The Recovery Plan prepared at least contains an analysis of the Bank's condition, line of business, office network and material subsidiaries of the Bank, the structure of the Bank's business group, the Bank's business linkages, scenario analysis of the impact of changes in the Bank's condition including crisis analysis scenarios (reverse stress testing) that can occur to the Bank idiosyncratic and market-wide shock, recovery options and Recovery Plan disclosure.

In 2024 Bank Mandiri has submitted a Resolution Plan document to the Deposit Insurance Corporation (LPS) as the resolution authority in Indonesia. The Resolution Plan is a document containing information about the Bank, which is in line with the Recovery Action Plan, as well as an analysis of the resolution strategy which is one of the considerations for LPS in handling or resolving the Bank which is designated as a Bank in Resolution. Banks are required to update the Resolution Plan every 2 (two) years if there is a change in financial condition of more than 20% of total assets, total liabilities, and/or total equity as of the date of the financial statements contained in the previous Resolution Plan, as stipulated in LPS Regulation No. 2 of 2024 concerning Resolution Plans for Commercial Banks.

BANK RISK MANAGEMENT POLICY

Adequacy of Policies, Procedures, and Limits Setting

Bank Mandiri implements risk management guided by its Risk Management Policy, which serves as the primary framework for managing risks. For specific business areas such as credit, treasury, and operations, the Bank has detailed policies and procedures that define limits for activities at both the portfolio and transactional levels. These policies and procedures are integrated into every aspect of the Bank's operations, evaluated, and updated annually. In line with SEOJK 34/SEOJK.03/2016 on the Implementation of Risk Management for Commercial Banks, the Bank's policies and procedures are based on a Risk Management Strategy by taking into account the level of risk to be taken (Risk Appetite). Risk Appetite represents the type and level of risk the Bank is willing and able to take, within its risk capacity, to achieve or exceed its business objectives.

Bank Mandiri's Risk Appetite is manifested through the Risk Appetite Framework which is a strategic decision-making that describes Bank Mandiri's risk strategy. Risk Appetite is reflected in the Bank's business strategy and objectives.

Risk appetite is articulated through a Risk Appetite Statement (RAS), which is a formal guideline in the risk-taking process to achieve business targets. RAS is pivotal because it will provide clear and consistent direction to all levels of Bank Mandiri on the Bank's risk-taking ability.

INTEGRATED RISK MANAGEMENT IMPLEMENTATION

Adequacy of Risk Identification, Measurement, Monitoring, and Control Processes, as well as Risk Management Information Systems

Bank Mandiri conducts Risk Identification, Measurement, Monitoring, and Control processes, as well as operates its Risk Management Information System, through the Enterprise Risk Management (ERM) framework. The ERM implementation at Bank Mandiri employs a two-pronged approach to ensure that risks are not only well mitigated through daily business processes, but also in unexpected conditions (downturns) through capital reserves.

Internal Control System

Bank Mandiri implements an Internal Control System for its Risk Management function through the Three Lines Model, where responsibilities are shared among the first, second, and third lines of defense.

The Internal Audit Unit, as the third line, conducts assurance and consulting activities to evaluate the adequacy of the Bank's internal control system, risk management, and governance processes, in compliance with applicable laws, regulations, and Bank policies.

INTEGRATED RISK MANAGEMENT IMPLEMENTATION

Bank Mandiri has been implementing consolidated/integrated risk management since 2008, inline with the issuance of Bank Indonesia Regulation No. 8/6/PBI/2006 on the Implementation of Consolidated Risk Management for Banks that Control Subsidiaries. In its development, the regulation was replaced by Financial Services Authority Regulation No. 38/POJK.03/2017 on the Implementation of Consolidated Risk Management for Banks that Control Subsidiaries. In addition, Bank Mandiri has also been implementing integrated risk in accordance with Financial Services Authority Regulation No. 17/POJK.03/2014 on the Implementation of Integrated Risk Management for Financial Conglomerates. In the implementation of integrated risk management, Bank Mandiri is also guided by the Integrated Good Corporate Governance Guidelines, which comply with Financial Services Authority Regulation No. 18/POJK.03/2014 on the Implementation of Integrated Good Corporate Governance for Financial Conglomerates.

INTEGRATED RISK MANAGEMENT IMPLEMENTATION

The implementation of Consolidated/Integrated Risk Management is in line with integrated risk management principles, business characteristics of subsidiaries, and regulations. The subsidiaries of Bank Mandiri include Bank Syariah Indonesia, Bank Mandiri Taspen, Bank Mandiri (Europe) Ltd, Mandiri Tunas Finance, Mandiri Utama Finance, AXA Mandiri Financial Services, Mandiri Inhealth, Mandiri Sekuritas, Mandiri Capital Indonesia and Mandiri International Remittance. However, Mandiri Inhealth has no longer been a member of Mandiri Group Financial Conglomerates since 9 October 2024.

As an active supervision of the Main Entity towards the implementation of Consolidated and Integrated Risk Management, Bank Mandiri has established the Integrated Risk Committee (IRC), consisting of the Board of Directors and Executives of the Bank with the Board of Directors and/or Executives of Subsidiaries as well as the Integrated Risk Management Unit (SKMRT), which is directly responsible to the Director of Risk Management.

Bank Mandiri actively conducts integrated identification, measurement, monitoring, and control of Mandiri Group (self-assessment) risk exposures by reporting this following assessment:

1. The Consolidated Bank Soundness Level with risk-based approach/Risk-Based Bank Rating (RBBR), with the assessment scope covering the following factors: Risk Profile, Integrated Good Corporate Governance, Earnings and Capital, at consolidated level. During 2024, Bank Mandiri has reported Consolidated Bank Soundness Level for the position of 31 December 2023 and 30 June 2024 to the Regulator in a timely manner.

During 2024, Bank Mandiri has reported the Consolidated Risk Profile for the position of 31 December 2023 and 31 March, 30 June, and 30 September 2024 to the Regulator in a timely manner.

The assessment of Consolidated/Integrated Risk Profile and Consolidated Bank Soundness Level are recommended by the Integrated Risk Committee (IRC) and the approval are provided by the Risk Management & Credit Policy Committee (RMPC) Category A. The assessment of the Consolidated/Integrated Risk Profile and Consolidated RBBR, which have been approved by the RMPC are then reported to the Regulator and to the Integrated Good Corporate Governance Committee.

BUILDING RISK AWARENESS CULTURE

To realize its vision of being “Your Preferred Financial Partner,” Bank Mandiri fosters a risk-awareness culture across all operational and business activities, ensuring potential risks are mitigated to safeguard business continuity. This culture is instilled at all levels, from top management to junior staff. The Board of Directors and Board of Commissioners have established a Risk Appetite Statement (RAS), defining the risk levels the Bank is prepared to tolerate. RAS indicates the Bank’s risk tolerance capacity and is developed to help the Bank achieve its business objectives. RAS informs business decision-making, and its implementation is intensively monitored.

The Bank integrates risk-awareness into product and technology development by adhering to its Risk Management System. Before launching or implementing any product or service, risk assessments and mitigation measures are thoroughly evaluated. This approach is also reflected in the Bank’s internal policies and technical guidelines, ensuring a consistent focus on sustainability.

A strong risk-awareness culture requires the support of the entire organization. Bank Mandiri integrates this risk-awareness into its corporate culture internalization program. The AKHLAK core values, as Bank Mandiri’s foundation, are applied to ensure they become a daily attitude in the

workplace. Every employee is expected to pursue business growth while carefully considering risk. Employees are encouraged to drive sustainable growth with a focus on risk awareness to ensure long-term resilience.

Effective communication strategies play a vital role in building risk-awareness. Bank Mandiri employs a variety of adaptive and sustainable communication channels to reach all employees. These channels are used comprehensively to cultivate a culture of risk-awareness within an open, efficient, and effective risk management framework.

RISK AWARENESS PROGRAM

The foundation of effective risk management lies in building a strong risk culture and fostering continuous learning. To enhance risk awareness culture, particularly on operational risks among employees, Bank Mandiri has introduced flagship programs such as Operational Risk Awareness (OPERA), including Cyber Risk Awareness, Fraud Awareness, Security Awareness, Compliance Awareness, and Business Continuity Awareness. These programs aim to strengthen employees’ understanding and improve the effectiveness of operational risk management across all levels of the organization. These awareness programs are conducted regularly and comprehensively for bank wide, including subsidiaries and overseas branches. The programs are designed with a thematic and adaptive approach, allowing them to address emerging risk trends effectively. This includes responding to heightened existing risks and identifying potential new risks such as Cyber Resilience & Data Security, significant internal and external events, updates on operational risks, global top risks, Control Testing results, and so forth. This proactive approach ensures that Bank Mandiri remains resilient and well-prepared in an evolving risk landscape.

In 2024, alignment initiative on risk awareness program bank-wide was carried out in order for the programs to be delivered to all employees effectively according to regulatory compliance and eventually could minimize the Bank operational loss. This initiative is including standardization of program delivery, media or channel, and audience target.

In general, risk awareness program is divided into two categories based on the dimension of:

BANK RISK MANAGEMENT

To maximize shareholder value, Bank Mandiri implements an integrated risk management approach through the Enterprise Risk Management (ERM) framework. This framework connects strategic planning, risk appetite, execution, risk assessment, and performance evaluation into a cohesive process. The goal is to deliver added value for the Bank and its shareholders while

achieving the objectives outlined in the Corporate Plan. At Bank Mandiri, ERM is applied using a two-pronged approach: managing risks through capital allocation and managing risks through operational activities, as depicted in the following diagram.

In the application of the two-prong approach, there are 4 (four) main components that function as supporting pillars, including:

1. Organization & Human Capital

The Risk Management Unit (SKMR) at Bank Mandiri is responsible for managing all risks faced by Bank Mandiri, including the development of supporting tools required in business and risk management. Moreover, there is a work unit acting as a risk counterpart of every business unit in the four-eye process of lending. Realizing that risk management is the responsibility of all work units at Bank Mandiri, the success of risk management is determined by risk awareness in all Bank Mandiri work units accompanied by adequate technical capabilities. As such, Bank Mandiri always improves the capabilities and knowledge of all employees, particularly in terms of risk management, by organizing regular internal training through the Risk Management Academy or through the use of expatriates in the area of risk management, hence there is a transfer of knowledge to Bank Mandiri employees. Bank Mandiri also regularly holds socialization at least once a year, discussion forums, internships, and programs on risk management that are in line with the internalization of corporate culture.

The Risk Management structure at Bank Mandiri consists of the Risk Management Directorate in charge of Independent Risk Management and Credit Approval Risk units comprising Wholesale Risk and Retail Risk. The Risk Management Directorate is led by the Director of Risk Management assisted by SEVP of Wholesale Risk.

2. Policies and Procedures

The Risk Management Policy (KMNR) is set as the main guidelines on the implementation of risk management at the operational level and the capital management at the Bank covering:

- Prudential Principle, which entails capital adequacy, fulfillment of prevailing laws and regulations, and an early warning system.
- Risk Management, which entails Risk Appetite, Risk Profile, Bank Soundness Rating, Stress Testing, Recovery Plan, and Resolution Plan, as well as Integrated Risk Management.
- Risk Management for each type of risks, which entails processes of risk identification, measurement, oversight, and control.
- Risk Oversight, which entails monitoring of activities/ methodologies of risk management at Bank Mandiri, and the Internal Control System.

This Risk Management Policy is the basis for making procedures and technical guidelines concerning risk management at Bank Mandiri.

3. System & Data

The risk management system is developed to support more efficient business processes so that decision-making is faster yet prudent. To maintain integrity and data quality, Bank Mandiri has adopted an Integrated Processing System and a Loan Origination System to increase the efficiency of credit processes and maintain data quality in the Corporate, Commercial, and Retail segments. To increase collection productivity level particularly in the Consumer and Retail segments, the Bank adopts an Integrated Collection System. Bank Mandiri utilizes Summit System and New Treasury Core System (NTCS) to manage risks in the trading book and Fundamental Review of the Trading Book (FRTB) and Ambit Focus System to manage banking book risks in the activities of treasury and assets & liabilities management.

TYPES OF RISKS AND ITS MITIGATIONS

To assess the Risk Profile and the Soundness Level of Mandiri Group at individual and consolidated/integrated levels, the Bank has adopted a web-based tool called Risk Assessment Consolidation Generator System (RACER) so that the risk assessment processes are more effective, efficient, accurate, and accountable and that the authorized access to the system is maintained.

4. Methods/Model & Analytics

Bank Mandiri has continuously implemented a risk measurement that adheres to international best practices by using quantitative and qualitative methods and developing risk models such as rating, scoring, Value at Risk (VaR), portfolio management, stress testing, and others as support for judgmental decision-making.

Periodically, available models are validated by an independent Unit Model Validator to ensure the quality and validity of such models. These risk models are managed through a model risk management framework inherent in the function of the Model Governance Guiding Unit. The management of model risk is done to ensure control over every component in the model used in business processes and decision-making. This model management framework includes:

a. Model Inventory

Through the model inventory, an inventory of the existing models is carried out at Bank Mandiri. This model inventory includes information related to the model including a description of the model's statistical results, the purpose of using the model, model owner, model developer, model user, validation results, and model-related documentation. In addition, in the model inventory system, we will be able to identify if a model is in a certain model cycle according to the Model Lifecycle, including

model initiation, model development, model validation, model implementation, model use and model monitoring.

b. Model Risk Assessment

An assessment of the level of risk of the models based on quantifiable observations about the materiality and complexity of the models.

c. Model Control

The process of monitoring of models and control over models constitutes a continuous assessment. The control process is done by validating models based on first-time validation or ongoing validation. The first-time validation is validation conducted for the first time after the model development process takes place to ensure that the developed models adhere to academic requirements, best practices, and regulatory requirements. The ongoing validation is validation conducted periodically to ensure the performance of models.

With the adoption of the model management framework, there is a segregation of duties between the first line (model owner, model developer, and model user), the second line (model validator and model management guiding unit), and the third line (Internal Audit) based on three-line models.

Bank Mandiri also continues to implement Basel II, III, and ERM in compliance with the Financial Services Authority and the BCBS (Basel Committee on Banking Supervision) as well as the best practices, which cover Credit Risk, Market Risk, Liquidity Risk, Interest Rate Risk on Banking Book Position, Operational Risk, Capital Management, and Internal Capital Adequacy Assessment Process (ICAAP), as well as Stress Testing and Recovery Plan.

Bank Mandiri manages 10 (ten) types of risks in an integrated manner:

1. Credit Risk
2. Market Risk
3. Liquidity Risk
4. Operational Risk
5. Legal Risk
6. Reputation Risk
7. Strategic Risk
8. Compliance Risk
9. Intra-Group Transaction Risk
10. Insurance Risk

CREDIT RISK MANAGEMENT

Bank Mandiri manages and mitigates credit risk at every stage of the lending process. In the Wholesale segment, the credit risk management process begins with determining the target market, guided by the Loan Portfolio Guideline. This guideline classifies industrial sectors into categories (attractive, neutral, selective, restrictive) based on sector outlook and portfolio quality. Industry Limits are also established to minimize credit risk concentration in specific sectors.

