the application of ESG aspects, for the wholesale segment, the assessment is stipulated in the Industry Acceptance Criteria (IAC), while for the retail segment, the assessment is carried out through a credit risk scorecard, with reference to the Risk Acceptance Criteria of each product.

Bank Mandiri establishes risk appetite and industry appetite in line with ESG issues in the Bank's policies as outlined in the Industry Acceptance Criteria (IAC) technical guidelines in Internal Regulation No.B3.P1.T16.IAC. Details of businesses covered is presented in the Sustainable Banking section of this report.

The Business Unit conducts due diligence, if necessary, on prospective debtors to explore issues related to Escalation submitted by the Business Unit to the authority holder to approve credit, where this function is carried out by the Senior VP to the Board of Directors. Lending decisions are made by the Business Unit and Credit Risk Management Unit independently with a four-eye-principle process.

The Bank periodically reviews and refines general credit policies, credit procedures per business segment and risk management tools, particularly sectors with high ESG and climate risks. Each Business Unit conducts a more detailed and in-depth assessment of each business activity to determine related ESG requirements in IAC and RAC, including based on input and involvement from regulators and resource persons.

Bank Mandiri analyzes the performance of sectoral portfolios, using sensitivity analysis of which the results are presented at the Board of Directors Forum and used as guidelines in internal business decision making.

ESG Risk Surveillance

The ESG Risk Management framework and governance at Bank Mandiri involves the active role of the Board of Commissioners and the Board of Directors. The Board of Directors monitors the implementation and fulfillment of ESG targets through the Risk Management & Credit Policy Committee (RMPC) forum, in accordance with the duties & authorities stipulated in the Decree of the Board of Directors of PT Bank Mandiri (Persero) Tbk, No. KEP.Dir/009/2021 on Risk Management & Credit Policy Committee, held quarterly with the topic of Sustainable Finance Action Plan (RAKB) performance, ESG trends, to discussion of critical issues in ESG aspects.

TYPES OF RISKS AND ITS MITIGATIONS

Furthermore, the Board of Commissioners supervises ESG implementation, fulfillment of ESG targets or commitments through the Risk Monitoring Committee (KPR) forum, which is held quarterly with topics such as reviewing the effectiveness of ESG-related risk management and supervision in financing activities.

Bank Mandiri monitors compliance in lending related to ESG aspects in accordance with bank policy, with the following measures:

1. Periodically monitor the fulfillment of ESG requirements. Bank Mandiri reviews regularly to ensure that the progress of customer projects is in accordance with the action plan that has been set. To ensure compliance with lending policies and procedures, Bank Mandiri also conducts periodic reviews and audits conducted by the Internal Audit Unit. For debtors who have not been able to meet these minimum requirements, there will be a periodic monitoring mechanism, determination of action plans and schedules needed.
2. Implement the ALERT system (watchlist) as an early warning system to identify risks that can affect the debtor's credit quality to ensure that preventive actions can be taken immediately to prevent credit quality deterioration based on financial performance, industry prospects, and fulfillment of ESG requirements.
3. Conduct an annual review as a form of check and balance of compliance with the latest internal credit policy requirements, including ESG requirements.

CLIMATE RISKS

Climate risk is an emerging risk embedded in key financial risks, such as credit risk, market risk, and operational risk. Bank Mandiri has assessed key financial risk accordingly and has considered ESG aspects in it. Climate risk is also embedded in every other type of risk managed by the Bank, including credit risk, liquidity risk, market risk and operational risk, enabling Bank Mandiri to carry out a comprehensive risk management process in accordance with existing procedures including climate risk.

Bank Mandiri has conducted an Initial Phase Climate Risk Stress Test for credit, market, and operational risks in accordance with OJK guidelines. On credit risk, credit portfolios that are potentially vulnerable to floods and forest fires have been identified; and sectoral portfolios that are characteristically classified as high emission sectors and are affected by government policies to control climate risk. For market risk, the Bank identifies market value movements in the Bank's securities portfolio which are included in the high emission sector category as a result of changes in government policy for carbon emissions.

Bank Mandiri manages climate-related financial risks, starting from risk identification and risk management framework, including conducting scenario analysis. The results of the climate risk analysis become inputs to increase the Bank's resilience to the impacts of climate risk and strengthen through various initiatives and alignment of ESG aspects in internal business processes. The impact of climate change on Bank Mandiri's sustainability based on the risk period is as follows:

1. In the short term (next 1-2 years). Climate change can have a risk impact on Bank Mandiri's financing through the potential impact of changes in government policy, inappropriate technological developments, and shifts in consumer and investor preferences, resulting in a decarbonization transition that affects borrower profitability, cash flow, and asset value.
2. In the medium (5-10 years) and long term. Severe and prolonged climate impacts can threaten the environment, such as floods, landslides, heat waves, food crises and other natural disasters.

Climate Risk Mitigation

Bank Mandiri is committed to managing its business and operations by prioritizing ESG principles to become "Indonesia's Sustainability Champion for Better Future". This commitment is Bank Mandiri's response in supporting the Government's aspirations towards a low-carbon economy.

In sectors that have high climate risk such as plantations, mining and energy, Bank Mandiri conducts intensive monitoring in fulfilling the ESG aspects that have been required by the Bank. Going forward, Bank Mandiri strives to conduct more comprehensive climate risk impact measurements, such as conducting climate scenario analysis and testing credit portfolios for customers against climate risks including transition and physical risk.

Bank Mandiri builds internal capabilities to assist the transition to green energy in the sector. As of December 2022, Bank Mandiri has financed 10 renewable energy projects

Governance Bodies' Involvement on Climate Risk

Coordination of ESG-related aspects, including climate risk, at Bank Mandiri is carried out by ESG Group under the Vice President Director who is authorized to manage the framework, alignment of provisions in line with ESG and climate change issues, sustainable portfolio management, and responsible operational strategies of the Bank, including communication and reporting functions to external and internal parties. Reports from the ESG Unit are then regularly forwarded to the Board of Directors as needed and to the Board of Commissioners with a frequency of at least 4 times per year.

In the implementation of ESG and climate management, the Board of Directors takes a role in strategic functions, to:

1. integrate ESG aspects bank-wide, establish the direction of Bank Mandiri's Sustainable Finance (Sustainability) which includes Framework, Commitment, Strategy, Initiatives, Roadmap related to climate targets and SDGs achievement;
2. carry out supervisory functions related to ESG and climate risks and opportunities, implementation of Sustainable Finance, fulfillment of appropriate ESG targets and initiatives;
3. accountable in ensuring the achievement of sustainability aspirations to stakeholders; and

4. build the collaboration and partnership needed to accelerate the Company's progress towards achieving SDGs and climate targets.

The Board of Directors in this case is assisted by the Risk Management and Policy Committee (RMPC). The forum with Risk Management and Credit Policy Committee (RMPC) is held quarterly on the topic of Sustainable Finance Action Plan (RAKB) performance, ESG trends, including discussion of critical issues in ESG aspects.

The Company's Board of Commissioners takes an important role in managing ESG and climate aspects, particularly to ensure the integration of ESG and climate aspects in Bank Mandiri's long-term goals, including fostering efforts beyond compliance and adoption of best practices, and overseeing the management of risks and opportunities related to sustainability and climate. To carry out this task, the Board of Commissioners is supported by the Risk Oversight Committee (ROC). The Risk Oversight Committee (ROC) forum is held quarterly including discussing the effectiveness of ESG-related risk management and supervision in financing activities.

TYPES OF RISKS AND ITS MITIGATIONS

The functions and obligations of the Board of Directors and in the implementation of Bank Mandiri's sustainable finance are stipulated in Board of Directors Decree No. KEP.DIR/009/2021 dated 13 January 2021 on Risk Management & Credit Policy Committee and Decree of the Board of Commissioners No. KEP.KOM/007/2022 dated 18 November 2022 on the Risk Monitoring Committee Charter. The specific organ, ESG Group, was established in accordance with the Decree of the Board of Directors of KEP.DIR/32/2022 dated 12 September 2022.

Climate Risk Resilience

In the reporting period, Bank Mandiri has conducted a climate risk resilience assessment based on OJK Letter No. S-16/PB.013/2023 which requires KBMI 3 & 4 banks to assess climate risk in the portfolio. In the study, climate-related risks were compared with qualitative initial assessments associated with credit risk, market risk, and operational risk to physical risk events, namely flooding for residential and commercial property collateralized loan portfolios and drought/forest fire risk events for portfolios to corporations and MSMEs for the forestry and plantation sectors.

The assessment provides an overview of potential losses that will occur and their impact on credit, market, operational and capital risks of the Bank. For transition risk, an assessment was conducted on the portfolio of several high emission sectors by looking at the projected impact of increased carbon emissions and changes in government policy on credit risk, market risk, operational risk and the Bank's capital. The transition scenario uses the NGFS scenario according to OJK guidelines, namely Net Zero 2050, Delayed Transition and Current Policies.

In credit risk, portfolios that are potentially vulnerable to floods and forest fires have been identified as well as sectoral portfolios that are classified as high emission sectors and affected by government policies to control

climate risk. For market risk, the Bank identifies market value movements in the Bank's securities portfolio which are included in the high emission sector category as a result of changes in government policy for carbon emissions.

We analyze drought/forest fire/flood climate risk events to Bank Mandiri's operations and property which, based on the study, have the potential to cause damage and loss to the Bank's technology system and property, as well as disruption to employee mobility and health. In this scenario, the Bank already has a Disaster Recovery Plan mitigation plan that includes a contingency plan for catastrophic events.

Bank Mandiri will continue to develop climate risk stress testing in accordance with regulatory directives and the Bank's needs in planning climate risk management in the Company's portfolio. In accordance with technological advances, going forward it is necessary to develop specific models and analytics used in quantifying climate and environmental impacts, more detailed current data and information, scenarios and assumptions according to the direction of regulators.

RISK ASSESSMENT OF THE BANK

To have a clear and thorough understanding of the risks exposure faced by the bank, Bank Mandiri conducts an assessment of the Bank Soundness Level, which is performed and reported periodically to the Regulator every semester or 6 (six) months, as well as Risk Profile, which is performed and reported quarterly or every 3 (three) months. The assessment of Bank Soundness Level complies with Regulation Of Financial Services Authority No.4/POJK.03/2016 and Financial Services Authority Circular Letter No.14/SEOJK.03/2017 concerning Assessment Of Commercial Bank Soundness Level, with the assessment scope covering the following factors: Risk Profile (constitutes an assessment of Inherent Risk and Quality of Risk Management Implementation), Good Corporate Governance, Earnings, and Capital. The assessment of the Risk Profile is performed on Credit Risk, Market Risk, Liquidity Risk, Operational Risk, Legal Risk, Strategic Risk, Compliance Risk, and Reputation Risk. There are two additional risks that are assessed in the Integrated Risk Profile assessment, namely Insurance Risk and Intra-Group Transaction Risk.

The assessment of Bank Mandiri Individual Risk Profile as of 31 December 2023 is categorized as rating 1 (Low Risk), with the assessment of Inherent Risk categorized as rating 2 (Low to Moderate) and the assessment of Quality of Risk Management Implementation categorized as rating 1 (strong), as follows:

Types of Risks	Inherent Risk Rating	KPMR Rating	Risk Level Rating

REVIEW OF RISK MANAGEMENT SYSTEM EFFECTIVENESS

The assessment of Bank Mandiri's Risk Profile at the Individual or Consolidated/Integrated level throughout 2023 reflected that the risks faced by Bank Mandiri at both levels can be managed well so that further business development can be maintained. In other words, Bank Mandiri has been managing its risk effectively.

Statements from the Board of Directors and/or the Board of Commissioners or the Audit Committee on the Adequacy of Risk Management System

Bank Mandiri's internal control system is deemed effective and adequate, as demonstrated by the effectiveness of the implementation of internal control functions such as internal audit, risk management, compliance, financial, and operational control.

RISK MANAGEMENT ACTIVITY REPORT IN 2023

During 2023, Bank Mandiri has conducted and reported the following assessments:

1. Individual Bank Soundness Level applies a risk-based approach/Risk-Based Bank Rating (RBBR), where the scope of assessment covers the following factors: Risk Profile, Good Corporate Governance, Earnings and Capital. The report of the second semester of 2022 and the first semester of 2023 has been submitted to the Regulator in a timely manner.
2. Individual Risk Profile which is performed on 8 risks (Credit, Market, Liquidity, Operational, Legal, Strategic, Compliance, and Reputation Risk), for the fourth quarter of 2022 and the first, second, and third quarters of 2023, has been submitted to the Regulator in a timely manner.

WORST-CASE SCENARIO SIMULATION AND STRESS TESTING

To assess Bank Mandiri's perseverance in the face of plausible exceptional external events, Bank Mandiri performs stress testing to make a contingency plan and satisfy regulatory requirements in Indonesia. To Bank Mandiri, stress testing aims to estimate potential losses the Bank can sustain and the Bank's capital sufficiency for absorbing these losses, to determine the adequate liquidity for fulfilling contractual or behavioral obligations of the Bank, as well as to identify the necessary steps for mitigating risks and maintaining capital sufficiency.

There are 2 (two) types of stress testing at Bank Mandiri, namely sensitivity/shock analysis and scenario analysis (historical or hypothetical). The execution of a stress test covers the analysis of main risks such as credit risk, market risk, and liquidity risk whose calculation uses a statistical or a financial model developed by the Bank in line with the best practices in the industry, for instance, a model and a stress test that links the credit risk changes to macroeconomic factors.

In general, the result of stress testing throughout 2023 indicated that Bank Mandiri was remained capable of maintaining its capital sufficiency and liquidity by building immediate anticipation of assets and liabilities management and preparing policies and systems.

In addition to stress testing at the individual level, stress testing at the level of Mandiri Group along with its subsidiaries was also performed. The stress testing for the Mandiri Group was one of the ways to communicate integrated risk management, whose result was presented to the management of Bank Mandiri, the management of Subsidiaries, and regulators for getting feedback and insights regarding corporate risk management strategies in a scenario of economic collapse. The scenario of Stress testing considers current economic conditions, including the global and domestic economic challenges in 2023 due to increase of inflation and interest rates, the potential of stagflation and recession in developed countries, as well as the escalation of the geopolitical tension.

RECOVERY PLAN

Based on the size of assets, liabilities, and capital, the level of product complexity, and the connection to the banking system, the FSA has determined that Bank Mandiri is a Domestic Systematically Important Bank.

As a Systemic Bank, Bank Mandiri prepares a Recovery Plan and Recovery Options to prevent, restore, or remedy the Bank's financial conditions and business continuity in the event of financial stress, as regulated in OJK Regulation No. 14/POJK.03/2017 on a Recovery Plan for Systemic Banks.

This Recovery Plan consists of a whole-entity analysis of the Bank's and its Subsidiaries' business lines, including crises (stress testing) that may happen to the Bank unexpectedly or a market-wide shock that may endanger the Bank's business (point of non-viability). As regulated by the OJK Regulation on Recovery Plan, the first Recovery Plan of Bank Mandiri has been approved by the shareholders on March 21, 2018, Bank Mandiri's Update of Recovery Plan for 2023-2024 has been submitted to Financial Services Authority in November 2023.

In June 2023, Bank Mandiri has issued Subordinated Medium-Term Notes (MTN) II that substitute Subordinate MTN I that has been matured in July 2023. MTN Subordinated II has been approved by OJK through Letter SR-51/PB.21/2023 dated 20 July 2023 concerning response to publication results Subordinate MTN II 2023 and request for determination of debt instrument that will be acknowledged as a Supplemental Capital (Tier 2) Component for Recovery Plan PT Bank Mandiri (Persero), Tbk.

RESOLUTION PLAN

In addition to the preparation of the Action Plan, in 2022 Bank Mandiri has also prepared a Resolution Plan for the first time and submitted it to the Deposit Insurance Corporation as the resolution authority in Indonesia. Provisions for the preparation of an Action Plan for Systemic Banks and a Resolution Plan for handling Bank solvency problems are Law No. 4 year 2023 on Financial Sector Development and Strengthening.

The Resolution Plan will be used by the LPS if the recovery efforts in the Action Plan are unable to restore the Bank's condition to meet the minimum regulatory requirements, resulting in its status becoming a Failed Bank. Thus, the Resolution Plan contains information about the Bank that is in line with the Action Plan which is complemented by an analysis of resolution options and potential obstacles to the implementation of resolution options, as well as communication strategies before handling the Bank's solvency problems by the resolution authority.

After the first submission, the Bank is obliged to update the Resolution Plan document and submit the updated results to the resolution authority every 2 (two) years. The obligation to prepare a Resolution Plan for Systemic Banks and for Non-Systemic Banks appointed by the resolution authority is regulated in LPS Regulation No. 1 of 2021 concerning Resolution Plans for Commercial Banks.

RISK HANDLING POST PANDEMIC

1. Restructuring Debtors impacted by Covid-19

The occurrence of the Covid-19 pandemic has greatly impacted the national economy. With the Covid-19 pandemic and the implementation of restrictions on business activities, many corporate debtors experienced a decline in sales and profits, resulting in cash flow and liquidity difficulties. Moreover, many individual debtors experience termination of employment. As a result, debtors experienced decreasing ability to meet financial obligations to banks and other creditors, hence it is necessary to restructure debtors impacted by the Covid-19.

To handle these risks and in order to support the government's efforts to maintain economic stability, the Bank actively takes a role in providing credit restructuring for debtors impacted by the Covid-19. In Q2 2021, the Bank has provided a Restructuring of Debtors Impacted by the Covid-19 of Rp96.5 trillion. The implementation of restructuring is regulated in the national economic stimulus implementation policy in line with the dynamics of policies and regulations issued by regulators.

The policy has regulated the criteria for debtors and business sectors impacted by Covid-19 that can be restructured, with reference to POJK No. 11/POJK.03/2020 and its amendments, POJK No. 48/POJK.03/2020 and POJK No. 17/POJK.03/2021 and other internal Bank provisions.

2. Establishment of Allowance for Impairment Losses (CKPN) for Debtors impacted by COVID-19

Based on POJK No. 11/POJK.03/2020 and its amendments, POJK No. 17/POJK.03/2021, the asset quality of debtors that receive relaxation or restructuring affected by Covid-19 will remain performing since the restructuring is carried out. In addition, OJK through Letter No. S-7/D.03/2020 provided stimulus to banks by stating that debtors with restructuring schemes due to the Covid-19 pandemic can be categorized as being at stage 1 in the calculation of CKPN based on PSAK 71.

However, there is a potential where the determination of collectibility 1 as credit quality and the formation of CKPN based on stage 1 categories does not fully reflect the real condition of debtors. After the

relaxation ends, there is a potential risk of increasing collectibility loans 2 and Non-Performing Loans (NPL) which have the potential to cause a significant increase in CKPN. As such, in an effort to apply the Bank's prudential principle and anticipate an increase in credit risk related to the loan restructuring of debtors impacted by COVID-19, the Bank established a larger CKPN (CKPN Build Up) in line with the assessment of the debtor's credit risk level during the relaxation period in anticipation of deterioration in credit quality.

3. Post-Covid-19 Restructuring Preparations and Limited Relaxation Program Implementation

Aligned with the increasingly controlled Covid-19 pandemic, economic developments also indicate an increasingly solid recovery direction. The status of Covid-19 as a pandemic has transitioned into an endemic status, hence it will greatly foster increased mobility and business activities, and will continue to improve overall economic conditions.

In this regard, as well as in implementing POJK No. 17/POJK.03/2021 in a compliant manner, the Bank has assessed debtors who are able to continue to survive the Covid-19 pandemic and still have business prospects.

- a. In the event that the debtor is considered to have improved and has returned to meet its financial obligations, the Bank removes the Covid-19 restructuring flag (in accordance with OJK Letter No. S-19/D.03/2021) on which the debtor has improved and meets the criteria.
- b. In the event that the debtor is considered still able to survive, but still requires restructuring, the Bank may extend the restructuring scheme in accordance with the debtor's business conditions.
- c. In the event that the debtor is considered no longer able to survive, the Bank prepares an action plan for debtors who have the potential to downgrade to NPL, among others, by preparing a normal restructuring scheme (exclude POJK No. 17/POJK.03/2021) as an effort by the Bank to recover the debtor's business.
- d. In the event that the debtor is considered no longer able to survive, the Bank will provide loan loss reserves in accordance with the debtor's business

RESOLUTION PLAN

conditions. Most of the Covid-19 Restructuring portfolio has completed its grace period and debtors have started making payments. As such, the Bank believes that it will be able to properly navigate the Covid-19 pandemic, without a hike in credit quality deterioration or cliff effect.

To accommodate the transition process and anticipate the impact of natural and non-natural disasters (including the spread of viruses) that cause a significant decrease in credit quality, the Financial Services Authority (OJK) enforces POJK No. 19 of 2022 concerning Special Treatment for Financial Service Institutions in Certain Regions and Sectors in Indonesia Affected by Disasters, followed by OJK Board of Commissioners Decree No. 34/KDK.03/2022 dated 25 November 2022.

OJK as the regulator considers that although the Indonesian economy has shown improvement from the impact of the Covid-19 pandemic, there are several regions and sectors that require longer time to recover after the end of national economic stimulus. As such, OJK determines that the Accommodation Provision and Food and Beverage Provision Sector, the Textile and Textile Products and Footwear Sector, the MSME Segment, and Bali Province are sectors and regions that still require special treatment related to bank credit or financing.

With the issuance of this provision, in the event that there are Covid-19 Restructuring debtors who still require a restructuring extension but are not eligible to get an extension, then the debtor will be restructured under the normal restructuring category.

4. Post-Covid-19 Pandemic Risk Management

The government has decided to revoke the Covid-19 pandemic status since June 2023 and declared that Indonesia has entered the endemic period. After the Covid-19 pandemic, mobility and business activities have increased and continue to improve economic conditions. Economic development also shows a more solid recovery direction.

As of December 2023, the size of the Covid-19 Restructuring portfolio has significantly decreased to Rp17,2 trillion, compared to the highest position of Rp96.5 trillion in June 2021. The CKPN Build Up formed

in order to mitigate credit risk on this portfolio has naturally decreased from Rp5.8 trillion at the highest position in December 2020 to Rp1.3 trillion in October 2023. Most of the debtors have fulfilled their credit payment obligations in line with the improvement of debtors' business conditions during this endemic period. In connection with the expiration of POJK No. 17/POJK.03/2021 on 31 March 2023, as well as the evaluation of debtors' business development, the bank converted CKPN Build Up to CKPN Business-as-Usual for debtors who still need special attention and released a small portion of CKPN Build Up for debtors whose conditions have improved.

On a bank-wide basis, as of December 2023, NPL% was 1.02% and NPL Coverage was adequate at 384%. Considering these conditions, the Bank is quite confident that it has managed this portfolio well and achieved a soft landing, and the end of the limited relaxation regulated by the Decree of the Board of Commissioners of the Financial Services Authority (KDK OJK) No. 34/KDK.03/2022 on 31 March 2024 will not cause a significant increase.

5. Post Covid-19 Pandemic Credit Monitoring

In addressing the post-pandemic, the Bank continues to carry out credit monitoring mechanisms, both for debtors on an entity and portfolio basis.

The credit monitoring mechanism is carried out through:

- a. Early warning signal analysis of all debtors with special attention to ex-Covid-19 Restructuring debtors.
- b. Output of early warning signals for debtors who have the potential to experience a decline in performance accompanied by an action plan that is monitored on an ongoing basis.

The Bank always conducts credit monitoring to maintain the quality of the managed credit portfolio.

MARKET RISK EXPOSURES**Market Risk Disclosure Using Standard Methods and Internal Models**

The Bank regularly calculates the Capital Adequacy Ratio (CAR) using a Standardized Method that is reported monthly to the Financial Services Authority (OJK), while for the consolidated position with its subsidiaries, it is reported quarterly. This reporting aims to improve the Bank's quality and quantity so the Bank will be able to absorb potential losses due to financial and economic crises.

- Table 7.1 Disclosure of Market Risk using a Standardized Method

For internal purposes, Bank Mandiri also has calculated using an Internal Method. The CAR calculation using an internal method is done by applying Value at Risk (VaR), a value describing the maximum losses the Bank can handle because of market movements affecting the Bank's risks in normal market conditions with a 99% confidence level. To obtain the VaR, the method used is Historical Simulation.

Realization of Value at Risk of Bank Mandiri in 2021 is as follows:

DISCLOSURE OF RISK EXPOSURE

Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures

The Interest Rate Risk in The Banking Book is a risk due to movements of interest rates in the market that run counter to the position of the Banking Book, which potentially impacts the capital and income of the Bank in the current period or the future.

According to OJK Circular No. 12/SEOJK.03/2018 on "Implementation of Risk Management and Risk Measurement using a Standardized Method for Interest Rate Risk in The Banking Book for Commercial Banks", the Bank uses 2 (two) methods in calculating the IRRBB:

1. Calculation based on changes in the economic value of equity, hereafter EVE, which is a method that measures the impact of interest rate changes on the economic value of equity of the Bank; and
2. Calculation based on changes in net interest income, hereafter NII, which is a method that measures the impact of interest rate changes on the income of the Bank.

Based on the sensitivity analysis at the end of December 2022, the impact of interest rate changes on the economic value of equity and the net interest income is as follows:

1. Table 7.3a Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures - Bank Only
2. Table 7.3b Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures - Bank Consolidated with Subsidiaries

In addition to the disclosure of IRRBB exposures, the Bank also discloses foreign exchange risk. The foreign exchange risk arises because of market movements that run counter to Bank Mandiri's foreign exchange position. This risk comes from the Bank's assets and liabilities in the balance sheet in foreign currencies, from foreign exchange transactions with customers and counterparties causing open positions in the foreign exchange, or from a structural position in the foreign exchange due to capital participation.

- Table 7.4 Disclosure of Risk Management Implementation Report for IRRBB

All tables regarding Market Risk Exposures can be found on pages 940-947 herein.

LIQUIDITY RISK EXPOSURES

In order to improve liquidity resilience, the Bank manages risk by measuring the short-term liquidity adequacy ratio using the Liquidity Coverage Ratio (LCR) and the long-term using the Net Stable Funding Ratio (NSFR). The Bank manages the LCR and NSFR ratios in accordance with the provisions of the Regulator, both individually and on a consolidated basis, above the minimum limit of 100%.

2. Table of Disclosure of Net Stable Funding Ratio

All tables regarding Liquidity Risk Exposures can be found on pages 932-939 herein.

Qualitative Analysis of IRRBB

1 Explanation about how the Bank defines IRRBB for risk measurement and control

The Interest Rate Risk in The Banking Book is a risk due to movements of interest rates in the market that run counter to the position of the Banking Book, which potentially impacts the capital and rentability (earnings) of the Bank in the current period or the future.

The Bank uses 2 (two) methods in calculating the IRRBB, namely calculation based on changes in the economic value of equity, or Δ EVE, and calculation based on changes in net interest income, or Δ NII. The simulation of Δ EVE and Δ NII is performed according to interest rate shock in OJK Circular No. 12/SEOJK.03/2018 dated 21 August 2018.

The Bank controls and mitigates interest rate risk using a recomposition of assets and liabilities or a hedging strategy.

2 Explanation about IRRBB strategic management and mitigation

The Bank adopts IRRBB control strategies that are in line with the Banks overall business strategies by considering the risk appetite and risk tolerance approved by the Board of Directors.

Meanwhile, in response to changes in the economic value of equity (Δ EVE), the IRRBB mitigation strategies are formulated based on the duration of the positions (average repricing maturity) of assets and liabilities. As of December 31, 2023, Bank Mandiris individual Δ EVE was 3.31%, far below the level set by the Regulator of 15%. The increase of Δ EVE compared to previous period was driven by the Banks internal strategy in managing assets & liabilities, specifically in optimizing liquidity.

3 Periodic calculation of the Banks IRRBB and the explanation about specific actions taken by the Bank to measure sensitivity to IRRBB.

To ensure IRRBB is monitored properly, the Bank calculates IRRBB every end-of-month of the reporting period and reports and publishes the result for every quarter position per the prevailing provisions. The measurement of sensitivity to IRRBB is in accordance with OJK Circular No. 12/SEOJK.03/2018 dated August 21, 2018:

IRRBB calculation considers the whole Banking Book position by excluding equity and grouping it according to currency positions material to the Bank

Δ EVE does not consider a commercial margin in the cash flow and discount on the cash flow.

4 Explanation about shock scenario for interest rates and stress scenario used by the Bank to estimate changes in economic value and earnings.