To identify qualified pipelines, a pre-approval process is conducted using credit risk tools. This involves a Clearance process that includes an initial analysis of potential customers based on their reputation, business operations, and financial condition. A credit risk assessment is then performed, by taking into account factors such as ratings, financial conditions, analysis, and borrower potential, etc. The final decision is made by

the Credit Approval Authority, following the four-eyes principle, which involves independent evaluations by the Business Unit and Credit Risk Management Unit.

Following the credit disbursement process, regular monitoring using early warning signals is carried out to detect potential non-performing borrowers, enabling the Bank to prepare appropriate action plans, including collection, recovery, and restructuring efforts.

For the Retail segment, which targets the mass market, credit processes are more automated. A credit risk scorecard, aligned with the Risk Acceptance Criteria of each product, processes loans through an automated workflow system (Loan Factory). Monitoring is performed at the portfolio level through Portfolio Quality Reviews, followed by collection and recovery process for non-performing portfolios.

To anticipate macroeconomic uncertainties, a what-if analysis of wholesale and retail portfolios is carried out through a process of stress testing and sensitivity analysis using certain macroeconomic scenarios.

In all lending activities, Bank Mandiri prioritizes prudence by employing credit analysis through independent business units and credit risk units. Credit management is governed by the Credit Policy (KPKD), operationalized through Credit

Standard Procedures (SPK) and Product Manuals, ensuring an end-to-end risk management process.

At the borrower level, credit concentration risk is managed by monitoring the Legal Lending Limit (LLL), and the application of Management Limits for large business groups. In general, credit processes and risk management are carried out end-to-end and integrated across the Business Unit, Credit Operation Unit, and Credit Risk Management Unit.

The Bank regularly reviews and updates its credit policies in general, credit for segment-specific procedures, and risk management tools. These guidelines provide comprehensive credit risk management instructions for identifying, measuring, and mitigating credit risk in the end-to-end credit process starting from determining the target market, credit analysis, approval, documentation, credit withdrawal, monitoring/supervision, to the process of resolving/restructuring non-performing loans.

To enhance its social role and commitment to addressing environmental risks, Bank Mandiri has embedded Environmental, Social, and Governance (ESG) considerations into its Industry Acceptance Criteria Technical Guidelines. These guidelines are used to evaluate and select prospective debtors who meet

TYPES OF RISKS AND ITS MITIGATIONS

qualification standards and have implemented ESG principles in their business operations. This initiative aligns with Financial Services Authority Regulation No. 40/POJK.03/2019 on Asset Quality Assessment for Commercial Banks, which mandates that the evaluation of a debtor's business prospects must include their efforts in environmental preservation. Furthermore, Bank Mandiri has developed a Sustainable Finance Action Plan to strengthen its environmental stewardship. This plan is in accordance with the Financial Services Authority Regulation on the Implementation of Sustainable Finance for Financial Service Institutions, Issuers, and Public Companies, reaffirming the Bank's commitment to fostering sustainability and responsible governance practices.

In principle, credit risk management at Bank Mandiri is implemented both at the transactional and portfolio levels. At the transactional level, the Bank applies a four-eyes principle, ensuring that every credit approval involves independent evaluations by the Business Unit and the Credit Risk Management Unit to achieve objective decision-making. This process is executed through the Credit Committee, adhering to the established authority limits, with credit approvals determined through the Credit Committee Meeting mechanism.

Credit risks from borrowers and products are accounted for through impairment loss provisions under PSAK 71, effective since 1 January 2020. These provisions are monitored through the cost of credit indicator.

MARKET RISK MANAGEMENT

Market risk management at Bank Mandiri is conducted by an independent unit following the principle of segregation of duties, ensuring a clear separation of functions and responsibilities among the front office, middle office, and back office. The Market Risk Management Organization is divided into two sections; Market Risk Management – Trading Book, and Market Risk Management – Banking Book.

The framework for and governance of market risk management at Bank Mandiri consist of:

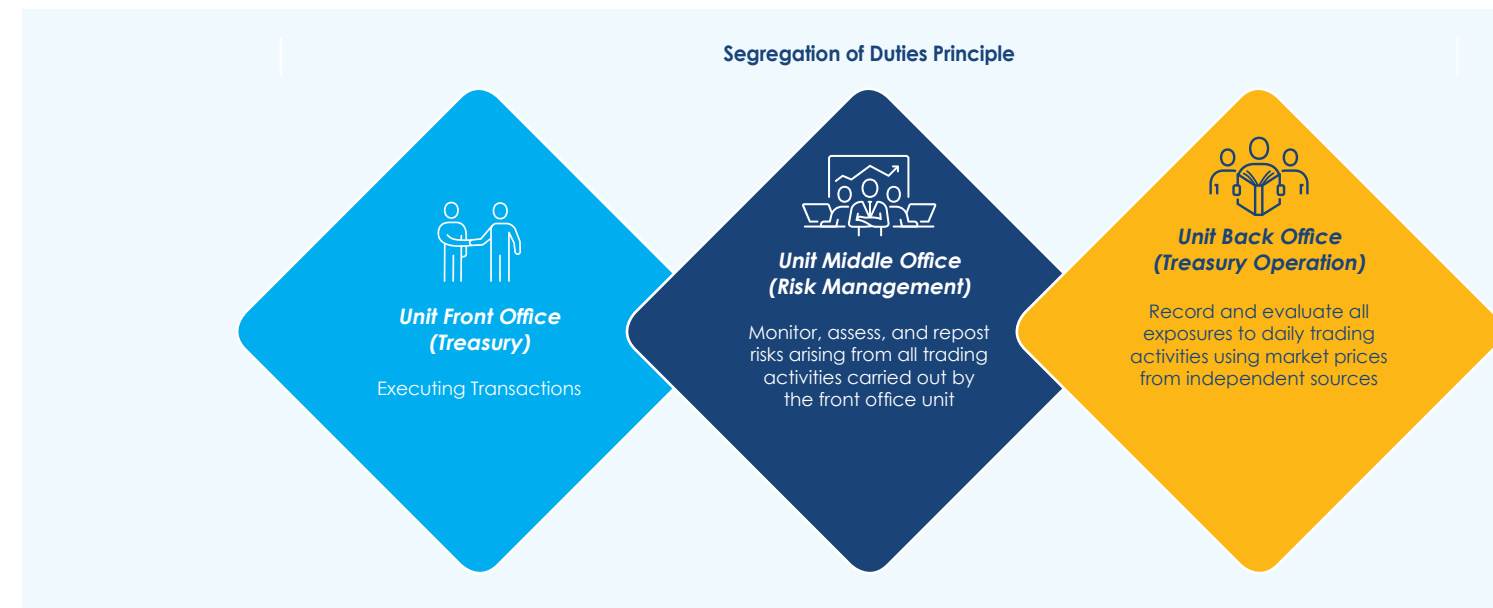

1. The Board of Commissioners, who are responsible for market risk oversight through the Risk Monitoring Committee, Integrated Governance Committee, and Audit Committee.
2. Directors, who are responsible for the risk policy function through the Executive Committee with respect to market risk management and recovery plan, the Assets & Liabilities Management Committee, Risk Management Committee.
3. Risk Management Unit together with the business units and compliance unit, who perform risk identification, risk calculation, risk monitoring, and risk control.

Bank Mandiri's Risk Management Framework is designed by considering both internal and external factors, including but not limited to the Bank's business dynamics, regulatory requirements, advancements in methodologies and best practices, as well as risk data. The authority and responsibilities for implementing risk management are defined in the Risk Management Policy (RMP). Specific guidelines for managing market risk in the trading book and banking book portfolios are detailed in the Standard Procedure of Treasury (SPT) and Standard Asset & Liability Procedure Management (SP ALM).

TYPES OF RISKS AND ITS MITIGATIONS

Management and Mechanism of Market Risk Measurement – Trading Book

Trading book market risk refers to the risk arising from potential losses due to activities involving trading book instruments, encompassing interest rate risk, credit spread risk, equity risk, and exchange rate risk, which can impact the Bank's profitability. Bank Mandiri manages market risk by adhering to the principle of segregation of duties, ensuring a clear separation of functions and responsibilities in treasury unit trade transactions, which consist of:

The measurement of trading book risk is conducted in accordance with regulatory requirements and several internal indicators, including Value at Risk (VaR), sensitivity simulations, and stress testing. Risk monitoring is carried out by applying various types of limits on treasury activities. These limits are set in a tiered manner, from the dealer level to the bank-wide level, to ensure that trading exposure remains consistent with the risk appetite established by management.

Management and Mechanism of Market Risk Measurement – Banking Book

Banking book market risk refers to the risk arising from changes in interest rates and exchange rates related to banking book activities, which can impact the Bank's profitability (earnings perspective) and the economic value of its capital (economic value perspective). Bank Mandiri manages this risk by optimizing its balance sheet structure to achieve maximum returns within an acceptable risk level. Management also involves setting limits aligned with internal policies and prevailing laws and regulations, which are periodically monitored by the relevant work units.

TYPES OF RISKS AND ITS MITIGATIONS

LIQUIDITY RISK MANAGEMENT

Liquidity risk arises from the Bank's inability to meet its due obligations through cash flow financing and/or high-quality liquid collateral assets without causing disruption to the Bank's operations and financial condition.

Liquidity risk can be divided into two categories:

1. Funding Liquidity Risk, which is a risk caused by the Bank's inability to liquidate its assets or secure funding from other sources. The inability to secure cash flow financing that causes liquidity risk can be explained by (1) the Bank's inability to generate cash flow from productive assets or asset liquidation including liquid assets; and/or (2) the Bank's inability to generate cash flow from funding, interbank transactions, and received loans.
2. Market Liquidity Risk, which is a risk caused by the Bank's inability to close out certain positions at a market price due to inadequate market liquidity conditions or disruptions in the market.

Liquidity Risk Management is carried out in the following 4 (four) stages:

1. Identification, to determine risk and sources of liquidity risk and the problems it poses so that it may be controlled and mitigated. The identification of liquidity risk can be conducted by identifying balance sheet components and administrative account components that may affect the Bank's liquidity and identifying market parameters such as crises and other things.

2. Measurement, to measure liquidity risk, which is done using 2 (two) approaches, namely (1) Nominal Stock-Based (Liquidity Ratio) which entails the use of various financial ratios as an indicator of the level of liquidity risk and (2) Flow-Based (Liquidity Gap Analysis).
3. Monitoring, which is conducted using a limit system to monitor the indicators of liquidity risk.
4. Control, which is an activity that aims to minimize the impact of liquidity risk by considering the level of income earned.

Tools and Method

Bank Mandiri manages liquidity risk by measuring the liquidity risk using some indicators, such as primary reserve ratio (minimum statutory reserves and Cash ratio), secondary reserve (liquidity reserves), Macroprudential Intermediation Ratio (MIR), Liquidity Coverage Ratio (LCR), and Net Stable Funding Ratio (NSFR).

To manage liquidity risk in a measured and comprehensive manner, Bank Mandiri implements the following strategies:

1. Determine limits that refer to internal provisions and regulatory provisions.
2. Perform periodic liquidity risk stress testing to determine the impact of changes in market factors and internal factors in extreme conditions (crises) on liquidity conditions.
3. Arrange and conduct a periodic review of the Liquidity Contingency Plan (LCP) and Recovery Plan that regulate the Company's procedure for handling worsening liquidity conditions including alternative financing strategies such as sale/purchase of FX, Money Market instruments, and Interbank Securities Repo, Government Bond sale, and the use of Standing Facility and repo of the Bank Indonesia. The determination of liquidity conditions and financing strategies in the LCP and Recovery Plan has considered internal and external conditions.

4. Monitor external indicators such as Jakarta Interbank Offered Rate (JIBOR), USD Interbank, Rupiah interest rate, yield from SUN and UST with a 10-year tenor, Outstanding IDR banking liquidity, USD/IDR exchange rate, credit spread of default swaps (CDS), Composite Stock Price Index (CSPI), as well as current market information. This monitoring aims to increase awareness of less stable economic conditions, either due to a global crisis or various domestic issues.

Liquidity Adequacy Ratio

Bank Mandiri's liquidity adequacy can be identified through Liquidity Coverage Ratio, Net Stable Funding Ratio, Macroprudential Intermediation Ratio (MIR), and Liquidity Reserves. The Liquidity Coverage Ratio (LCR) is a ratio of High-Quality Liquid Assets (HQLA) to the estimated net cash outflow within the next 30 (thirty) days in a crisis scenario. The LCR aims to improve the short-term liquidity of a bank during a crisis. In December 2024, Bank Mandiri's LCR reached 139.21% (Bank Only) and 140.64% (consolidated), above the minimum LCR fulfillment target set by the Regulator which was 100%.

Another indicator used by Bank Mandiri to determine liquidity adequacy is the Net Stable Funding Ratio (NSFR). The Net Stable Funding Ratio (NSFR) is a ratio of available stable funding to required stable funding. As of December 2023, Bank Mandiri's NSFR reached 107.60% (Bank Only) and 109.18% (consolidated), above the minimum NSFR fulfillment target set by the Regulator which was 100%.

The Macroprudential Intermediation Ratio (MIR) is a ratio of distributed credit and corporate commercial paper fulfilling certain requirements and are owned by the Bank to third-party funds, commercial paper fulfilling certain requirements issued by the Bank, and loans fulfilling certain requirements received by the Bank. As of December 2024, Bank Mandiri's RIM (Bank Only) reached 94.83%.

TYPES OF RISKS AND ITS MITIGATIONS

In addition, Bank Mandiri has liquidity reserves, which serve as a liquid asset above minimum statutory reserves that are used to meet unscheduled liquidity needs. In managing its liquidity reserves, Bank Mandiri sets a limitation in the form of safety level, which is a projection of liquidity reserves for the next 1 (one) month. As of December 2024, the Bank's liquidity reserves were above the safety level.

RISK OPERATIONAL MANAGEMENT

Operational risk arises from inadequacies and/or failures in internal processes, human errors, system malfunctions, and/or external events that impact the Bank's operations, including risks related to cyber security. Operational risks can lead the emergence of other risks, such as reputational risk, strategic risk, legal risk, market risk, credit risk, compliance risk, and liquidity risk. Effective and consistent management of operational risk is crucial to minimizing the likelihood of these interconnected risks.

Operational risks are inherent in every product, activity, and operational process of the Bank as part of its business activities. These risks are also the responsibility of every individual within the Bank. The Risk & Control Owner holds the primary responsibility for implementing optimal operational risk management to minimize these risks.