IRRBB exposures calculation is based on 6 (six) shock scenarios for interest rates:

Scenario	Explanation	Estimation of Changes	
		Economic value	Earnings
Parallel Up	Interest rate shock that is parallel up	√	√
Parallel Down	Interest rate shock that is parallel down	√	√
Steeper	Steep interest rate shock in which short-term interest rates go down and longterm interest rates go up	√

Scenario	Explanation	Estimation of Changes	
		Economic value	Earnings
	Interest rate shock in which short-term interest rates go down		
5	Modelling assumption used significantly in the Internal Measurement System (IMS) – if any.		
	The Bank has no modelling assumption that is used significantly in the Internal Measurement System (IMS) because the Banks assumption is different from the modelling assumption used in the IRRBB calculation with a standardised method		
6	Explanation about how the Bank hedges the IRRBB (if any), along with the relevant accounting treatment.		
	The Bank makes hedging transactions on the interest rate risk position by considering risk appetite, business strategies, and projected future movements of market factors. The Bank does not apply the hedge accounting method in the hedging transaction accounting. The profit/loss arising from the hedging transaction is recorded in the Banks profit/loss statement.		
7	Comprehensive explanation about the primary assumptions of modelling and the parameters used to calculate ΔEVE and ΔNII.		
	The following are the primary assumptions of modelling used to calculate Δ EVE and Δ NII: 1. Δ EVE calculation does not consider a commercial margin in the cash flow and discount on cash flow while Δ NII calculation considers a commercial margin in the cash flow. 2. The material impact of instruments having behavioral options, such as consumer credit, retail deposit, and NMD on Δ EVE and Δ NII has been factored in using the early prepayment model (for consumer credit), early redemption method (for termed deposit), and behavior analysis method for NMD. These models will affect the repricing time of the instruments inside the repricing gap.		
	Quantitative Analysis		
1	Average repricing maturity applied to NMD.

6 Explanation about how the Bank hedges the IRRBB (if any), along with the relevant accounting treatment.

The Bank makes hedging transactions on the interest rate risk position by considering risk appetite, business strategies, and projected future movements of market factors. The Bank does not apply the hedge accounting method in the hedging transaction accounting. The profit/loss arising from the hedging transaction is recorded in the Bank's profit/loss statement.

7 Comprehensive explanation about the primary assumptions of modelling and the parameters used to calculate Δ EVE and Δ NII.

The following are the primary assumptions of modelling used to calculate Δ EVE and Δ NII:
 Δ EVE calculation does not consider a commercial margin in the cash flow and discount on cash flow while Δ NII calculation considers a commercial margin in the cash flow.
 The material impact of instruments having behavioral options, such as consumer credit, retail deposit, and NMD on Δ EVE and Δ NII has been factored in using the early prepayment model (for consumer credit), early redemption method (for term deposit), and behavior analysis method for NMD. These models will affect the repricing time of the instruments inside the repricing gap.

Quantitative Analysis**1 Average repricing maturity applied to NMD.**

ESG PRACTICES IN BANK MANDIRI

Bank Mandiri's journey to support the creation of a low-carbon Indonesian economy began five years ago, when Bank Mandiri submitted its Sustainable Finance Action Plan 2019-2023 to the Financial Services Authority (OJK).

Sustainable finance is the overall support of the financial services industry for sustainable growth resulting from the alignment of economic, social, and environmental interests. As a financial services institution, Bank Mandiri takes an active role in developing products and services which support financing activities to improve customers' environmental performance and improve social justice for businesses at the bottom of the pyramid and integrate Environmental, Social and Governance (ESG) aspects in the Bank's business processes and practices.

For Bank Mandiri, the value of sustainability is the foundation in conducting business and operations to ensure that the Bank is able to provide the best benefits for all stakeholders, positively contribute to the environment and society, as well as actively participate in creating a better future for the next generations.

Bank Mandiri's Sustainability Framework

Bank Mandiri has focused on sustainable finance initiatives over the past five years with the aim of increasing financing of environmentally sound business activities, capacity building, and developing management systems to manage sustainable finance including changes to the organization, risk management, systems and procedures as well as related documents needed for sustainable finance to perform effectively.

In the 2023 - 2027 period, Bank Mandiri's sustainable finance initiatives are managed with 14 initiatives in three main pillars, namely; (1) Sustainable Banking; (2) Sustainable Operation; (3) Sustainability Beyond Banking.

Bank Mandiri also obtained ESG-based funding with the issuance of Sustainability Bonds and other funding products. Bank Mandiri has had a sustainability framework since 2019 which is in line with the provisions of POJK No. 51/POJK.03/2017 and other international best practices.

The establishment of ESG Group is one of the important steps for Bank Mandiri in implementing sustainable finance, especially as a focal point for the implementation of sustainable finance at Bank Mandiri. ESG Group was previously a task force appointed by the Board of Directors since 2019 which is now transformed into a full-time permanent unit under the Vice President Director. ESG Group acts as the person in charge of sustainable finance at Bank Mandiri.

Details of sustainable finance achievements in the 2023 reporting period are outlined in more detail in the Sustainability Report.

ENVIRONMENTAL PILLARS

Bank Mandiri's commitment to prioritizing environmental balance in its operational activities is reflected in the "Net Zero Emission (NZE) in Operations by 2030" commitment. To ensure the achievement of this commitment, Bank Mandiri has developed strategies to conserve resources regulated by three approaches, namely: (1) Green Business Mindset (2) Measurement and Monitoring of Operational Carbon Emissions (3) implementing net-zero carbon initiatives such as Green Operations, which involve energy consumption efficiency and low-emission office equipment, as well as Carbon Offsetting in the form of Nature-Based Solutions (NBS) and carbon unit purchases.

Eco-Friendly Policies and Practices

Eco-friendly policies and practices implemented throughout 2023 include::

1. Energy Reduction and Utilization of Renewable Energy Sources

Efforts to reduce energy consumption are carried out through a series of energy reduction and efficiency initiatives in banking operations. The Bank's largest energy use is electricity consumption and the use of fuel oil for transportation and backup electricity.

As such, the Bank took the initiative to replace air handling unit (AHU) equipment with more efficient ones, streamline the use of operational vehicles and provide electric & hibryd vehicles to save fuel consumption, use LED lights, turn off lights during break hours, and turn off certain elevators on holidays. Currently, 100% of LED lights have been used in 241 smart branches, while the total number of electric vehicles available until the end of 2023 was 136 units.

The Bank also took the initiative to increase the use of renewable energy sources by installing 727 units of solar panels in several of its green buildings.

The Bank managed to reduce electricity consumption by **0.6%** from the previous year, amid increasing operational intensity and increasing company scale, while energy **consumption intensity per employee decreased by 19.7%** compared to the base year from **52.40 Gjoules/Employee** in 2019 to **42.10 G Joules/Employee** in 2023.

ENVIRONMENTAL PILLARS

2. GHG Emission Management and Reduction

Bank Mandiri calculates Scope-1 Operational GHG emissions from fuel consumption from 4,083 operational vehicles, and Scope-2 GHG emissions from electricity consumption in 2,348 branch offices spread throughout Indonesia. To ensure the achievement of the "NZE in Operations by 2030" commitment, in 2023 Bank Mandiri became the first bank in Indonesia to launch Digital Carbon Tracking that measures and monitors all operational emissions that can be accessed by stakeholders on the Corporate Website.

This platform monitors the carbon footprint generated and emissions that have been successfully reduced from Bank Mandiri's central operations to the regional office level in phase I and branches in phase II. Emission recording on Digital Carbon Tracking is in accordance with the Greenhouse Gas (GHG) Protocol. In the reporting year, GHG emissions in 2023 were recorded at 295,713 tCO₂e, decreased by 63,040.38 tCO₂e from 2019 which amounted to 358,753 tCO₂e or decreased 18% compared to baseline.

2019 is the baseline for calculating operational emissions with pre-COVID-19 pandemic operational activities. During the pandemic period (2020 and 2021), Bank Mandiri did not operate fully due to social restrictions. Bank Mandiri's efforts to reduce operational emissions can also be seen in the reduction in GHG emission intensity per employee from 9.18 tCO₂e/employee in the baseline year (2019) to 7.59 tCO₂e/employee in 2023.

3. Construction and Development of Green Buildings

Bank Mandiri implements the development of Green Buildings in all office space facilities, by setting green building standards that are developed gradually, including: optimization of sunlight lighting, use of LED lights, use of inverter air conditioners, use of timers to save electricity, use of Water Recycle system with Reverse Osmosis, use of low OTTV (Overall Thermal Transfer Value) glass, and so forth.

Until the end of 2023, Bank Mandiri already has: **1 unit of Green Building certified, 4 Green Buildings and 241 Smart Branches.**

4. Carbon Offsetting

Bank Mandiri realizes that to balance the carbon emission footprint of operational activities, non-operational activities are needed that can compensate for operational emissions (carbon offsetting), among others, through the purchase of carbon units, NBS, and other mitigation actions. Carbon reduction by offsetting is the last option after all efforts to reduce, substitution, and efficiency have been made by Bank Mandiri. Given the relatively short timeframe to achieve "NZE in Operations by 2030", the Bank has initiated carbon offsetting initiatives through the purchase of carbon units and bolstered investment in Nature Based Solution (NBS) projects through land restoration and conservation.

ENVIRONMENTAL PILLARS

On 26 September 2023, Bank Mandiri participated in the Indonesian carbon exchange by purchasing 3,027 tCO₂ in the primary market or 10% of the total baseline operational emissions which in the future will be used for the Bank's needs through the carbon offsetting mechanism.

Bank Mandiri's participation is also a tangible form of support for the Government's strategic program on Primary Carbon Trading in Indonesia and increases the capability of employees to be able to play an active role in the Carbon Exchange in the future. In this historic momentum, Bank Mandiri is trusted by the Regulator, namely OJK as a socialization partner in the national seminar on carbon trading preparation in 5 main cities in Indonesia.

5. Waste Management

Waste management is carried out by applying the 3 R principles (Reduce, Reuse, Recycle), namely optimizing paperless and digitalization programs such as Livin' Super App, Kopra, and Branchless Banking and providing Reversed Vending Machine (RVM) as a means of exchanging PET bottle plastic waste to the machine and earning Livin' points on the Livin' App, to manage PET bottle plastic waste.

This initiative succeeded in reducing waste generation, such as **saving paper consumption by 46%** from the previous year, as well as reducing plastic waste generation.

Bank Mandiri collaborates with licensed and certified third parties to manage other B3 waste/waste as well as domestic waste.

6. Water Consumption Management

Several main Bank Mandiri office buildings already have water recycle for the water recycling process and ensure there is no pollution of water bodies around the office location. The Bank also uses a sewage treatment plant to manage effluent. This recycled water is then used for flushing toilets, plant maintenance, etc., so as to reduce the consumption of water supplied by third parties in these areas.

A comprehensive information of environmental impact reduction is detailed in the Sustainability Report of Bank Mandiri, which is published concurrently but in a separate publication.

Bank Mandiri's Sustainable Finance Products

Bank Mandiri also provides sustainable financial products, such as debt funding instruments known as sustainable/green/social bonds. Sustainable financing refers to the allocation of the proceeds from the issuance of these bonds towards the financing or refinancing of green projects, social development projects, or a combination of both.

Sustainable Products

1. Wholesale

1.1 Sustainability Linked Loan (SLL) & Corporate-in-Transition Financing

Bank Mandiri has also taken significant steps to promote Indonesia's transition towards a low-carbon economy by continuously striving to provide various sustainable products to support its customers, especially those in high carbon-intensive sectors, by offering financial solutions (such as Sustainability-Linked Loans, Green Loans, Corporate-in-Transition Financing) that can assist in decarbonization and transforming their operations into more responsible, environmentally friendly businesses with a smaller carbon footprint.

Bank Mandiri has established a special task force called the ESG Desk with the aim of aligning customer needs with sustainable products and financing and developing other forms of green finance. This is outlined in assignment document number CBG.CTS/5167/2023. Through the ESG Desk, Bank Mandiri continues to identify business potential and innovate in

sustainable financing according to market developments by encouraging customers to have an ESG Financing Framework, including providing advisory services related to ESG Financing to customers in transitioning towards environmentally friendly business activities.

As an initial step, Bank Mandiri has provided sustainable financing in the form of Sustainability-Linked Loans (SLL), which are loan instruments whose financial and/or structural characteristics can vary depending on whether the issuer can achieve predetermined sustainability/ESG goals. Bank Mandiri has provided SLL to several borrowers operating in high carbon-intensive sectors such as the cement industry, livestock farming, and palm oil.

Moreover, Bank Mandiri has disbursed Corporate-in-Transition Financing, in line with the Climate Transition Finance (ICMA CTF) from the International Capital Market Association. This Corporate-in-Transition Financing aims to support companies with high carbon emissions in their decarbonization efforts. This form of financing reflects a commitment to sustainability towards a low-carbon economy.

In the provision of Sustainability Linked Loans & Corporate-in-Transition Financing, the funding follows a KPI-based approach and refers to the debtor's ESG Framework. By using key performance indicators (KPIs), this funding not only supports sustainability-focused projects but also provides incentives for debtors to achieve established ESG goals. This approach reflects a collaborative spirit between lenders and debtors in promoting sustainable practices in business activities and transition projects.

ENVIRONMENTAL PILLARS

1.2. Green Loan

Bank Mandiri actively contributes to accelerating the achievement of a low-carbon economy by providing banking solutions that support eco-friendly business practices for debtors. One of the facilities provided is the Green Facility, which is specifically designed to finance projects and initiatives that have a positive impact on the environment. This funding follows the Green Loan Principles set by the Loan Market Association (LMA).

Bank Mandiri demonstrated its commitment in 2022 by taking significant steps to provide a Green Loan facility for the EV Battery Component Industry in Hong Kong. In its role as Mandated Lead Arrangers, Bank Mandiri played a central role in arranging the Green Loan syndication, totaling USD 300 million. This facility is aimed at the lithium battery industry, including research, development, processing, production, and sales of precursor materials for cathodes. Additionally, the funding covers materials for recycling in the context of new materials and energy.

2 Retail

Bank Mandiri demonstrates its commitment to supporting the attainment of carbon emission reduction targets by 2030 and Net Zero Emission financing 2060 in the Retail segment, alongside its Green Loan financing in the Wholesale segment. This is exemplified through the launch of a financing scheme for solar panel rooftop installation and a battery-based electric motor vehicle ownership loan program (KBLBB).

2.1. Battery-Based Electric Motor Vehicle Ownership Loans (KBLBB)

Bank Mandiri conducts automotive financing programs in collaboration with two of its subsidiaries, Mandiri Tunas Finance and Mandiri Utama Finance, as part of the ownership loan program of KBLBB. This financing program provides expedited

service in addition to competitive interest rates, easy application and payment procedures (both offline and online), and application requirements.

A special program was initiated since July 2022 by Mandiri Tunas Finance to provide benefits to Bank Mandiri Priority Customers and Private. The program offered financing facilities for new car vehicles with an interest rate of 2.25% for a 1-Year Tenor, a maximum LTV of 90%, and an administration fee of Rp1. The financing scheme applies to prepaid installments (ADDM), New Car Passenger Units, and Rates are applied to Priority Customers and Private Bank Mandiri.

2.2. Solar Panels

Bank Mandiri demonstrates its strong commitment to expediting the progress of New Renewable Energy (EBT) in Indonesia through the implementation of solar panel financing initiatives. ENVIRONMENTAL PILLARS

Going forward, Bank Mandiri will continue to develop various sustainable products targeting various business segments in line with best practices and customer needs.

Sustainable Funding

Bank Mandiri promotes the disbursement of sustainable funds and investments through the development of sustainable funding products, so as to support the growth of sustainable financing.

To support this commitment, Bank Mandiri issued a Sustainability Bond with a nominal value of US\$300 million on the Singapore Exchange (SGX) on 19 April 2021 with an interest rate of 2.00% per year and a tenor of 5 years. The funding is then used to finance or refinance green and social business activities.

The Sustainability Bond framework has been prepared referring to the Sustainability Bond Guidelines from the International Capital Market Association (ICMA) and in line with the Association of Southeast Asian Nation (ASEAN) Sustainability Bond Standards, Green Bond Standards, and Social Bond Standards.

The issuance of this sustainability bond received an overwhelmingly positive response, with demand orders exceeding US\$2.5 billion during the book

building process, resulting in oversubscription of more than 8.3 times the planned bond issuance amount. This demonstrates the appreciation and positive perception of foreign investors towards Bank Mandiri's work program and business prospects, especially regarding sustainable finance. The positive confidence of investors is also evident from the ratings given to these bonds by international rating agencies.

Furthermore, in February 2022, Bank Mandiri diversified its sustainable financing instruments, through wholesale funding by issuing the first ESG Repurchase Agreement (Repo) in Indonesia and one of the first movers in Southeast Asia. The Repurchase Agreement (Repo) transaction of US\$500 million is also used to finance or refinance green and social business activities with criteria referring to Bank Mandiri's Sustainability Bond Framework. Bank Mandiri's ESG Repo transaction is one of the strategic initiatives to strengthen the Bank's funding structure in supporting business expansion plans.

We have audited the consolidated financial statements of PT Bank Mandiri (Persero) Tbk and its subsidiaries (the "Group"), which comprise the consolidated statement of financial position as at 31 December 2023, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including material accounting policies information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2023, and its consolidated financial performance and its consolidated cash flows for the year then ended, in accordance with Indonesian Financial Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements paragraph of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audits of the consolidated financial statements in Indonesia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Hal audit utama yang teridentifikasi dalam audit kami diuraikan sebagai berikut.

1. Cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah

Seperti yang dijelaskan dalam Catatan 12, Kredit yang Diberikan dan Piutang/Pembiayaan Syariah, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2023, cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah adalah sebesar Rp 53.098.619 juta dan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan ("PSAK") yang berlaku.

Kami berfokus pada area ini karena saldo cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah mewakili 95% dari total cadangan kerugian penurunan nilai untuk aset keuangan Grup, dimana nilainya signifikan terhadap laporan keuangan konsolidasian Grup. Lebih lanjut, dalam menentukan cadangan kerugian penurunan nilai, Grup mengadopsi model kompleks yang menggunakan sejumlah parameter, mengandalkan input data internal dan eksternal, melibatkan pertimbangan manajemen yang subjektif dan asumsi dengan tingkat ketidakpastian yang tinggi.

Kredit yang diberikan

Seperti yang dijelaskan dalam Catatan 2.c.h, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2023, cadangan kerugian penurunan nilai atas kredit yang diberikan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan 71 – Instrumen Keuangan ("PSAK 71").

Untuk kredit yang tidak mengalami penurunan nilai dan kredit yang mengalami penurunan nilai yang secara individual tidak dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter risiko yang memasukan parameter kunci, termasuk *Probability of Default* ("PD"), *Loss Given Default* ("LGD"), *Exposure at Default* ("EAD"), dengan memperhitungkan informasi perkiraan masa depan dan data eksternal lainnya. Untuk kredit yang diberikan yang secara individual dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian yang diperoleh dari kredit yang diberikan.

The key audit matters identified in our audit are outlined as follows.

1. Allowance for impairment losses on loans and sharia receivables/financing

As described in Note 12, Loans and Sharia Receivable/Financing, to the consolidated financial statements, as at 31 December 2023, the allowance for impairment losses on loans and sharia receivables/financing was Rp 53,098,619 million and was determined based on the applicable Statement of Financial Accounting Standards ("SFAS").

We focused on this area because the balance of allowance for impairment losses on loans and sharia receivables/financing represented 95% of the total allowance for impairment losses for the Group's financial assets, which was significant to the Group's consolidated financial statements. Furthermore, to determine the allowance for impairment losses, the Group adopted a complex model that used a number of parameters, relied on internal and external data inputs, involved subjective management judgements and assumptions subject to a high degree of uncertainty.

Loans

As described in Note 2.c.h, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements as at 31 December 2023, the allowance for impairment losses for loans was determined based on Statement of Financial Accounting Standards 71 – Financial Instruments ("SFAS 71").

For non-impaired loans and for impaired loans which were not considered individually significant, the Group calculated the allowance for impairment losses collectively using a risk parameter model that incorporated key parameters, such as *Probability of Default* ("PD"), *Loss Given Default* ("LGD"), and *Exposure at Default* ("EAD"), after considering forward-looking information and other external data. For loans that were considered individually significant, the Group calculated the allowance for impairment losses on an individual basis by estimating the expected cash flows to be obtained from the loans.

Piutang/pembiayaan syariah

Seperti yang dijelaskan dalam Catatan 2.c.h, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian, cadangan kerugian penurunan nilai atas piutang *murabahah* ditentukan berdasarkan PSAK 102 - Akuntansi *Murabahah* ("PSAK 102"). Cadangan kerugian penurunan nilai atas pinjaman *qardh*, pembiayaan *musyarakah* dan *mudharabah*, ditentukan berdasarkan PSAK yang berlaku.

Piutang *murabahah* yang secara individual tidak dianggap signifikan, Bank menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter risiko dengan menggunakan parameter-parameter utama yaitu PD dan LGD. Untuk piutang/pembiayaan syariah, yang secara individual nilainya signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kredit yang diberikan

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

- Kami memperoleh pemahaman atas perhitungan manajemen atas cadangan kerugian penurunan nilai untuk kredit yang diberikan;
- Secara sampel, menguji pengendalian yang relevan atas penentuan rating internal kredit sebagai basis identifikasi aset keuangan yang mengalami peningkatan risiko kredit secara signifikan atau bukti objektif penurunan nilai;
- Menguji pengendalian umum dari teknologi informasi ("TI") atas sistem perhitungan cadangan kerugian penurunan nilai serta pengendalian aplikasi TI atas kelengkapan dan keakuratan data;
- Menguji asumsi pemodelan signifikan yang digunakan dalam model cadangan kerugian penurunan nilai, termasuk penentuan PD, LGD dan EAD, termasuk (i) evaluasi model dan metodologi yang digunakan dalam perhitungan kuantitatif; dan (ii) evaluasi data historis dan prakiraan ekonomi makro yang digunakan dengan membandingkan data tersebut dengan informasi yang tersedia untuk umum tentang prospek ekonomi makro;
- Menguji data input ke model cadangan kerugian penurunan nilai, secara sampel, untuk menilai keakuratan dan kelengkapannya;

Sharia receivables/financing

As described in Note 2.c.h, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements, the allowance for impairment losses for *murabahah* receivables was determined based on SFAS 102 - *Murabahah Accounting* ("SFAS 102"). The allowance for impairment losses for funds of *qardh*, *musyarakah* and *mudharabah* financing, was determined based on the applicable SFAS.

Murabahah receivables, which were not considered individually significant, were assessed using collective allowance for impairment losses by using the risk parameter modelling approach that incorporated key parameters such as PD and LGD. For *sharia* receivables/financing, which were individually significant, the Group calculated the allowance for impairment losses individually by estimating the expected cash flows.

How Our Audit Addressed the Key Audit Matters

Loans

We have performed the following audit procedures to address this key audit matter:

- We understood management's calculation of the allowance for impairment losses for loans;
- On a sample basis, testing of the relevant controls over the determination of credit internal ratings as the basis over the identification of financial assets that have experienced a significant increase in credit risk or objective evidence of impairment;
- Testing the information technology (IT) general controls over the allowance for impairment losses calculation system as well as the IT application controls over the completeness and accuracy of the data;
- Testing the significant modelling assumptions used in the allowance for impairment losses model, including the determination of the PD, LGD and EAD, which involved (i) evaluation of the model and methodology used in the quantitative calculation; and (ii) evaluation of the historical data and macroeconomic forecasts used by comparing them with publicly available information on macroeconomic prospects;
- Testing, on a sample basis, the data inputs to the allowance for impairment losses model, to assess their accuracy and completeness;

- Menguji, secara sampel, keakuratan identifikasi manajemen atas kredit yang diberikan yang mengalami peningkatan signifikan risiko kredit dan gagal bayar dengan mempertimbangkan informasi keuangan dan non-keuangan debitur dan bukti eksternal yang relevan;
 - Membandingkan, secara sampel, data tertentu yang digunakan pada perhitungan cadangan kerugian penurunan nilai, dengan data yang tercatat di sistem perbankan utama Grup pada tanggal pelaporan;
 - Secara sampel, melakukan perhitungan matematis ulang atas perhitungan cadangan kerugian penurunan nilai untuk memeriksa keakuratan nilai tercatat cadangan kerugian penurunan nilai atas kredit yang diberikan;
 - Secara sampel, untuk kredit yang diklasifikasikan sebagai Tahap 2 dan Tahap 3 (kredit dengan cadangan kerugian penurunan nilai dihitung secara individual), memeriksa kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas asumsi yang digunakan oleh manajemen, jumlah dan waktu estimasi arus kas masa depan yang disiapkan oleh manajemen berdasarkan informasi keuangan debitur dan/atau penjamin, penilaian agunan terbaru dan informasi lain yang tersedia yang digunakan dalam perhitungan cadangan kerugian penurunan nilai atas kredit yang diberikan;
 - Dengan melibatkan spesialis TI, menguji keakuratan perhitungan jumlah hari tunggakan dari tanggal jatuh tempo kredit dan penilaian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak yang digunakan dalam penentuan PD; dan
 - Menilai kecukupan pengungkapan terkait cadangan kerugian penurunan nilai atas kredit yang diberikan dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.
- *Testing, on a sample basis, the accuracy of management's identification of loans that experience a significant increase in credit and default risk by considering the debtor's financial and non-financial information and relevant external evidence;*
 - *Comparing, on a sample basis, the data used in the allowance for impairment losses calculation with the data recorded in the Group's core banking system at the reporting date;*
 - *On a sample basis, performing mathematical re-calculation of the allowance for impairment losses calculation to assess the accuracy of the allowance recorded for impairment losses for loans;*
 - *On a sample basis, for loans classified as Stage 2 and Stage 3 (loans where allowance for impairment losses are calculated individually), assessing the adequacy of allowance for impairment losses by testing the assumptions used by management, the amount and timing of estimates of future cash flows prepared by management based on the debtor's and/or guarantor's financial information, the latest collateral valuation and other available information used in calculation of allowance for impairment losses on loans granted;*
 - *By involving IT specialists, we tested the accuracy of the number of days past due from the credit due date and assessed the accuracy of credit collectibility based on the number of days past due which used in the determination of the PD; and*
 - *Assessing the adequacy of the disclosures related to allowance for impairment losses on loans in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Piutang/pembiayaan syariah

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

- Kami memperoleh pemahaman, mengevaluasi dan menguji efektivitas desain serta operasi pengendalian internal yang berkaitan dengan pengukuran cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah yang telah mengalami peningkatan risiko kredit secara signifikan atau terdapat bukti penurunan nilai;

Sharia receivables/financing

We have performed the following audit procedures to address this key audit matter:

- *We understood, evaluated and tested the design and operating effectiveness of internal controls related to the measurement of impairment losses for sharia receivables and financing that have experienced a significant increase in credit risk or had evidence of impairment;*

- Memeriksa, secara sampel, keakuratan identifikasi peningkatan risiko kredit secara signifikan terhadap bukti objektif penurunan nilai atas piutang/pembiayaan syariah;
 - Memeriksa, secara sampel, kecukupan cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah yang mengalami penurunan nilai, yang dihitung secara individual. Atas sampel tersebut, kami menilai kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas jumlah dan periode estimasi arus kas masa depan yang disiapkan oleh manajemen, menilai asumsi dan estimasi yang digunakan dengan membandingkan jadwal pembayaran kembali dan tingkat pengembalian yang efektif yang digunakan pada perhitungan cadangan kerugian penurunan nilai dengan informasi yang tertera pada perjanjian piutang/pembiayaan syariah;
 - Menilai metodologi dan asumsi pemodelan signifikan yang digunakan dalam model cadangan kerugian penurunan nilai, termasuk penentuan PD dan LGD, yang diterapkan sebagai persyaratan PSAK No. 102, yang melibatkan (i) evaluasi model dan metodologi yang digunakan dalam perhitungan kuantitatif; dan (ii) menguji kelengkapan dan keakuratan data yang digunakan sebagai basis dalam penentuan tingkat PD dan LGD, dengan melibatkan spesialis TI kami;
 - Melakukan perhitungan matematis ulang atas cadangan kerugian penurunan nilai secara kolektif atas kerugian penurunan nilai piutang/pembiayaan syariah, dengan melibatkan spesialis TI kami;
 - Melakukan pengujian atas akurasi perhitungan jumlah hari tertunggak dari tanggal jatuh tempo kredit dan pengujian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak;
 - Melakukan pengujian atas kelengkapan dan keakuratan data piutang/pembiayaan syariah yang digunakan untuk menilai keandalan data yang digunakan dalam menghitung cadangan kerugian penurunan nilai; dan
 - Menilai kecukupan pengungkapan terkait cadangan kerugian penurunan nilai atas piutang/pembiayaan syariah dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.
- *Testing, on a sample basis, the accuracy of management's identification of significant increases in credit risk against objective evidence of impairment of the sharia receivables/financing;*
 - *Testing, on a sample basis, the adequacy of the individual allowance for impairment losses for sharia receivables and financing that had been impaired. For these samples, we assessed the adequacy of allowance for impairment losses by testing the amount and period of estimated future cash flows prepared by management, assessed the assumptions and estimates used by comparing the repayment schedule and effective rate of return used in calculating allowance for impairment losses with information stated in the sharia receivables/financing agreement;*
 - *Assessing the methodology and significant modelling assumptions used in the allowance for impairment losses model, including the determination of PD and LGD applied as requirements of SFAS No. 102, which involved (i) evaluating the models and methodologies used in quantitative calculations; and (ii) testing the completeness and accuracy of the data used as the basis for determining PD and LGD levels, with the involvement of our IT specialists;*

2. Pengoperasian dan pengendalian atas sistem Teknologi Informasi (TI) pelaporan keuangan

Grup sangat bergantung pada infrastruktur, sistem, dan pengendalian TI untuk mendukung kegiatan operasional sehari-hari dan proses pelaporan keuangan. Lingkungan TI Grup dianggap kompleks dengan mempertimbangkan jumlah dan kompleksitas sistem utama pelaporan keuangan dan kompleksitas antarmuka antar sistem. Pengendalian tingkat entitas TI, pengendalian keamanan siber, dan pengendalian umum TI merupakan bagian penting dari kerangka pengendalian internal Bank. Oleh karena itu, kami menganggap pengoperasian dan pengendalian atas sistem teknologi informasi pelaporan keuangan Grup sebagai hal audit utama.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman pengelolaan sistem TI serta pengendalian yang mendukung proses pelaporan keuangan. Kami menilai efektivitas desain, implementasi dan pengoperasian pengendalian utama yang terkait, termasuk:

1. Pengendalian atas manajemen perubahan: Proses dan pengendalian yang dijalankan untuk mengembangkan, menguji dan mengesahkan perubahan pada fungsi dan konfigurasi di dalam sistem;
2. Pengendalian atas keamanan akses: Pengendalian akses pengguna dirancang untuk melaksanakan pemisahan tugas, mengatur penggunaan akun dengan akses istimewa atau proses otorisasi atas perubahan data; dan
3. Pengendalian atas operasional TI: Pengendalian atas operasional dilaksanakan untuk memastikan bahwa setiap masalah TI yang muncul telah ditindaklanjuti.