TYPES OF RISKS AND ITS MITIGATIONS

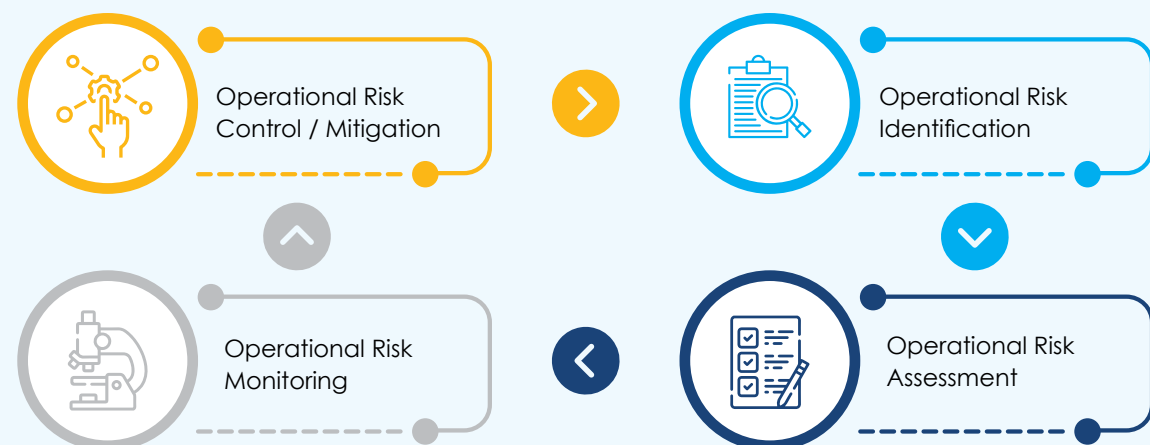

In developing an Operational Risk Management Strategy, the Bank applies the following principles:

1. Long-term oriented to ensure the Bank's business continuity, by maintaining the Bank's risk exposure managed in a controlled manner in accordance with the Bank's internal regulations, as well as prevailing laws and regulations and other stipulations.
2. Comprehensive and extensive in all parts of the Bank, and remains focused on material and or significant risks and the most effective mitigation processes.
3. Proactive in identifying and detecting potential control weaknesses and the occurrence of risks hence risks can always be minimized.
4. Comply with the provisions for the fulfillment of capital adequacy operational risks in accordance with regulations and the development of risks appetite.

Operational risk management is implemented through a layered lines-of-defense model, where each line of defense has distinct roles and approaches to addressing operational risks. This framework is based on the principle of combined assurance, ensuring that a balance between risk & reward is also achieved.

The Risk & Control Owner is fully responsible for managing risks and implementing daily internal controls to ensure that existing risks are mitigated. This includes continuously improving control designs to align with changes in processes.

To ensure effective operational risk management, the process is carried out in four stages:

1. Identification, a process to identify potential inherent risks to a product/activity/process, taking into account internal and external factors, such as data of operational risk incidents, regulatory changes, and audit findings. This stage includes identifying risk mitigation and control measures.

TYPES OF RISKS AND ITS MITIGATIONS

2. Assessment, which is the process of evaluating by considering the potential impact and likelihood of a risk can inherently occur. This aims to find out which risks are more material/significant compared to others to ensure more focused control measures can be prepared. In addition, an assessment is also carried out on quantitative control through control testing activities to determine whether the control design regulated in the prevailing regulations at the bank has been effectively implemented (operating effectiveness) and or can still be effectively used (design effectiveness). The assessment produces a residual risk value which is the risk value after considering the controls.
3. Monitoring, a proses to monitor risks that have been identified and assessed for their likelihood. Risk monitoring is carried out at all times in every work unit and by its members. The activity follows a hierarchy and is done collectively, including by the unit's head, adhering to the applicable procedures. Monitoring activities include the early warning systems in existing tools/reporting.
4. Risk Control/Mitigation, which is a process to control and mitigate before a risk event occurs through the implementation of adequate and consistent control procedures, as well as implementing follow-up actions plans on control weaknesses found (thereby potential risks occur) in the monitoring process and follow-up on incidents. The purpose of this process is to ensure that residual risk to the Bank is kept to a minimum. Controls must be consistently implemented according to existing control designs but must also be continuously reviewed to ensure existing control designs are still effective for mitigation of emerging risks.

Operational Risk Management Tools

To enable work units in implementing operational risk management, the Bank provides the following risk management tools:

1. Risk & Control Self-Assessment (RCSA)
RCSA is a register of key risks and control measures that inform risk-based control testing to identify potential weaknesses as early on as possible. The tool allows its user to maintain minimum level of residual risks and to take necessary mitigation measures.
2. Loss Event Database (LED)
A database of operational risk incidents that are recorded on a risk-based approach with the aim of being lesson learned, monitoring follow-up remediation and future improvements, and as one of the components of the calculation of operational risk capital (regulatory capital charge) of the Standardized Approach (SA) method.
3. Key Indicator (KI)
KI contains key risk indicators (KRIs) and Key Control Indicators (KCI) and serves as an early warning signal that encourages early control actions to be undertaken.
4. Issue & Action Management (IAM)
IAM is a tool to monitor if known issues are follow-up using a range of activities, such as control testing, incidents, key indicators, and self-identified issues.
5. Capital Modelling
A tool to calculate regulatory capital charge in accordance to applicable regulations and as part of operational risk mitigation.

TYPES OF RISKS AND ITS MITIGATIONS

To improve its operational risk management effectiveness, the Bank has developed an integrated Operational Risk Management System that covers all of the tools above. The system is also implemented in all work units at the head office and regions.

The output of operational risk management activities is an Operational Risk Profile Report that describes operational risk exposure. The report is submitted periodically to the Bank's Board of Commissioners and Board of Directors, and supports the boards' active role in operational risk management. The report also informs the Bank's risk management report to regulators as part of Risk-Based Bank Rating (RBBR) in accordance with applicable provisions.

Operational Risk Management Organization

Operational risk management is carried out by all of the Bank's elements, including the Board of Directors with active supervision from the Board of Commissioners. The Boards understand existing risks and have a key role in supporting and overseeing risk management activities at the operational unit level.

The operational risk management organization and their duties and responsibilities are:

1. Risk Management Committee (RMC). RMC leads the preparation, adjustment/ improvement of risk management. RMC's membership, duties, and authority are stipulated in a Board of Directors' Decision on RMC.
2. Risk & Control Owner. A unit that is fully responsible for operational risk management and ensuring the effectiveness and compliance of control measures in every operational activity. A Risk & Control Owner maintains the Bank's operational risk appetite at a level that has been identified, thereby allowing the Bank to achieve its goals and keep an optimal level of regulatory capital charge.

3. Operational Risk Management Unit (Senior Operational Risk by Business Area). A unit (attached to a business area) that is responsible for implementing operational risk management policies, strategies, frameworks and tools in collaboration with the Risk & Control Owner.
4. Work Unit on Operational Risk Management Development (Bankwide/Enterprise). A unit that is responsible to formulate and disseminate policies, strategies, frameworks, and operational risk management tools.
5. Internal Audit Unit. This unit carries out independent assurance function to ensure that all operational defense lines are functioning effectively and properly.

LEGAL RISK MANAGEMENT

Legal risk is a type of risk faced by Bank Mandiri as a result of lawsuits and/or legal claims, whether initiated by internal or external parties, and/or the identification of legal weaknesses such as the absence of supportive regulations, flaws in agreements such as the failure to meet the requirements for a valid contract, or imperfect collateral binding.

The management of legal risk is handled by the Legal unit at the Head Office, which is responsible for regulatory, advisory, litigation, advocacy, and legal assistance functions, as well as coordination and supervision, legal education and transformation, and legal risk management for the Bank. In carrying out these functions, duties, and responsibilities, the Legal unit at the Head Office coordinates with the Legal units in work units and regional offices. The Head Office Legal unit acts as the system supervisor and provides guidance to the Legal units in work units and regions.

The risk management mechanism, encompassing the processes of identification, measurement, monitoring, and control, adheres to the applicable risk management regulations. Each work unit responsible for products and/or activities is required to identify and manage risks comprehensively, including but not limited to legal risks, which are inherently present in every product or activity created or carried out by the company. This is to ensure that legal risks do not have widespread impacts or trigger other risks, such as reputational risks.

The legal risk management efforts implemented by Bank Mandiri, both preventive and corrective, are deemed sufficient to protect the Bank's legal interests and minimize significant financial impacts. This is reflected in the 2024 Legal Risk Profile Report, which achieved a "Low" risk rating.

REPUTATIONAL RISK MANAGEMENT

Reputational risk arises from a decline in the level of stakeholder trust caused by negative sentiments surrounding the Bank.

Reputational risk is managed through monitoring, supervision, handling, and resolution efforts coordinated by the Corporate Secretary, with support from relevant work units, including Customer Care, Legal, Retail Product & Fraud Risk Management, IT Application Development & IT Application Support, and Business Continuity Management. Reputational risk management adheres to internal policies and applicable laws and regulations.

To mitigate this risk, the Bank actively builds a positive image through conventional media and by producing positive content on social media platforms.

The Mechanism for Managing Reputational Risk

Reputational risk is managed through monitoring, supervision, handling, and resolution mechanisms coordinated by the Corporate Secretary Group, in accordance with the Corporate Secretary Standard Guidelines. Based on these guidelines, there are four stages of reputational risk management: identification, measurement, monitoring, and control. These stages are reflected in each Corporate Secretary activity with potential reputational risk, such as the Bank's activities as a publicly listed company.

In such activities, reputational risks can be identified, such as delays, errors, or inconsistencies in reporting. These may stem from factors such as individuals lacking knowledge or understanding of disclosure obligations or insufficient supervision and review by supervisors. To control these risks, Bank Mandiri implements mitigation measures, such as maintaining a checklist of disclosure obligations and ensuring supervisors carry out thorough checks and reviews.

Should reputational risk incidents occur and result in negative perceptions of the Bank, mitigation activities can be carried out to reduce the impact. One method involves publishing positive articles in print, online, and electronic media, as well as sharing positive content on social media to neutralize the negative perceptions. These positive articles may highlight the Company's business and social activities or its support for government programs, in compliance with the Corporate Secretary Standard Guidelines.

TYPES OF RISKS AND ITS MITIGATIONS

Implementation of Reputational Risk Management Policy

As part of the implementation of the reputational risk management policy, the Company ensures that all work units perform their respective functions effectively and in compliance with applicable regulations. In cases where an incident with reputational risk implications occurs related to the duties and functions of a specific work unit, that unit is required to provide detailed information to the Corporate Secretary Group immediately. This enables prompt management of the incident to minimize its impact.

To address customer complaints and inquiries, Bank Mandiri currently maintains internal channels, including branch offices, the Call Center at 14000, its official website, and social media accounts. All complaints and inquiries are forwarded to the Customer Care Group for handling and resolution. In addition to internal channels, the Customer Care Group also manages complaints from external sources, such as print, online, electronic media, and social media.

In executing these duties, the Customer Care Group coordinates with the Corporate Secretary Group, particularly in handling customer complaints reported in conventional media and social media.

Monitoring and Evaluation

The Corporate Secretary Group conducts periodic monitoring and evaluation of media coverage in print, online, electronic media, and social media to measure the effectiveness of the company's publication and communication activities. The results of this monitoring and evaluation serve as the basis for planning future publication and communication activities, with the goal of continuously strengthening the Bank's reputation.

Communication Support for Government Programs

The Corporate Secretary Group continues to serve an active role in supporting the government's strategic programs through various integrated communication activities. One of its key efforts is collaborating with the Ministry of SOEs in developing publications using an agenda-setting approach. This initiative aims to ensure that the corporation's strategic messages align with the government's communication priorities while enhancing synergy between institutions in delivering relevant information to the public.

In addition, the Corporate Secretary Group supports government programs through international publications. This is achieved by highlighting the SOEs' contributions information on the global stage, strengthening the position of Indonesian SOEs as key entities at the international level, and enhancing the nation's positive image worldwide.

Furthermore, the Corporate Secretary Group conducts financial literacy campaigns and raises awareness on financial services through various media, such as social media, YouTube, official WhatsApp platforms, and so forth. These efforts are undertaken to convey messages regarding financial inclusion, including awareness and caution in transactions. Bank Mandiri also collaborates with public figures and influencers to ensure the messages resonate more effectively with a broader audience or specific segments of the population.

Crisis Management

In the event of a massive reputation crisis with significant impact on stakeholder trust, the Company will promptly implement immediate action plans to minimize the effects of the crisis. These actions include preparing issue management strategies, appointing internal spokespersons, scheduling crisis response activities, and conducting an overall evaluation.

STRATEGIC RISK MANAGEMENT

Strategic Risk Management Organization

The Bank has established a Risk Management Committee and a Risk Management Unit that aim to support comprehensive, integrated, measurable, and controlled risk management. Each committee is supported by a working group consisting of groups directly related to the risk issues within the scope of the respective committee.

Strategic Risk Management Mechanism

The Bank's risk management is governed by a risk management policy developed in alignment with Bank Indonesia Regulations (PBI), Financial Services Authority Regulations (POJK), Basel standards, and international best practices. This policy is regularly reviewed to anticipate changes in business conditions, regulations, and the Bank's internal environment.

In managing strategic risks, Bank Mandiri consistently reviews performance and evaluates policies for setting business targets. The Bank also takes corrective actions to refine its strategic planning and business targets, considering internal and external conditions when necessary.

The Implementation of Strategic Risk Management

Bank Mandiri's strategic direction aligns with its Corporate Plan, which is designed by taking into account the Bank's core competencies and the shifting business patterns and consumer behavior toward digital platforms. Amid economic uncertainties, Bank Mandiri also emphasizes the importance of profitability and credit quality to mitigate future risks. As such, in addition to implementing initiatives outlined in the Corporate Plan, Bank Mandiri sharpens its business strategy by focusing on:

1. Focus on driving and implementing sustainable growth strategies, accompanied by optimal cost-efficiency programs, to enhance profitability growth.
2. Ensure the achievement of leading indicators for both revenue and cost across all financial metrics.
3. Prioritize maintaining and increasing a sustainable CASA Ratio to support loan growth.

Measures and Plans in Anticipating Strategic Risk

In anticipating the risk factors faced by Bank Mandiri, it is essential to implement independent and prudent risk management without hindering the Company's business expansion processes. The following outlines the strategic risk management strategies for 2024:

1. Conduct liquidity management by adjusting deposit and loan interest rates to maintain a healthy Net Interest Margin (NIM). Additionally, the Bank can diversify funding sources by reducing reliance on high-cost funds, exploring alternative, more affordable funding sources, and reviewing counter rates and special rates (retail deposits) in the small business, micro, and consumer (individual) segments.
2. Perform credit assessments that focus on industrial sectors demonstrating positive and sustainable growth while considering internal capabilities and resources in accordance with Bank Mandiri's Risk Acceptance Criteria to minimize default risks. Additionally, maintain adequate provisioning to anticipate potential credit losses.
3. In line with the industry's digitalization trend, Bank Mandiri's Corporate Plan 2020–2024 includes a focus on digitalization, aiming to become Indonesia's #1 Modern Digital Bank and ensuring the progress of IT projects aligns with the established timeline.