Kami menguji pengendalian utama yang bergantung pada TI yang mendukung proses pelaporan keuangan, seperti perhitungan otomatis di sistem, pemrosesan transaksi, laporan yang dihasilkan sistem, dan perpindahan data antar sistem. Pengujian kami meliputi inspeksi atas konfigurasi sistem yang relevan disertai dengan pengujian hasil keluaran sistem berdasarkan sampel.

2. Operation and controls of financial reporting Information Technology (IT) systems

The Group is heavily reliant on its IT infrastructure, systems and controls for its daily operations and financial reporting processes. The IT environment of the Group is considered to be complex due to the number and complexity of the key financial reporting systems and interfaces between systems. IT entity level controls, cybersecurity controls, and IT general controls are important components of the Bank's internal control framework. Therefore, we considered the operation and controls of the Group's financial reporting information technology systems to be a key audit matter.

How Our Audit Addressed the Key Audit Matters

We understood the IT systems and controls that supported the financial reporting process. We assessed the effectiveness of the design, implementation and operation of the associated key controls, including:

1. *Change management controls: The processes and controls used to develop, test and authorise changes to the functionality and configurations within systems;*
2. *Access security controls: The access controls designed to enforce segregation of duties, govern the use of high privileged accounts or the authorisation process to change the data; and*
3. *IT operation related controls: The controls over operations to manage the financial risks that may arise from any IT operation issues.*

We tested key IT dependent controls supporting the financial reporting process, such as automated system calculations, transaction processing, system generated reports and data interfaces between systems. Our testing included the inspection of the relevant system configurations and supplemented with the testing of the system outputs on a sample basis.

3. Estimasi atas liabilitas kepada pemegang polis

Seperti yang dijelaskan dalam Catatan 35, Liabilitas lain-lain, atas laporan keuangan konsolidasian, nilai cadangan teknis, yang terdiri atas manfaat polis masa depan dari produk non *unit-link* dan estimasi liabilitas klaim, dan terdapat pada liabilitas kepada pemegang polis adalah sebesar Rp 5.969.732 juta pada tanggal 31 Desember 2023.

Kewajiban untuk menentukan penyelesaian klaim masa depan melibatkan penilaian yang kompleks dan subjektif tentang peristiwa masa depan, baik internal maupun eksternal bisnis, di mana perubahan kecil dalam asumsi dapat mengakibatkan dampak material terhadap estimasi kewajiban ini. Manajemen dibantu oleh pakar aktuaris untuk melakukan perhitungan kewajiban tersebut.

Terdapat ketidakpastian yang timbul dari berbagai asumsi aktuarial. Asumsi-asumsi yang dipakai untuk menghitung cadangan liabilitas masa depan pemegang polis dan estimasi liabilitas klaim ditentukan berdasarkan estimasi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga seperti yang dijelaskan dalam Catatan 2.z, Kontrak Asuransi, atas laporan keuangan konsolidasian. Selain itu, Grup juga menerapkan asumsi margin untuk risiko pemburukan atas produk tersebut.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman perhitungan manajemen atas estimasi liabilitas kepada pemegang polis. Kami mengevaluasi keakuratan estimasi liabilitas kepada pemegang polis, dengan melakukan pengujian substantif yang terdiri dari:

- Dengan melibatkan spesialis aktuari kami, menguji asumsi yang digunakan dalam menghitung cadangan teknis, termasuk evaluasi tingkat diskonto, asumsi morbidita dan mortalita, tingkat pembatalan polis, dan alokasi biaya berdasarkan data historis dan informasi yang tersedia untuk umum;
- Mengevaluasi kompetensi, kapabilitas, dan objektivitas tenaga ahli aktuaris yang membantu manajemen untuk melakukan perhitungan atas utang kepada pemegang polis;

3. Estimation of liabilities to policyholders

As described in Note 35, Other Liabilities, to the consolidated financial statements, the technical reserve, which represents future policy benefits from non-unit-linked products and an estimated claim liability and forms part of the liabilities to policyholders, was Rp 5,969,732 million as at 31 December 2023.

The determination of the liabilities for future claim settlements involved complex and subjective assessment of future events, both internal and external to the business, where a small change in assumptions could have a material impact on the estimation of these liabilities. Management was assisted by an actuarial expert in its calculation of the liabilities.

There is also uncertainty arising from various actuarial assumptions. The assumptions used to calculate the policyholder's future liability reserves and the estimated claim liabilities were determined based on the estimates of mortality, morbidity, lapse, expenses, inflation rates and interest rates as described in Note 2.z, Insurance Contracts, to the consolidated financial statements. In addition, the Group also applied margin assumptions to the risk of deterioration over those products.

How Our Audit Addressed the Key Audit Matters

We understood management's calculation of the estimation of liabilities to policyholders. We evaluated the estimation of liabilities to policyholders, by performing the following procedures:

- By involving our actuarial expert, testing the assumptions used to determine the technical reserves, which involved evaluation of the discount rates, assumptions of morbidity and mortality, lapse rate and cost allocation based on historical data and publicly available information;
- Evaluating the competence, capabilities and objectivity of actuarial experts who assisted management in the calculation of the obligation to policyholders;

- Memeriksa kelengkapan data yang digunakan untuk menghitung saldo cadangan teknis dengan melakukan rekonsiliasi antara laporan aktuaria manajemen, buku besar dan buku besar pembantu pada tanggal 31 Desember 2023;
- Dengan melibatkan spesialis aktuari kami, melakukan perhitungan matematis ulang, secara sampel, atas *Gross Premium Reserve* ("GPV") untuk portofolio jangka panjang tradisional dan Cadangan Risiko untuk portofolio *unit-link*, saldo aset reasuransi, kecukupan bruto dan bersih atas cadangan *Incurred but not Recorded* ("IBNR") dan pengujian kecukupan liabilitas untuk portofolio tradisional pada tanggal 31 Desember 2023; dan
- Menilai kecukupan pengungkapan terkait nilai liabilitas kepada pemegang polis dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.
- *Checking the completeness of the data used to calculate the technical reserve balance by reconciling management's actuarial reports, general ledger and sub-ledgers as at 31 December 2023;*
- *By involving our actuarial expert, performing independent mathematical re-calculation, on a sample basis, of the Gross Premium Reserve ("GPV") for traditional long-term portfolios and Risk Reserves for unit-linked portfolios, reinsurance asset balances, the gross and net adequacy of Incurred but not Recorded ("IBNR") reserves and liability adequacy testing ("LAT") for traditional portfolios as at 31 December 2023; and*
- *Assessing the adequacy of the disclosures related to the liabilities to policyholders in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Responsibilities of Management and Those Charged with Governance for The Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for The Audit of The Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.

- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.
- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur, dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*
- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.*
- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*

- Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

b. Penggabungan usaha

Pada akhir bulan Februari 1998, Pemerintah Republik Indonesia (selanjutnya disebut "Pemerintah") mengumumkan rencana untuk melakukan restrukturisasi atas Bank Peserta Penggabungan. Sehubungan dengan rencana restrukturisasi tersebut, Pemerintah mendirikan Bank Mandiri pada bulan Oktober 1998 dengan melakukan penyeteroran tunai dan pengalihan saham Pemerintah pada Bank Peserta Penggabungan (Catatan 40a dan 40b). Selisih antara harga transfer dan nilai buku saham pada saat restrukturisasi tidak dihitung karena dinilai tidak praktis. Seluruh kerugian yang timbul selama periode restrukturisasi diakui dalam Program Rekapitalisasi.

Rencana restrukturisasi tersebut dirancang untuk menggabungkan usaha Bank Peserta Penggabungan ke dalam Bank Mandiri pada bulan Juli 1999 dan rekapitalisasi Bank Mandiri. Restrukturisasi Bank Peserta Penggabungan ke dalam Bank Mandiri juga mencakup:

- Restrukturisasi kredit yang diberikan;
- Restrukturisasi aset non-kredit yang diberikan;
- Rasionalisasi kantor cabang di dalam dan luar negeri;
- Rasionalisasi sumber daya manusia.

Berdasarkan Akta Notaris Sutjipto, S.H., No. 100 tanggal 24 Juli 1999, Bank Peserta Penggabungan secara hukum melakukan penggabungan usaha ke dalam Bank Mandiri. Akta Penggabungan Usaha tersebut disahkan oleh Menteri Kehakiman Republik Indonesia dengan Surat Keputusan No. C-13.781.HT.01.04.TH.99 tanggal 29 Juli 1999 dan disetujui oleh Gubernur Bank Indonesia dengan Surat Keputusan No. 1/9/KEP.GBI/1999 tanggal 29 Juli 1999. Penggabungan tersebut dinyatakan sah oleh Kepala Kantor Departemen Perindustrian dan Perdagangan Jakarta Selatan melalui Surat Keputusan No. 09031827089 tanggal 31 Juli 1999.

b. Merger

At the end of February 1998, the Government of the Republic of Indonesia (hereinafter referred to as "Government") announced its plan to restructure the Merged Banks. In connection with the restructurisation plan, the Government established Bank Mandiri in October 1998 through the payment of cash and the transfer of the Government's shares of the Merged Banks (Notes 40a and 40b). The difference between the transfer price and the book value of the shares at the time of the restructurisation was not calculated as it was considered not practicable to do so. All losses incurred during the year of restructuring were recognised in the Recapitalisation Program.

The restructurisation plan was designed to merge the Merged Banks' business into Bank Mandiri on July 1999 and the recapitalisation of Bank Mandiri. The restructurisation of the Merged Banks into Bank Mandiri also covered the following:

- *Restructurisation of loans;*
- *Restructurisation of non-loan assets;*
- *Rationalisation of domestic and overseas offices;*
- *Rationalisation of human resources.*

Based on the Notarial Deed of Sutjipto, S.H., No. 100 dated 24 July 1999, the Merged Banks were legally merged into Bank Mandiri. The Merger Deed was legalised by the Ministry of Justice of the Republic of Indonesia in its Decision Letter No. C-13.781.HT.01.04.TH.99 dated 29 July 1999 and approved by the Governor of Bank Indonesia in its Decision Letter No. 1/9/KEP.GBI/1999 dated 29 July 1999. The merger was declared effective by the Department Chief of the South Jakarta Ministry of Industry and Trade Office in its Decision Letter No. 09031827089 dated 31 July 1999.

Effective from the date of the merger:

- *All assets and liabilities of the Merged Banks were transferred to Bank Mandiri as the Surviving Bank;*
- *All operations and business activities of the Merged Banks were transferred and operated by Bank Mandiri;*
- *Bank Mandiri received additional paid-in capital amounted to Rp1,000,000 (full amount) or equivalent to 1 (one) share representing the remaining shares owned by the Government in the Merged Banks (Notes 40a and 40b).*

On the effective date, the Merged Banks were legally dissolved without liquidation process and Bank Mandiri, as the Surviving Bank, received all the rights and obligations from the Merged Banks.

b. Perubahan kebijakan akuntansi (lanjutan)

Pada tanggal 1 Januari 2023, terdapat standar baru dan penyesuaian atau amendemen terhadap beberapa standar yang masih berlaku yang relevan dengan operasi Grup yang berlaku efektif sejak tanggal tersebut yaitu sebagai berikut: (lanjutan)

- Amendemen PSAK 46 tentang Pajak Penghasilan tentang Pajak Tangguhan Terkait Aset dan Liabilitas Yang Timbul Dari Transaksi Tunggal. Amendemen PSAK 46 ini mewajibkan agar entitas mengakui aset maupun liabilitas pajak tangguhan pada saat pengakuan awalnya misalnya dari transaksi sewa, untuk menghilangkan perbedaan praktik di lapangan atas transaksi tersebut dan transaksi serupa.
- Perubahan PSAK 107 tentang Akuntansi Ijarah. Hal ini berdampak pada perubahan kebijakan penerapan ijarah multijasa atas akad sewa yang masih berlaku saat awal implementasi PSAK tersebut. Ruang Lingkup dari PSAK 107 tersebut mencakup akad ijarah baik yang digunakan di sektor keuangan atau pun sektor riil. Pengaturan pada PSAK ini termasuk Ijarah Aset, Ijarah Jasa Langsung dan Ijarah Jasa Tidak Langsung. Penerapan PSAK tersebut juga berdampak penambahan saldo laba akibat adanya perbedaan metode pembebanan dari metode penyusutan aset ijarah dengan metode garis lurus (*straight line*) menjadi metode penurunan saldo piutang ijarah porsi pokok. Grup telah membukukan selisih metode pengakuan pendapatan sesuai PSAK 107 sebesar Rp78.403 pada saldo laba per 1 Januari 2023.

Dampak atas penerapan standar baru dan penyesuaian atau amendemen tersebut di atas tidak material terhadap laporan keuangan konsolidasian Grup.

b. Changes in accounting policies (continued)

*On 1 January 2023, there are new and revised or amendment towards several standards that are relevant to the Group operation which is effective for application from that date as follows:
(continued)*

- *Amendment to SFAS No. 46 on Income Taxes Related to Deferred Tax Assets and Liabilities Arise from a Single Transaction. This amendment to SFAS No. 46 requires that entities recognize both deferred tax assets and liabilities at their initial recognition, such as from lease transactions, in order to eliminate variations in practice in the field for that transaction and similar transactions.*
- *Changes to SFAS No. 107 concerning Ijarah Accounting. This has an impact on changes in the policy for implementing multiservice ijarah on lease contracts that are still valid at the time of the initial implementation of the SFAS. The scope of SFAS 107 covers ijarah contracts both used in the financial sector and the real sector. The arrangements in this SFAS include Asset Ijarah, Direct Service Ijarah and Indirect Service Ijarah. The implementation of this SFAS also has an impact on the addition of retained earnings due to differences in the method of charging from the ijarah asset depreciation method using straight line method to the decreasing of principal portion of outstanding balance ijarah receivables method. The Group has recorded the difference in the revenue recognition method in accordance with SFAS 107 amounting to Rp78,403 in the retained earnings balance as of 1 January 2023.*

The impact of the implementation of the new standards and the adjustments/amendments mentioned above are not material to the Group's consolidated financial statements.

c. Instrumen keuangan

A. Aset keuangan

Grup mengklasifikasikan aset keuangannya dalam kategori (a) aset keuangan yang diukur pada nilai wajar melalui laba rugi, (b) aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan (c) aset keuangan yang diukur pada biaya perolehan diamortisasi.

Grup memiliki instrumen keuangan utang dan instrumen keuangan ekuitas. Grup selanjutnya mengukur semua investasi ekuitas pada nilai wajar. Saat pengakuan awal, Grup dapat membuat pilihan yang tak terbatal untuk menyajikan perubahan selanjutnya pada nilai wajar investasi dalam instrumen ekuitas dalam penghasilan komprehensif lain.

Grup menggunakan 2 (dua) dasar untuk mengklasifikasikan aset keuangan yaitu model bisnis Grup dalam mengelola aset keuangan dan karakteristik arus kas kontraktual pembayaran pokok dan bunga (*Solely Payment of Principal and Interest* ("SPPI")) dari aset keuangan.

Pengujian SPPI

Sebagai langkah pertama dari proses klasifikasi, Grup menilai persyaratan kontraktual keuangan untuk mengidentifikasi apakah mereka memenuhi pengujian SPPI.

Pokok pinjaman untuk tujuan pengujian ini didefinisikan sebagai nilai wajar dari aset keuangan pada pengakuan awal dan dapat berubah selama umur aset keuangan (misalnya, jika ada pembayaran pokok atau amortisasi premi/diskon).

Elemen bunga yang paling signifikan dalam perjanjian kredit biasanya adalah pertimbangan atas nilai waktu dari uang dan risiko kredit. Untuk membuat penilaian SPPI, Grup menerapkan pertimbangan dan memperhatikan faktor-faktor yang relevan seperti mata uang dimana aset keuangan didenominasikan dan periode pada saat suku bunga ditetapkan.

c. Financial instruments

A. Financial assets

The Group classified its financial assets in the following categories (a) financial assets measured at fair value through profit or loss, (b) financial assets measured at fair value through other comprehensive income, and (c) financial assets measured at amortised cost.

The Group has debt financial instruments and equity financial instruments. The Group further measures all equity investments at fair value. On initial recognition, the Group may make an irrevocable choice to subsequent changes in the fair value of investments in equity instruments in other comprehensive income.

The Group used 2 (two) methods to classify its financial assets, which based on the Group's business model in managing the financial assets, and the contractual cash flow of the financial assets solely payment of principal and interest ("SPPI").

SPPI test

As a first step of its classification process, the Group assesses the contractual terms of financial to identify whether they meet the SPPI test.

Principal, for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant element of interest within a arrangement are typically the consideration for the time value of money and credit risk. To perform the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

c. Instrumen keuangan (lanjutan)

A. Aset keuangan (lanjutan)

Penilaian model bisnis

Grup menentukan model bisnisnya berdasarkan tingkat yang paling mencerminkan bagaimana Grup mengelola kelompok atas aset keuangannya untuk mencapai tujuan bisnisnya.

Model bisnis Grup tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti:

- Bagaimana kinerja model bisnis dan aset keuangan yang dimiliki dalam model bisnis tersebut dievaluasi dan dilaporkan kepada personel manajemen kunci;
- Risiko yang mempengaruhi kinerja model bisnis (dan aset keuangan yang dimiliki dalam model bisnis tersebut) dan khususnya, bagaimana cara risiko tersebut dikelola;
- Bagaimana manajer bisnis dikompensasi (misalnya, apakah kompensasi didasarkan pada nilai wajar dari aset yang dikelola atau pada arus kas kontraktual yang tertagih);
- Frekuensi, nilai dan waktu penjualan yang diharapkan, juga merupakan aspek penting dari penilaian Grup.

Penilaian model bisnis didasarkan pada skenario yang diharapkan secara wajar tanpa mempertimbangkan skenario "worst case" atau "stress case". Jika arus kas setelah pengakuan awal direalisasikan dengan cara yang berbeda dari yang awal diharapkan, Grup tidak mengubah klasifikasi aset keuangan dimiliki yang tersisa dalam model bisnis tersebut, tetapi memasukkan informasi tersebut dalam melakukan penilaian atas aset keuangan yang baru atau yang baru dibeli selanjutnya.

- (a) Aset keuangan yang diukur pada nilai wajar melalui laba rugi

Aset keuangan diukur pada nilai wajar melalui laba rugi kecuali tes model bisnis dan tes arus kas kontraktual menunjukkan bahwa aset keuangan masuk ke dalam klasifikasian diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

c. Financial instruments (continued)

A. Financial assets (continued)

Business model assessment

The Group determines its business model at the level that best reflects how group manages group of financial assets to achieve its business objective.

The Group's business model is not assessed by each instrument, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular the way those risks are managed;
- How business managers are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- The expected frequency, value, and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking "worst case" or "stress case" scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's initial expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

- (a) Financial assets measured at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless the business model test and the contractual cash flow test show that financial assets entering into classifications are measured at amortised cost or fair value through other comprehensive income.

Penilaian model bisnis (lanjutan)

- (b) Aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain (lanjutan)

Pada saat pengakuan awalnya, instrumen utang yang diukur pada nilai wajar melalui penghasilan komprehensif lain diakui pada nilai wajarnya ditambah biaya transaksi dan selanjutnya diukur pada nilai wajarnya dimana keuntungan atau kerugian atas perubahan nilai wajar, keuntungan atau kerugian atas selisih kurs dan kerugian penurunan nilai, diakui sebagai penghasilan komprehensif lain. Dividen dari instrumen ekuitas diakui di dalam pos laba rugi.

Kerugian kredit ekspektasian diakui sebagai penambah dari penghasilan komprehensif lain di dalam laporan posisi keuangan (tidak mengurangi jumlah tercatat aset keuangan dalam laporan keuangan). Pendapatan bunga dihitung menggunakan metode suku bunga efektif.

Grup selanjutnya mengukur semua investasi ekuitas pada nilai wajar. Jika manajemen Grup telah memilih untuk menyajikan keuntungan dan kerugian nilai wajar atas investasi ekuitas dalam penghasilan komprehensif lain, tidak ada reklasifikasi keuntungan dan kerugian nilai wajar ke laba rugi setelah penghentian pengakuan investasi tersebut. Dividen dari instrumen ekuitas diakui di dalam pos laba rugi.

- (c) Aset keuangan yang diukur pada biaya perolehan diamortisasi

Aset keuangan diukur pada biaya perolehan diamortisasi jika aset keuangan dikelola dalam model bisnis yang bertujuan untuk memiliki aset keuangan dalam rangka mendapatkan arus kas kontraktual dan persyaratan kontraktual dari aset keuangan yang pada tanggal tertentu memperoleh arus kas semata dari pembayaran pokok dan bunga (*solely payments of principal and interest*) dari jumlah pokok terutang.

- (b) Financial assets measured at fair value through other comprehensive income (continued)

At the initial recognition, debt instruments measured at fair value through other comprehensive income are recognized at the fair value plus the transaction costs and subsequently measured at fair value where the gain or loss from changes in fair value, gain or loss from the exchange rate, and impairment, are recognized as other comprehensive income. Dividend from equity instrument is recognized in profit or loss.

Expected credit losses are recognized as additions of other comprehensive income in the statement of financial position (not reducing the number of recorded financial assets in financial statements). Interest income is calculated using the effective interest rate method.

The Group further measures all equity investments at fair value. If group management has chosen to present fair value gains and losses on equity investments in other comprehensive income, there is no reclassification of fair value gains and losses to profit or loss upon derecognition of those investments. Dividends from equity instruments are recognized in profit or loss.

- (c) Financial assets measured at amortised cost

Financial assets are measured at amortised cost if the financial asset is managed in a business model to obtain a contractual cash flow and the contractual arrangement of a financial asset at certain date to obtain cash flow solely from payments of principal and interest of the amount owed.

Pada saat pengakuan awal, aset keuangan yang diukur pada biaya perolehan diamortisasi diakui pada nilai wajarnya ditambah biaya transaksi dan selanjutnya diukur pada biaya perolehan diamortisasi dengan menggunakan suku bunga efektif.

Pendapatan bunga dari aset keuangan yang diukur pada biaya perolehan diamortisasi dicatat dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian dan diakui sebagai "Pendapatan bunga". Ketika penurunan nilai terjadi, kerugian penurunan nilai diakui sebagai pengurang dari nilai tercatat aset keuangan dan diakui di dalam laporan keuangan konsolidasian sebagai "Pembentukan cadangan kerugian penurunan nilai".

Pengakuan

Bank menggunakan akuntansi tanggal perdagangan untuk mencatat transaksi efek dan obligasi pemerintah.

B. Liabilitas keuangan

Grup mengklasifikasikan liabilitas keuangan dalam kategori (a) liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi dan; (b) liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi.

- (a) Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi

Kategori ini terdiri dari dua sub-kategori: liabilitas keuangan diklasifikasikan sebagai nilai wajar melalui laba rugi dan liabilitas keuangan yang pada saat pengakuan awal telah ditetapkan oleh Grup untuk diukur pada nilai wajar melalui laba rugi.

- (c) Financial assets measured at amortised cost (continued)

At initial recognition, the financial assets measured at amortised cost are recognised at the fair value plus the transaction costs and subsequently measured at amortised cost by using the effective interest rate.

Interest income from financial assets measured at amortised cost is recorded in the consolidated statements of profit or loss and other comprehensive income and is recognised as "Interest income". When the decline in value occurs, the impairment loss is recognised as a deduction to the carrying amount of the financial asset and is recognised in the financial statements as "Allowance for impairment losses".

Recognition

The Bank use transactions date record to transactions in securities and government bonds.

B. Financial liabilities

The Group classifies its financial liabilities into the category of (a) financial liabilities measured at fair value through profit or loss and; (b) financial liabilities measured at amortised cost.

- (a) Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi (lanjutan)

Liabilitas keuangan diklasifikasikan sebagai nilai wajar melalui laba rugi jika diperoleh terutama untuk tujuan dijual atau dibeli kembali dalam waktu dekat atau jika merupakan bagian dari portofolio instrumen keuangan tertentu yang dikelola bersama dan terdapat bukti mengenai pola ambil untung dalam jangka pendek yang terkini. Derivatif diklasifikasikan sebagai liabilitas nilai wajar melalui laba rugi kecuali ditetapkan dan efektif sebagai instrumen lindung nilai arus kas.

Keuntungan dan kerugian yang timbul dari perubahan nilai wajar liabilitas keuangan yang diklasifikasikan sebagai nilai wajar melalui laba rugi dicatat dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sebagai pendapatan dari kelompok nilai wajar melalui laba rugi - neto. Beban bunga dari liabilitas keuangan diklasifikasikan sebagai nilai wajar melalui laba rugi dicatat di akun pendapatan dari kelompok nilai wajar melalui laba rugi - neto.

Jika Grup pada pengakuan awal telah menetapkan instrumen utang tertentu sebagai nilai wajar melalui laba rugi (opsi nilai wajar), maka selanjutnya, penetapan ini tidak dapat diubah.

Perubahan nilai wajar terkait dengan liabilitas keuangan yang ditetapkan untuk diukur pada nilai wajar melalui laba rugi diakui di dalam pendapatan dari kelompok nilai wajar melalui laba rugi - neto. B. Financial liabilities (continued)

- (a) *Financial liabilities measured at fair value through profit or loss (continued)*

A financial liability is classified as fair value through profit or loss, if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit-taking. Derivatives are also categorised as fair value through profit or loss liabilities unless they are designated and effective as hedging instruments.

Gains and losses arising from changes in fair value of financial liabilities classified as fair value through profit or loss are recorded in the consolidated statements of profit or loss and other comprehensive income as income from fair value through profit or loss - net. Interest expense from financial liability classified as trading are recorded as income from fair value through profit or loss - net.

If the Group designated certain debt securities upon initial recognition as at fair value through profit or loss (fair value option), then this designation cannot be changed subsequently.

Changes of fair value related to financial liabilities designated at fair value through profit or loss are recognised in income from fair value through profit or loss - net. Interest expense from financial liabilities designated at fair value through profit or loss are recorded as income from fair value through profit or loss - net.

B. Liabilitas keuangan (lanjutan)

- (b) Liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

1. Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi;
2. Liabilitas keuangan yang timbul ketika pengalihan aset keuangan tidak memenuhi syarat penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan;
3. Kontrak jaminan keuangan;
4. Komitmen untuk menyediakan pinjaman dengan suku bunga di bawah pasar;
5. Imbalan kontijensi yang akan diselesaikan dengan kas, dimana Grup bertindak selaku pihak pengakuisisi dalam kombinasi bisnis.

Pada saat pengakuan awal, liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi diukur pada nilai wajar dikurangi biaya transaksi. Setelah pengakuan awal, Grup mengukur seluruh liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi dengan menggunakan metode suku bunga efektif. Amortisasi suku bunga efektif diakui sebagai "Beban bunga".

C. Penghentian pengakuan

Penghentian Pengakuan Aset Keuangan

Penghentian pengakuan aset keuangan dilakukan ketika hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir, atau ketika aset keuangan tersebut telah ditransfer dan secara substansial seluruh risiko dan manfaat atas kepemilikan aset tersebut telah ditransfer (jika, secara substansial seluruh risiko dan manfaat tidak ditransfer, maka Grup melakukan evaluasi untuk memastikan keterlibatan berkelanjutan atas kendali yang masih dimiliki tidak mencegah penghentian pengakuan).

B. Financial liabilities (continued)

- (b) Financial liabilities at amortised cost

The Group classifies all financial liabilities after initial recognition as measured at amortised cost, except:

1. Financial liabilities measured at fair value through profit or loss;
2. Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach is applied;
3. Financial guarantee contracts;
4. Commitment to providing loans at below market interest rates;
5. Contingent consideration recognized by the acquirer in the business combination.

At initial recognition, financial liabilities at amortised cost measured at fair value are deducted by transaction cost. After initial recognition, the Group measures all financial liabilities at amortised cost using the effective interest rate method. Effective interest rate amortisation is recognised as "Interest expense".