TYPES OF RISKS AND ITS MITIGATIONS

4. The Bank focuses on maintaining and sustainably increasing the CASA Ratio and CASA volume to support credit expansion by:
 - a. Optimizing the use of Kopra by Mandiri through main operating account strategies (Kopra Portal and Kopra H2H) to capture the entire customer transaction ecosystem.
 - b. Managing the realization of the Cost of Fund (CoF) by balancing liquidity, supporting demand deposit growth through transactional solutions for business and corporate clients, and increasing savings market share using Livin' as an everyday financial app.

6. Enhance access to capital and financial markets to secure additional funding, either in the form of equity or debt (subordinated debt).

COMPLIANCE RISK MANAGEMENT

Compliance risk arises from the Bank's failure to adhere to and/or implement the provisions of prevailing laws and regulations.

To manage compliance risk, Bank Mandiri has established policies, guidelines, systems, and procedures to foster a compliance culture. This culture serves as a key factor in the successful implementation of compliance risk management, both individually and on a consolidated basis, as well as in an integrated framework within the Financial Conglomerate.

Compliance Risk Management Mechanism

Bank Mandiri has established compliance risk management policies and procedures based on the applicable rules and regulations, where the risk is managed in several stages:

1. Identification
Identification of compliance risk is articulated in the Compliance Risk Statement (CRS). CRS entails reference of regulations, risk cause, risk control, and action plans for prevention purpose.
2. Evaluation
All identified risks are assessed by each risk owner. The output of assessment is a compliance risk profile for every work unit. Risk assessment is carried out based on the risk's occurrence likelihood and its potential impacts. Risk owners also assess the effectiveness of control measures.
3. Monitoring
Risk monitoring is part of an adequate compliance risk management. Monitoring activities include identifying and overseeing compliance risk appetite statement (RAS).
4. Mitigation
Compliance risk mitigation is carried out by:
 - a. Reviewing risk identification process to ensure the process has been carried out appropriately.
 - b. Reviewing the appropriateness of control and mitigation activities.
 - c. Reviewing the appropriateness of compliance risk assessment process, including that the process has considered historical sanction data.

TYPES OF RISKS AND ITS MITIGATIONS

Compliance Risk Management Implementation

Compliance risk management activities in 2024 were as follows:

1. Defining Risk Appetite Statement (RAS)
In 2024, Bank Mandiri defined its compliance Risk Appetite Statement (RAS) at 4 (four) violations per month. Throughout the year, the Bank received 2 (two) sanction per month, which was well below the RAS threshold.
2. Compliance Risk Assessment
Compliance risk assessment is carried out on a quarterly and semi-annual basis and submitted to the OJK as part of the Bank's Risk Profile Report. According to the self-assessment conducted in Quarter IV 2024, the Bank's compliance risk level was 2 (low to moderate). Several issues of concern for improvement were employees' compliance risk awareness, data quality, and monitoring of report submission to regulators.
3. Compliance Risk Mitigation
To mitigate compliance risk, the Bank has implemented several compliance programs:
 - a. Monitoring the Fulfillment of the Banks' Obligations on New Regulations
The Compliance Unit conducts Prudential Meetings on new regulations, monitors action plans that need to be carried out, and issues reminders on regulatory obligations to the relevant Units.
 - b. Control Testing Against High-Risk Activities
Control testing is carried out by the Senior Operational Risk Unit on high-risk activities. Where discrepancy with applicable regulations is identified, immediate actions are taken to prevent the Bank from suffering any losses.

TYPES OF RISKS AND ITS MITIGATIONS

- c. Compliance Assessment Program
This program aims to increase compliance risk awareness of the risk owners on applicable compliance and regulation risks (according to their duties and responsibilities).
- d. Compliance Unit Competency Improvement Program
To increase understanding related to compliance risk management, the Company partners with an independent party to organize compliance training and certification for all Compliance Unit personnel.

of laws and regulations, or other policies or the results of legal analysis to the Bank's management and employees.

- b. Monitoring the work units' action plans relating to new regulations that have significant impacts.
- 4. Competency Building for Compliance Unit
To improve the quality of personnel in Compliance Unit, the Bank collaborates with independent parties to organize training and certification of compliance.

INTRA-GROUP TRANSACTION RISK MANAGEMENT

The management of Intra-Group Transaction Risk is carried out with Subsidiaries within Bank Mandiri's business group in alignment with the Bank's overall business strategy. This process aims to ensure that intra-group transactions are conducted responsibly and do not adversely affect the Bank's performance or the financial stability of its Subsidiaries.

Bank Mandiri identifies and analyzes activities that may increase exposure to Intra-Group Transaction Risk, particularly those that could influence operational, financial, and reputational performance. The identification process includes assessing the business activities of both Bank Mandiri and its Subsidiaries, with particular attention to the complexity and interconnectedness of transactions.

To effectively measure Intra-Group Transaction Risk, the Bank employs a combination of qualitative and quantitative approaches. This includes scenario analyses, risk exposure evaluations, and financial impact modeling. Regular monitoring is conducted to ensure ongoing compliance with established risk management policies and procedures.

Measures and Plans to Anticipate Compliance Risk

To improve compliance risk management, the following measures are taken:

1. Compliance Risk Management
 - a. Define compliance Risk Appetite Statement (RAS) and monitor sanctions/finances to ensure the appetite that has been set out are under control.

TYPES OF RISKS AND ITS MITIGATIONS

INSURANCE RISK MANAGEMENT

Insurance risk arises from the inability of an insurance company to meet its obligations to policyholders due to inadequacies in underwriting, pricing, reinsurance usage, or claims handling.

Bank Mandiri manages this risk through its subsidiaries engaged in the insurance business, namely AXA Mandiri Financial Services and Mandiri Inhealth. But Mandiri Inhealth has no longer been a member of Mandiri Group Financial Conglomerates since 9 October 2024.

Bank Mandiri identifies and analyzes activities that may increase insurance risk exposure and impact the performance of the Bank. This risk identification process is tailored to the specific characteristics of the Subsidiaries' insurance business activities. To measure insurance risk, Bank Mandiri employs a combination of qualitative and quantitative approaches. These measurements are followed by periodic risk monitoring to ensure alignment with established procedures.

The assessment of the Integrated Insurance Risk Profile throughout 2024 was at Low to Moderate level. This reflects low potential loss faced by Financial Conglomerates due to Integrated Insurance Risk at a certain time in the future. The quality of the implementation of the Integrated Management of Insurance Risk is adequate, there are some weaknesses but these weaknesses can be resolved in the normal course of business.

ESG RISK MANAGEMENT COVERAGE

Alignment of ESG aspects is also one of Bank Mandiri's priorities in long-term business transformation. Through the stream "Conduct Sustainable Business", Bank Mandiri has developed ESG frameworks, roadmaps and initiatives with a target focus on the transition to a low-carbon economy, emission reduction and net zero in bank operations and increasing social impact in achieving SDGs targets.

To achieve this target, particularly in fostering the transition to a low-carbon economy, Bank Mandiri continues to identify, measure and evaluate ESG risks including climate risks, specifically in the financing aspect.

The ESG risk management system in the loan process includes Bank Mandiri's loan services for the wholesale and retail segments. Bank Mandiri establishes and implements Environmental and Social Risk Management (ESRM).

This is in line with the efforts made by the Financial Services Authority (OJK) regarding the Asset Quality Assessment of Commercial Banks, which regulates the assessment of the debtor's business prospects is also associated with the debtor's efforts in maintaining the environment.

ESG Risk Management System

ESG risk assessment on loan is carried out at each stage of loan disbursement end-to-end and integrated by the Business Unit, Credit Operation Unit and Credit Risk Management Unit. Each Business Unit conducts an assessment based on the Loan Portfolio Guideline then carries out a pre-approval process using credit risk tools including the application of ESG aspects, for the wholesale segment, the assessment is stipulated in the Industry Acceptance Criteria (IAC), while for the retail segment, the assessment is carried out through a credit risk scorecard, with reference to the Risk Acceptance Criteria of each product.

Bank Mandiri establishes risk appetite and industry appetite in line with ESG issues in the Bank's policies as outlined in the Industry Acceptance Criteria (IAC) technical guidelines in Internal Regulation

No.B3.P1.T16.IAC. Details of businesses covered is presented in the Environmentally Friendly Financing Policy section of this report and in full in the Sustainability Report.

The Bank periodically reviews and refines general credit policies, credit procedures per business segment and risk management tools, particularly sectors with high ESG and climate risks. Each Business Unit conducts a more detailed and in-depth assessment of each business activity to determine related ESG requirements in IAC and RAC, including based on input and involvement from regulators and resource persons.

Bank Mandiri has an early warning system through the initiation of the ALERT Forum, engaging the Business Unit and Risk Management Unit. The ALERT Forum functions to identify and monitor risks that could affect credit quality, including risks related to ESG aspects, financial performance, and industry prospects. In addition, this forum serves a role in evaluating the implementation of ESG practices by debtors, assessing business sustainability, and monitoring mitigation measures for the impacts of climate change.

ESG Risk Surveillance

The ESG Risk Management framework and governance at Bank Mandiri involves the active role of the Board of Commissioners and the Board of Directors. The Board of Directors monitors the implementation and fulfillment of ESG targets through the Risk Management Committee (RMC) forum, in accordance with the duties & authorities stipulated in the Decree of the Board of Directors of PT Bank Mandiri (Persero) Tbk, No. KEP. DIR/028/2024 on Risk Management Committee (RMC), held quarterly with the topic of Sustainable Finance Action Plan (RAKB) performance, ESG trends, to discussion of critical issues in ESG aspects.

Furthermore, the Board of Commissioners supervises ESG implementation, fulfillment of ESG targets or commitments through the Risk Monitoring Committee (KPR) forum, which is with topics such as reviewing the effectiveness of ESG-related risk management and supervision in financing activities.

Bank Mandiri monitors compliance in lending related to ESG aspects in accordance with bank policy, with the following measures:

1. Periodically monitor the fulfillment of ESG requirements. Bank Mandiri reviews regularly to ensure that the progress of customer projects is in accordance with the action plan that has been set. To ensure compliance with lending policies and procedures, Bank Mandiri also conducts periodic reviews and audits. For debtors who have not been able to meet these minimum requirements, there will be a periodic monitoring mechanism, determination of action plans and schedules needed.
2. Implement the ALERT system (watchlist) as an early warning system to identify risks that can affect the debtor's credit quality to ensure that preventive actions can be taken immediately to prevent credit quality deterioration based on financial performance, industry prospects, and fulfillment of ESG requirements.
3. Conduct an annual review as a form of check and balance of compliance with the latest internal credit policy requirements, including ESG requirements.

CLIMATE RISKS

Climate risk is an emerging risk embedded in key financial risks. Bank Mandiri has assessed key financial risk accordingly and has considered ESG aspects in it. Climate risk is also embedded in every other type of risk managed by the Bank. Accordingly, Bank Mandiri conducts a comprehensive risk management process in accordance with established procedures, including those addressing climate risk.

Bank Mandiri has conducted an Pilot Project Climate Risk Stress Test in accordance with OJK guidelines. On credit risk, credit portfolios that are potentially vulnerable to floods and forest fires have been identified; and sectoral portfolios that are characteristically classified as high emission sectors and are affected by government policies to control climate risk. For market risk, the Bank identifies market value movements in the Bank's securities portfolio which are included in the high emission sector category as a result of changes in government policy for carbon emissions.

Bank Mandiri manages climate-related financial risks, starting from risk identification and risk management framework, including conducting scenario analysis. The results of the climate risk analysis become inputs to increase the Bank's resilience to the impacts of climate risk and strengthen through various initiatives and alignment of ESG aspects in internal business processes. The impact of climate change on Bank Mandiri's sustainability based on the risk period is as follows:

1. Short-Term (1–5 Years): Includes the target to complete the transition plan by 2025, strengthening credit policies for high-emission sectors, and preparing to achieve net-zero emissions for Scope 1 and Scope 2 through offsetting strategies currently under internal review.

2. Medium-Term (5–10 Years): Encompasses strategic planning to mitigate risks associated with evolving climate regulations while enhancing efforts toward net-zero. These initiatives include targeted investments in green technology, collaborative partnerships, and adjustments to operational practices to meet emerging regulatory standards.
3. Long-Term (10–36 Years): Focuses on achieving net-zero emissions in financing by 2060, guiding strategies to build a low-carbon economy through portfolio diversification, green product offerings for customers, and the development of a green ecosystem.

Climate Risk Mitigation

Bank Mandiri is committed to managing its business and operations by prioritizing ESG principles to become "Indonesia's Sustainability Champion for a Better Future". This commitment is Bank Mandiri's response in supporting the Government's aspirations towards a low-carbon economy.

In sectors that have high climate risk such as plantations, mining and energy, Bank Mandiri conducts intensive monitoring in fulfilling the ESG aspects that have been required by the Bank. Going forward, Bank Mandiri strives to conduct more comprehensive climate risk impact measurements, such as conducting climate scenario analysis and testing credit portfolios for customers against climate risks including transition and physical risk.

Governance Bodies' Involvement on Climate Risk

Coordination of ESG-related aspects, including climate risk, at Bank Mandiri is carried out by ESG Group under the Vice President Director who is authorized to manage the framework, alignment of provisions in line with ESG and climate change issues, sustainable portfolio management, and responsible operational strategies of the Bank, including communication and reporting functions to external and internal parties. Reports from the ESG Unit are regularly forwarded to the Board of Directors as needed, as well as to the Board of Commissioners.

In the implementation of ESG and climate management, the Board of Directors takes a role in strategic functions, to:

1. integrate ESG aspects bank-wide, establish the direction of Bank Mandiri's Sustainable Finance (Sustainability) which includes Framework, Commitment, Strategy, Initiatives, Roadmap related to climate targets and SDGs achievement;

RISK ASSESSMENT OF THE BANK

2. carry out supervisory functions related to ESG and climate risks and opportunities, implementation of Sustainable Finance, fulfillment of appropriate ESG targets and initiatives;
3. accountable in ensuring the achievement of sustainability aspirations to stakeholders; and
4. build the collaboration and partnership needed to accelerate the Company's progress towards achieving SDGs and climate targets.

The Board of Directors in this case is assisted by Risk Management Committee (RMC). The forum with Risk Management Committee (RMC) is held quarterly on the topic of Sustainable Finance Action Plan (RAKB) performance, ESG trends, including discussion of critical issues in ESG aspects.

The Company's Board of Commissioners takes an important role in managing ESG and climate aspects, particularly to ensure the integration of ESG and climate aspects in Bank Mandiri's long-term goals, including fostering efforts beyond compliance and adoption of best practices, and overseeing the management of risks and opportunities related to sustainability and climate. To carry out this task, the Board of Commissioners is supported by the Risk Oversight Committee (ROC). The Risk Oversight Committee (ROC) forum is held periodically including discussing the effectiveness of ESG-related risk management and supervision in financing activities.