C. Derecognition

Derecognition of Financial Assets

Financial assets are derecognised when the contractual rights to receive the cash flows from these assets have expired or matured or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred (that is, if substantially all the risks and rewards have not been transferred, the Group evaluates to ensure that continuing involvement on the basis of any retained powers of control does not prevent derecognition).

Agunan yang diserahkan oleh Grup di dalam perjanjian efek-efek yang dijual dengan janji untuk dibeli kembali dan transaksi *securities lending* dan *borrowing* tidak dihentikan pengakuannya karena Grup secara substansial masih memiliki seluruh risiko dan manfaat atas agunan tersebut, berdasarkan kesepakatan bahwa harga pembelian kembali telah ditentukan di awal, sehingga kriteria penghentian pengakuan tidak terpenuhi.

Aset keuangan yang dialihkan kepada pihak ketiga tetapi tidak memenuhi syarat penghentian pengakuan disajikan di dalam laporan posisi keuangan konsolidasian sebagai "Aset lain-lain - Tagihan atas efek-efek dan obligasi pemerintah yang diagunkan", dimana pihak penerima memiliki hak untuk menjual atau mentransfer kembali.

**Penghentian Pengakuan Liabilitas
Keuangan**

Penghentian pengakuan liabilitas keuangan dilakukan jika liabilitas keuangan tersebut telah berakhir karena kewajiban yang ditetapkan dalam kontrak telah dilepaskan, dibatalkan atau kedaluwarsa atau apabila terdapat perubahan yang substansial dalam persyaratan suatu liabilitas keuangan, maka kontrak liabilitas keuangan sebelum perubahan akan dihapus dan Grup akan mengakui liabilitas keuangan baru.

Hapusbuku

Dalam hal penghapusbukuan aset keuangan merupakan kelanjutan dari tindakan penyelesaian aset keuangan dengan cara pengambilalihan agunan, maka jumlah yang dihapusbuku adalah sebesar selisih kurang antara nilai wajar agunan yang diambil alih setelah memperhitungkan taksiran biaya penjualan dengan nilai tercatat aset keuangan.

Aset keuangan dapat dihapusbuku apabila cadangan kerugian penurunan nilai telah dibentuk 100%.

Penghapusbukuan dilakukan secara keseluruhan terhadap nilai tercatat aset keuangan dengan mendebit cadangan kerugian penurunan nilai.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

c. Financial instruments (continued)

C. Derecognition (continued)

**Derecognition of Financial Assets
(continued)**

Collateral that is submitted by the Group under the agreement of securities sold under agreements to repurchase and securities lending and borrowing transactions are not derecognised because the Group substantially has all the risks and benefits of the collateral, based on the requirement that the repurchase price has been determined at the beginning, so that the criteria for derecognition are not met.

Financial assets that are transferred to third parties but do not qualify for derecognition criteria are presented in the consolidated statements of financial position as "Other assets - Receivables from securities and government bonds pledged as collateral", which the recipient has the right to sell or transfer back.

Derecognition of Financial Liabilities

Financial liabilities are derecognised when the financial liabilities have expired because the obligations specified in the contract have been released, canceled or expired or if there is a substantial change in the terms of a financial liability, the financial liability contract before the change will be written off and the Group will recognize the new financial liability.

Write-offs

In the case of financial assets' write-off is a continuation of the financial assets' settlement by taking over collaterals, the written-off amount is approximately equal to the difference between the fair value of repossessed assets after taking into account the financial assets' cost of sales and carrying amount.

Financial assets can be written-off when the allowance for impairment losses have been 100% established.

Full write-off is done to the financial assets' carrying amount by debiting the allowance for impairment losses.

D. Modifikasi atas arus kas aset keuangan

Penilaian apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan, dilakukan oleh unit bisnis yang berwenang melakukan restrukturisasi aset keuangan tersebut.

Grup mengakui aset keuangan dimodifikasi atau direstrukturisasi secara substansial dan menghasilkan penghentian pengakuan ketika:

- (a) aset keuangan (atau bagiannya) berakhir, yaitu jika debitur secara hukum dibebaskan dari tanggung jawab utama atas aset tersebut (atau bagiannya), baik melalui proses hukum maupun oleh kreditur pembuatan kontrak kredit baru (sebagai contoh, opsi *equity conversion*); atau
- (b) terdapat konversi mata uang.

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut:

- (a) Modifikasi aset keuangan yang menghasilkan penghentian pengakuan aset keuangan
 - 1. Saat arus kas kontraktual atas aset keuangan direstrukturisasi atau dimodifikasi (antara lain ketika kredit direstrukturisasi) dimana restrukturisasi atau modifikasi tersebut menghasilkan penghentian pengakuan aset keuangan, Grup akan mencatat aset keuangan tersebut sebagai aset keuangan baru/modifikasian pada tanggal modifikasi/restrukturisasi.
 - 2. Selisih nilai tercatat aset keuangan sebelum modifikasi/restrukturisasi dengan nilai wajar aset setelah modifikasi/restrukturisasi diakui di laba rugi.
 - 3. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai bagian dari keuntungan atau kerugian atas modifikasi tersebut.
 - 4. Grup melakukan penilaian apakah aset keuangan baru/modifikasian merupakan aset yang berasal dari aset keuangan memburuk atau *Purchased or Originated Credit-Impaired ("POCI") Financial Asset*.
 - 5. Pengakuan pendapatan bunga atas aset yang berasal dari aset keuangan memburuk ditentukan berdasarkan suku bunga efektif yang telah disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) untuk mendiskontokan arus kas aset keuangan yang telah dimodifikasi.

D. Modification of financial assets cash flow

An assessment of whether a financial asset has been modified or restructured substantially or not substantially derecognised is carried out by a business unit whose authorized to modify or restructure financial assets.

Modifications or restructuring to financial assets are considered substantial and the Group will cease to recognize the original financial assets when:

- (a) the financial asset (or portion thereof) expires, that is, if the debtor is legally released from primary responsibility for the asset (or any portion thereof), either by legal process or by the creditor entering into a new credit contract (for example, the equity conversion option); or
- (b) there is a currency conversion.

The Group will measure the substantially and not substantially modified financial assets as follows:

- (a) *Substantial Modification of Financial Assets*
 - 1. When the contractual cashflow on a financial asset is restructured or modified (including when a credit is restructured) and the restructuring or modification results in derecognition of the financial asset, therefore the Group will record the financial asset as a new/modified financial asset on the modification/restructuring date.
 - 2. The difference between the gross amount of the initial financial assets and the fair value of the modified or restructuring assets recorded as profit or loss.
 - 3. Transaction income or costs incurred in connection with a modification event recognized as part of gain or loss on the modification.
 - 4. Group assess whether new/modified financial assets are assets originating from impaired financial assets or *Purchased or Originated Credit-Impaired ("POCI") Financial Asset*.
 - 5. Recognition of interest income on assets originating from Impaired financial assets is calculated based on an effective interest rate adjusted for credit risk (*risk-adjusted effective interest rate*) to discount the cash flows of modified financial assets.

(b) Modifikasi aset keuangan yang tidak menghasilkan penghentian pengakuan aset keuangan

1. Saat Grup melakukan renegotiasi atau modifikasi arus kas kontraktual atas aset keuangan (antara lain ketika kredit direstrukturisasi) yang tidak memenuhi kriteria modifikasi aset keuangan yang substansial di atas, maka restrukturisasi atau modifikasi tersebut tidak menghasilkan penghentian pengakuan aset keuangan.
2. Jumlah tercatat bruto aset keuangan dihitung sebesar nilai kini (*net present value*) dari arus kas neto kontraktual yang telah dimodifikasi atau direstrukturisasi yang didiskontokan menggunakan suku bunga efektif awal.
3. Grup kemudian mengakui keuntungan atau kerugian dari modifikasi (yaitu sebesar perubahan jumlah tercatat bruto aset keuangan) dalam laporan laba rugi.
4. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai penyesuaian terhadap jumlah tercatat aset keuangan yang telah dimodifikasi dan diamortisasi selama sisa jangka waktu aset keuangan modifikasian tersebut dengan menggunakan suku bunga efektif awal.
5. Selisih antara jumlah tercatat bruto aset keuangan sebelum dan sesudah modifikasi atau restrukturisasi diakui sebagai kerugian atau keuntungan aset keuangan modifikasian, yang merupakan penyesuaian terhadap jumlah tercatat bruto awal dan diamortisasi selama sisa jangka waktu aset keuangan dengan menggunakan suku bunga efektif awal (*unwinding interest*).

(b) Non-Substantial Modification of Financial Assets

1. When the Group renegotiates or modifies contractual cash flows of financial assets (including when loans are restructured) that do not meet the criteria for substantial modification of financial assets above, the restructuring or modification does not result in derecognition of the financial assets.
2. The gross carrying amount of financial assets is computed at the net present value of modified or restructured contractual cash flows, discounted at the initial effective interest rate.
3. The Group then recognizes the gain or loss from the modification (i.e the change in the gross carrying amount of the financial asset) in the profit or loss.
4. Transaction income or costs incurred in connection with a modification event are recognized as an adjustment to the carrying amount of the modified financial asset and amortised over the remaining term of the modified financial asset using the initial effective interest rate.
5. The difference between the gross carrying amount of a financial asset before and after modification or restructuring is recognised as a gain or loss of the modified financial asset, which is an adjustment to the initial gross carrying amount and is amortised over the remaining term of the financial asset using the initial effective interest rate (*unwinding interest*).

E. Reklasifikasi aset keuangan

Grup diperkenankan untuk melakukan reklasifikasi atas aset keuangan yang dimiliki jika Grup mengubah model bisnis untuk pengelolaan aset keuangan dan Grup tidak diperkenankan untuk melakukan reklasifikasi atas liabilitas keuangan.

Perubahan model bisnis sifatnya harus berdampak secara signifikan terhadap kegiatan operasional Grup seperti memperoleh, melepaskan, atau mengakhiri suatu lini bisnis. Selain itu, Grup perlu membuktikan adanya perubahan tersebut kepada pihak eksternal.

Grup akan mereklasifikasi seluruh aset keuangan yang terkena dampak dari perubahan model bisnis. Perubahan tujuan model bisnis Grup harus berdampak sebelum tanggal reklasifikasi.

Yang bukan merupakan perubahan model bisnis adalah:

- (a) perubahan intensi berkaitan dengan aset keuangan tertentu (bahkan dalam situasi perubahan signifikan dalam kondisi pasar).
- (b) hilangnya sementara pasar tertentu untuk aset keuangan.
- (c) pengalihan aset keuangan antara bagian dari Grup dengan model bisnis berbeda.

Dampak reklasifikasi aset keuangan

Grup menerapkan reklasifikasi secara prospektif dari tanggal reklasifikasi. Grup tidak menyajikan kembali keuntungan, kerugian (termasuk keuntungan atau kerugian penurunan nilai), atau bunga yang diakui sebelumnya.

E. Reclassification of financial assets

The Group is allowed to reclassify the financial assets owned if the Group changes the business model for managing the financial assets and the Group is not allowed to reclassify the financial liabilities.

Changes in the business model should significantly impact the Group's operational activities such as acquiring, disposal or discontinued a line of business. In addition, the Group needs to prove the change of business model to external parties.

The Group will reclassify all financial assets impacted by changes in the business model. The changes of the Group's business model must occur before the reclassification date.

The following are not considered as change in business model:

- (a) the change of intention related to certain financial assets (even in situations of significant changes in market conditions).*
- (b) temporary loss of certain markets for financial assets.*
- (c) the transfer of financial assets between parts of the Group and different business models.*

Impact of reclassification of financial assets

The Group applies the reclassifications prospectively from the reclassification date. The Groups does not restate gain, losses (including gains and impairment losses), or previously recognised interest.

G. Saling hapus instrumen keuangan

Aset keuangan dan liabilitas keuangan saling hapus disajikan dalam laporan posisi keuangan konsolidasian jika memiliki hak yang berkekuatan hukum untuk melakukan saling hapus atas jumlah yang telah diakui tersebut dan berniat untuk menyelesaikan secara neto atau untuk merealisasikan aset dan menyelesaikan liabilitasnya secara simultan. Hak yang berkekuatan hukum berarti:

- a. tidak terdapat kontinjensi di masa yang akan datang, dan
- b. hak yang dapat dipaksakan secara hukum pada kondisi-kondisi berikut ini:
 - i. kegiatan bisnis normal;
 - ii. kondisi kegagalan usaha; dan
 - iii. kondisi gagal bayar atau bangkrut.

H. Cadangan kerugian penurunan nilai aset keuangan

Penerapan PSAK 71 "Instrumen Keuangan" telah mengubah metode perhitungan kerugian penurunan nilai dari pendekatan kerugian yang telah terjadi (*incurred loss*) dalam PSAK 55 "Instrumen Keuangan: Pengakuan dan Pengukuran" dengan pendekatan kerugian kredit ekspektasian (*expected credit loss*).

1. Ruang lingkup penurunan nilai

- a) Aset keuangan dalam klasifikasi selain yang diukur pada nilai wajar melalui laba rugi
 - 1) Penurunan nilai atas aset keuangan pada biaya perolehan diamortisasi diakui sebagai pengurang dari nilai tercatat aset di dalam laporan posisi keuangan konsolidasian, dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan Kerugian Penurunan Nilai".
 - 2) Penurunan nilai atas aset keuangan (di luar instrumen ekuitas) yang diukur pada nilai wajar melalui penghasilan komprehensif lain diakui sebagai penambah dari penghasilan komprehensif lainnya di dalam laporan posisi keuangan konsolidasian (tidak mengurangi jumlah tercatat aset keuangan dalam laporan keuangan) sebagai "Keuntungan/Kerugian yang Belum Direalisasikan", dan diakui di dalam laporan laba rugi konsolidasian sebagai "Beban Pembentukan Cadangan kerugian penurunan nilai".

G. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount presented in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and an intention to settle on a net basis or realised the asset and settle the liability simultaneously. This means that the right to offset:

- a. *must not be contingent on a future event, and*
- b. *must be legally enforceable in all of the following circumstances:*
 - i. *the normal course of business;*
 - ii. *the event of default; and*
 - iii. *the event of insolvency or bankruptcy.*

H. Allowance for impairment losses of financial assets

The implementation of SFAS 71 "Financial Instruments" has changed the method of calculating impairment losses from the incurred loss approach in SFAS 55 "Financial Instruments: Recognition and Measurement" with the expected credit loss approach.

1. Scope of impairment

- a) *Financial assets in other than those measured at fair value through profit or loss*
 - 1) *Impairment of financial assets at amortised cost is recognised as a deduction from the asset's carrying amount in the consolidated statement of financial position, and recognised in the consolidated income statement as "Allowance for Impairment Losses".*
 - 2) *Impairment of financial assets (excluding equity instruments) measured at fair value through other comprehensive income is recognised as an addition to other comprehensive income in the consolidated statement of financial position (not reducing the carrying amount of financial assets in the financial statements) as "Unrealised Gain or Loss" and recognised in the consolidated income statement as "Allowance for Impairment Losses".*

b) Komitmen Pinjaman atau Kelonggaran Tarik yang Sifatnya Tidak Dapat Dibatalkan (*Committed*)

1) Penurunan nilai atas komitmen pinjaman diakui sebagai provisi pada komponen liabilitas Bank yang dicatat secara terpisah dari aset pinjaman yang terkait sebagai "Estimasi kerugian atas komitmen dan kontijensi", kecuali Grup tidak dapat mengidentifikasi secara terpisah.

2) Dalam kondisi tersebut, penurunan nilai atas komitmen pinjaman dan aset pinjaman diakui bersama sebagai pengurang dari nilai tercatat aset di dalam laporan posisi keuangan konsolidasian.

c) Kontrak Jaminan Keuangan
Penurunan nilai atas kontrak jaminan keuangan diakui sebagai provisi pada komponen liabilitas Bank sebagai "Estimasi kerugian atas komitmen dan kontijensi".

2. Evaluasi penurunan nilai yang dilakukan secara periodik

Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup mengevaluasi apakah terdapat peningkatan risiko kredit yang signifikan atau terdapat bukti objektif terjadinya penurunan nilai.

Kriteria yang digunakan oleh Grup untuk menentukan bukti objektif dari penurunan nilai adalah sebagai berikut:

- a) Kesulitan keuangan signifikan yang dialami penerbit atau pihak peminjam;
- b) Pelanggaran kontrak, seperti peristiwa gagal bayar atau peristiwa tunggakan bunga atau pokok;
- c) Pihak pemberi pinjaman, untuk alasan ekonomik atau kontraktual sehubungan dengan kesulitan keuangan yang dialami pihak peminjam, telah memberikan konsesi pada pihak peminjam yang tidak mungkin diberikan jika pihak peminjam tidak mengalami kesulitan tersebut;

b) Loan Commitments or Committed Unused Loan Facilities

1) Impairment of loan commitments is recognized as provision for the Bank's liability component which is recorded separately from the related loan assets as "Estimated losses on commitments and contingencies", unless the Group cannot identify it separately.

2) In that case, the impairment of loan commitments and loan assets is recognised together as a deduction from the carrying amount of the assets in the consolidated statement of financial position.

c) Financial Guarantee Contract
Impairment of financial guarantee contracts is recognised as a provision under the Bank's liability component as "Estimated losses on commitments and contingencies".

**2. Periodic evaluation on impairment of
financial assets**

The Group assesses at each reporting date whether there is a significant increase in credit risk or objective evidence that a financial asset or group of financial assets is impaired.

The criteria that the Group uses to determine that there is objective evidence of impairment loss include:

- a) Significant financial difficulty of the issuer or obligor;
- b) A breach of contract, such as a default or delinquency in interest or principal payments;
- c) The lender, for economic or legal reasons relating to the borrower's financial difficulty, granting to the borrower a concession that the lender would not otherwise consider if the borrower is not having that financial difficulty;

Kriteria yang digunakan oleh Grup untuk menentukan bukti objektif dari penurunan nilai adalah sebagai berikut (lanjutan):

- d) Terjadi kemungkinan bahwa pihak peminjam akan dinyatakan pailit atau melakukan reorganisasi keuangan lainnya;
- e) Hilangnya pasar aktif dari aset keuangan akibat kesulitan keuangan; atau
- f) Pembelian atau penerbitan aset keuangan dengan diskon sangat besar yang mencerminkan kerugian kredit yang terjadi.

Grup menggunakan kriteria tambahan untuk menentukan kualitas aset instrumen keuangan sesuai dengan Peraturan Otoritas Jasa Keuangan (POJK) No. 40/POJK.03/2019 tanggal 19 Desember 2019 tentang Penilaian Kualitas Aset Bank Umum.

Selanjutnya, Grup mengelompokkan aset keuangan berdasarkan hasil evaluasi tersebut yang mencerminkan tingkat risiko kredit aset keuangan.

a) Stage 1

Pada tanggal evaluasi penurunan nilai, risiko kredit atas instrumen keuangan tidak meningkat secara signifikan sejak pengakuan awal yang dapat dibuktikan dengan terjadinya seluruh hal berikut, yaitu:

Untuk Jenis Aset Keuangan Non-Surat Berharga:

- 1) Tidak terdapat tunggakan pokok dan/atau bunga lebih dari 30 hari;
- 2) Instrumen keuangan memiliki kualitas 1 atau 2; dan
- 3) Tidak direstrukturisasi.

Aset Keuangan Surat Berharga:

- 1) Memiliki peringkat investasi;

**2. Periodic evaluation on impairment of
financial assets (continued)**

The criteria that the Group uses to determine that there is objective evidence of impairment loss include (continued):

- d) There is a probability that the borrower will enter bankruptcy or other financial reorganisation;
- e) The disappearance of an active market for that financial asset because of financial difficulties; or
- f) Purchase or issuance of financial asset at significant discount which reflects the credit loss that occurs.

The Group uses additional criteria to determine the quality of financial instrument assets in accordance with the Financial Services Authority Regulation (POJK) No. 40/POJK.03/2019 dated 19 December 2019 concerning Asset Quality Assessment for Commercial Banks.

Furthermore, the Group classifies financial assets based on the evaluation results, which reflect the level of credit risk of the financial assets.

a) Stage 1

At the evaluation date of impairment, credit risk on financial instruments does not increase significantly since initial recognition, which can be proven by the occurrence of all of the following, namely:

For Types of Non-Securities Financial Assets:

- 1) There are no arrears of principal and/or interest for more than 30 days;
- 2) The financial instrument has a collectability of 1 or 2; and

3. Metode penurunan nilai

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut:

a) Metode Individual

1) Kriteria Individual

Grup mengevaluasi penurunan nilai secara individual apabila Grup memiliki informasi yang wajar dan terdukung untuk mengukur kerugian kredit ekspektasian sepanjang umurnya pada instrumen secara individual dan aset keuangan memiliki kriteria sebagai berikut:

- a. Aset keuangan per debitur memiliki nilai *outstanding* kumulatif lebih dari Rp25.000 (dua puluh lima miliar Rupiah);
- b. Kredit segmen *Corporate*, *Kelembagaan*, *Financial Institutions*, *Commercial*, dan *SME Banking*; dan
- c. Aset keuangan termasuk dalam kategori *stage 2* akibat dari restrukturisasi, *stage 3*, atau *POCI*.

Grup juga dapat menetapkan aset keuangan untuk dievaluasi secara individual meskipun aset keuangan dimaksud belum memiliki kriteria untuk dievaluasi secara individual.

- 2) Jika aset keuangan terdapat bukti objektif penurunan nilai dari aset keuangan yang dievaluasi secara individual namun tidak terdapat kerugian penurunan nilai, maka aset keuangan tersebut tetap dimasukkan ke dalam klasifikasi aset keuangan yang akan dievaluasi penurunan nilainya secara individual. Namun, Grup membentuk cadangan kerugian penurunan nilai atas aset keuangan tersebut berdasarkan *probability of default* yang dihasilkan dari evaluasi penurunan nilai kredit secara kolektif.

3. Impairment method

The Group evaluates the impairment using the following methods:

a) Individual Method

1) Individual Criteria

The Group evaluates impairment individually when the Group has reasonable and supportable information to measure the lifetime expected credit losses on an individual instrument and the financial assets have the following criteria:

- a. Financial assets per debtor with a cumulative outstanding amount of more than Rp25,000 (twenty five billion Rupiah);
- b. Loans for the Corporate, Institutional, Financial Institutions, Commercial, and SME Banking segments; and
- c. Financial assets fall into the stage 2 category as a result of a restructuring, stage 3, or POCI.

The Group may also designate financial assets to be evaluated individually even though the financial assets have not yet meet criteria for individual evaluation.

- 2) If a financial asset has objective evidence of impairment from a financial asset that is evaluated individually but there is no impairment loss, the financial asset is still classified as a financial asset that will be assessed for impairment individually. However, the Group establishes allowance for impairment losses on these financial assets based on the probability of default resulting from a collective evaluation of loans impairment.

a) Metode Individual (lanjutan)

3) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara individual didasarkan pada konsep estimasi jumlah probabilitas tertimbang kerugian aset keuangan. Konsep tersebut menggunakan pembobotan masing-masing dari 3 (tiga) skenario yaitu skenario optimis, skenario normal, dan skenario pesimis.

1. Optimis

Skenario dengan asumsi terdapat kenaikan atau ekspansi dalam perekonomian yang berakibat pada menguatnya nilai variabel seperti pertumbuhan ekonomi meningkat atau apresiasi nilai tukar.

2. Normal

Skenario yang memiliki peluang terbesar untuk terjadi dibandingkan 2 (dua) skenario lainnya. Nilai variabel dalam skenario *baseline* adalah hasil proyeksi dengan asumsi pergerakan ekonomi tanpa adanya peristiwa luar biasa, guncangan atau gejolak ekonomi.

3. Pesimis

Skenario dengan asumsi terdapat pelemahan atau kontraksi dalam perekonomian yang berakibat melemahnya nilai variabel seperti penurunan pertumbuhan ekonomi atau depresiasi nilai tukar.

3) Impairment Evaluation

Individual impairment evaluation is based on the concept of an estimated weighted probability of loss of financial assets. This concept uses the weighting of each of the 3 (three) scenarios, which are the optimistic scenario, the normal scenario, and the pessimistic scenario.

1. Optimistic

A scenario with the assumption that there is an increase or expansion in the economy which results in the strengthening of variable values such as increased economic growth or exchange rate appreciation.

2. Normal

The scenario that has the greatest chance of occurring compared to the other 2 (two) scenarios. The variable value in the baseline scenario is the projection result assuming economic movements without any extraordinary events, shocks or economic turmoil.

3. Pessimistic

Scenarios with the assumption that there is a weakening or contraction in the economy that results in weakening of variable values such as a decrease in economic growth or depreciation of the exchange rate.

3) Evaluasi Penurunan Nilai (lanjutan)

Setiap skenario menghasilkan nilai kini arus kas yang didiskontokan, di mana arus kas tersebut didasarkan pada seluruh informasi yang tersedia dengan *experienced credit judgement* serta mencerminkan seluruh informasi yang memperhatikan berbagai faktor seperti:

1. Kekuatan finansial dan kemampuan debitur untuk membayar kembali kewajiban (*repayment capacity*).
2. Jenis dan jumlah agunan.
3. Ketersediaan garansi.
4. Prospek usaha nasabah di masa datang.
5. Probabilitas penjualan agunan.
6. Kerugian historis.
7. Faktor makroekonomi yang relevan.

Selisih estimasi jumlah probabilitas tertimbang dengan jumlah *outstanding* aset keuangan mencerminkan jumlah kerugian penurunan nilai individual.

Metode evaluasi penurunan nilai secara individual didasarkan pada 2 (dua) konsep, yaitu estimasi jumlah kerugian aset keuangan dan estimasi jumlah yang dapat diperoleh kembali. Metode yang digunakan adalah *discounted cash flow* atau metode *fair value of collateral*. Bank menggunakan metode *fair value of collateral* sebagai arus kas masa datang apabila memenuhi salah satu kondisi berikut:

1. Kredit bersifat *collateral dependent*, yaitu jika pelunasan kredit hanya bersumber dari agunan;
2. Sulit untuk menentukan jumlah dan waktu penerimaan estimasi *cash flow* yang berasal dari pokok kredit dan/atau bunga dengan andal; dan/atau
3. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan aspek legal pengikatan agunan.

Each scenario provides a discounted present value of cash flows, where the cash flows are based on all available information with experienced credit judgment and reflect all information that takes into account various factors such as:

1. Financial strength and the debtor's repayment capacity.
2. Type and amount of collateral.
3. Availability of warranty.
4. Customers' future business prospects.
5. Probability of collateral sale.
6. Historical losses.
7. Relevant macroeconomic factors.

The difference between the weighted probability and the total outstanding of financial assets reflects the amount of the individual impairment loss.

The individual impairment evaluation method is based on 2 (two) concepts, which are the estimated amount of loss on financial assets and the estimated amount that can be recovered. The method used are *discounted cash flow* or *fair value of collateral* method. The Bank uses the *fair value of collateral* method as future cash flows if it meets one of the following conditions:

1. Loans is collateral dependent, if loans repayment source only from collateral;
2. It is difficult to reliably determine the amount and timing of receipt of the estimated cash flow from loan principal and/or interest; and/or;
3. Foreclosure of collateral is likely to occur and is supported by legal binding aspects of collateral.

b) Metode Kolektif

1) Kriteria Kolektif

Bank mengevaluasi penurunan nilai secara kolektif apabila aset keuangan memiliki kesamaan dalam karakteristik risiko aset keuangan dengan tujuan untuk memfasilitasi analisis yang didesain untuk memungkinkan peningkatan risiko kredit secara signifikan dapat diidentifikasi tepat waktu. Kriteria aset keuangan yang dievaluasi secara kolektif adalah sebagai berikut:

- a. Aset keuangan per debitur merupakan aset keuangan *non-performing* atau memiliki *days past due* > 90 hari dan memiliki nilai kumulatif sebesar ≤ Rp25.000 (dua puluh lima milyar rupiah) untuk Segmen *Corporate, Kelembagaan, Financial Institutions, Commercial* dan *SME Banking*;
- b. Aset keuangan *performing* atau memiliki *days past due* ≤ 90 hari dan tidak direstrukturisasi untuk segmen *Corporate, Kelembagaan, Financial Institutions, Commercial* dan *SME Banking*; dan
- c. Seluruh kredit segmen *Micro Banking* dan *Consumer*.

Secara garis besar, seluruh portofolio kredit yang evaluasi penurunan nilainya tidak dihitung menggunakan metode individual, akan dievaluasi menggunakan metode kolektif.

2) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara kolektif didasarkan pada konsep *Probability of Default (PD)*, *Loss Given Default (LGD)* dan *Exposure at Default (EAD)* yang mempertimbangkan informasi masa lalu, terkini, dan masa mendatang.