The functions and obligations of the Board of Directors and in the implementation of Bank Mandiri's sustainable finance are stipulated in Board of Directors Decree No. KEP.DIR/028/2024 on Risk Management Committee (RMC) and Decree of the Board of Commissioners No. KEP. KOM/004/2023 dated 13 September 2023 on the Risk Monitoring Committee Charter. The specific organ, ESG Group, was established in accordance with the Decree of the Board of Directors of KEP. DIR/32/2022 dated 12 September 2022.

Climate Risk Resilience

In the reporting period, Bank Mandiri has conducted a climate risk resilience assessment based on OJK Letter No. S-16/PB.013/2023 which requires KBMI 3 & 4 banks to assess climate risk

in the portfolio. In the study, climate-related risks were compared with an initial qualitative assessment linked to other bank risks concerning physical risk events, such as flooding, for credit portfolios secured by residential and commercial properties, as well as drought/forest fire risk events for corporate and MSME portfolios in the forestry and plantation sectors.

The assessment conducted provides an overview of potential losses and their impact on various bank risks. For transition risks, the assessment was carried out on portfolios in several high-emission sectors by projecting the impact of increased carbon emissions and changes in government policies on various bank risks and the Bank's capital. The transition scenario uses the NGFS scenario according to OJK guidelines, namely Net Zero 2050, Delayed Transition and Current Policies.

In credit risk, portfolios that are potentially vulnerable to floods and forest fires have been identified as well as sectoral portfolios that are classified as high emission sectors and affected by government policies to control climate risk. For market risk, the Bank identifies market value movements in the Bank's securities portfolio which are included in the high emission sector category as a result of changes in government policy for carbon emissions.

We analyze drought/forest fire/flood climate risk events to Bank Mandiri's operations and property which, based on the study, have the potential to cause damage and loss to the Bank's technology system and property, as well as disruption to employee mobility and health. In this scenario, the Bank already has a Disaster Recovery Plan mitigation plan that includes a contingency plan for catastrophic events.

Bank Mandiri will continue to develop climate risk stress testing in accordance with regulatory directives and the Bank's needs in planning climate risk management in the Company's portfolio. In accordance with technological advances, going forward it is necessary to develop specific models and analytics used in quantifying climate and environmental impacts, more detailed current data and information, scenarios and assumptions according to the direction of regulators.

To comprehensively understand the risk exposures faced by the Bank, Bank Mandiri conducts regular assessments of the Bank Soundness Level and Risk Profile. The Bank Soundness Level assessment is performed and reported to the regulator every six months, while the Risk Profile assessment is conducted quarterly.

The Bank Soundness Level assessment complies with Financial Services Authority Regulation No. 4/POJK.03/2016 and Circular Letter No. 14/SEOJK.03/2017 concerning the Assessment of Commercial Bank Soundness Level. This assessment covers the Risk Profile, which includes an evaluation of inherent risks and the quality of risk management implementation, Good Corporate Governance (GCG), earnings, and capital. The Risk Profile assessment focuses on eight primary risks: credit risk,

market risk, liquidity risk, operational risk, legal risk, strategic risk, compliance risk, and reputational risk. Moreover, the Integrated Risk Profile assessment includes two additional risks, namely insurance risk and intra-group transaction risk, ensuring a comprehensive understanding of the Bank's risk landscape and alignment with regulatory standards.

The assessment of Bank Mandiri Individual Risk Profile as of 31 December 2024 is categorized as rating 1 (Low Risk), with the assessment of Inherent Risk categorized as rating 2 (Low to Moderate) and the assessment of Quality of Risk Management Implementation categorized as rating 1 (strong), as follows:

Types of Risks	Inherent Risk Rating	KPMR Rating	Risk Level Rating
Credit Risk	Low to Moderate	Satisfactory	Low to Moderate
Market Risk	Low	Strong	Low
Liquidity Risk	Low to Moderate	Strong	Low
Operational Risk	Moderate	Satisfactory	Low to Moderate

REVIEW OF RISK MANAGEMENT SYSTEM EFFECTIVENESS

The Risk Profile assessment of Bank Mandiri, both at the individual and consolidated/integrated levels throughout 2024, indicates that the risks faced by the Bank at both levels have been effectively managed. This enables Bank Mandiri to sustain its business development efforts while maintaining sound and effective risk management practices.

In addition, accordance with the Regulation of the Ministry of SOEs number PER-2 / MBU / 03/2023 concerning Guidelines for Governance and Significant Corporate Activities of State-Owned Enterprises in article 74 paragraph 1 SOEs are required to conduct a risk maturity index assessment (Risk Maturity Index). The RMI assessment aims to measure the level of design quality and effectiveness of Risk Management implementation in protecting and creating value in SOEs.

In 2024 Bank Mandiri has carried out the RMI assessment and based on the assessment results, Bank Mandiri is in the Better Practice Phase where Bank Mandiri has strong risk management practices, which on average are close to or in line with global industry standard practices.

Statements from the Board of Directors and/or the Board of Commissioners or the Audit Committee on the Adequacy of Risk Management System

The internal control system at Bank Mandiri is considered effective and adequate. This is demonstrated by the successful implementation of internal control functions, including internal audit, risk management, compliance, and financial and operational controls, which collectively ensure the Bank's risk management framework operates efficiently.

RISK MANAGEMENT ACTIVITY REPORT IN 2024

During 2024, Bank Mandiri has conducted and reported the following assessments:

1. Individual Bank Soundness Level applies a risk-based approach/Risk-Based Bank Rating (RBBR), where the scope of assessment covers the following factors: Risk Profile, Good Corporate Governance, Earnings and Capital. The report for the position of 31 December 2023 and 30 June 2024 has been submitted to the Regulator in a timely manner.
2. Individual Risk Profile which is performed on 8 risks (Credit, Market, Liquidity, Operational, Legal, Strategic, Compliance, and Reputation Risk), for the position of 31 December 2023 and 30 March, 30 June, and 30 September 2024, has been submitted to the Regulator in a timely manner.

WORST-CASE SCENARIO SIMULATION AND STRESS TESTING

To evaluate Bank Mandiri's resilience against plausible exceptional external events, the Bank conducts stress testing as part of its contingency planning and to meet regulatory requirements in Indonesia. Stress testing at Bank Mandiri aims to estimate potential losses the Bank might incur, assess its capital adequacy to absorb these losses, ensure sufficient liquidity to meet contractual or behavioral obligations, and identify necessary steps to mitigate risks while maintaining capital adequacy.

Bank Mandiri performs 2 (two) types of stress testing: sensitivity or shock analysis and scenario analysis (both historical and hypothetical). These stress tests analyze key risks, including credit risk, market risk, and liquidity risk, using statistical and financial models developed by the Bank in accordance with industry best practices. For instance, one model and assumption that links to changes in credit risk to macroeconomic factors, providing a comprehensive understanding of potential impacts.

In general, the result of stress testing throughout 2024 indicated that Bank Mandiri was remained capable of maintaining its capital sufficiency and liquidity by building immediate anticipation of assets and liabilities management and preparing policies and systems.

In addition to stress testing at the individual level, stress testing at the level of Mandiri Group along with its subsidiaries was also performed. The stress testing for the Mandiri Group was one of the ways to communicate integrated risk management, whose result was presented to the management of Bank Mandiri, the management of Subsidiaries, and regulators for getting feedback and insights regarding corporate risk management strategies in a scenario of economic collapse.

The scenario of stress testing considers current economic conditions, where the global and domestic economic challenges in 2024 are driven by factors such as economic slowdown, rising interest rates, and the potential escalation of geopolitical tensions.

RECOVERY PLAN

In accordance with POJK 5 of 2024 on the Determination of Supervision Status and Managing Commercial Bank Issues, banks are required to prepare and submit a Recovery Plan to the Financial Services Authority (Otoritas Jasa Keuangan).

The Recovery Plan prepared includes a comprehensive analysis of the conditions across all business lines of the Bank and its Subsidiaries, including scenario analysis of crisis conditions (stress testing) affecting the Bank, both idiosyncratic and market-wide shocks, which could jeopardize the Bank's business continuity (point of non-viability).

In line with this regulation, Bank Mandiri's initial Recovery Plan was approved by shareholders on 21 March 2018. The updated Recovery Plan for 2024 was submitted to the Financial Services Authority in November 2024.

RESOLUTION PLAN

Apart from preparing the Recovery Plan, Bank Mandiri developed its first Resolution Plan in 2022, which was submitted to the Deposit Insurance Corporation (LPS) as the resolution authority in Indonesia. The requirement for preparing a Recovery Plan for Systemic Banks and a Resolution Plan for addressing solvency issues is mandated by Law No. 4 of 2023 on Financial Sector Development and Strengthening.

The Resolution Plan serves as a guide for LPS if recovery efforts outlined in the Recovery Plan fail to restore the Bank's condition to meet minimum regulatory requirements, resulting in the Bank being classified as a Bank in Resolution. The Resolution Plan includes information consistent with the Recovery

Plan, supplemented by an analysis of resolution options, potential obstacles to implementing those options, and communication strategies prior to the resolution authority addressing the Bank's solvency issues.

Following the initial submission, Bank Mandiri is required to update the Resolution Plan document every two years if the Bank experiences a financial condition change exceeding 20% of total assets, total liabilities, and/or total equity as of the financial statement date included in the previous Resolution Plan. The updated document must be submitted to the resolution authority. The obligation to prepare a Resolution Plan applies to banks as stipulated in LPS Regulation No. 2 of 2024 concerning Resolution Plans for Commercial Banks.

RISK HANDLING POST PANDEMIC

1. Post-Covid-19 Pandemic Risk Management

The occurrence of Covid-19 pandemic has greatly impacted the national economy. Due to the pandemic and the implementation of restrictions on business activities, many corporate debtors experienced a decline in sales and profits, resulting in cash flow and liquidity difficulties. Moreover, many individual debtors experienced termination of employment. As a result, debtors experienced decreasing ability to meet financial obligations to banks and other creditors, hence it was necessary to restructure debtors impacted by the Covid-19.

To handle these risks and in order to support the government's efforts to maintain economic stability, the Bank has actively taken a role in providing credit restructuring for debtors

impacted by the Covid-19. The implementation of restructuring is regulated under the national economic stimulus policy, in line with the dynamic of policies and regulations issued by the regulator, including the latest policy, OJK Board of Commissioners Decree ("KDK") numbered 34/KDK.03/2022, regarding sectors, segments, and regions that still require special treatment for bank credit or financing, effective until March 31, 2024.

The government has decided to revoke the Covid-19 pandemic status in June 2023 and declared that Indonesia has entered the endemic period. Post-Covid19 pandemic, mobility and business activities have increased, further improving the economic condition. Economic development also has been showing a solid recovery trend.

Following the expiration of OJK Board of Commissioners Decree ("KDK") numbered 34/KDK.03/2022 on March 31, 2024, OJK issued Press Release ("SP") numbered SP-41/OJK/GKPB/III/2024 regarding the Announcement of the End of Bank Credit Restructuring Stimulus in Handling the COVID-19 Pandemic. Banks should continue the credit restructuring schemes for borrowers that have already commenced until the repayment of the loan.

Bank Mandiri has managed Covid-19 credit restructuring, with the highest position at Rp96.5 trillion in June 2021, declining to Rp9.25 trillion as of September 2024. At bankwide level, at the same time, the NPL% of Bank Mandiri is 0.97%, with adequate NPL Coverage of 317.97%. Considering these conditions, the Bank is quite confident that it has successfully managed the pandemic-affected credit portfolio. This confidence is also reflected in the fact that the expiration of the limited relaxation under OJK Board of Commissioners Decree numbered

34/KDK.03/2022 on March 31, 2024, did not result in any significant spike, demonstrating the Bank's success in achieving a soft-landing post-relaxation.

2. Post Covid-19 Pandemic Credit Monitoring

In addressing the post-pandemic, the Bank continues to carry out credit monitoring mechanisms, both for debtors on an entity and portfolio basis. The credit monitoring mechanism is carried out through:

- Early warning signal analysis of all debtors with special attention to ex-Covid-19 Restructuring debtors.
- Output of early warning signals for debtors who have the potential to experience a decline in performance accompanied by an action plan that is monitored on an ongoing basis.

The Bank always conducts credit monitoring to maintain the quality of the managed credit portfolio.

MARKET RISK EXPOSURES

Market Risk Disclosure Using Standard Methods and Internal Models

The Bank regularly calculates the Capital Adequacy Ratio (CAR) using a Standardized Method that is reported monthly to the Financial Services Authority (OJK), while for the consolidated position with its subsidiaries, it is reported quarterly. This reporting aims to improve the Bank's quality and quantity so the Bank will be able to absorb potential losses due to financial and economic crises.

Table 7.1 Disclosure of Market Risk using a Standardized Method

For internal purposes, Bank Mandiri also has calculated using an Internal Method. The CAR calculation using an internal method is done by applying Value at Risk (VaR), a value describing the maximum losses the Bank can handle because of market movements affecting the Bank's risks in normal market conditions with a 99% confidence level. To obtain the VaR, the method used is Historical Simulation. Realization of Value at Risk of Bank Mandiri in 2024 is as follows:

Table 7.2 Disclosure of Market Risk using an Internal Model (Value at Risk/VaR) - Bank Only

Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures

The Interest Rate Risk in The Banking Book is a risk due to movements of interest rates in the market that run counter to the position of the Banking Book, which potentially impacts the capital and income of the Bank in the current period or the future.

According to OJK Circular No. 12/SEOJK.03/2018 on "Implementation of Risk Management and Risk Measurement using a Standardized Method for Interest Rate Risk in The Banking Book for Commercial Banks", the Bank uses 2 (two) methods in calculating the IRRBB:

1. Calculation based on changes in the economic value of equity, hereafter EVE, which is a method that measures the impact of interest rate changes on the economic value of equity of the Bank; and
2. Calculation based on changes in net interest income, hereafter NII, which is a method that measures the impact of interest rate changes on the income of the Bank.

Based on the sensitivity analysis at the end of December 2024, the impact of interest rate changes on the economic value of equity and the net interest income is as follows:

1. **Table 7.3a Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures - Bank Only**
2. **Table 7.3b Disclosure of Interest Rate Risk in Banking Book (IRRBB) Exposures - Bank Consolidated with Subsidiaries**

In addition to the disclosure of IRRBB exposures, the Bank also discloses foreign exchange risk. The foreign exchange risk arises because of market movements that run counter to Bank Mandiri's foreign exchange position. This risk comes from the Bank's assets and liabilities in the balance

sheet in foreign currencies, from foreign exchange transactions with customers and counterparties causing open positions in the foreign exchange, or from a structural position in the foreign exchange due to capital participation.

Table 7.4 Disclosure of Risk Management Implementation Report for IRRBB

All tables regarding Market Risk Exposures can be found on pages 1118 - 1127 herein.

LIQUIDITY RISK EXPOSURES

In order to improve liquidity resilience, the Bank manages risk by measuring the short-term liquidity adequacy ratio using the Liquidity Coverage Ratio (LCR) and the long-term using the Net Stable Funding Ratio (NSFR). The Bank manages the LCR and NSFR ratios in accordance with the provisions of the Regulator, both individually and on a consolidated basis, above the minimum limit of 100%.