The Bank assesses impairment collectively if the financial assets share the same risk characteristics of the financial assets with the purpose of facilitating analysis which is designed to allows a significant increase in credit risk to be identified in a timely manner. The criteria for financial assets that are evaluated collectively are as follows:

- a. Financial assets per debtor are *non-performing* financial assets or have *days past due* > 90 days and have a cumulative value of ≤ Rp25,000 (twenty five billion rupiah) for the *Corporate, Institutional, Financial Institutions, Commercial*, and *SME Banking* segments;
- b. *Performing* financial assets or having *days past due* ≤ 90 days and were not restructured for the *Corporate, Institutional, Financial Institutions, Commercial*, and *SME Banking* segments; and
- c. All loans in the *Micro Banking* and *Consumer* segments.

In general, all loan portfolios for which impairment evaluation is not calculated using the individual method will be evaluated using the collective method.

2) Impairment Evaluation

The evaluation of collective impairment is based on the concepts of *Probability of Default (PD)*, *Loss Given Default (LGD)*, and *Exposure at Default (EAD)* which consider past, current, and future information.

Metode *Basel* dilakukan dengan menentukan hubungan antara PD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model *Basel* yang telah didapatkan digunakan sebagai dasar penentuan nilai PD dari setiap debitur.

Metode *Vasicek* adalah metode penentuan PD menggunakan formula korelasi aset yang telah ditentukan oleh *Basel Committee*.

Metode *Roll Rate Transition Matrix* menggunakan *historical transition bucket* PD. *Bucket* PD yang digunakan dalam perhitungan *historical* adalah sebagai berikut:

1. *Bucket* 1: *Lancar*
2. *Bucket* 2: 1-30 days *past due* (DPD)

b. Loss Given Default

Bank menggunakan metode *Basel* dan *Historical* dalam menentukan nilai LGD dari setiap debitur. LGD menggambarkan persentase nominal fasilitas yang tidak akan dapat dipulihkan oleh Bank terhadap debitur *default*. LGD biasa dihitung dengan formula *1-Recovery Rate*. *Recovery rate* dihitung mempertimbangkan *Time Value of Money* dari pengembalian kewajiban yang telah *default*. Tingkat suku bunga yang digunakan untuk menghitung *Time Value of Money* dari *Recovery* adalah *Effective Interest Rate* (EIR).

Metode *Basel* dilakukan dengan menentukan hubungan antara LGD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model *Basel* yang telah didapatkan digunakan sebagai dasar penentuan nilai LGD dari setiap debitur.

Metode *Historical* dilakukan dengan menghitung rata-rata nilai LGD dalam periode jangka panjang pada segmen yang dimaksud.

b. Loss Given Default

The Bank uses *Basel* and *Historical* methods in determining the LGD value of each debtor. LGD describes the nominal percentage of the facility that the Bank will not be able to recover against the default debtor. Regular LGD is calculated with formula *1-Recovery Rate*. The recovery rate is calculated by considering the *Time Value of Money* from the recovery of the default obligation. The interest rate used to calculate the *Time Value of Money of Recovery* is the *Effective Interest Rate* (EIR).

The *Basel* method is carried out by determining the relationship between a debtor's LGD and the internal characteristics of the debtor concerned. The *Basel* model that has been obtained is used as the basis for determining the LGD value of each debtor.

Historical method is done by calculating the average value of LGD in the long term observation period in the respective segment.

c. Exposure at Default

Dalam menentukan nilai EAD dari setiap debitur, Bank menggunakan metode *Basel, Prepayment Rate* dan *Expected Lifetime*. EAD menggambarkan *exposure* yang akan ditanggung Bank jika terdapat debitur yang *default*.

Metode *Basel* dalam perhitungan EAD dilakukan dengan menentukan hubungan antara EAD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan.

Metode *Prepayment Rate* ialah metode yang mempelajari *behaviour* dari tingkat pembayaran debitur yang lebih besar dibandingkan dengan besaran pembayaran fasilitas yang telah dijadwalkan.

Forward-Looking Macro Adjustment in LGD is a method used to determine the forward looking LGD value based on the historical relationship between macroeconomics and the Bank's LGD value. If there is no relationship between macroeconomics and the Bank's LGD value, the Bank may not use *Forward-Looking* in determining the LGD value.

c. Exposure at Default

In determining the EAD value of each debtor, the Bank uses the *Basel, Prepayment Rate, and Expected Lifetime* method. EAD describes the exposure that will be borne by the Bank if there is a debtor become defaults.

The *Basel* method in calculating EAD is performed by determining the relationship between a debtor's EAD and the internal characteristics of the respective debtor.

The *Prepayment Rate* method is a method that studies the behavior of the debtor's payment rate that is bigger than the scheduled facility payment amount.

d. *Expected Credit Loss*

Secara umum formula untuk menghitung ECL secara kolektif adalah pengkalian antara *Probability of Default*, *Loss Given Default*, dan *Exposure at Default*.

Dalam menghitung besarnya cadangan kerugian penurunan nilai kolektif, Bank menggunakan nilai saldo rekening kredit dari yang penurunan nilainya dievaluasi secara kolektif.

Perhitungan cadangan kerugian penurunan nilai sesuai pada masing-masing *stage* sesuai pada karakteristik *staging*. Metode perhitungan pada masing-masing *stage* adalah sebagai berikut:

1. *Stage 1: 12-months ECL*
2. *Stage 2: Lifetime ECL*

In calculating the amount of collective impairment, the Bank uses the loan carrying value which the impairment value is assessed collectively.

Calculation of impairment is done for each stage according to the characteristics of the staging. The calculation method for each stage is as follows:

1. *Stage 1: 12-months ECL*

For these financial assets, the Group applies a risk-adjusted effective interest rate on the amortised cost of the financial assets since initial recognition.

Entitas Anak menetapkan piutang murabahah yang harus dievaluasi penurunan nilainya secara individual, jika memenuhi salah satu kriteria di bawah ini:

- 1) Piutang murabahah memiliki kolektibilitas kurang lancar, diragukan dan macet, dan memiliki saldo nilai piutang secara individual di atas atau sama dengan Rp10.000; dan
- 2) Piutang murabahah yang direstrukturisasi atau pernah direstrukturisasi dan yang secara individual memiliki saldo nilai piutang di atas Rp10.000.

Entitas Anak menetapkan piutang murabahah yang harus dievaluasi penurunan nilainya secara kolektif, jika memenuhi salah satu kriteria di bawah ini:

- 1) Piutang murabahah yang secara individual memiliki nilai signifikan namun tidak memiliki bukti objektif penurunan nilai;
- 2) Piutang murabahah yang secara individual memiliki nilai tidak signifikan; dan
- 3) Piutang murabahah yang direstrukturisasi yang secara individual memiliki nilai tidak signifikan.

- (b) Aset keuangan yang tersedia untuk dijual

Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Lihat Catatan 2c.(H).(2) untuk kriteria bukti objektif adanya penurunan nilai.

Penurunan yang signifikan atau penurunan jangka panjang atas nilai wajar dari investasi dalam instrumen utang di bawah biaya perolehannya merupakan bukti objektif terjadinya penurunan nilai dan menyebabkan pengakuan kerugian penurunan nilai. Ketika terdapat bukti tersebut di atas untuk aset keuangan yang tersedia untuk dijual, kerugian kumulatif, yang merupakan selisih antara biaya perolehan dengan nilai wajar kini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, dikeluarkan dari ekuitas dan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Jika, pada tahun berikutnya, nilai wajar aset keuangan yang diklasifikasikan dalam kelompok tersedia untuk dijual meningkat dan peningkatan tersebut dapat secara objektif dihubungkan dengan peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, maka kerugian penurunan nilai tersebut harus dipulihkan melalui laba rugi dan penghasilan komprehensif lain konsolidasian.

- (b) Financial assets classified as available for sale

The Group assesses at each date of the consolidated statement of financial position whether there is objective evidence that a financial asset or a group of financial assets is impaired. Refer to Note 2c.(H).(2) for the criteria of objective evidence of impairment.

A significant or prolonged decline in the fair value of the debt investments below its cost is objective evidence of impairment resulting in the recognition of an impairment loss. If any such evidence exists for available for sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in consolidated statement of profit or loss and other comprehensive income is removed from equity and recognised in the consolidated statement of profit or loss and other comprehensive income.

If, in a subsequent period, the fair value of a financial asset classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in consolidated statement of profit or loss and other comprehensive income, the impairment loss is reversed through the consolidated statement of profit or loss and other comprehensive income.

Kontrak jaminan keuangan adalah kontrak yang mengharuskan penerbit untuk melakukan pembayaran yang ditetapkan untuk mengganti uang pemegang kontrak atas kerugian yang terjadi karena debitur tertentu gagal untuk melakukan pembayaran pada saat jatuh tempo, sesuai dengan ketentuan dari instrumen utang. Jaminan keuangan tersebut diberikan kepada bank-bank, lembaga keuangan dan badan-badan lainnya atas nama debitur untuk menjamin kredit dan fasilitas-fasilitas perbankan lainnya.

Jaminan keuangan awalnya diakui dalam laporan keuangan konsolidasian sebesar nilai wajar pada tanggal jaminan diberikan. Nilai wajar dari jaminan keuangan pada saat dimulainya transaksi pada umumnya sama dengan provisi yang diterima untuk jaminan diberikan dengan syarat dan kondisi normal. Setelah pengakuan awal, liabilitas Bank atas jaminan tersebut diukur pada jumlah yang lebih tinggi antara jumlah awal, dikurangi amortisasi provisi dan estimasi terbaik dari jumlah yang diharapkan akan terjadi untuk menyelesaikan jaminan tersebut. Estimasi ini ditentukan berdasarkan pengalaman transaksi yang sejenis dan kerugian historis masa lalu, dilengkapi dengan penilaian manajemen. Pendapatan provisi yang diperoleh diamortisasi selama jangka waktu jaminan dengan menggunakan metode garis lurus.

Bank menentukan cadangan kerugian penurunan nilai aset keuangan atas kontrak jaminan keuangan yang memiliki risiko kredit dan komitmen berdasarkan nilai yang lebih tinggi antara nilai amortisasi (nilai tercatat) dan nilai kini atas pembayaran liabilitas yang diharapkan akan terjadi (ketika pembayaran atas jaminan tersebut menjadi *probable*) atau nilai cadangan kerugian penurunan nilai yang dihitung berdasarkan data kerugian historis untuk evaluasi penurunan nilai secara kolektif.

**(c) Financial guarantee contracts and
commitments**

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the contracts holder for a loss incurred because a specified debtor defaulted to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other institutions on behalf of customers to secure loans and other banking facilities.

Financial guarantees are initially recognised in the consolidated financial statements at fair value on the date which the guarantee was given. The fair value of a financial guarantee at inception is likely to equal with the provision received because all guarantees are agreed on arm's length terms. Subsequent to initial recognition, the Bank's liabilities under such guarantees are measured at the higher amount between the initial amount, less amortisation of provision recognised, and the best estimates of the amount required to settle the guarantee. These estimation are determined based on experience of similar transactions and history of past losses, supplemented by the judgement from management. The provision income earned is amortised over the period of guarantees using the straight-line method.

The Bank determines impairment losses on financial assets of financial guarantee contracts that have credit risk and commitment based on the value that is higher between the amortised value (carrying value) and the present value of the liabilities that are expected to occur (when payment under the guarantee has become probable) or impairment losses that are calculated based on historical loss data for a collective evaluation of impairment.

I. Investasi pada sukuk

Sebelum pengakuan awal, Grup menentukan klasifikasi investasi pada sukuk berdasarkan tujuan investasi Grup. Klasifikasi dalam investasi sukuk terdiri dari:

- Biaya perolehan

Jika investasi tersebut dimiliki dalam suatu model usaha yang bertujuan utama untuk memperoleh arus kas kontraktual; dan terdapat persyaratan kontraktual untuk menentukan tanggal tertentu pembayaran pokok dan/atau hasilnya. Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* termasuk biaya transaksi. Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk.

- Diukur pada nilai wajar melalui penghasilan komprehensif lain

Jika investasi tersebut dimiliki dalam suatu model usaha yang bertujuan utama untuk memperoleh arus kas kontraktual dan melakukan penjualan sukuk dan terdapat persyaratan kontraktual menentukan tanggal tertentu pembayaran pokok dan/atau hasilnya. Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* termasuk biaya transaksi. Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk. Perubahan nilai wajar diakui dalam penghasilan komprehensif lain. Pada saat penghentian pengakuan saldo, perubahan nilai wajar dalam penghasilan komprehensif lain direklasifikasi ke laba rugi sebagai penyesuaian reklasifikasi.

- Diukur pada nilai wajar melalui laba rugi

Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* yang diukur pada nilai wajar melalui laba rugi tidak termasuk biaya transaksi. Untuk investasi pada sukuk yang diukur pada nilai wajar melalui laba rugi, selisih antara nilai wajar dan jumlah tercatat diakui dalam laba rugi.

I. Investment in sukuk

Before the initial recognition, the Group determines the classification of investment in sukuk based on the Group's investment objective. Investment in sukuk can be measured as follows:

- Acquisition cost

If the investment is held within a business model that aims to collect contractual cash flows and there is a contractual requirement to determine the specific date of principal payments and/or the returns. The acquisition cost for sukuk *ijarah* and sukuk *mudharabah* includes transaction cost. The difference between acquisition cost and nominal value is amortised using straight-line method during the period of the sukuk instrument.

- Measured at fair value through other comprehensive income

If the investment is held within a business model which its primary purpose is to obtain contractual cash flows and sell off sukuk and there is a contractual requirements determined by specific date of payment of principal and/or results. The acquisition cost of sukuk *ijarah* and sukuk *mudharabah* includes transaction costs. The difference between the acquisition cost and nominal value is amortised on straight-line basis over the terms of sukuk. The changes in fair value are recognised in other comprehensive income. At the time of derecognition, the changes in fair value in other comprehensive income are reclassified to profit or loss as a reclassification adjustment.

- Measured at fair value through profit or loss

The acquisition cost of sukuk *ijarah* and sukuk *mudharabah* is measured at fair value through profit or loss excluding transaction costs. For investments in sukuk which are measured at fair value through profit or loss, the difference between the fair value and the carrying amount is recognised in profit or loss.

J. Sukuk *mudharabah* yang diterbitkan

Sukuk *mudharabah* yang diterbitkan disajikan sebesar nilai nominal. Biaya-biaya yang timbul dari penerbitan surat berharga dicatat sebagai beban yang ditangguhkan yang disajikan dalam akun "Aset lain-lain" dan diamortisasi secara garis lurus selama jangka waktu surat berharga.

K. Penentuan nilai wajar

Nilai wajar adalah pengukuran berbasis pasar. Pengukuran/penetapan nilai wajar bertujuan untuk mengestimasi harga dimana transaksi teratur (*orderly transaction*) untuk menjual aset atau mengalihkan liabilitas akan terjadi antara pelaku pasar (*market participants*) pada tanggal pengukuran.

Ketika tidak terdapat pasar aktif atau harga suatu instrumen keuangan yang identik tidak dapat diobservasi, Grup dapat mengukur nilai wajar menggunakan teknik penilaian sesuai jenis instrumen keuangan.

Grup dapat melakukan pengukuran nilai wajar, dengan hirarki sebagai berikut:

1. Input Level 1, yaitu harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses Grup pada tanggal pengukuran.
2. Input Level 2, yaitu input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung atau tidak langsung.
3. Input Level 3, yaitu input yang tidak dapat diobservasi untuk aset atau liabilitas.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- Di pasar utama untuk aset dan liabilitas tersebut; atau
- Jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

c. *Financial instruments* (continued)

J. *Sukuk mudharabah issued*

Sukuk mudharabah issued is recognised at nominal amount. Transaction costs from the issuance of sukuk mudharabah are recognised as deferred expense and presented as "Other assets" and amortised using straight-line over the terms of sukuk mudharabah.

K. *Determination of fair value*

Fair value is a market based measurement. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction among market participants at the measurement date.

When there is no active market or the price of an identical financial instrument cannot be observed, the Group can measure fair value using valuation techniques according to the type of financial instrument.

The Group can measure fair value, with the following hierarchy:

1. *Input Level 1, the quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.*
2. *Input Level 2, the input other than quoted price included in level 1 that can be observed for assets or liabilities, either directly or indirectly.*
3. *Input Level 3, the unobservable input for an asset or liability.*

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- *In the principal market for the asset or liability; or*
- *In the absence of a principal market, in the most advantageous market for the asset or liability.*

K. Penentuan nilai wajar (lanjutan)

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomik dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Nilai wajar untuk instrumen keuangan yang diperdagangkan di pasar aktif, seperti efek-efek dan obligasi pemerintah, ditentukan berdasarkan nilai pasar yang berlaku pada tanggal laporan posisi keuangan konsolidasian menggunakan harga yang dipublikasikan secara rutin dan berasal dari sumber yang terpercaya, seperti Bloomberg, Reuters atau harga yang diberikan oleh broker (harga kuotasian). Investasi dalam unit reksadana dinyatakan sebesar nilai pasar sesuai nilai aset bersih dari reksadana pada tanggal laporan posisi keuangan konsolidasian.

Instrumen keuangan dianggap memiliki kuotasi di pasar aktif, jika harga kuotasi tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek (*dealer*), perantara efek (*broker*) dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Jika kriteria di atas tidak terpenuhi, maka pasar aktif dinyatakan tidak tersedia. Indikasi-indikasi dari pasar tidak aktif adalah terdapat selisih yang besar antara harga penawaran dan permintaan atau kenaikan signifikan dalam selisih harga penawaran dan permintaan dan hanya terdapat beberapa transaksi terkini.

Untuk efek-efek yang tidak mempunyai harga pasar, estimasi atas nilai wajar efek-efek ditetapkan dengan mengacu pada nilai wajar instrumen lain yang substansinya sama atau dihitung berdasarkan arus kas yang diharapkan terhadap aset bersih efek-efek tersebut.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES
(continued)**

c. Financial instruments (continued)

K. Determination of fair value (continued)

The fair value of an asset or a liability should be measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset at its highest and best use or by selling it to another market participant that would use the asset at its highest and best use.

The fair value of financial instruments traded in active markets, such as marketable securities and government bonds, is determined based on quoted market prices at the consolidated statement of financial position date using price that published regularly and from credible sources such as quoted market prices from Bloomberg, Reuters or broker's quoted price. Investments in mutual fund units are stated at market value, in accordance with the net value of assets of the mutual funds at the consolidated statement of financial position date.

A financial instrument is deemed to be quoted in an active market if quoted prices are available at any time and can be obtained regularly from stock exchanges, dealers, and brokers. These prices reflect actual and regular market transactions in a fair transaction. If the criteria above are not met, the active market is declared unavailable. Indications of an inactive market are that there is a large gap between the bid and ask prices or a significant increase in the difference between the bid and ask prices, and there are only a few recent transactions.

For marketable securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially has the same characteristic or calculated based on the expected cash flows of the underlying net asset base of the marketable securities.

K. Penentuan nilai wajar (lanjutan)

Untuk obligasi pemerintah yang tidak memiliki nilai pasar, estimasi nilai wajar ditentukan dengan menggunakan model internal berdasarkan nilai kini dari arus kas masa depan yang diharapkan (*next-repricing method*) dengan menggunakan faktor deflator.

L. Reformasi acuan suku bunga

Untuk pengukuran instrumen keuangan yang menggunakan biaya perolehan diamortisasi (aset keuangan instrumen utang yang diklasifikasikan sebagai biaya perolehan diamortisasi dan nilai wajar melalui penghasilan komprehensif lain, serta liabilitas keuangan yang diukur pada biaya perolehan diamortisasi), perubahan arus kas kontraktual masa depan dari instrumen keuangan tersebut yang terjadi akibat reformasi suku bunga (perubahan suku bunga acuan kontraktual dari sebelumnya suku bunga LIBOR menjadi suku bunga acuan alternatif) akan mengubah tingkat suku bunga efektif instrumen keuangan tersebut. Perubahan arus kas kontraktual tersebut tidak mempengaruhi biaya perolehan diamortisasi instrumen keuangan dimaksud, dan tidak berdampak pada laba atau rugi (penerapan praktis). Penerapan praktis tersebut dapat diterapkan jika dan hanya jika 2 (dua) persyaratan berikut terpenuhi:

1. Perubahan arus kas kontraktual tersebut diperlukan sebagai akibat langsung dari reformasi acuan suku bunga; dan
2. Suku bunga acuan alternatif pengganti secara ekonomis setara (*economically equivalent*) dengan suku bunga acuan yang digunakan sebelumnya.

d. Prinsip-prinsip konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Bank Mandiri dan Entitas Anak yang mayoritas sahamnya dimiliki atau dikendalikan oleh Bank Mandiri.

K. Determination of fair value (continued)

For government bonds with no quoted market prices, a reasonable estimate of the fair value is determined using the internal model based on the present value of expected future cash flows using the next-repricing method with a deflator factor.

L. Interest rate benchmark reform

For the measurement of financial instruments using amortised cost (financial assets of debt instruments classified as amortised cost and fair value through other comprehensive income, as well as financial liabilities measured at amortised cost), changes in the future contractual cash flows of those financial instruments occurs as a result of interest rate reform (change in the contractual benchmark interest rate from the previous LIBOR interest rate to an alternative benchmark interest rate) will change the effective interest rate of the financial instrument. The change in contractual cash flows does not affect the amortised cost of the financial instrument, and has no impact on profit or loss (practical expedient). Such practical expedient can be applied if and only if the following 2 (two) requirements are met:

1. *The change in contractual cash flows is necessary as a direct result of the reform of benchmark interest rates; and*
2. *The alternative reference interest rate is economically equivalent to the previously used benchmark interest rate.*

d. Principles of consolidation

The consolidated financial statements include the financial statement of Bank Mandiri and its Subsidiaries in which the majority shares are owned or controlled by Bank Mandiri.

Control is presumed to exist where the Bank is exposed, or has rights, to variable returns from its involvement with the Subsidiaries and has ability to use its power to affect its returns from its involvement with the Subsidiaries.

- b) Eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak.
- c) Kemampuan untuk menggunakan kekuasaannya atas Entitas Anak untuk mempengaruhi jumlah imbal hasil Bank.

Pada laporan keuangan konsolidasian Bank Mandiri, semua saldo dan transaksi yang signifikan antar perusahaan yang dikonsolidasi telah dieliminasi. Kepentingan nonpengendali atas laba bersih Entitas Anak disajikan sebagai pengurang dari laba bersih konsolidasian untuk mendapatkan jumlah laba yang menjadi hak pemilik entitas Bank. Kepentingan nonpengendali dalam aset bersih disajikan sebagai bagian dari ekuitas kecuali kepentingan nonpengendali yang berasal dari konsolidasi atas reksadana disajikan sebagai bagian dari liabilitas dalam laporan posisi keuangan konsolidasian.

Laporan keuangan konsolidasian disusun dengan menggunakan kebijakan akuntansi yang sama untuk peristiwa dan transaksi sejenis dalam kondisi yang sama. Kebijakan akuntansi yang digunakan dalam laporan keuangan konsolidasian telah diterapkan secara konsisten oleh Entitas Anak, kecuali bila dinyatakan lain.

Bila pengendalian atas suatu entitas diperoleh atau berakhir dalam tahun berjalan, hasil usaha entitas tersebut dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal pengendalian dimulai atau sampai dengan tanggal pengendalian berakhir.

Transaksi kombinasi bisnis entitas sepengendali, berupa pengalihan bisnis yang dilakukan dalam rangka reorganisasi entitas-entitas yang berada dalam suatu kelompok usaha yang sama, bukan merupakan perubahan kepemilikan dalam arti substansi ekonomi, sehingga transaksi tersebut tidak dapat menimbulkan laba atau rugi bagi kelompok usaha secara keseluruhan ataupun bagi entitas individual dalam kelompok usaha tersebut.

Oleh karena transaksi kombinasi bisnis entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan atas bisnis yang dipertukarkan, maka transaksi tersebut diakui pada jumlah tercatat berdasarkan metode penyatuan kepemilikan.

Pada tanggal 1 April 2016, Grup melakukan perubahan kebijakan akuntansi atas tanah dari model biaya menjadi model revaluasi. Tanah disajikan sebesar nilai wajar.

Penilaian terhadap tanah dilakukan oleh penilai independen eksternal yang memiliki sertifikasi. Penilaian atas aset tersebut dilakukan secara berkala untuk memastikan bahwa nilai wajar aset yang direvaluasi tidak berbeda secara material dengan nilai tercatatnya.

Jika nilai wajar dari aset yang direvaluasi mengalami perubahan yang signifikan dan fluktuatif, maka perlu direvaluasi secara tahunan, sedangkan jika nilai wajar dari aset yang direvaluasi tidak mengalami perubahan yang signifikan dan fluktuatif, maka perlu dilakukan revaluasi minimal 3 tahun sekali.

Kenaikan nilai tercatat yang timbul dari revaluasi tanah dicatat sebagai "Selisih bersih revaluasi aset tetap" dan disajikan sebagai penghasilan komprehensif lain. Penurunan nilai tercatat yang timbul dari revaluasi dicatat sebagai beban pada tahun berjalan. Apabila aset tersebut memiliki saldo "Selisih bersih revaluasi aset tetap" yang disajikan sebagai penghasilan komprehensif lain, maka selisih penurunan nilai tercatat tersebut dibebankan terhadap "Selisih bersih revaluasi aset tetap" dan sisanya diakui sebagai beban tahun berjalan.

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

Sesuai dengan PSAK 16 (Revisi 2011) tentang "Aset Tetap", biaya perolehan hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai diakui sebagai aset tetap. Biaya perolehan tersebut merupakan biaya yang dapat diatribusikan secara langsung untuk memperoleh hak atas tanah tersebut termasuk biaya pengurusan legal hak atas tanah ketika tanah diperoleh pertama kali.

Hak atas tanah dalam bentuk hak guna usaha, hak guna bangunan dan hak pakai tidak disusutkan, kecuali terdapat bukti yang mengindikasikan bahwa perpanjangan atau pembaruan hak atas tanah tersebut kemungkinan besar atau pasti tidak diperoleh.

PSAK 48 (Revisi 2014) tentang "Penurunan Nilai Aset" mensyaratkan bahwa nilai tercatat aset tetap dikaji ulang setiap tanggal laporan posisi keuangan konsolidasian untuk menilai apakah aset tetap tersebut nilai tercatatnya lebih tinggi dari nilai terpulihkan (*recoverable amount*) dari aset tetap tersebut. Jika nilai tercatat aset tetap melebihi taksiran nilai terpulihkan dari aset tetap tersebut, nilai tercatat aset tetap harus diturunkan menjadi nilai terpulihkan dari aset tetap tersebut.

ii. Aset dan liabilitas sewa

Grup telah menerapkan PSAK 73 "Sewa" sejak tanggal 1 Januari 2020.

PSAK 73 menerapkan persyaratan baru atau amendemen sehubungan dengan akuntansi sewa. Standar ini memperkenalkan perubahan signifikan untuk akuntansi penyewa dengan menghapus perbedaan antara sewa operasi dan pembiayaan, serta mensyaratkan pengakuan aset hak guna dan pengakuan liabilitas sewa pada saat dimulainya sewa untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Berbeda dengan akuntansi penyewa, persyaratan untuk akuntansi pesewa sebagian besar tidak berubah.

PSAK 73 menentukan apakah kontrak merupakan, atau mengandung sewa atas dasar jika penyewa memiliki hak untuk mengendalikan penggunaan aset selama suatu jangka waktu tertentu untuk dipertukarkan dengan imbalan.

Grup menggunakan tingkat diskonto tunggal untuk portofolio sewa dengan karakteristik yang hampir sama.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

i. Fixed assets and software (continued)

In accordance with SFAS No. 16 (Revised 2011) regarding "Fixed Assets", the cost of land rights in the form of right to cultivate, right to build and use rights are recognised as fixed assets. The acquisition cost is the cost that are directly attributable to obtain land rights, including the cost of legal rights to the land when the land was first acquired.

Land rights in the form of right to cultivate, right to build and use rights are not amortised, unless there is evidence to indicate that the extension or renewal of land rights is likely to or definitely not obtained.

SFAS No. 48 (Revised 2014) regarding "Impairment of Assets" requires that the carrying amounts of fixed assets are reviewed at each consolidated statement of financial position date to assess whether they are recorded in excess of their recoverable amounts of the fixed assets. If the carrying value exceeds this estimated recoverable amount, assets are written down to their recoverable amount of the fixed assets.

ii. Leased assets and liabilities

The Group has implemented SFAS No. 73 "Leased" since 1 January 2020.

SFAS No. 73 applies new or amended requirements with respect to lease accounting. This standard introduces significant changes to lessee accounting by eliminating the distinction between operating and financing leases, and requires recognition of right-of-use assets and recognition of lease liabilities at lease inception for all leases, except for short-term leases and leases of low-value assets. In contrast to lessee accounting, the requirements for lessor accounting are mostly unchanged.

SFAS No. 73 determines whether a contract is, or contains a lease on the basis that the lessee has the right to control the use of the asset for a specified period of time in exchange for certain consideration.

The Group uses a single discount rate for lease portfolios with similar characteristics.

Grup menerapkan pendekatan pengakuan dan pengukuran tunggal untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang mewakili hak untuk menggunakan aset pendasar.