2. **Table of Disclosure of Net Stable Funding Ratio**

Qualitative Analysis of IRRBB

1 Explanation about how the Bank defines IRRBB for risk measurement and control

The Interest Rate Risk in The Banking Book is a risk due to movements of interest rates in the market that run counter to the position of the Banking Book, which potentially impacts the capital and rentability (earnings) of the Bank in the current period or the future.

The Bank uses 2 (two) methods in calculating the IRRBB, namely calculation based on changes in the economic value of equity, or ΔEVE, and calculation based on changes in net interest income, or ΔNII. The simulation of ΔEVE and ΔNII is performed according to interest rate shock in OJK Circular No. 12/SEOJK.03/2018 dated 21 August 2018.

The Bank controls and mitigates interest rate risk using a recomposition of assets and liabilities or a hedging strategy.

2 Explanation about IRRBB strategic management and mitigation

The Bank adopts IRRBB control strategies that are in line with the Banks overall business strategies by considering the risk appetite and risk tolerance approved by the Board of Directors.

Meanwhile, in response to changes in the economic value of equity (ΔEVE), the IRRBB mitigation strategies are formulated based on the duration of the positions (average repricing maturity) of assets and liabilities. As of December 31, 2024, Bank Mandiris individual ΔEVE was 2.83%, far below the level set by the Regulator of 15%. The increase of ΔEVE compared to previous period was driven by the Banks internal strategy in managing assets & liabilities, specifically in optimizing liquidity.

3 Periodic calculation of the Banks IRRBB and the explanation about specific actions taken by the Bank to measure sensitivity to IRRBB.

To ensure IRRBB is monitored properly, the Bank calculates IRRBB every end-of-month of the reporting period and reports and publishes the result for every quarter position per the prevailing provisions. The measurement of sensitivity to IRRBB is in accordance with OJK Circular No. 12/SEOJK.03/2018 dated August 21, 2018:

- a. IRRBB calculation considers the whole Banking Book position by excluding equity and grouping it according to currency positions material to the Bank
- b. ΔEVE does not consider a commercial margin in the cash flow and discount on the cash flow.

4 Explanation about shock scenario for interest rates and stress scenario used by the Bank to estimate changes in economic value and earnings.

IRRBB exposures calculation is based on 6 (six) shock scenarios for interest rates :

Scenario	Explanation	Estimation of Changes	
		Economic value	Earnings
Parallel Up	Interest rate shock that is parallel up	√	√
Parallel Down	Interest rate shock that is parallel down	√	√
Steepener	Steep interest rate shock in which short-term interest rates go down and longterm interest rates go up	√	
Flattener	Flat interest rate shock in which short-term interest rates go up and long-term	√	
Short Up	Interest rate shock in which short-term interest rates go up	√

Qualitative Analysis of IRRBB

5 Modelling assumption used significantly in the Internal Measurement System (IMS) – if any.

The Bank has no modelling assumption that is used significantly in the Internal Measurement System (IMS) because the Bank's assumption is different from the modelling assumption used in the IRRBB calculation with a standardised method

6 Explanation about how the Bank hedges the IRRBB (if any), along with the relevant accounting treatment.

The Bank makes hedging transactions on the interest rate risk position by considering risk appetite, business strategies, and projected future movements of market factors. The Bank does not apply the hedge accounting method in the hedging transaction accounting. The profit/loss arising from the hedging transaction is recorded in the Bank's profit/loss statement.

7 Penjelasan komprehensif mengenai asumsi utama pemodelan dan parametrik yang digunakan dalam menghitung ΔEVE dan ΔNII.

The following are the primary assumptions of modelling used to calculate ΔEVE and ΔNII:

- a. ΔEVE calculation does not consider a commercial margin in the cash flow and discount on cash flow while ΔNII calculation considers a commercial margin in the cash flow.
- b. The material impact of instruments having behavioral options, such as consumer credit, retail deposit, and NMD on ΔEVE and ΔNII has been factored in using the early prepayment model (for consumer credit), early redemption method (for termed deposit), and behavior analysis method for NMD. These models will affect the repricing time of the instruments inside the repricing gap.

Quantitative Analysis

SUSTAINABILITY STRATEGY

As part of its long-term efforts, Bank Mandiri has outlined its 2025–2029 sustainability strategy, anchored by the aspiration to “Become Indonesia’s Sustainability Champion for a Better Future.” This aspiration is embodied in three major goals: Leading Indonesia’s Transition to a Low Carbon Economy, Achieving Net Zero Emission (NZE) in Operations by 2030, and Catalyzing Multiple Growth for Social Impact to Achieve SDGs.

To realize this vision, Bank Mandiri has developed an ESG Framework comprising three main pillars and eight strategic initiatives to be implemented during the 2025–2029 period. This framework is designed to integrate sustainability into every aspect of Bank Mandiri’s operations and business activities, delivering significant impacts for the environment, society, and the national economy.

SUSTAINABILITY STRATEGY

SUSTAINABILITY STRATEGY PILLARS

Bank Mandiri's sustainability strategy is founded on three key pillars: Sustainable Banking, Sustainable Operation, and Sustainability Beyond Banking, reflecting a holistic approach to integrating Environmental, Social, and Governance (ESG) principles into the Bank's business and operational activities.

SUSTAINABLE BANKING

The first pillar emphasizes Bank Mandiri's focus on conducting sustainable business by committing to lead Indonesia's transition to a low-carbon economy. This commitment is reflected in the integration of ESG principles across all of the Bank's business activities, encompassing risk management as well as the development of sustainable financial products and services. In addition, Bank Mandiri consistently serves as a collaborative partner for stakeholders in shaping sustainability-related policies and as a strategic partner for customers transitioning to more environmentally friendly business practices.

SUSTAINABLE OPERATION

In the second pillar, Bank Mandiri is committed to supporting its sustainability targets by achieving carbon neutrality in its operations by 2030, aligning with the aspiration of Net Zero Emissions (NZE). This commitment is realized by integrating ESG principles throughout all operational activities, including raising awareness, implementing environmentally friendly practices, applying technologies that ensure customer data protection, and managing human resources with a focus on enhancing diversity and equity in the workplace.

SUSTAINABILITY BEYOND BANKING

In the third pillar, Bank Mandiri expands its sustainability commitment by enhancing activities beyond its core banking operations, particularly in the social domain. These efforts aim to uplift local economies through various empowerment programs involving communities and local stakeholders. Through these initiatives, Bank Mandiri is determined to drive diverse forms of growth that deliver meaningful social impact, thereby supporting the Sustainable Development Goals (SDGs) in line with its commitment to "Catalyzing Multiple Growth for Social Impact to Achieve SDGs."

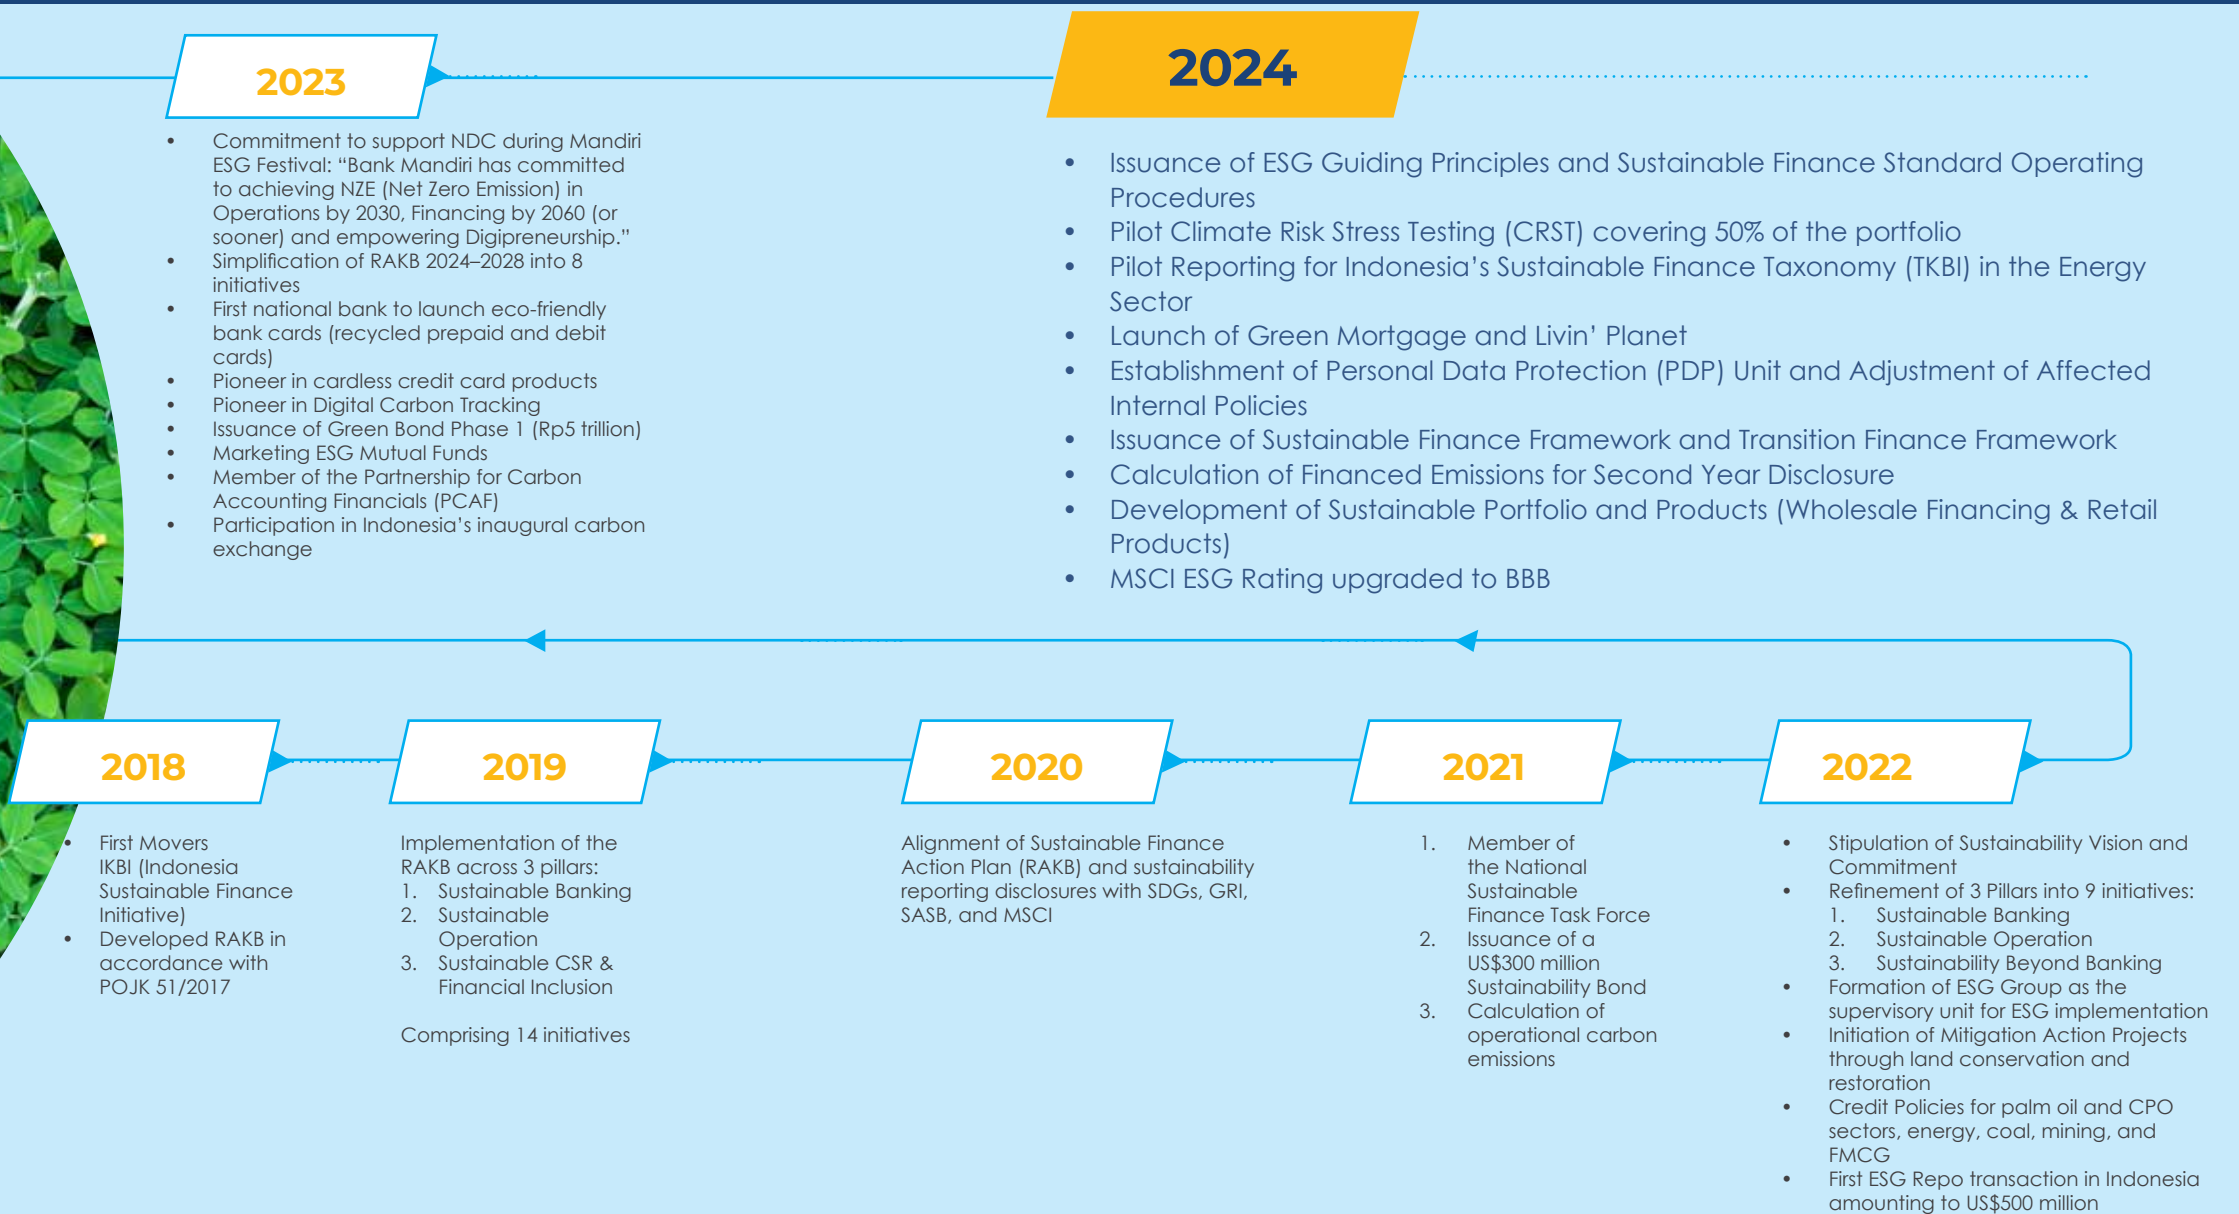

STRENGTHENING ENABLERS TO CONSOLIDATE VISION AND SUSTAINABILITY COMMITMENT

Enablers play a crucial role in ensuring the successful implementation of ESG principles across all operational aspects. These enablers include strengthening governance by integrating ESG into policies and decision-making processes, enhancing Mandirian capacity to support a sustainable transition, and improving transparency through comprehensive ESG disclosures to stakeholders.