Grup mengakui aset hak guna pada tanggal dimulainya sewa. Aset hak guna diukur pada biaya perolehan, dikurangi akumulasi penyusutan dan kerugian penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Liabilitas sewa merupakan jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Biaya aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset, sebagai berikut:

- Bangunan	: 20 tahun/years
- Mesin kantor	: 5 tahun/years
- Komputer perangkat keras	: 5 tahun/years
- Komputer perangkat lunak	: 5 tahun/years
- Inventaris kantor	: 5 tahun/years
- Inventaris rumah dinas dan mess	: 5 tahun/years
- Kendaraan bermotor	: 5 tahun/years

Jika kepemilikan aset sewa dialihkan ke Grup pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK 48 "Penurunan Nilai Aset".

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dilakukan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Grup dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Grup mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES
(continued)**

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

ii. Leased assets and liabilities (continued)

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and low-value asset leases. The Group recognizes a lease liabilities to make lease payments and rights of use assets that represent the right to use the underlying asset.

The Group recognised the rights of use assets at the inception date of the lease. The rights of use assets are measured at cost, less accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. Lease liabilities are the amount of lease payments accrued until the end of the lease term, discounted using the incremental loan interest rate. The cost of lease assets includes the amount of lease liability recognised, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease less lease incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset, as follows:

	Building	-
	Office machines	-
	Computer hardware	-
	Computer software	-
	Office equipment	-
	Inventory of official houses and mess	-
	Motor vehicle	-

If ownership of the leased asset is transferred to the Group at the end of the lease term or the lease payments reflect the exercise of the purchase option, depreciation is calculated using the estimated useful lives of the asset. Rights of use assets are assessed for impairment in accordance with SFAS No. 48 "Impairment of Assets".

At the inception date of the lease, the Group recognizes lease liabilities which measured at the present value of future lease payments to be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less lease incentive receivables, variable lease payments that are index or interest rate dependent, and the amount expected to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Group and the payment of a penalty to terminate the lease, if the lease term reflects the Group exercising the lease termination option. Variable lease payments that are not dependent on an index or interest rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

ii. Aset dan liabilitas sewa (lanjutan)

Dalam menghitung nilai kini dari pembayaran sewa, Grup menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

Sewa jangka pendek dengan durasi kurang dari 12 bulan dan sewa aset bernilai rendah, serta elemen-elemen sewa tersebut, sebagian atau seluruhnya tidak menerapkan prinsip-prinsip pengakuan yang ditentukan oleh PSAK 73. Grup akan mengakui pembayaran sewa tersebut dengan dasar garis lurus selama masa sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Beban ini ditunjukkan pada beban umum dan administrasi dalam laporan laba rugi.

Penerapan pencatatan PSAK 73 berlaku untuk seluruh sewa (kecuali sebagaimana yang disebutkan sebelumnya), yaitu sebagai berikut:

- (a) Menyajikan aset hak-guna sebagai bagian dari aset tetap dan liabilitas sewa disajikan sebagai bagian dari liabilitas lain-lain dalam laporan posisi keuangan konsolidasian, yang diukur pada nilai kini dari pembayaran sewa masa depan;
- (b) Mencatat penyusutan aset hak-guna dan bunga atas liabilitas sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian; dan
- (c) Memisahkan jumlah pembayaran ke bagian pokok (disajikan dalam kegiatan pendanaan) dan bunga (disajikan dalam kegiatan operasional) dalam laporan arus kas konsolidasian.

**2. SUMMARY OF MATERIAL ACCOUNTING POLICIES
(continued)**

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

ii. Leased assets and liabilities (continued)

In calculating the present value of lease payments, the Group uses the incremental loan interest rate of the lessee at the inception date of the lease because the interest rate implicit in the lease cannot be determined. After the inception date of the lease, the amount of the lease liability is increased to reflect the increase in interest and less lease payments made. In addition, the carrying amount of the lease liability is remeasured if there are modifications, changes in the term of the lease, changes in lease payments, or changes in the valuation of the option to purchase the underlying asset.

Short-term leases with a duration of less than 12 months and leases of low value assets, as well as elements of such leases, partially or wholly do not apply the recognition principles prescribed by SFAS No. 73. The Group will recognize the lease payment on a straight-line basis over the lease term in the consolidated statement of profit or loss and other comprehensive income. This expense is shown under general and administrative expenses in the income statement.

The implementation of SFAS No. 73 payment applies to all leases (except as stated earlier), as follows:

- (a) Present right of use assets as part of fixed assets and leased liabilities are presented as part of other liabilities in the consolidated statement of financial position, measured at the present value of future lease payments;*
- (b) Record the depreciation of right of use assets and the interest of lease liability in the consolidated statement of profit or loss and other comprehensive income; and*
- (c) Separating the total payment into principal (presented in financing activities) and interest (presented in operating activities) in the consolidated statement of cash flows.*

Pengujian kecukupan liabilitas (lanjutan)

Untuk asuransi jiwa, liabilitas kepada pemegang polis khususnya liabilitas untuk klaim masa depan diuji untuk menentukan apakah liabilitas tersebut cukup untuk menutupi semua arus kas keluar di masa depan termasuk semua manfaat yang dijamin dan manfaat tambahan yang dijamin, manfaat partisipasi yang tidak dijamin (jika ada), semua biaya untuk penerbitan polis dan pemeliharaan polis, serta mencerminkan arus kas masuk masa depan yaitu penerimaan premi masa depan, yaitu premi yang diterima di masa depan. Liabilitas dihitung berdasarkan diskonto dari arus kas untuk semua arus kas yang terkait yaitu arus kas keluar dan arus kas masuk seperti yang disebutkan di atas dengan menggunakan seperangkat asumsi estimasi terbaik terkini yang ditetapkan oleh aktuaris Entitas Anak, termasuk asumsi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga, serta asumsi margin atas risiko pemburukan. Entitas Anak yang bergerak dalam bidang asuransi jiwa menerapkan metode *Gross Premium Reserve* dalam perhitungan cadangan premi atas manfaat polis masa depan kepada pemegang polis dengan menggunakan asumsi aktuarial berdasarkan asumsi estimasi terbaik dan margin atas risiko pemburukan, sehingga pengujian kecukupan liabilitas tidak diperlukan lagi.

Reasuransi

Entitas Anak mereasuransikan sebagian porsi risikonya kepada perusahaan reasuradur. Jumlah premi yang dibayar atau porsi premi atas transaksi reasuransi prospektif diakui selama periode kontrak asuransi sesuai dengan proporsi jumlah proteksi reasuransi yang diterima.

Aset reasuransi termasuk saldo yang diharapkan dibayarkan oleh perusahaan reasuransi untuk *ceded* liabilitas manfaat polis masa depan, *ceded* estimasi liabilitas klaim dan *ceded* cadangan atas premi yang belum merupakan pendapatan. Jumlah manfaat yang ditanggung oleh reasuradur diperkirakan secara konsisten sesuai dengan liabilitas yang terkait dengan polis reasuransi.

Entitas Anak menyajikan aset reasuransi secara terpisah sebagai aset atas liabilitas manfaat polis masa depan, cadangan atas premi yang belum merupakan pendapatan dan estimasi liabilitas klaim.

Jika aset reasuransi mengalami penurunan nilai, Entitas Anak mengurangi nilai tercatat dan mengakui kerugian penurunan nilai tersebut dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Aset reasuransi mengalami penurunan nilai jika ada bukti objektif, sebagai akibat dari suatu peristiwa yang terjadi setelah pengakuan awal aset reasuransi, bahwa Entitas Anak tidak dapat menerima seluruh jumlah karena di bawah syarat-syarat kontrak dan dampak pada jumlah yang akan diterima dari reasuradur dapat diukur secara andal.

Liability adequacy test (continued)

For life insurance, the liabilities to policyholder in particular the liabilities for future claim is tested to determine whether the liabilities sufficient to cover all related future cash out flow including all guaranteed benefit and guaranteed additional benefit, non-guaranteed participation benefit feature (if any), all expenses for policies issuance and maintenance, as well as reflecting the future cash inflow, i.e. future premium receipt. The liabilities are calculated based on discounted cash flow basis for all related cash flows i.e. both of cash outflows and cash inflows as mentioned above using a set of most recent best estimate assumptions set by the Subsidiaries's appointed actuary, includes mortality, morbidity, lapses, expenses, inflation rates, and interest rate, assumptions as well as margin for adverse deviation assumptions. Subsidiaries operates in life insurance use Gross Premium Reserve in the premium allowance calculation for future policy benefits to the policyholders using actuary assumptions with best estimate and margin for adverse deviation, therefore liability adequacy test is not required.

Reinsurance

The Subsidiaries reinsure a portion of its risk to reinsurance companies. The amount of premium paid or portion of premium from prospective reinsurance transactions is recognised over the reinsurance contract in proportion with the protection received.

Reinsurance assets include balances expected to be recovered from reinsurance companies for ceded liability for future policy benefits, ceded estimated claim liabilities and ceded unearned premiums allowance. Recovery amount from reinsurers are estimated in a consistent manner with the liability associated with the reinsurance policy.

Subsidiaries presents separately reinsurance asset of future policy benefit liabilities, unearned premium allowance, and estimated claim liabilities.

If a reinsurance asset is impaired, the Subsidiaries deducted the carrying amount accordingly and recognises that impairment loss in the consolidated statement of profit or loss and other comprehensive income. A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after initial recognition of the reinsurance asset, that the Subsidiary may not receive all amounts due to it is below the requirement of the contract, and the impact on the amounts that the Subsidiary will receive from the reinsurer can be reliably measured.

Liability for future policy benefits

The liabilities for future policy benefits represent the present value of estimated future policy benefits to be paid to policyholders or their heirs less present value of estimated future premiums to be received from the policyholders and recognised consistently with the recognition of premium income. The liabilities for future policy benefits are determined and computed based on certain formula by the Subsidiaries's actuary.

The Subsidiaries calculate the liability for future policy benefits using *Gross Premium Reserve* method that reflect the present value of estimated payments of all the guaranteed benefits including all the embedded options available, the present value estimated of all handling costs incurred and also considering the future premium receipt.

Increase/(decrease) in liabilities for future policy benefits is recognised in the current year's consolidated statement of profit or loss and other comprehensive income.

Manajemen Grup mengevaluasi secara periodik implementasi terhadap peraturan perpajakan yang berlaku terutama yang memerlukan interpretasi lebih lanjut mengenai pelaksanaannya termasuk juga evaluasi terhadap surat ketetapan pajak yang diterima dari kantor pajak. Lebih lanjut, Bank Mandiri membentuk cadangan, jika dianggap perlu berdasarkan jumlah yang diestimasikan akan dibayarkan ke kantor pajak.

Bank Mandiri dan Entitas Anak menerapkan metode liabilitas laporan posisi keuangan (*balance sheet liability method*) untuk menentukan beban pajak penghasilan. Menurut metode liabilitas laporan posisi keuangan, aset dan utang pajak tangguhan diakui untuk semua perbedaan temporer antara nilai aset dan liabilitas yang tercatat di laporan posisi keuangan dengan dasar pengenaan pajak atas aset dan liabilitas tersebut pada setiap tanggal pelaporan. Metode ini juga mensyaratkan adanya pengakuan manfaat pajak di masa datang yang belum digunakan apabila besar kemungkinan bahwa manfaat tersebut dapat direalisasikan di masa yang akan datang.

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi aset pajak tangguhan yang muncul akibat perbedaan temporer.

Pajak tangguhan dihitung dengan menggunakan tarif pajak yang berlaku atau secara substansial diberlakukan pada periode dimana aset tersebut direalisasi atau liabilitas tersebut diselesaikan. Perubahan nilai tercatat aset dan liabilitas pajak tangguhan yang disebabkan oleh perubahan tarif pajak dibebankan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Koreksi atas liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan/atau banding, maka koreksi diakui pada saat keputusan atas keberatan dan/atau banding tersebut diterima. Manajemen juga dapat membentuk pencadangan terhadap liabilitas pajak di masa depan sebesar jumlah yang diestimasikan akan dibayarkan ke kantor pajak jika berdasarkan evaluasi pada tanggal laporan posisi keuangan konsolidasian terdapat risiko pajak yang *probable*. Asumsi dan estimasi yang digunakan dalam perhitungan pembentukan cadangan tersebut memiliki unsur ketidakpastian.

ad. Income tax (continued)

The Group's management periodically evaluates the implementation of prevailing tax regulations especially for those that are subject to further interpretation for its implementation, including evaluation on tax assessment letters received from tax authorities. Furthermore, the Bank establishes provisions based on the if necessary amounts expected to be paid to the tax authorities.

Bank Mandiri and Subsidiaries apply the balance sheet liability method to determine income tax expense. Under the balance sheet liability method, deferred tax assets and liabilities are recognised for all temporary differences arising between the tax base of assets and liabilities and their carrying amount in the consolidated statement of financial position at each reporting date. This method also requires the recognition of unused future tax benefits, to the extent that realisation of such benefits is probable in the future.

Deferred tax assets are recognised only to the extent that is probable that future taxable income will be sufficient to compensate deferred tax asset arising from temporary differences.

Deferred tax is calculated using tax rates enacted or substantively applied to the period during which the asset is realised or the liability is settled. The changes to the carrying value of deferred tax assets and liabilities due to the changes of tax rates are charged in the current year, consolidated statement of profit or loss and other comprehensive income except for transactions which previously have been directly charged or credited to equity.

Adjustments to taxation obligations are recorded when tax assessment letter is received or, if objection/appeal is submitted, adjustments are recognised when the result of objection/appeal is received. Management provides provision for future tax liability at the estimated amount that will be payable to the tax office if there is a probable tax exposure, based on management's assessment as of the date of consolidated statement of financial position. Assumptions and estimation used in the calculation of provision may involve element of uncertainty.

Dana *syirkah* temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dan tidak mempunyai hak kepemilikan yang sama dengan pemegang saham seperti hak *voting* dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset non investasi.

(i) Konvensional

Pendapatan dan beban bunga untuk semua instrumen keuangan dengan *interest bearing* dicatat dalam "Pendapatan bunga" dan "Beban bunga" di dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian menggunakan metode suku bunga efektif.

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, namun tidak mempertimbangkan kerugian kredit di masa datang. Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga yang diperoleh setelahnya diakui atas bagian aset keuangan yang tidak mengalami penurunan nilai dari aset keuangan yang mengalami penurunan nilai, berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

af. Interest income and expense and sharia income and expense

(i) Conventional

Interest income and expense for all interest-bearing financial instruments are recognised as "Interest income" and "Interest expense" in the consolidated statement of profit or loss and other comprehensive income using the effective interest method.

The effective interest method is a method used for calculating the amortised cost of financial assets and liabilities and method for allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to obtain the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all commissions, provision and other fees received between parties in the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, subsequently, interest income is recognised for the non-impaired portion of the impaired financial assets using the interest rate used to discount the future cash flows for measuring the impairment loss.

Liabilitas pensiun

Bank Mandiri menyelenggarakan program pensiun iuran pasti yang pesertanya adalah pegawai aktif Bank Mandiri sejak tanggal 1 Agustus 1999, serta program pensiun manfaat pasti yang berasal dari masing-masing dana pensiun Bank Peserta Penggabungan. Program ini didanai melalui pembayaran kepada pengelola dana pensiun sebagaimana ditentukan dalam perhitungan aktuarial yang dilakukan secara berkala.

Apabila manfaat pensiun lebih kecil dari pada manfaat menurut UU Cipta Kerja No 11/2020, maka Bank dan Entitas Anak membayar kekurangan tersebut.

Program pensiun berdasarkan UU Ketenagakerjaan adalah program imbalan pasti karena UU Ketenagakerjaan menentukan rumus tertentu untuk menghitung jumlah minimum imbalan pensiun. ai. Employee benefits

Pension liability

Bank Mandiri established a defined contribution pension plan covering substantially all of its eligible active employees since 1 August 1999 and also defined benefit pension plans, which were derived from each of the Merged Banks' pension plan. This program is funded through payment to pension fund's management as defined in the actuarial calculation which done regularly.

Bank Mandiri and Subsidiaries' pension liability has been calculated by comparing the benefit that will be received by an employee at normal pension age from the Pension Plans with the benefit that will be received as stipulated under the Employment Law No. 13/2003 which has been updated using the Employment Regulations No. 11/2020 as amended by UU No. 6/2023 concerning Government In Lieu Of Law No. 2 Of 2022 Concerning Stipulation Employment Regulations Become Law based on the Collective Labor Agreement which was renewed at the end of 2021 after deducting accumulated employee contributions and the results of its investments. If the pension benefit from the Pension Plans is less than the benefit as required by the Employment Regulations No. 11/2020, the Bank and Subsidiaries will have to pay such shortage.

The pension plan based on the Labor Law is a defined benefit plan because the Labor Law sets a certain formula to calculate the minimum pension benefit. A defined contribution plan is a pension plan that defines an amount of pension contribution based on pension fund regulation and all contribution including investment return are recorded in its account's member as pension benefit as stated in Law No. 4 year 2023 dated 12 January 2023 regarding Development and Strengthening Financial Sector.

The defined benefit pension liability recognised in the consolidated statement of financial position is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets, adjusted with unrealised actuarial gains or losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method on a regular basis for periods not exceeding one year. The present value of the defined benefit obligation is determined by discount the estimated future cash outflows using discounting rate of government bonds' yield that are denominated in the currency in which the benefit will be paid, and that have terms to maturity approximating the terms of the related pension liability.

**3. PENGGUNAAN ESTIMASI DAN PERTIMBANGAN
AKUNTANSI YANG PENTING**

Beberapa estimasi dan asumsi dibuat dalam rangka penyusunan laporan keuangan konsolidasian dimana dibutuhkan pertimbangan manajemen dalam menentukan metodologi yang tepat untuk penilaian aset dan liabilitas.

Manajemen membuat estimasi dan asumsi yang berimplikasi pada pelaporan nilai aset dan liabilitas atas tahun keuangan satu tahun ke depan. Semua estimasi dan asumsi yang diharuskan oleh Standar Akuntansi Keuangan di Indonesia adalah estimasi terbaik serta berdasarkan pada standar yang berlaku. Estimasi dan pertimbangan dievaluasi secara terus menerus dan berdasarkan pengalaman masa lalu dan faktor-faktor lain termasuk harapan atas kejadian yang akan datang.

Walaupun estimasi dan asumsi ini dibuat berdasarkan pengetahuan terbaik manajemen atas kejadian dan tindakan saat ini, hasil yang timbul mungkin berbeda dengan estimasi dan asumsi semula.

Sumber utama ketidakpastian estimasi

a. Cadangan kerugian penurunan nilai aset keuangan

Evaluasi atas kerugian penurunan nilai aset keuangan yang dicatat pada biaya perolehan diamortisasi dan efek utang yang diklasifikasikan sebagai nilai wajar melalui pendapatan komprehensif lain dijelaskan di Catatan 2c.

Cadangan kerugian penurunan nilai terkait dengan pihak lawan spesifik dalam seluruh cadangan kerugian penurunan nilai dibentuk atas tagihan yang penurunan nilainya dievaluasi secara individual berdasarkan estimasi terbaik manajemen atas nilai tunai arus kas yang diharapkan akan diterima. Dalam menghitung cadangan kerugian penurunan nilai, manajemen membuat pertimbangan mengenai kondisi keuangan dari pihak lawan dan nilai neto yang dapat direalisasi dari agunan yang diterima. Setiap aset yang mengalami penurunan nilai dievaluasi dan strategi penyelesaiannya serta estimasi arus kas yang dinilai dapat diperoleh kembali dan disetujui secara independen oleh *Credit Risk Management Unit*.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Several estimates and assumptions are created in the preparation of the consolidated financial statements in which management judgment is required in determining the methodology in the valuation of assets and liabilities.

Management makes estimation and assumptions that affect the reported amounts of assets and liabilities within the one next financial year. All estimation and assumptions required in conformity with Statement of Financial Accounting Standard are the best estimation undertaken in accordance with the applicable standards. Estimation and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Although these estimates and assumptions are based on management's best knowledge of current events and activities, actual results may differ from those estimates and assumptions.

Key sources of estimation uncertainty

a. Allowances for impairment losses of financial assets

Evaluation of impairment losses on financial assets which recognised at amortised cost and debt securities classified as fair value through other comprehensive income are described in Note 2c.

*Allowance for impairment losses related to a specific counterparty as part of the entire allowance for impairment losses are established for receivables that are individually evaluated for impairment based on management's best estimate of the present value of cash flows expected to be received. In calculating the allowance for impairment losses, management makes judgements regarding of the financial condition of the counterparty and the net realizable value of the collateral received. Each impaired asset is evaluated, and its settlement strategy and estimation of cash flows considered recoverable are independently approved by the *Credit Risk Management Unit*.*

AKUNTANSI YANG PENTING (lanjutan)**

Sumber utama ketidakpastian estimasi (lanjutan)

**a. Cadangan kerugian penurunan nilai aset
keuangan (lanjutan)**

Evaluasi cadangan kerugian penurunan nilai secara kolektif meliputi kerugian kredit yang melekat pada portofolio tagihan dengan karakteristik ekonomi yang serupa ketika terdapat kenaikan risiko kredit yang signifikan atau terdapat bukti objektif bahwa telah terjadi penurunan nilai tagihan dalam portofolio tersebut, namun penurunan nilai secara individu belum dapat diidentifikasi. Dalam menentukan perlunya untuk membentuk cadangan kerugian penurunan nilai secara kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas kredit, besarnya portofolio, konsentrasi kredit dan faktor-faktor ekonomi. Dalam mengestimasi cadangan yang dibutuhkan, asumsi-asumsi dibuat untuk menentukan model kerugian ekspektasian dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman historis, kondisi ekonomi saat ini, dan prakiraan kondisi ekonomi di masa mendatang (*forecasting*). Ketepatan dari cadangan ini bergantung pada seberapa tepat estimasi arus kas masa depan untuk menentukan cadangan individual serta asumsi model dan parameter yang digunakan dalam penentuan cadangan kolektif.

b. Menentukan nilai wajar instrumen keuangan

Dalam menentukan nilai wajar aset dan liabilitas keuangan yang tidak mempunyai harga pasar, Grup menggunakan teknik penilaian seperti yang dijelaskan dalam Catatan 2c untuk instrumen keuangan yang tidak diperdagangkan secara aktif dan memiliki informasi harga yang terbatas, nilai wajar yang kurang objektif dan membutuhkan berbagai tingkat penilaian tergantung pada likuiditas, konsentrasi, faktor ketidakpastian pasar, asumsi harga dan risiko lainnya.

c. Imbalan pensiun

Program-program pensiun ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri dan lain-lain (Catatan 2ai dan 52). Perubahan asumsi ini akan mempengaruhi nilai liabilitas pensiun.

**a. Allowances for impairment losses of financial
assets (continued)**

Collectively assessed impairment allowances cover credit losses inherent in portfolios with similar economic characteristics when there is a significant increase in credit risk or objective evidence to suggest the impairments are exist within the portfolio, but the individual impaired items cannot yet be identified. In determining the need to establish allowance for collective impairment, management considers factors such as credit quality, size of portfolio, credit concentrations, and economic factors. In estimating the required allowance, the assumptions made to determine expected default and loss model and to determine the required input parameters which are based on historical experience and estimated future economic conditions (*forecasting*). The accuracy of this allowance depends on how precise the estimated future cash flows to determine the individual allowance and the model assumptions and parameters used in determining collective allowance.

b. Determining fair values of financial instruments

In determining the fair value for financial assets and financial liabilities for which there is no observable market price, the Group uses the valuation techniques as described in Note 2c for financial instruments that are traded infrequently and have limited pricing information, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks.

c. Pension benefits

Pension programs are determined based on actuarial valuation. The actuarial valuation uses assumptions such as discount rate, expected rate of return on investments, future salary increases, mortality rate, resignation rate and others (refer to Note 2ai and 52). Any changes in those assumptions will impact the liability balance of employee benefit obligations.

Grup menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni *zero coupon bond* yang digunakan untuk menentukan nilai kini arus kas keluar masa depan estimasian yang diharapkan untuk menyelesaikan liabilitas pensiun. Dalam menentukan tingkat suku bunga yang sesuai, Grup mempertimbangkan imbal hasil obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas pensiun yang terkait. Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

d. Liabilitas asuransi untuk kontrak asuransi

Liabilitas kepada pemegang polis (manfaat polis masa depan dari produk *non-unit link* dan estimasi liabilitas klaim) Entitas Anak dicatat di laporan posisi keuangan konsolidasian sebagai bagian dari "Liabilitas lain-lain" berdasarkan perhitungan aktuaris dengan menggunakan asumsi aktuarial yaitu asumsi estimasi terbaik dan margin atas risiko pemburukan.

e. Aset pajak tangguhan

Aset pajak tangguhan diakui atas seluruh perbedaan temporer yang dapat dikurangkan, sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia sehingga perbedaan temporer tersebut dapat digunakan. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak serta strategi perencanaan pajak masa depan. Bank tidak memperhitungkan sebagian manfaat aset pajak tangguhan karena manajemen Bank berpendapat bahwa aset pajak tangguhan tersebut tidak dapat terpulihkan di masa yang akan datang.

f. Penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen Bank mengestimasi masa manfaat ekonomis aset tetap antara 4 (empat) sampai dengan 20 (dua puluh) tahun.

c. Pension benefits (continued)

The Group determines the appropriate discount rate at the end of each year, which is *zero coupon bond* that used to determine the present value of estimated future cash outflows expected to settle the pension obligations. In determining the appropriate discount rate, the Group considers the government bonds' yields denominated in currency and have similar period with payments that will be made and have terms to maturity approximating the terms of the related employee benefit liability. Other key assumptions for pension obligations mostly are determined based on current market conditions.

d. Insurance liabilities on insurance contracts

Liabilities to policyholders (future policy benefits from *non-unit linked products* and estimated claim liabilities) of Subsidiaries are recorded in the consolidated statement of financial position as part of "Other liabilities" based on actuarial calculations using actuarial assumptions, which is the best estimate assumptions and margin for risk of deterioration.

e. Deferred tax assets

Deferred tax assets are recognised for all deductible temporary differences, as long as taxable income most likely will be available so that the temporary differences can be utilised. Significant estimation by management are required in determining the amount of deferred tax assets that can be recognised, based on utilisation period and the level of taxable income and future tax planning strategies. The Bank does not consider some of the benefits of deferred tax assets as management believes that those part of deferred tax assets will not be recoverable in the future.

f. Depreciation and estimated useful life of fixed assets

Cost of acquisition of fixed assets are depreciated using the straight-line method based on their estimated economic useful life. Bank's management estimates the useful lives of the fixed assets between 4 (four) to 20 (twenty) years.

f. Penyusutan dan estimasi umur manfaat aset tetap (lanjutan)

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi.

Nilai tercatat atas aset tetap Bank diungkapkan pada Catatan 18.

g. Penurunan nilai aset non-keuangan

Bank Mandiri dan entitas anak mengevaluasi penurunan nilai aset non-keuangan apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset non-keuangan tidak dapat dipulihkan kembali. Faktor-faktor penting yang dapat menyebabkan penurunan nilai aset non-keuangan adalah sebagai berikut:

- a) Performa yang tidak tercapai secara signifikan terhadap ekspektasi historis atau proyeksi hasil operasi di masa yang akan datang;
- b) Perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- c) Industri atau tren ekonomi yang secara signifikan bernilai negatif.

Manajemen Bank dan Entitas Anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai terpulihkannya. Nilai terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurang biaya pelepasan dengan nilai pakai aset (atau unit penghasil kas). Nilai terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

f. Depreciation and estimated useful life of fixed assets (continued)

Changes in the level of usage and technological developments could affect the economic useful lives and residual value of assets, and therefore future depreciation charges may be revised.

The carrying value of the Bank's fixed assets is disclosed in Note 18.

g. Impairment of non-financial assets

Bank Mandiri and its Subsidiaries assess impairment of non-financial assets whenever there are events or changes in circumstances indicate that the carrying value of non-financial assets cannot be recovered. Important factors that could cause impairment of non-financial assets are as follows:

- a) Performance is not achieved significantly against historical expectations or projected operating results in the future;*
- b) A significant change in the way of the asset usage or the overall business strategy; and*
- c) Industry or economic trends are significantly negative.*

The Management of the Bank and its Subsidiaries recognise an impairment loss if the carrying amount of the asset exceeds its recoverable amount. Recoverable amount is the higher value between the fair value minus costs of disposal and the value in use of the asset (or cash-generating unit). Recoverable amount is estimated for individual assets or, if not possible, for the cash-generating unit in which the asset is part of the unit.

h. Revaluations of land

The Group engaged independent valuation specialists to assess fair value of land. Lands were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as location and condition of land.

i. Menentukan jangka waktu kontrak dengan opsi perpanjangan dan penghentian kontrak - Grup sebagai penyewa

Grup menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

Grup memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Grup menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Grup menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah penyewa cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

Pertimbangan akuntansi yang penting

Selain itu, manajemen tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank dan Entitas Anak untuk mempertahankan kelangsungan hidupnya. Oleh karena itu, laporan keuangan konsolidasian telah disusun atas dasar usaha yang berkelanjutan.

3. USE OF CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

Key sources of estimation uncertainty (continued)

i. Determine the contract term with options for extension and termination of the contract - the Group as lessee

The Group determines the lease term as the term of the lease that cannot be canceled, together with the period covered based on the option to extend the lease if it is determined to be exercised, or any period covered by the option to terminate the lease, if it is reasonably not to do so.