The policy also outlines the rights of creditors to:

1. Receive adequate explanations about the characteristics of the products.
2. Access the terms and conditions of deposit products through Bank Mandiri's website.

Bank Mandiri prioritizes prudential principles and periodic portfolio monitoring in processing loan disbursement. The application of due diligence steps in the loan granting process is reflected in the escalation mechanism for loan approval and monitoring for large-scale and high-risk debtors.

In the loan granting process, during the Loan Monitoring stage, the quality of existing debtor loan is reviewed through various methods, one of which is the Watchlist mechanism. This mechanism serves as an Early Warning Signal to assess the quality of credit provided by analyzing three key aspects: the debtor's future business prospects, financial performance, and repayment history.

If the review process indicates a decline in credit quality, Bank Mandiri implements a non-performing loan rescue effort. This initiative focuses on debtors with non-performing loans who still demonstrate business potential, operational performance, and repayment ability. The objective is to minimize potential losses for the Bank and recover the granted loan effectively.

Loan rescue efforts may include restructuring, which can be applied through the following measures:

1. Reduction of loan interest rates;
2. Extension of the loan term;
3. Reduction of overdue interest payments;
4. Reduction of overdue principal payments;
5. Provision of additional loan facilities; and/or
6. Conversion of loan into temporary equity participation.

Bank Mandiri also has a Business Committee and a Risk Management & Credit Policy Committee (RMPC) tasked with evaluating the Bank's products and services, including assessing the risks associated with products and services issued by the Bank.

A comprehensive review of the Business Committee and the Risk Management & Credit Policy Committee (RMPC) is presented in the Corporate Governance chapter in the section of Committees under the Board of Directors in this Annual Report.

Bank Mandiri has its own internal regulations governing the marketing communication activities for its products and services. These regulations include provisions on communication materials intended for the public, adhering to and considering regulatory requirements, such as OJK Regulation No. 22 of 2023 on Consumer and Community Protection in the Financial Services Sector and the OJK Guidelines on Financial Services Advertising. For Communities

Financial Inclusion

Bank Mandiri actively participates in enhancing financial inclusion by expanding and simplifying access to financial services for the community. Improving access to financial services helps reduce economic disparities and promotes more equitable national economic growth. Bank Mandiri’s financial inclusion targets include:

1. Low-income or irregular-income individuals.
2. Communities having difficulties in accessing banking services.
3. Persons with disabilities.
4. Workers without legal identification documents.
5. Areas with limited access to formal financial networks due to geographical constraints, dispersed populations, or low financial literacy.
6. Marginalized and/or vulnerable groups, such as women and children.
7. Micro-entrepreneurs having difficulties in accessing capital or banking services.

To maximize access to banking services and contribute to addressing social inequality, Bank Mandiri participates in the Financial Inclusion Program by providing banking services for MSME entrepreneurs, including micro-business operators.

MSME Loan Access

Micro, Small, and Medium Enterprises (MSMEs) play a significant role in Indonesia’s economy due to their large proportion and direct absorption of labor. As the backbone of the economy, the government encourages MSME entrepreneurs to continue innovating, advancing to higher levels, and contributing more significantly to improving societal economic conditions.

Bank Mandiri supports the growth of MSMEs by providing adequate access to financing, recognizing that the development of the MSME portfolio generates various positive social impacts, such as improving living standards, creating jobs, and alleviating poverty.

By the end of 2024, Bank Mandiri supported 1.3 million MSME borrowers, benefiting from MSME loans amounting to Rp134 trillion, reflecting a growth of 6.5% from the previous year. This achievement was accompanied by a well-maintained non-performing loan (NPL) ratio in the MSME segment at 1.4%. The MSME loan portfolio accounted for 11% of Bank Mandiri’s total loan portfolio.

To deepen its market share, Bank Mandiri offers special packages for MSMEs connected to the Bank’s wholesale customers or ecosystem financing. Bank Mandiri’s customers, ranging from multinational companies and large corporations to State-Owned Enterprises, form the center of this ecosystem. MSMEs within the ecosystem can benefit from more competitive interest rates compared to the prevailing Micro Business Loan (KUM) Program rates.

MSME loans are provided in the form of Working Capital Loans and Investment Loans. In addition, Bank Mandiri offers Micro Business Loans (KUM) and participates in the government program by providing People’s Business Loans (KUR) under the micro banking segment.

SOCIAL PILLAR

In the 2024 reporting year, Bank Mandiri demonstrated its commitment to expanding financial service access for MSME entrepreneurs through a tripartite collaboration with Meratus Group and financial technology company PT Modal Rakyat Indonesia (Modal Rakyat) to provide financial solutions for the maritime transportation industry. This initiative, known as 'smart financing,' is a digital financial product aimed at logistics SMEs within the Meratus Group ecosystem, enabling easier access to bridging loans needed for working capital in the logistics business. This tripartite collaboration is part of Mandiri's strategy to expand financing access through digital channels. It also serves to enhance Bank Mandiri's MSME loan disbursement in Indonesia, particularly in the logistics sector.

Digitalization is one of the key issues that MSME entrepreneurs must address. Bank Indonesia (BI) data reveals that during the pandemic, the number of e-commerce transactions nearly doubled, rising from 80 million transactions in 2019 to 140 million transactions in August 2022. This highlights that adapting to e-commerce transactions based on digital technology has become a necessity for MSMEs, given the vast market opportunities it presents (Bank Indonesia, 2022).

Livin' Merchant is a point-of-sale (POS) cashier application designed to digitalize payment transactions for MSME merchants, enabling them to directly accept QRIS payments from various

The ESG Group acts as the ESG coordinator within Bank Mandiri and then bankwide, and collaborates with the Culture Squad in all work units managed by the Internal Culture Team. The Culture Squad serves as a liaison to convey information related to ESG in their respective work environments.

Throughout 2024, Bank Mandiri actively conducted ESG awareness campaigns within its internal environment. The agenda covered topics such as global and national commitment statements, regulatory requirements, and ESG implementation across Bank Mandiri in various aspects. Additionally, the campaigns were aligned with the scope of work of the related units to enhance support for achieving Net Zero Emissions (NZE) by 2030.

TJSL PROGRAM PERFORMANCE

Mandiri Bersama Mandiri Program

The Mandiri Bersama Mandiri program is a Social and Environmental Responsibility (TJSL) initiative aimed at supporting community empowerment and fostering sustainable economic development in Indonesia. It emphasizes collaboration and innovative approaches to developing community self-reliance, ultimately shaping economically independent Indonesian communities.

The program targets several key objectives, including improving the economic welfare of communities across Indonesia, empowering economic activities, enhancing financial literacy, promoting sustainable community development, and providing tangible support for the government's National Economic Recovery (PEN) program. These targets reflect Bank Mandiri's commitment to the priority goals of the Sustainable Development Goals (SDGs), particularly Goal 8: "Decent Work and Economic Growth."

The program encompasses 14 distinct activities, which are detailed as follows:

Entrepreneurs serve as a vital role in a nation's economy and are considered a key indicator of its economic progress.

The main objective is to form a community of young entrepreneurs who continue to synergize in Bank Mandiri and government programs, thereby succeeding as role models for the new generation of Indonesian youth entering the entrepreneurial world.

Carrying the tagline Inspire, Innovate, Impact, the WMM Program is expected to continuously create young entrepreneurs with the ability to find effective solutions to problems or challenges and the capability to adapt to new changes or situations.

In its implementation in 2024, WMM registration attracted more than 3,700 participants under the Business Existing category. The program aims to support young entrepreneurs who are eager to pursue entrepreneurship, helping them further develop their businesses, gain access to business networks, and acquire the knowledge and skills needed to succeed in the business world.

2. Rumah BUMN (RB) Bank Mandiri

Rumah BUMN (RB) is an enhancement of the Rumah Kreatif BUMN (RKB) program, with primary goal to increase the capacity and capability of MSMEs. This initiative aims to create excellent and quality MSMEs in Indonesia.

Hal audit utama yang teridentifikasi dalam audit kami diuraikan sebagai berikut.

The key audit matters identified in our audit are outlined as follows.

1. Cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah

1. Allowance for impairment losses on loans and sharia receivables/financing

Seperti yang dijelaskan dalam Catatan 12, Kredit yang Diberikan dan Piutang/Pembiayaan Syariah, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2024, cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah adalah sebesar Rp 49.354.645 juta dan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan ("PSAK") yang berlaku.

As described in Note 12, Loans and Sharia Receivables/Financing, to the consolidated financial statements, as at 31 December 2024, the allowance for impairment losses on loans and sharia receivables/financing was Rp 49,354,645 million and was determined based on the applicable Statement of Financial Accounting Standards ("SFAS").

Kami berfokus pada area ini karena saldo cadangan kerugian penurunan nilai atas kredit yang diberikan dan piutang/pembiayaan syariah mewakili 95% dari jumlah cadangan kerugian penurunan nilai untuk aset keuangan Grup, dimana nilainya signifikan terhadap laporan keuangan konsolidasian Grup. Lebih lanjut, dalam menentukan cadangan kerugian penurunan nilai, Grup mengadopsi model kompleks yang menggunakan sejumlah parameter, mengandalkan input data internal dan eksternal, melibatkan pertimbangan-pertimbangan manajemen yang subjektif dan asumsi-asumsi dengan tingkat ketidakpastian yang tinggi.

We focused on this area because the balance of allowance for impairment losses on loans and sharia receivables/financing represented 95% of the total allowance for impairment losses for the Group's financial assets, which was significant to the Group's consolidated financial statements. Furthermore, to determine the allowance for impairment losses, the Group adopted a complex model that used a number of parameters, relied on internal and external data inputs, involved subjective management judgements and assumptions subject to a high degree of uncertainty.

Kredit yang diberikan

Loans

Seperti yang dijelaskan dalam Catatan 2.c.H, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian pada tanggal 31 Desember 2024, cadangan kerugian penurunan nilai atas kredit yang diberikan ditentukan berdasarkan Pernyataan Standar Akuntansi Keuangan 109 – Instrumen Keuangan ("PSAK 109").

As described in Note 2.c.H, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements as at 31 December 2024, the allowance for impairment losses for loans was determined based on Statement of Financial Accounting Standards 109 – Financial Instruments ("SFAS 109").

Untuk kredit yang tidak mengalami penurunan nilai dan kredit yang mengalami penurunan nilai yang secara individual tidak dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter-parameter risiko yang memasukkan parameter utama, seperti *Probability of Default* ("PD"), *Loss Given Default* ("LGD"), *Exposure at Default* ("EAD"), dengan memperhitungkan informasi perkiraan masa depan dan data eksternal lainnya. Untuk kredit yang diberikan yang secara individual dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian yang diperoleh dari kredit yang diberikan.

For non-impaired loans and for impaired loans which were not considered individually significant, the Group calculated the allowance for impairment losses collectively using a risk parameter model that incorporated key parameters, such as *Probability of Default* ("PD"), *Loss Given Default* ("LGD"), and *Exposure at Default* ("EAD"), after considering forward-looking information and other external data. For loans that were considered individually significant, the Group calculated the allowance for impairment losses on an individual basis by estimating the expected cash flows to be obtained from the loans.

Piutang/pembiayaan syariah

Seperti yang dijelaskan dalam Catatan 2.c.H, Cadangan Kerugian Penurunan Nilai Aset Keuangan, atas laporan keuangan konsolidasian, cadangan kerugian penurunan nilai atas piutang murabahah ditentukan berdasarkan PSAK 402 - Akuntansi Murabahah ("PSAK 402"). Cadangan kerugian penurunan nilai atas pinjaman qardh, pembiayaan musyarakah dan mudharabah, ditentukan berdasarkan PSAK yang berlaku.

Atas piutang murabahah yang secara individual tidak dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara kolektif menggunakan model parameter risiko dengan menggunakan parameter-parameter utama yaitu PD dan LGD. Untuk piutang/pembiayaan syariah yang secara individual dianggap signifikan, Grup menghitung cadangan kerugian penurunan nilai secara individual dengan mengestimasi arus kas ekspektasian dari piutang/pembiayaan syariah.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kredit yang diberikan

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

- Kami memperoleh pemahaman atas perhitungan manajemen atas cadangan kerugian penurunan nilai untuk kredit yang diberikan;
- Secara sampel, menguji pengendalian yang relevan atas penentuan rating internal kredit sebagai basis identifikasi aset keuangan yang mengalami peningkatan risiko kredit secara signifikan atau yang terdapat bukti objektif penurunan nilai;
- Menguji pengendalian umum dari teknologi informasi ("TI") atas sistem perhitungan cadangan kerugian penurunan nilai serta pengendalian aplikasi TI atas kelengkapan dan keakuratan data;
- Menguji asumsi-asumsi pemodelan signifikan yang digunakan dalam model cadangan kerugian penurunan nilai yang dihitung secara kolektif, termasuk penentuan PD, LGD dan EAD, yang mencakup (i) evaluasi model dan metodologi yang digunakan dalam perhitungan kuantitatif; dan (ii) evaluasi data historis dan prakiraan ekonomi makro yang digunakan dengan membandingkan data tersebut dengan informasi yang tersedia untuk umum tentang prospek ekonomi makro;

Sharia receivables/financing

As described in Note 2.c.H, Allowance for Impairment Losses of Financial Assets, to the consolidated financial statements, the allowance for impairment losses for murabahah receivables was determined based on SFAS 402 - Murabahah Accounting ("SFAS 402"). The allowance for impairment losses for funds of qardh, musyarakah and mudharabah financing, was determined based on the applicable SFAS.

For Murabahah receivables, which are not considered to be individually significant, the Group assessed allowance for impairment losses collectively by using the risk parameter modelling approach that incorporated key parameters such as PD and LGD. For sharia receivables/financing which are considered individually significant, the Group assessed allowances for impairment losses individually by estimating the expected cash flows obtained from the sharia receivables/financing.