The Group has several lease contracts that include options for extension and termination of the lease terms. The Group applies its judgment in evaluating whether it is certain to exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Group reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.

40. EKUITAS (lanjutan)

a. Modal dasar, ditempatkan dan disetor (lanjutan)

Penetapan modal ditempatkan dan disetor sebesar Rp4.000.000 oleh Pemerintah Republik Indonesia pada tanggal pendirian Bank Mandiri, telah dilaksanakan sebagai berikut:

1. Pembayaran secara tunai melalui Bank Indonesia sejumlah Rp1.600.004.
2. Penempatan dalam saham yang dicatat sebagai penyertaan saham pada Bank Peserta Penggabungan sejumlah Rp599.999 untuk setiap bank atau jumlah keseluruhannya Rp2.399.996, melalui pengalihan saham milik Pemerintah Republik Indonesia pada setiap Bank Peserta Penggabungan kepada Bank Mandiri, seperti yang telah disebut dalam Rapat Umum Pemegang Saham Luar Biasa dari Bank Peserta Penggabungan. Berdasarkan perjanjian *inbreg* yang telah diaktakan dengan Akta No. 9 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 2 Oktober 1998, Bank Mandiri dan Pemerintah Republik Indonesia setuju untuk mengalihkan saham-saham tersebut sebagai pembayaran untuk saham baru yang akan dikeluarkan oleh Bank Mandiri.

Berdasarkan perubahan anggaran dasar Bank Mandiri yang dituangkan dalam Akta No. 98 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 24 Juli 1999, pemegang saham memutuskan untuk meningkatkan modal disetor (modal saham) Bank Mandiri dari Rp4.000.000 menjadi Rp4.251.000 dan jumlah tersebut akan dibayar oleh Pemerintah Republik Indonesia. Penambahan sebesar Rp251.000 merupakan hasil konversi dari tambahan modal disetor menjadi modal saham akibat dari adanya kelebihan obligasi rekapitalisasi yang diterbitkan dalam Program Rekapitalisasi Pertama berdasarkan Peraturan Pemerintah No. 52 Tahun 1999.

- (i) Pelaksanaan *Initial Public Offering* (IPO).
- (ii) Perubahan struktur permodalan Bank Mandiri.
- (iii) Perubahan anggaran dasar Bank Mandiri.

Based on the inbreg agreement approved by Notarial Deed No. 9 of Notary Sutjipto, S.H., dated 2 October 1998, Bank Mandiri and the Government of the Republic of Indonesia agreed to transfer those shares as payment for new shares to be issued by Bank Mandiri.*

d. Saham treasuri

Bank melakukan pembelian kembali saham Bank yang dipicu oleh perlambatan dan tekanan ekonomi baik secara regional dan nasional yang antara lain disebabkan oleh wabah Covid-19. Selanjutnya, kondisi perdagangan saham di Bursa Efek Indonesia sejak awal tahun 2020 sampai dengan tanggal 9 Maret 2020 mengalami tekanan yang signifikan yang diindikasikan dari penurunan Indeks Harga Saham Gabungan ("IHSG") sebesar 18,46%. Selanjutnya, untuk memberikan stimulus perekonomian dan mengurangi dampak pasar yang berfluktuasi secara signifikan maka OJK mengeluarkan SEOJK No. 3/SEOJK.04/2020, yang bertujuan untuk memberi kemudahan bagi Emiten atau Perusahaan Publik untuk melakukan aksi korporasi pembelian saham kembali tanpa melanggar peraturan perundang-undangan yang berlaku. Hal ini menjadi salah satu pertimbangan bagi Bank untuk melakukan proses pembelian kembali saham (*buyback*).

Dalam hal pembelian kembali saham, Bank mengacu pada Peraturan OJK No. 2/POJK.04/2013 tentang Pembelian Kembali Saham Yang Dikeluarkan Oleh Emiten atau Perusahaan Publik Dalam Kondisi Pasar Yang Berfluktuasi Secara Signifikan ("POJK No. 2/POJK.04/2013") sebagaimana diubah dengan POJK No. 13 Tahun 2023 Tentang Kebijakan Dalam Menjaga Kinerja Dan Stabilitas Pasar Modal Pada Kondisi Pasar Yang Berfluktuasi Secara Signifikan. Surat Edaran OJK No. 3/SEOJK.04/2020 tentang Kondisi Lain Sebagai Kondisi Pasar Yang Berfluktuasi Secara Signifikan Dalam Pelaksanaan Pembelian Kembali Saham Yang Dikeluarkan Oleh Emiten Atau Perusahaan Publik ("SEOJK No. 3/SEOJK.04/2020").

Pembelian kembali saham Bank dilakukan secara bertahap untuk periode 3 (tiga) bulan terhitung sejak tanggal 20 Maret 2020 sampai dengan 19 Juni 2020 dimana pelaksanaan transaksi pembelian saham dilaksanakan melalui Bursa Efek Indonesia. Sampai dengan periode Pembelian Kembali Saham tersebut, Bank membeli kembali 35.400.000 (angka penuh) lembar saham dengan total nilai perolehan sebesar Rp150.895 yang dicatat sebagai saham treasuri yang merupakan pengurang ekuitas.

Sesuai dengan Keterbukaan Informasi Bank pada tanggal 17 Juni 2022, per tanggal 31 Desember 2022 Bank sudah tidak memiliki saham treasuri. Berdasarkan keputusan Rapat Umum Pemegang Saham Tahunan Bank tanggal 10 Maret 2022 antara lain telah disetujui pengalihan saham hasil pembelian kembali saham (*buyback*) pada tahun 2020 yang disimpan sebagai saham treasuri (*treasury stock*) Bank sejumlah 35.400.000 (tiga puluh lima juta empat ratus ribu) lembar saham, pada tanggal 15 Juni 2022 Bank telah menyelesaikan seluruh proses pengalihan saham hasil *buyback* tersebut kepada pegawai Bank melalui program ESOP sejumlah 35.400.000 (tiga puluh lima juta empat ratus ribu) lembar saham kepada 3.036 pegawai.

d. Treasury stock

The Bank buyback its shares which was triggered by a slowdown and economic pressure both regionally and nationally, among others, was caused by the Covid-19 outbreak. Furthermore, the condition of stock trading on the Indonesia Stock Exchange from the beginning of 2020 to 9 March 2020 experienced significant pressure as indicated by a decrease in the Composite Stock Price Index ("IHSG") of 18.46%. Furthermore, in order to provide an economic stimulus and reduce the impact of a significantly fluctuating market, Financial Service Authority (FSA) issued SEOJK No. 3/SEOJK.04/2020, to ease Issuers or Public Companies to carry out corporate action to buy back shares without violating applicable laws and regulations. This is one of the considerations for the Bank to carry out the buyback process.

For the share buyback, the Bank also refers to FSA Regulation No. 2/POJK.04/2013 regarding the Buyback Shares Issued by Issuers or Public Companies in Market Conditions that Fluctuate Significantly ("POJK No. 2/POJK.04/2013") as amended by POJK No. 13 Year 2023 regarding Policy In Maintaining Performance And Capital Market Stability In Significantly Fluctuating Market Conditions. FSA Circular Letter No. 3/SEOJK.04/2020 regarding Other Conditions as Market Conditions with Significant Fluctuation in the Implementation of Share Buybacks Issued by Issuers or Public Companies ("SEOJK No. 3/SEOJK.04/2020").

The buyback of the shares were carried out in stages for a period of 3 (three) months starting from 20 March 2020 to 19 June 2020, where the buyback transactions were carried out through the Indonesia Stock Exchange. Until the period of share buyback, the Bank has bought back 35,400,000 (full amount) shares with a total acquisition value of Rp150,895 which are recorded as treasury shares, which are a deduction of equity.

In accordance with the Bank's Disclosure of Information on 17 June 2022, as of 31 December 2022 the Bank no longer owns treasury shares. Based on the decision of the Bank's Annual General Meeting of Shareholders on 10 March 2022, among others, it has been approved the transfer of shares resulting from the buyback in 2020 which are kept as treasury shares of the Bank in the amount of 35,400,000 (thirty five million four hundred thousand) shares, on 15 June 2022 the Bank has completed the entire process of transferring the shares resulting from the buyback to the Bank's employees through the ESOP program in the amount of 35,400,000 (thirty five million four hundred thousand) shares to 3,036 employees

The models that have been developed by the Bank, both credit and non-credit risk models, are validated internally by the *Model Validator*, which is a function that is independent and separate from the model developer function. This is done to ensure the quality and validity of the model. Apart from validation, another thing that is implemented regarding model risk management is the implementation of a model management governance framework (*Model Risk Management*).

4. Credit Monitoring

The Bank's credit risk management is primarily directed at improving the balance between healthy credit expansion and prudent credit management to avoid a decline in quality or becoming a *Non-Performing Loan* (NPL), as well as managing optimal capital use through identifying business units, segments, products, areas that provide added value for the Bank. In addition, in implementing credit concentration risk management at the debtor level, Bank Mandiri consistently monitors the *Maximum Lending Limit* (BMPK). In general, the credit process and credit risk management at Bank Mandiri has been carried out *end-to-end* and integrated.

The Bank carries out early identification and detection of *Corporate* and *Commercial* debtors with collectibility 1 and 2 through *ALERT Tools*. In assessing and monitoring credit quality, the Bank refers to Regulator provisions by prioritizing the principle of prudence by reviewing *Pillar 3*, namely business prospects, financial performance and debtor's ability to pay. Selain itu, Bank Mandiri juga telah menyusun Rencana Resolusi (*Resolution Plan*) sesuai Peraturan Lembaga Penjamin Simpanan Nomor 1 Tahun 2021 tentang Rencana Resolusi Bagi Bank Umum yang merupakan strategi resolusi yang akan menjadi bahan pertimbangan bagi Lembaga Penjamin Simpanan ("LPS") dalam menangani Bank yang ditetapkan sebagai Bank gagal apabila serangkaian langkah perbaikan kondisi keuangan yang telah ditetapkan dalam *Recovery Plan* tidak dapat mengembalikan atau memperbaiki kondisi keuangan Bank.

Manajemen Risiko Kredit dalam Kondisi Endemi COVID-19

Selama masa pandemi covid-19 berlangsung, Bank Mandiri secara aktif berpartisipasi dalam berbagai program Pemulihan Ekonomi Nasional (PEN) yang dicanangkan Pemerintah antara lain penyaluran dana berdasarkan penempatan uang negara pada Bank, penjaminan kredit, dan subsidi bunga. Diantara program tersebut adalah program untuk debitur terdampak Covid-19 berdasarkan POJK No.11/POJK.03/2020 serta perubahan keduanya POJK No.17/POJK.03/2021 yang telah berakhir pada Maret 2023, maupun Keputusan Dewan Komisiner ("KDK") OJK No. 34/KDK.03/2022 terkait sektor, segmen serta wilayah yang masih memerlukan perlakuan khusus terhadap kredit atau pembiayaan bank yang masih berlaku hingga Maret 2024.

Seiring dengan semakin terkendalinya pandemi Covid-19, pemerintah telah memutuskan untuk mencabut status pandemi Covid-19 sejak Juni 2023 dan menyatakan bahwa Indonesia telah memasuki masa endemi. Hal tersebut diikuti dengan perkembangan ekonomi yang menunjukkan arah pemulihan yang semakin baik. Perbaikan ini juga tercermin perbaikan portfolio Restrukturisasi Covid-19, dimana sebagian besar debitur telah memenuhi kewajiban pembayaran kredit sejalan dengan perbaikan kondisi usaha debitur di masa endemi ini. Portfolio ini telah mengalami penurunan dari posisi tertinggi sebesar Rp96,5 Triliun pada Juni 2021 menjadi sebesar Rp17,2 Triliun pada posisi Desember 2023. Secara bankwide, pada Desember 2023, NPL% sebesar 1,02% dan NPL Coverage yang memadai sebesar 384,78%. Memperhatikan kondisi tersebut, Bank cukup menyakini telah berhasil mengelola portofolio ini dengan baik dan mencapai soft landing, dan berakhirnya relaksasi terbatas KDK OJK No. 34/KDK.03/2022 pada 31 Maret 2024 mendatang tidak akan menimbulkan lonjakan yang berarti.

62. RISK MANAGEMENT (continued)

A. Credit risk (continued)

7. Recovery Plan and Resolution Plan (continued)

Apart from that, Bank year Mandiri has also prepared a Resolution Plan in accordance with the Deposit Insurance Corporation Regulation Number 1 of 2021 regarding Resolution Plans for Commercial Banks, which is a resolution strategy that will be taken into consideration by the Deposit Insurance Corporation ("LPS") in dealing with designated banks. as a failed Bank if a series of steps to improve the financial condition set out in the Recovery Plan are unable to restore or improve the Bank's financial condition.

Credit Risk Management in Endemic COVID-19 Condition

During the covid-19 pandemic, Bank Mandiri actively participated in various national programs initiated by the Government to boost economy recovery (Pemulihan Ekonomi Nasional (PEN)), including Government fund's distribution, loan guarantees, and interest subsidies. Among those programs was a program for debtors affected by Covid-19 which was regulated based on POJK No.11/POJK.03/2020 as well as it's second POJK No.17/POJK.03/2021 which ended in March 2023, and also the OJK Board of Commissioners Decree ("KDK") No.34/KDK.03/2022 regarding sectors, segments, and regions that still require special treatment for credit or bank financing which is still valid until March 2024.

As the Covid-19 pandemic was well managed, the government decided to revoke the Covid-19 pandemic status at June 2023 and declare that Indonesia has entered an endemic period. This was followed by economic developments and recovery. This improvement is also reflected in the improvement in the Covid-19 Restructuring portfolio, where the majority of debtors have fulfilled their credit payment obligations in line with the improvement in debtor business conditions during this endemic period. This portfolio has decreased from its highest position of IDR96.5 Trillion in June 2021 to IDR17.2 Trillion in December 2023. At bankwide level, in December 2023, NPL% was 1.02% and adequate NPL Coverage was 384.78%. Taking into account these conditions, the Bank is quite confident that it has succeeded in managing this portfolio well and achieved a soft landing, and the end of the limited relaxation of OJK KDK No. 34/KDK.03/2022 on 31 March 2024 will not cause a significant spike.

Bank Mandiri:

Terdapat pertimbangan tertentu terkait dengan kemampuan nasabah dalam melakukan pembayaran pada saat jatuh tempo. Namun, sampai dengan tanggal 31 Desember 2023 dan 2022, belum terdapat keterlambatan dalam pembayaran cicilan pokok dan bunga pada saat jatuh temponya. Termasuk dalam jumlah tersebut adalah *credit exposure* atas efek-efek (wesel ekspor), tagihan lainnya - transaksi perdagangan dan tagihan akseptasi dengan kolektibilitas Bank Indonesia dua (dalam perhatian khusus) tanpa memiliki tunggakan per 31 Desember 2023 dan 2022.

Bank Mandiri:

There are certain considerations in relation to the debtor's ability in repaying the loan at maturity date. However, up to 31 December 2023 and 2022, there was no late payment in terms of principal installment as well as interest at maturity date. This amount includes credit exposure on marketable securities (export bills), other receivables - trade transactions and acceptance receivables with Bank Indonesia's collectibility at two (special mention) but with no overdue as of 31 December 2023 and 2022.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas

(i) Manajemen risiko likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank.

Untuk mengukur besarnya risiko likuiditas, Bank menggunakan beberapa indikator, antara lain adalah rasio Giro Wajib Minimum ("GWM") pada Bank Indonesia dan kas, Penyangga Likuiditas Makroprudensial ("PLM"), cadangan likuiditas, Rasio Intermediasi Makroprudensial ("RIM"), *Liquidity Coverage Ratio* ("LCR"), *Net Stable Funding Ratio* ("NSFR"), dan ketergantungan terhadap pendanaan nasabah besar.

GWM adalah simpanan minimum yang wajib dipelihara oleh Bank dalam bentuk saldo rekening giro pada Bank Indonesia atau surat berharga yang besarnya ditetapkan oleh Bank Indonesia sebesar persentase tertentu dari dana pihak ketiga (DPK). PLM merupakan persentase kepemilikan surat berharga Rupiah yang dapat digunakan dalam operasi pasar terbuka, antara lain SBI, SDBI, SBN, dan SRBI.

Pada tanggal 31 Desember 2023 (Bank Mandiri saja), posisi GWM Rupiah rata - rata adalah sebesar 7,32% dari total DPK Rupiah, sesuai dengan limit yang telah ditetapkan, sedangkan untuk Giro RIM adalah sebesar 0,68% dan PLM adalah sebesar 19,25% dari total DPK Rupiah. Sementara untuk posisi GWM valas rata-rata adalah sebesar 4,10% dari total DPK valas asing sesuai dengan limit yang ditetapkan.

Cadangan likuiditas adalah alat likuid Bank di atas GWM dengan fungsi untuk pemenuhan kebutuhan likuiditas yang tidak terjadwal. Dalam mengelola cadangan likuiditas, Bank memiliki batasan dalam bentuk limit *safety level*, yaitu proyeksi cadangan likuiditas Bank untuk 1 bulan ke depan. Pada tanggal 31 Desember 2023, cadangan likuiditas berada di atas *safety level*.

RIM adalah rasio hasil perbandingan antara kredit yang diberikan dan surat berharga korporasi yang memenuhi persyaratan tertentu yang dimiliki bank terhadap dana pihak ketiga, surat-surat berharga yang memenuhi persyaratan tertentu yang diterbitkan oleh Bank, dan pinjaman yang memenuhi persyaratan tertentu yang diterima oleh Bank. Pada tanggal 31 Desember 2023, RIM Bank Mandiri saja sebesar 83,73%.

LCR merupakan rasio antara *High Quality Liquid Assets* (HQLA) dengan estimasi total arus kas keluar bersih (*net cash outflow*) selama 30 (tiga puluh) hari ke depan dalam skenario krisis. LCR bertujuan untuk meningkatkan ketahanan likuiditas jangka pendek Bank dalam kondisi krisis. Pada tanggal 31 Desember 2023, LCR Bank Mandiri saja sebesar 176,24%.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk

(i) Liquidity risk management

Liquidity risk represents the Bank's inability to fulfill all financial liabilities when they become due from its financing cash flows and/or high quality liquid assets that can be pledged, without negatively impacting the Bank's activities and financial condition.

The Bank's liquidity risk is measured through several indicators, which are minimum statutory reserve ratio ("GWM") in Bank Indonesia and cash, Macroprudential Liquidity Reserve ("PLM"), liquidity reserve, Macroprudential Intermediation Ratio ("RIM"), Liquidity Coverage Ratio ("LCR"), Net Stable Funding Ratio ("NSFR") and dependency on large customer deposits.

GWM is a minimum deposits required to be maintained by the Bank in the form of current accounts with Bank Indonesia or marketable securities in which the amount is determined by Bank Indonesia based on certain percentage from total deposits from customers. PLM is an ownership percentage in Rupiah marketable securities which can be used in open market operations i.e. SBI, SDBI, SBN, and SRBI.

As of 31 December 2023 (Bank Mandiri only), the Bank maintained average Rupiah GWM of 7.32% from total outstanding deposit from customers denominated in Rupiah in accordance with the regulated limit, while for RIM ratio is 0.68% and PLM ratio of 19.25% from the outstanding deposit from customer denominated in Rupiah. Meanwhile for the foreign currency, the Bank maintained average foreign exchange GWM at 4.10% from the outstanding deposits from customer denominated in foreign currency in accordance with the regulated limit.

Liquidity reserve is the Bank's liquidity on top of GWM to anticipate unscheduled liquidity needs. In managing the liquidity reserve, Bank has liquidity reserve limit in the form of safety level limit, which represents the Bank's liquidity reserve projection for one following month. As of 31 December 2023, the liquidity reserve balance is above the safety level.

RIM is a ratio of loans and qualified marketable securities owned by the Bank to the customer deposits, qualified debt securities issued by the Bank and qualified borrowing received by the Bank. As of 31 December 2023, the Banks's RIM is 83.73%.

LCR is a ratio between High Quality Liquid Assets (HQLA) with the estimation of total net cash outflow for the next 30 (thirty) days under a crisis scenario, LCR is used to improve the short-term liquidity of the Bank under a crisis conditions. As of 31 December 2023, the Bank's LCR is 176.24%.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

NSFR merupakan rasio perbandingan antara pendanaan stabil yang tersedia (*available stable funding*) dengan pendanaan stabil yang diperlukan (*required stable funding*). Pada tanggal 31 Desember 2023, NSFR Bank Mandiri saja sebesar 116,59%.

Kondisi likuiditas Bank di masa mendatang diproyeksikan melalui metodologi *liquidity gap*, yang merupakan *maturity mismatch* antara komponen-komponen aset dan liabilitas (termasuk *off balance sheet*), yang disusun ke dalam periode waktu (*time bucket*) berdasarkan *contractual maturity* ataupun *behavioral maturity*. Pada tanggal 31 Desember 2023, proyeksi likuiditas Bank sampai dengan 12 bulan ke depan berada dalam posisi surplus. Meskipun proyeksi likuiditas 12 bulan ke depan surplus, Bank selalu mempersiapkan alternatif *funding* apabila kondisi likuiditas pasar menjadi ketat atau tidak sesuai dengan prediksi Bank.

Untuk mengetahui dampak perubahan faktor pasar maupun faktor internal pada kondisi ekstrem (krisis) terhadap kondisi likuiditas, Bank melakukan *stress testing* risiko likuiditas secara berkala. Hasil *stress testing* yang dilakukan telah dipaparkan kepada Manajemen. Hasil *stress testing* menunjukkan bahwa Bank dapat bertahan pada kondisi krisis likuiditas.

Meskipun hasil *stress testing* menunjukkan bahwa risiko likuiditas dapat dikelola dengan baik, Bank memiliki *Liquidity Contingency Plan (LCP)* yang meliputi strategi pendanaan dan strategi *pricing* dalam kondisi krisis, antara lain pinjaman pasar uang, *repo*, pinjaman bilateral, *FX swap* dan *wholesale funding*. Dalam LCP, penetapan kondisi likuiditas dan strategi-strategi pendanaan telah mempertimbangkan kondisi internal dan eksternal.

Dalam rangka mengantisipasi timbulnya risiko likuiditas akibat adanya perubahan faktor ekonomi global, Bank Mandiri memonitor indikator - indikator eksternal di antaranya: *indONIA*, suku bunga kebijakan Bank Indonesia (*BI Rate*), *yield SUN 10 tahun*, *outstanding* likuiditas perbankan Rupiah, Indeks Harga Saham Gabungan (*IHSG*), *rate interbank call money*, *yield UST 10 tahun*, nilai tukar *USD/IDR*, *Credit Default Swap (CDS) 5 tahun* Indonesia, serta informasi pasar terkini.

Pelaporan jatuh tempo pada tanggal 31 Desember 2023 dan 2022, didasarkan pada jangka waktu yang tersisa sejak tanggal-tanggal tersebut. Secara historis, terdapat bagian dari simpanan dalam jumlah yang cukup besar yang diperpanjang pada saat jatuh tempo. Selain itu, jika terdapat keperluan likuiditas, obligasi pemerintah (portofolio diukur pada nilai wajar melalui laba rugi dan tersedia untuk dijual diukur pada nilai wajar melalui penghasilan komprehensif lain) dapat dicairkan dengan menggunakannya sebagai jaminan dalam pasar antar Bank.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

NSFR is a ratio comparing the available stable funding to required stable funding. As of 31 December 2023, the Bank's NSFR is 116.59%.

The Bank uses liquidity gap methodology to project its liquidity conditions for the future. Liquidity gap is basically a maturity mismatch between components of assets and liabilities (including off-balance sheet), which are classified into time bucket based on their contractual maturity or behavioral maturity. As of 31 December 2023, the Bank's liquidity forecast up to next 12 months is at a surplus position. Even in the surplus position for the next 12 months, the Bank always prepares for alternative funding to anticipate tight liquidity in the market or the liquidity is not as expected.

To determine the impact of changes in market factors and internal factors under extreme conditions (crisis) to the liquidity, the Bank conducts stress testing of liquidity risk on a regular basis. The results of stress testing performed was presented to the Management. The stress testing result showed that the Bank will be able to survive under liquidity crisis conditions.

Although the stress testing result showed liquidity risk is well managed, Bank has Liquidity Contingency Plan (LCP) in crisis condition which covers funding strategy and pricing strategy including money market borrowing, repo, bilateral borrowing, FX swap and wholesale funding. In LCP, determination of liquidity situations and funding strategies have considered internal and external conditions.

To anticipate liquidity risks due to volatility of global economic condition, Bank Mandiri monitors external indicators, including indONIA, BI Rate, 10-years SUN Yield, Rupiah Banking Liquidity Outstanding, Composite Stock Price Index (IHSG), Rate Interbank Call Money, 10-years UST Yield, USD/IDR Exchange Rate, Indonesia's 5-years Credit Default Swap (CDS) and the current market informations.

The maturity profile as of 31 December 2023 and 2022 are based on the remaining period from these dates. Historically, there were a large portion of deposits to be renewed upon maturity. In addition, if there is a need for liquidity, Government Bonds (at fair value through profit or loss and fair value through other comprehensive income) can be exercised by utilizing as collateral in interbank market.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Sumber risiko suku bunga *banking book* adalah *repricing risk* (*repricing mismatch* antara komponen aset dan liabilitas), *basis risk* (penggunaan suku bunga acuan yang berbeda), *yield curve risk* (perubahan bentuk dan *slope yield curve*) dan *option risk* (pelunasan kredit atau pencairan deposito sebelum jatuh tempo). Bank menggunakan *repricing gap* dan melakukan *sensitivity analysis* guna memperoleh proyeksi perubahan *Net Interest Income* ("NII").

a. Sensitivitas terhadap pendapatan bunga - neto

Tabel di bawah ini mengikhtisarkan sensitivitas pendapatan bunga - neto Bank Mandiri untuk 1 (satu) tahun ke depan terhadap pergerakan suku bunga dari portofolio aset dan liabilitas yang memiliki suku bunga pada tanggal 31 Desember 2023 dan 2022 (Bank Mandiri saja) yaitu:

	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps
31 Desember 2023		
Menambah/(mengurangi) pendapatan bunga - neto (Rp miliar)	121,23	(3.091,51)
	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps
31 Desember 2022		
Menambah/(mengurangi) pendapatan bunga - neto (Rp miliar)	(2.844,96)	(2.508,39)

Proyeksi di atas mengasumsikan bahwa seluruh variabel lainnya adalah konstan pada tanggal pelaporan keuangan.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(ii) Interest rate risk management on banking book portfolio (continued)

The sources of banking book's interest rate risk are repricing risk (repricing mismatch between asset and liability components), basis risk (usage of different interest rate reference), yield curve risk (changes in shape and slope of the yield curve) and the option risk (loan repayment or redeem of deposit before maturity). The Bank uses the repricing gap and performs sensitivity analysis to obtain the projected Net Interest Income ("NII").

a. Sensitivity of net interest income

The table below shows the sensitivity of net income for the next 1 year to interest rate movement of interest bearing assets and liabilities of Bank Mandiri as of 31 December 2023 and 2022 (Bank Mandiri only) as follows:

	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps
31 Desember 2023		
Increase/(decrease) net interest income (Rp billion)	121,23	(3.091,51)
	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps
31 Desember 2022

- (ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)
- b. Sensitivitas pendapatan bunga untuk kelompok nilai wajar melalui pendapatan komprehensif lain

Tabel di bawah ini mengikhtisarkan sensitivitas pendapatan bunga untuk kelompok nilai wajar melalui pendapatan komprehensif lain pada tanggal 31 Desember 2023 dan 2022 yang akan jatuh tempo dalam 12 (dua belas) bulan atas perubahan tingkat suku bunga (Bank Mandiri saja) yaitu:

	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps	
31 Desember 2023			31 December 2023
Menambah/(mengurangi) pendapatan bunga (Rp miliar)	211,72	(212,08)	Increase/(decrease) interest income (Rp billion)
	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps	
31 Desember 2022			31 December 2022
Menambah/(mengurangi) pendapatan bunga (Rp miliar)	197,38	(195,37)	Increase/(decrease) interest income (Rp billion)

Proyeksi di atas mengasumsikan bahwa seluruh variabel lainnya adalah konstan pada tanggal pelaporan keuangan.

Sensitivitas pendapatan bunga untuk kelompok nilai wajar melalui pendapatan komprehensif lain, tidak memperhitungkan efek dari lindung nilai dan tindakan-tindakan Bank Mandiri untuk mengurangi risiko atas tingkat suku bunga. Dalam kenyataannya, Bank Mandiri secara proaktif melakukan mitigasi atas efek prospektif pergerakan tingkat suku bunga.

- c. Eksposur Bank Mandiri terhadap risiko tingkat suku bunga (*repricing gap*)

Tabel di bawah ini mengikhtisarkan aset dan liabilitas keuangan Bank Mandiri pada nilai tercatat, yang dikategorikan menurut mana yang lebih dulu antara tanggal *repricing* secara kontraktual (*contractual repricing*) atau tanggal jatuh tempo:

62. RISK MANAGEMENT (continued)

- B. *Market risk and liquidity risk (continued)*
- (ii) *Interest rate risk management on banking book portfolio (continued)*
- b. *Sensitivity of interest income from financial assets classified at fair value through other comprehensive income*

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Untuk mengetahui dampak perubahan suku bunga dan nilai tukar pada kondisi ekstrim (krisis) terhadap pendapatan dan modal, Bank melakukan *stress testing* risiko pasar *banking book* secara berkala.

(iii) Manajemen *pricing*

Bank menerapkan kebijakan *pricing* baik untuk produk dana maupun produk kredit. Kebijakan *pricing* merupakan salah satu strategi untuk memaksimalkan *Net Interest Margin* ("NIM") dan sekaligus mendukung Bank menguasai *market share* dengan mempertimbangkan kondisi persaingan.

Bank secara konsisten berupaya menerapkan strategi sebagai *market leader* dalam hal *pricing* pendanaan. Namun demikian, dengan mempertimbangkan kondisi likuiditas dan kebutuhan dana, Bank dapat menerapkan strategi agresif (lebih besar dari pesaing utama) atau defensif (sama atau lebih kecil dari pesaing utama).

Dalam menetapkan suku bunga kredit, Bank menerapkan *risk based pricing* yaitu pemberian suku bunga kredit kepada nasabah bervariasi berdasarkan tingkat risiko kreditnya. Dalam rangka meminimalkan risiko suku bunga, maka suku bunga kredit disesuaikan dengan suku bunga sumber dana pembiayaan. Selain biaya dana, suku bunga kredit ditetapkan dengan mempertimbangkan biaya *overhead*, premi risiko kredit dan margin keuntungan Bank dengan tetap memperhatikan *competitiveness* dengan pesaing utama. Suku bunga kredit dapat berupa suku bunga mengambang (*floating rate*) atau suku bunga tetap (*fixed rate*) untuk tenor tertentu.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(ii) Interest rate risk management on banking book portfolio (continued)

To assess the impact of changes in interest rates and exchange rates at extreme conditions (crisis) to earnings and capital, the Bank conducts stress testing on the market risk of banking book regularly.

(iii) Pricing management

The Bank implements pricing policy for loans or deposit products. The pricing policy is one of the Bank's strategy to maximise Net Interest Margin ("NIM") and to support the Bank to dominate the market share by considering the competition condition.

The Bank consistently manages to apply the strategy as market leader in terms of fund pricing. However, considering the liquidity conditions and funding needs, the Bank may implement an aggressive strategy (greater than major competitors) or defensive (equal to or smaller than major competitors).

In determine interest rates, the Bank implements risk-based pricing by providing a range of interest rate of loan to customers based on credit risk level. In order to minimize interest rate risk, the loan interest rate is adjusted with interest rate from cost of funds. Other than cost of funds, loan interest rates are determined with consideration to overhead costs, credit risk premiums and profit margins as well as taking into account the Bank's competitiveness with its major competitors. Interest rates for loan can be either a floating or a fixed rate for certain tenors.

(iv) Manajemen risiko nilai tukar

Risiko nilai tukar adalah potensi kerugian yang timbul akibat pergerakan nilai tukar di pasar yang berlawanan pada saat Bank memiliki posisi terbuka. Bank menerapkan manajemen risiko nilai tukar yang memadai sehingga terhindar dari kerugian akibat perubahan atau volatilitas nilai tukar. Risiko nilai tukar berasal dari transaksi valuta asing dengan nasabah atau *counterparty* yang menyebabkan posisi terbuka dalam valuta asing maupun posisi struktural dalam valuta asing akibat penyertaan modal. Bank mengelola risiko nilai tukar dengan melakukan pemantauan dan pengelolaan Posisi Devisa Neto ("PDN") sesuai dengan limit internal dan ketentuan Bank Indonesia.

Perhitungan PDN pada tanggal 31 Desember 2023 dan 2022 berdasarkan Peraturan Bank Indonesia No. 12/10/PBI/2010 tanggal 1 Juli 2010 yang telah diperbaharui oleh Peraturan Bank Indonesia No. 17/5/PBI/2015 tanggal 29 Mei 2015 yang mengatur mengenai penghapusan peraturan PDN 30 menit. Sesuai dengan Peraturan Bank Indonesia, rasio PDN secara keseluruhan adalah penjumlahan nilai absolut dari selisih bersih antara aset dan liabilitas dalam laporan posisi keuangan untuk setiap mata uang asing yang dinyatakan dalam Rupiah ditambah dengan selisih bersih dari tagihan dan liabilitas komitmen dan kontinjensi, yang dicatat dalam rekening administratif, untuk setiap mata uang asing, yang dinyatakan dalam Rupiah, sedangkan PDN untuk laporan posisi keuangan adalah selisih bersih jumlah aset dan jumlah liabilitas dalam mata uang asing yang dinyatakan dalam Rupiah. Terhitung tanggal 20 Maret 2020 sesuai dengan Surat BI No. 22/53/DPPK/Srt/B, transaksi *Domestic Non-Deliverable Forward* ("DNDF") disertakan ke dalam perhitungan PDN.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(iv) Foreign exchange risk management

Exchange rate risk represents potential loss arising from unfavourable exchange rate movements in the market when the Bank has an open position. The Bank applies a proper foreign exchange risk management to avoid loss arising from exchange rate changes or volatility. Exchange rate risk arises from foreign exchange currency transactions with customer or counterparty which leads to an open position in foreign currency or structural positions in foreign currencies due to capital investment. The Bank manages exchange rate risk by monitoring and managing the Net Open Position ("NOP") in accordance with internal limits and the regulation of Bank Indonesia.

The calculation of the net open position as of 31 December 2023 and 2022 is based on Bank Indonesia's Regulation No. 12/10/PBI/2010 dated 1 July 2010 which amended by Bank Indonesia's Regulation No. 17/5/PBI/2015 dated on 29 May 2015 regarding removal implementation NOP 30 minutes. In accordance with Bank Indonesia Regulation, the overall NOP ratio is the total absolute amount from the net difference between assets and liabilities for each foreign currency on statement of financial position which presented in Rupiah added with the net difference between receivables and payables of commitments and contingencies for each foreign currency recorded in administrative which presented in Rupiah. The net open position for the statement of financial position is the net difference between total assets and liabilities for each foreign currency which presented in Rupiah. As of 20 March 2020, in accordance with BI Letter No. 22/53/DPPK/Srt/B, Domestic Non-Deliverable Forward ("DNDF") transactions are included in the NOP calculation.

- *Input* selain harga yang kuotasi dari pasar yang disertakan pada Tingkat 1 yang dapat diobservasi untuk aset dan liabilitas, baik secara langsung (yaitu sebagai sebuah harga) atau secara tidak langsung (yaitu sebagai turunan dari harga) (Tingkat 2);
- *Input* untuk aset atau liabilitas yang tidak didasarkan pada data pasar yang dapat diobservasi (informasi yang tidak dapat diobservasi) (Tingkat 3).

62. MANAJEMEN RISIKO (lanjutan)

- B. Risiko pasar dan risiko likuiditas (lanjutan)
- (v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

Pada tanggal 31 Desember 2023 dan 2022, untuk aset dan liabilitas yang dimiliki pada akhir tahun laporan diukur pada nilai wajar secara berulang, Bank dan Entitas Anak tidak memiliki transfer antara Tingkat 1 dan Tingkat 2 dari hierarki. Selain itu pada posisi tanggal yang sama, tidak terdapat Surat Berharga yang masuk ke dalam Tingkat 3.

Nilai wajar instrumen keuangan yang diperdagangkan dalam pasar aktif (misalnya efek yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain) ditentukan berdasarkan harga pasar kuotasian pada tanggal pelaporan. Suatu pasar dianggap aktif apabila informasi mengenai kuotasian dapat dengan mudah dan secara berkala tersedia dari suatu bursa, pedagang efek, atau *broker*, kelompok penilai harga pasar industri tertentu, regulator dan harga-harga tersebut mencerminkan transaksi pasar yang aktual dan reguler pada tingkat yang wajar. Harga pasar kuotasian untuk aset keuangan yang dimiliki Grup adalah harga penawaran sekarang. Instrumen-instrumen tersebut termasuk dalam tingkat 1. Instrumen yang termasuk dalam tingkat 1 umumnya meliputi investasi ekuitas dan surat hutang terdaftar di Bursa Efek Indonesia yang diklasifikasikan sebagai surat berharga yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain.

Nilai wajar instrumen keuangan yang tidak diperdagangkan pada pasar aktif meliputi derivatif *over the counter* dan obligasi pemerintah yang tidak aktif ditentukan dengan teknik penilaian internal.

Teknik-teknik penilaian tersebut memaksimalkan penggunaan data pasar yang dapat diobservasi dan sedapat mungkin meminimalisir penggunaan estimasi yang bersifat spesifik dari entitas. Seluruh input yang dibutuhkan untuk menentukan nilai wajar instrumen keuangan dapat diobservasi dari pasar, oleh karena itu instrumen tersebut termasuk dalam tingkat 2. Sebaliknya, jika salah satu atau lebih data tidak didasarkan pada data pasar yang dapat diobservasi, instrumen ini termasuk dalam tingkat 3.

62. RISK MANAGEMENT (continued)

- B. Market risk and liquidity risk (continued)
- (v) Fair value of financial assets and liabilities (continued)

As of 31 December 2023 and 2022, assets and liabilities held at the end of the reporting year are measured at fair value on a recurring basis. The Bank and its Subsidiaries have no transfers between Level 1 and Level 2 of the hierarchy. In addition at the same date, there is no Marketable Securities included in Level 3

The fair value of financial instruments traded in active markets (such as marketable securities which are measured at fair value through profit or loss and fair value through other comprehensive income) was determined based on quoted market prices at the reporting date. A market is considered active if the information regarding price quotations can be easily obtained and regularly available from an exchange, securities dealer or broker, the market price of a particular industry assessors, regulators and those price reflects actual and regular market transactions at a fair value. Quoted market price for financial assets owned by the Group are using current offering price. These instruments are included in level 1. The instruments included in level 1 generally include investments in shares in IDX and debt securities classified as held for trading and fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market (include over-the-counter derivatives and inactive government bonds) are determined by internal valuation techniques.

The valuation techniques maximise the use of observable market data when available and as far as possible to minimise the use of specific estimates of the entity. If all the inputs needed to determine the fair value of financial instruments are observable from market, therefore the instrument is included in level 2. Instead, if one or more data is not based on observable market data, these instrument are included in level 3.

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

- (i) Giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain

Penempatan pada Bank Indonesia dan bank lain merupakan penanaman dana dalam bentuk *Deposit Facility*, FASBI Syariah, *Call Money*, penempatan "fixed term", deposito berjangka dan lain-lain.

Nilai tercatat dari giro pada Bank Indonesia dan bank lain, penempatan *overnight* dengan suku bunga mengambang adalah perkiraan yang layak atas nilai wajar.

Estimasi nilai wajar terhadap penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain adalah perkiraan yang layak atas nilai wajar.

- (ii) Efek-efek dan obligasi pemerintah (diukur pada biaya perolehan dan biaya perolehan diamortisasi)

Nilai wajar untuk efek-efek dan obligasi pemerintah yang diukur pada biaya perolehan dan biaya perolehan diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dinilai dengan menggunakan metode valuasi internal.

62. RISK MANAGEMENT (continued)

B. *Market risk and liquidity risk (continued)*

(v) *Fair value of financial assets and liabilities (continued)*

- (i) *Current accounts with Bank Indonesia, current accounts with other banks, placement with Bank Indonesia and other banks, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets*

Placements with Bank Indonesia and other banks represent placements in the form of deposit facility, sharia FASBI, call money, fixed-term placements, time deposits and others

The carrying amount of current accounts, placements and overnight deposits, which uses floating rate, is a reasonable approximation of fair value.

The estimated fair value of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and remaining maturity. Since the remaining maturity is below one year, the carrying amount of fixed interest bearing placements, other receiveables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is a reasonable approximation of fair value.

- (ii) *Government Securities and Bonds (measured at cost and amortised cost)*

The fair value for government securities and bonds measured at cost and amortised cost is determined based on market prices or intermediary (broker)/dealer quotes. If this information is not available, the fair value is estimated using market prices of similar credit, maturity and yield securities or evaluated using internal valuation methods.

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

(iii) Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan

Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan dinyatakan berdasarkan jumlah nilai tercatat setelah dikurangi dengan beban penurunan nilai. Estimasi nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan mencerminkan jumlah diskonto dari estimasi kini dari arus kas masa depan yang diharapkan akan diterima. Nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan ditentukan dengan mendiskontokan arus kas yang diharapkan pada tingkat suku bunga pasar terkini.

(iv) Simpanan nasabah dan simpanan dari bank lain, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain

Estimasi nilai wajar simpanan yang bisa ditarik kembali sewaktu-waktu, termasuk simpanan tanpa bunga, adalah sebesar jumlah terutang/nilai tercatat ketika utang tersebut dibayarkan.

Estimasi nilai wajar simpanan dengan tingkat suku bunga tetap, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari simpanan dengan tingkat bunga tetap, liabilitas akseptasi dan liabilitas lain-lain adalah perkiraan yang layak atas nilai wajar.

B. *Market risk and liquidity risk (continued)*

(v) *Fair value of financial assets and liabilities (continued)*

(iii) *Loans and Sharia Receivables/Financing, Consumer Financing Receivables and Net Investment in Finance Leases*

Loans and sharia receivables/financing, consumer financing receivables and net investment in finance leases are recorded at carrying amount net of charges for impairment. The estimated fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases represents the discounted amount of estimated future cash flows expected to be received. The fair value of loans and consumer financing receivables is determined by discounting the expected future cash flows at current market interest rates.

(iv) *Deposits from customers and other banks, securities sold under agreements to repurchase, acceptance payables and other liabilities*

The estimated fair value of deposits that can be withdrawn at any time, includes non-interest bearing deposits, is the payable amount/carrying amount when the payable is paid.

The estimated fair value of fixed interest bearing deposits, securities sold under agreements to repurchase, acceptance payables and other liabilities not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity. As the remaining maturity is below one year, the carrying amount of fixed interest bearing deposits, acceptance payables and other liabilities is a reasonable approximation of fair value.

(vi) *Value at Risk* (VaR)

Dalam pelaksanaan pengelolaan risiko pasar *trading*, Bank menerapkan prinsip *segregation of duties* dengan cara melakukan pemisahan antara unit *front office* (melaksanakan transaksi *trading*), unit *middle office* (melaksanakan proses manajemen risiko serta menyusun kebijakan dan prosedur) dan unit *back office* (melaksanakan proses *settlement* transaksi).

Analisa risiko pasar atas aktivitas *trading treasury* dilakukan secara harian menggunakan pendekatan sesuai *best practice* yang ada dan mengacu pada ketentuan internal dan eksternal yang berlaku, salah satunya melalui perhitungan VaR.

VaR adalah potensi kerugian maksimum dari posisi portofolio Bank (*open position*) dengan *confidence level* dan *holding period* tertentu dalam kondisi pasar yang normal. Metode perhitungan VaR yang digunakan bank yaitu metode *Historical Simulation* yang tidak membutuhkan asumsi bahwa pergerakan faktor pasar terdistribusi normal. Bank menghitung VaR berdasarkan 250 hari data faktor pasar historis.

Realisasi VaR 31 Desember 2023 dan 2022 (tidak diaudit) adalah sebagai berikut:

B. *Market risk and liquidity risk (continued)*

(v) *Fair value of financial assets and liabilities (continued)*

(v) *Debt securities issued, fund borrowings and subordinated loans and marketable securities*

The aggregate fair values are calculated based on quoted market prices. When information is not available, a discounted cash flow model is used based on the current yield curve appropriate for the remaining term to maturity.

(vi) *Value at Risk* (VaR)

The implementation of managing market risk of trading, the Bank's applies segregation of duties principle by separation front office unit (conduct trading transaction), middle office unit (conduct process of risk management as well as develop policies and procedures) and back office unit (conduct process of settlement transaction).

VaR is the maximum potential loss from the Bank's portfolio position (open position) with a certain confidence level and holding period under normal market conditions. The VaR calculation method used by the bank is the Historical Simulation method which does not require the assumption that the movement of market factors is normally distributed. The bank calculates VaR based on 250 days of historical market factor data.

(viii) Dampak Reformasi Acuan Suku Bunga

Pada tahun 2017, *Financial Conduct Authority* (FCA) Inggris mengumumkan rencana untuk menghentikan penggunaan LIBOR pada akhir tahun 2020. Pada November 2020, *ICE Benchmark Administration* (IBA) mengumumkan secara resmi rencana untuk menghentikan publikasi suku bunga acuan LIBOR. Sebagai tanggapan atas kondisi terbaru, pada tanggal 5 Maret 2021, FCA mengumumkan rencana penundaan sebagian penghentian publikasi suku bunga acuan LIBOR oleh IBA tersebut yang akan diadakan dalam 2 (dua) tahap sebagai berikut:

1. Pada 31 Desember 2021 untuk suku bunga acuan LIBOR semua tenor dalam mata uang GBP, EUR, CHF dan JPY serta dalam mata uang USD untuk tenor 1 (satu) minggu dan 2 (dua) bulan.
2. Pada 31 Desember 2023 untuk suku bunga acuan LIBOR dalam mata uang USD untuk tenor *Overnight*, 1 (satu) bulan, 3 (tiga) bulan, 6 (enam) bulan dan 12 (dua belas) bulan.

Eksposur risiko Bank yang secara langsung terdampak dari reformasi acuan suku bunga terdiri dari *portfolio* kredit korporasi, transaksi derivatif dan *borrowing* yang menggunakan suku bunga acuan USD LIBOR.

Saat ini Bank telah berencana menggunakan suku bunga acuan *Secured Overnight Financing Rate* (SOFR) atau suku bunga acuan lain yang disepakati untuk menggantikan suku bunga acuan USD LIBOR. Terkait suku bunga acuan SOFR, terdapat beberapa perbedaan antara USD LIBOR dan SOFR. USD LIBOR adalah "*term rate*", yang berarti USD LIBOR dipublikasikan untuk beberapa periode pinjaman (sebagai contoh 3 (tiga) bulanan atau 6 (enam) bulanan) dan bersifat "*forward looking*" (LIBOR dipublikasikan pada awal periode), sedangkan SOFR merupakan suku bunga acuan yang bersifat "*backward looking*", berdasarkan suku bunga *overnight* dari transaksi *actual*, dan dipublikasikan pada akhir periode *overnight*. Selain itu, LIBOR merupakan tingkat suku bunga yang telah memperhitungkan *credit spread*, sementara SOFR saat ini adalah suku bunga yang hampir *risk free* berdasarkan transaksi pasar *repurchase agreement* (repo) US Treasury. Untuk melakukan transisi atas kontrak dan perjanjian yang saat ini mengacu ke USD LIBOR menjadi mengacu ke suku bunga acuan alternatif (SOFR), diperlukan penyesuaian untuk memastikan bahwa kedua suku bunga acuan tersebut secara ekonomis setara.

Pada tahun 2020, Bank telah membentuk komite, yang terdiri dari unit kerja Treasury, Kredit, Risk, IT, Legal, Compliance, dan Keuangan untuk menyusun strategi transisi USD LIBOR. Komite Transisi LIBOR ini dibentuk untuk meminimalisasi potensi disrupti bisnis dan memitigasi risiko operasional, hukum, kepatuhan serta keuangan. Inisiatif transisi LIBOR mempertimbangkan perubahan pada sistem informasi, proses, manajemen risiko, dan model valuasi instrumen keuangan serta mengkaji dampak akuntansi dan perpajakan.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(viii) Impact of Interest Rate Benchmark Reform

In 2017, the UK *Financial Conduct Authority* (FCA) announced plans to stop using LIBOR by the end of 2020. In November 2020, the *ICE Benchmark Administration* (IBA) officially announced plans to stop publishing the LIBOR benchmark interest rate. In response to the latest conditions, on 05 March 2021, FCA announced a plan to partially suspend the publication of the LIBOR benchmark interest rate by the IBA which will be held in 2 (two) stages as follows:

1. As of 31 December 2021, the reference interest rate is LIBOR for all tenors in GBP, EUR, CHF and JPY and in USD for 1 (one) week and 2 (two) months tenors.
2. On 31 December 2023, the reference interest rate is LIBOR in USD for the *Overnight* tenor, 1 (one) month, 3 (three) months, 6 (six) months and 12 (twelve) months.

The Bank's risk exposures that are directly affected by the interest rate benchmark reform consist of a portfolio of corporate loans, derivative transactions and borrowing using the USD LIBOR benchmark interest rate.

Currently, the Bank plans to use the *Secured Overnight Financing Rate* (SOFR) benchmark interest rate or other agreed benchmark interest rate to replace the USD LIBOR benchmark interest rate. Regarding the SOFR benchmark interest rate, there are several differences between USD LIBOR and SOFR. USD LIBOR is the "*term rate*", which means that USD LIBOR is published for several loan periods (for example 3 (three) months or 6 (six) months) and is "*forward looking*" (LIBOR is published at the beginning of the period), while SOFR is the rate "*backward-looking*" benchmark interest rate, based on the overnight interest rate of actual transactions, and published at the end of the overnight period. In addition, LIBOR is an interest rate that has taken into account credit spreads, while SOFR is currently an almost risk free interest rate based on US Treasury *repurchase agreement* (repo) market transactions. In order to make the transition of contracts and agreements that currently refer to USD LIBOR to refer to the alternative benchmark interest rate (SOFR), adjustments are needed to ensure that the two benchmark interest rates are economically equivalent.

In 2020, the Bank has formed a committee, consisting of Treasury, Credit, Risk, IT, Legal, Compliance, and Finance work units to formulate a USD LIBOR transition strategy. The LIBOR Transition Committee was formed to minimize the potential for business disruption and mitigate operational, legal, compliance and financial risks. The LIBOR transition initiative considers changes to information systems, processes, risk management and financial instrument valuation models and examines the impact of accounting and taxation.

B. Risiko pasar dan risiko likuiditas (lanjutan)

(viii) Dampak Reformasi Acuan Suku Bunga (lanjutan)

Dari segi manajemen risiko pasar, Bank telah mengidentifikasi dan mengantisipasi perubahan yang akan terjadi pada aspek - aspek antara lain perubahan *market data*, yang selanjutnya berdampak pada hasil perhitungan *mark to market*, perhitungan dan monitoring VaR, dan perhitungan lain - lain terkait risiko pasar. Terhadap perubahan-perubahan yang terjadi tersebut, Bank telah melakukan penyesuaian pada sistem manajemen risiko pasar dan ketentuan internal terkait, serta telah melaporkan realisasi *enhancement* pada sistem ke Regulator.

Dalam hal kaitannya dengan risiko likuiditas, perubahan atas suku bunga acuan LIBOR menjadi suku bunga acuan alternatif lain juga dapat berdampak pada kondisi likuiditas Bank. Dalam hal ini, perubahan nominal pembayaran bunga kredit, transaksi derivatif dan/atau bunga pinjaman dapat berpengaruh pada nilai arus kas yang diterima atau dibayarkan oleh Bank, antara lain yang terukur dalam indikator *Liquidity Coverage Ratio* (LCR) dan *Net Stable Funding Ratio* (NSFR). Namun demikian, dampak tersebut diperkirakan tidak signifikan mempengaruhi kondisi likuiditas Bank secara keseluruhan.

Sebagai bentuk mitigasi risiko pasar, per posisi 31 Desember 2023, Bank telah mengidentifikasi kebutuhan perubahan pada sistem informasi dan Bank telah melakukan penyesuaian pada sistem tersebut. Bank juga telah melakukan kajian yang dibutuhkan dalam proses transisi terkait proses dan model valuasi instrumen keuangan. Saat ini Bank telah melakukan komunikasi dengan *counterparty* dan/atau nasabah yang terdampak untuk memberikan informasi terkini terkait perubahan yang mungkin terjadi akibat dari reformasi acuan suku bunga, secara khusus USD LIBOR, baik melalui sosialisasi, diskusi maupun tertulis. Bank telah mengidentifikasi area yang memiliki risiko yang signifikan terhadap penghentian USD LIBOR, yaitu melakukan pengembangan pada sistem informasi dan penyesuaian proses bisnis untuk dapat mengakomodasi penggunaan suku bunga acuan alternatif, melakukan amendemen kontrak/*repapering* dan/atau melakukan kajian *fallback clause* pada kontrak *existing*. Selain melakukan usaha berkelanjutan dalam pemantauan kondisi terkini terkait transisi USD LIBOR, Bank juga telah melakukan diskusi lebih intensif dengan pelaku industri baik yang berasal dari dalam maupun luar negeri dalam rangka *benchmark* serta komunikasi dengan Regulator untuk memastikan transisi perubahan suku bunga acuan dari USD LIBOR ke suku bunga acuan alternatif berjalan dengan baik, sekaligus meminimalisasi risiko yang muncul dari proses transisi tersebut. Sebagai tindak lanjut jangka panjang, Bank akan secara berkelanjutan menilai dan mempersiapkan mitigasi atas risiko yang akan timbul dari transisi USD LIBOR dimaksud.

62. RISK MANAGEMENT (continued)

B. *Market risk and liquidity risk (continued)*

(viii) *Impact of Interest Rate Benchmark Reform (continued)*

In terms of market risk management, the Bank has identified and anticipated changes that will occur in aspects including changes in market data, which in turn will have an impact on the results of the mark to market calculation, VaR calculation and monitoring, and other calculations related to market risk. With regard to these changes, the Bank has made adjustments to the market risk management system and has reported system enhancement realisation to the regulator.

In terms of liquidity risk, changes in the LIBOR benchmark interest rate to another alternative benchmark interest rate may also have an impact on the Bank's liquidity condition. In this case, changes in the nominal payment of credit interest, derivative transactions and/or loan interest may affect the value of cash flows received or paid by the Bank, including those measured in the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) indicators. However, this impact is not expected to significantly affect the Bank's overall liquidity condition.

*As a form of market risk mitigation, as of 31 December 2023, the Bank has identified the need for changes to the information system and the Bank has made adjustments to the system. The Bank has also conducted studies needed in the transition process related to the process and model of the valuation of financial instruments. Currently, the Bank has communicated with affected counterparties and/or customers to provide the latest information regarding changes that may occur as a result of the reform of the interest rate reference, specifically USD LIBOR, either through socialization, discussion or in writing. The Bank has identified areas that have a significant risk of discontinuing USD LIBOR, namely developing information systems and adjusting business processes to accommodate the use of alternative reference interest rates, conducting contract amendments/*repapering* and/or reviewing *fallback clauses* on existing contracts. In addition to carrying out continuous efforts in monitoring the latest conditions related to the USD LIBOR transition, the Bank has also conducted more intensive discussions with industry players both from within and outside the country in the context of benchmarking and communication with Regulators to ensure the transition of changes in the benchmark interest rate from USD LIBOR to alternative interest rates went well, also to minimize the risk arising from the transition process. As a long-term follow-up, the Bank will continuously assess and prepare for mitigation of the risks that will arise from the said USD LIBOR transition.*

Penilaian *inherent risk rating* dan *control rating* menghasilkan nilai *residual risk* dan menjadi bagian dari profil risiko operasional. Tingkat risiko residual dijaga seminimal mungkin dengan mengambil tindakan yang diperlukan untuk mitigasi sebelum risiko terjadi.
- (ii) *Loss Event Database*, merupakan *database* insiden risiko operasional yang dicatat secara *risk based* dengan tujuan sebagai *lesson learned*, pemantauan tindak lanjut perbaikan kedepannya, serta sebagai salah satu komponen untuk perhitungan modal risiko operasional (*regulatory capital charge*) metode *Standardized Approach (SA)*.
- (iii) *Key Indicator (KI)*, merupakan *early warning signal* dalam pengelolaan risiko operasional dengan tujuan agar upaya mitigasi dapat segera ditentukan dan dilaksanakan sebelum sebuah risiko terjadi. KI mengindikasikan besar kecilnya kemungkinan suatu risiko akan terjadi (*risk based*) atau mengindikasikan besar kecilnya kemungkinan suatu kontrol tidak dilaksanakan sebagaimana mestinya (*control based*). KI ditetapkan ambang batasnya (*threshold*) dan dicatat skor realisasinya secara berkala.
- (iv) *Issue & Action Management (IAM)*, merupakan perangkat untuk memantau tindak lanjut yang telah disusun atas isu-isu yang ditemukan dari berbagai sumber, seperti dari hasil *Control Testing*, hasil *monitoring Key Indicator*, terjadinya insiden, teridentifikasinya suatu permasalahan (*self-identified issue*) dan lainnya.
- (v) *Capital Modelling*, merupakan model perhitungan modal risiko operasional (*regulatory capital charge*) sesuai regulasi yang berlaku.

The *residual risk level* is minimized by taking necessary mitigations before risk occurs.
- (ii) *Loss Event Database*, is a database of *operational risk incidents* which recorded on *risk based basis* as a *lesson learned*, *remediation monitoring* and *future improvements*, also as a component for calculation of *operational risk capital calculation (regulatory capital charge)* with the *Standardized Approach (SA)* method.