How Our Audit Addressed the Key Audit Matters

Loans

We have performed the following audit procedures to address this key audit matter:

- We understood management's calculation of the allowance for impairment losses for loans;
- On a sample basis, testing of the relevant controls over the determination of credit internal ratings as the basis over the identification of financial assets that have experienced a significant increase in credit risk or have objective evidence of impairment;
- Testing the information technology (IT) general controls over the allowance for impairment losses calculation system as well as the IT application controls over the completeness and accuracy of the data;
- Testing the significant modelling assumptions used in the allowance for impairment losses model calculated collectively including the determination of the PD, LGD and EAD, which involved (i) evaluation of the model and methodology used in the quantitative calculation; and (ii) evaluation of the historical data and macroeconomic forecast used by comparing them with publicly available information on macroeconomic prospect;

- Menguji input data ke model cadangan kerugian penurunan nilai, secara sampel, untuk menilai keakuratan dan kelengkapannya;
 - Menguji, secara sampel, keakuratan identifikasi manajemen atas kredit yang diberikan yang mengalami peningkatan signifikan risiko kredit dan gagal bayar dengan mempertimbangkan informasi keuangan dan non-keuangan debitur dan bukti eksternal yang relevan;
 - Membandingkan, secara sampel, data yang digunakan pada perhitungan cadangan kerugian penurunan nilai, dengan data yang tercatat di sistem perbankan utama Grup pada tanggal pelaporan;
 - Secara sampel, melakukan perhitungan matematis ulang atas perhitungan cadangan kerugian penurunan nilai untuk memeriksa keakuratan nilai tercatat cadangan kerugian penurunan nilai atas kredit yang diberikan;
 - Secara sampel, untuk kredit yang diklasifikasikan sebagai Tahap 2 dan Tahap 3 (kredit dengan cadangan kerugian penurunan nilai dihitung secara individual), memeriksa kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas asumsi-asumsi yang digunakan oleh manajemen, jumlah dan waktu estimasi arus kas masa depan yang disiapkan oleh manajemen berdasarkan informasi keuangan debitur dan/atau penjamin, penilaian agunan terbaru dan informasi lain yang tersedia yang digunakan dalam perhitungan cadangan kerugian penurunan nilai atas kredit yang diberikan;
 - Dengan melibatkan spesialis TI, menguji keakuratan perhitungan jumlah hari tunggakan dari tanggal jatuh tempo kredit dan penilaian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak yang digunakan dalam penentuan PD; dan
 - Menilai kecukupan pengungkapan terkait cadangan kerugian penurunan nilai atas kredit yang diberikan dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.
- *Testing, on a sample basis, the data inputs to the allowance for impairment losses model, to assess their accuracy and completeness;*
 - *Testing, on a sample basis, the accuracy of management's identification of loans that experience a significant increase in credit and default risk by considering the debtor's financial and non-financial information and relevant external evidence;*
 - *Comparing, on a sample basis, the data used in the allowance for impairment losses calculation with the data recorded in the Group's core banking system at the reporting date;*
 - *On a sample basis, performing mathematical recalculation of the allowance for impairment losses calculation to assess the accuracy of the allowance recorded for impairment losses for loans;*
 - *On a sample basis, for loans classified as Stage 2 and Stage 3 (loans where allowance for impairment losses are calculated individually), assessing the adequacy of allowance for impairment losses by testing the assumptions used by management, the amount and timing of estimates of future cash flows prepared by management based on the debtor's and/or guarantor's financial information, the latest collateral valuation and other available information used in calculation of allowance for impairment losses on loans granted;*
 - *By involving IT specialists, we tested the accuracy of the number of days past due from the credit due date and assessed the accuracy of credit collectibility based on the number of days past due which used in the determination of the PD; and*
 - *Assessing the adequacy of the disclosures related to allowance for impairment losses on loans in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Piutang/pembiayaan syariah

Kami melakukan prosedur-prosedur audit berikut untuk merespons hal audit utama ini:

- Kami memperoleh pemahaman, mengevaluasi dan menguji efektivitas desain serta operasi pengendalian internal yang berkaitan dengan pengukuran cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah.
- Menguji, secara sampel, keakuratan identifikasi peningkatan risiko kredit atas piutang/pembiayaan syariah secara signifikan terhadap bukti objektif penurunan nilai;
- Memeriksa, secara sampel, kecukupan cadangan kerugian penurunan nilai untuk piutang dan pembiayaan syariah yang mengalami penurunan nilai, yang dihitung secara individual. Atas sampel tersebut, kami menilai kecukupan cadangan kerugian penurunan nilai dengan melakukan pengujian atas jumlah dan periode estimasi arus kas masa depan yang disiapkan oleh manajemen, menilai asumsi-asumsi dan estimasi-estimasi yang digunakan dengan membandingkan jadwal pembayaran kembali dan tingkat pengembalian yang efektif yang digunakan pada perhitungan cadangan kerugian penurunan nilai dengan informasi yang tertera pada perjanjian piutang/pembiayaan syariah;
- Menilai metodologi dan asumsi-asumsi pemodelan signifikan yang digunakan dalam model cadangan kerugian penurunan nilai yang dihitung secara kolektif, termasuk penentuan PD dan LGD, yang diterapkan sebagai persyaratan PSAK 402, yang melibatkan (i) evaluasi model dan metodologi yang digunakan dalam perhitungan kuantitatif; dan (ii) menguji kelengkapan dan keakuratan data yang digunakan sebagai basis dalam penentuan tingkat PD dan LGD, dengan melibatkan spesialis TI kami;
- Melakukan perhitungan matematis ulang atas cadangan kerugian penurunan nilai piutang/pembiayaan syariah secara kolektif, dengan melibatkan spesialis TI kami;
- Melakukan pengujian atas keakuratan perhitungan jumlah hari tertunggak dari tanggal jatuh tempo kredit dan pengujian atas kolektibilitas kredit berdasarkan jumlah hari tertunggak;

Sharia receivables/financing

We have performed the following audit procedures to address this key audit matter:

- We understood, evaluated and tested the design and operating effectiveness of internal controls related to the measurement of impairment losses for sharia receivables and financing.
- Testing, on a sample basis, the accuracy of management's identification of the sharia receivables/financing of significant increases in credit risk against objective evidence of impairment;
- Testing, on a sample basis, the adequacy of the individual allowance for impairment losses for sharia receivables and financing that had been impaired. For these samples, we assessed the adequacy of allowance for impairment losses by testing the amount and period of estimated future cash flows prepared by management, assessed the assumptions and estimates used by comparing the repayment schedule and effective rate of return used in calculating allowance for impairment losses with information stated in the sharia receivables/financing agreement;
- Assessing the methodology and significant modelling assumptions used in the allowance for impairment losses model calculated collectively, including the determination of PD and LGD applied as requirements of SFAS 402, which involved (i) evaluating the models and methodologies used in quantitative calculations; and (ii) testing the completeness and accuracy of the data used as the basis for determining PD and LGD levels, with the involvement of our IT specialists;
- Performing independent mathematical recalculation of the collective allowance for impairment losses for sharia receivables/financing, with the involvement of our IT specialists;
- Testing the accuracy of number of days past due from the credit due date and assessing the credit collectibility based on the number of days past due;

- Melakukan pengujian atas kelengkapan dan keakuratan data piutang/pembiayaan syariah yang digunakan untuk menilai keandalan data yang digunakan dalam menghitung cadangan kerugian penurunan nilai; dan
- Menilai kecukupan pengungkapan terkait cadangan kerugian penurunan nilai atas piutang/pembiayaan syariah dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.

2. Pengoperasian dan pengendalian sistem Teknologi Informasi (TI) pelaporan keuangan

Grup sangat bergantung pada infrastruktur, sistem dan pengendalian TI untuk mendukung kegiatan operasional sehari-hari dan proses pelaporan keuangan. Lingkungan TI Grup dianggap kompleks dengan mempertimbangkan jumlah dan kompleksitas sistem utama pelaporan keuangan dan kompleksitas antarmuka antar sistem. Pengendalian tingkat entitas TI, pengendalian keamanan siber, dan pengendalian umum TI merupakan bagian penting dari kerangka pengendalian internal Bank. Oleh karena itu, kami menganggap pengoperasian dan pengendalian sistem teknologi informasi pelaporan keuangan Grup sebagai hal audit utama.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman pengelolaan sistem TI serta pengendalian yang mendukung proses pelaporan keuangan. Kami menilai efektivitas desain, implementasi dan pengoperasian pengendalian utama yang terkait, termasuk:

1. Pengendalian manajemen perubahan: Proses dan pengendalian yang dijalankan untuk mengembangkan, menguji dan mengesahkan perubahan pada fungsi dan konfigurasi di dalam sistem;
2. Pengendalian keamanan akses: Pengendalian akses pengguna dirancang untuk melaksanakan pemisahan tugas, mengatur penggunaan akun dengan akses istimewa atau proses otorisasi untuk perubahan data; dan
3. Pengendalian untuk operasional TI: Pengendalian untuk operasional dilaksanakan untuk memastikan bahwa setiap masalah TI yang muncul telah ditindaklanjuti.

- *Testing the completeness and accuracy of the data for sharia receivables/financing to assess the reliability of the data used to calculate the allowance for impairment losses; and*
- *Assessing the adequacy of the disclosures related to allowance for impairment losses on sharia receivables/financing in the context of Indonesian Financial Accounting Standards disclosure requirements.*

2. Operation and controls of financial reporting Information Technology (IT) systems

The Group is heavily reliant on its IT infrastructure, systems and controls for its daily operations and financial reporting processes. The IT environment of the Group is considered to be complex due to the number and complexity of the key financial reporting systems and interfaces between systems. IT entity level controls, cybersecurity controls and IT general controls are important components of the Bank's internal control framework. Therefore, we considered the operation and controls of the Group's financial reporting information technology systems to be a key audit matter.

How Our Audit Addressed the Key Audit Matters

We understood the IT systems and controls that supported the financial reporting process. We assessed the effectiveness of the design, implementation and operation of the associated key controls, including:

1. *Change management controls: The processes and controls used to develop, test and authorise changes to the functionality and configurations within systems;*
2. *Access security controls: The access controls designed to enforce segregation of duties, govern the use of high privileged accounts or the authorisation process to change the data; and*
3. *IT operation related controls: The controls over operations is carried out to ensure that any IT issues that arise have been addressed.*

Kami menguji pengendalian utama yang bergantung pada TI yang mendukung proses pelaporan keuangan, seperti perhitungan otomatis pada sistem, pemrosesan transaksi, laporan yang dihasilkan sistem, dan antarmuka data antar sistem. Pengujian kami meliputi inspeksi atas konfigurasi sistem yang relevan disertai dengan pengujian hasil keluaran sistem berdasarkan sampel.

3. Estimasi atas liabilitas kepada pemegang polis 3. Estimation of liabilities to policyholders

Seperti yang dijelaskan dalam Catatan 35, Liabilitas lain-lain, atas laporan keuangan konsolidasian, nilai cadangan teknis, yang terdiri atas manfaat polis masa depan dari produk non unit-link dan estimasi liabilitas klaim dan terdapat pada liabilitas kepada pemegang polis sebesar Rp 7.170.554 juta pada tanggal 31 Desember 2024.

Kewajiban untuk menentukan penyelesaian klaim masa depan melibatkan penilaian yang kompleks dan subjektif tentang peristiwa masa depan, baik internal maupun eksternal terhadap bisnis, di mana perubahan kecil dalam asumsi-asumsi dapat mengakibatkan dampak material terhadap estimasi kewajiban ini. Manajemen dibantu oleh pakar aktuaris untuk melakukan perhitungan kewajiban tersebut.

Terdapat ketidakpastian yang timbul dari berbagai asumsi-asumsi aktuarial. Asumsi-asumsi yang dipakai untuk menghitung cadangan liabilitas masa depan pemegang polis dan estimasi liabilitas klaim ditentukan berdasarkan estimasi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga seperti yang dijelaskan dalam Catatan 2.z, Kontrak Asuransi, atas laporan keuangan konsolidasian. Selain itu, Grup juga menerapkan asumsi margin untuk risiko pemburukan atas produk tersebut.

We tested key IT dependent controls supporting the financial reporting process, such as automated system calculations, transaction processing, system generated reports and data interfaces between systems. Our testing included the inspection of the relevant system configurations and supplemented with the testing of the system outputs on a sample basis.

As described in Note 35, Other Liabilities, to the consolidated financial statements, the technical reserve, which represents future policy benefits from non-unit-linked products and an estimated claim liability and forms part of the liabilities to policyholders, of Rp 7,170,554 million as at 31 December 2024.

The determination of the liabilities for future claim settlements involved complex and subjective assessment of future events, both internal and external to the business, where a small change in assumptions could have a material impact on the estimation of these liabilities. Management was assisted by an actuarial expert in its calculation of the liabilities.

There is also uncertainty arising from various actuarial assumptions. The assumptions used to calculate the policyholder's future liability reserves and the estimated claim liabilities were determined based on the estimates of mortality, morbidity, lapse, expenses, inflation rates and interest rates as described in Note 2.z, Insurance Contracts, to the consolidated financial statements. In addition, the Group also applied margin assumptions to the risk of deterioration over those products.

Bagaimana Audit Kami Merespons Hal Audit Utama

Kami memperoleh pemahaman perhitungan manajemen atas estimasi liabilitas kepada pemegang polis. Kami mengevaluasi estimasi liabilitas kepada pemegang polis, dengan melakukan prosedur-prosedur berikut:

- Dengan melibatkan ahli aktuarial kami, menguji asumsi-asumsi yang digunakan dalam menghitung cadangan teknis, termasuk evaluasi tingkat diskonto, asumsi morbiditas dan mortalitas, tingkat pembatalan polis dan alokasi biaya berdasarkan data historis dan informasi yang tersedia untuk umum;
- Mengevaluasi kompetensi, kapabilitas dan objektivitas tenaga ahli aktuarial yang membantu manajemen untuk melakukan perhitungan atas utang kepada pemegang polis;
- Memeriksa kelengkapan data yang digunakan untuk menghitung saldo cadangan teknis dengan melakukan rekonsiliasi antara laporan aktuarial manajemen, buku besar dan buku besar pembantu pada tanggal 31 Desember 2024;
- Dengan melibatkan ahli aktuarial kami, melakukan perhitungan matematis ulang, secara sampel, atas *Gross Premium Reserve* ("GPV") untuk portofolio jangka panjang tradisional dan Cadangan Risiko untuk portofolio *unit link*, saldo aset reasuransi, kecukupan bruto dan bersih atas cadangan *Incurred but not Recorded* ("IBNR") dan pengujian kecukupan liabilitas untuk portofolio tradisional pada tanggal 31 Desember 2024; dan
- Menilai kecukupan pengungkapan terkait nilai liabilitas kepada pemegang polis dalam konteks persyaratan pengungkapan Standar Akuntansi Keuangan di Indonesia.

How Our Audit Addressed the Key Audit Matters

We understood management's calculation of the estimation of liabilities to policyholders. We evaluated the estimation of liabilities to policyholders, by performing the following procedures:

- *By involving our actuarial expert, testing the assumptions used to determine the technical reserves, which involved evaluation of the discount rates, assumptions of morbidity and mortality, lapse rate and cost allocation based on historical data and publicly available information;*
- *Evaluating the competence, capabilities and objectivity of actuarial experts who assisted management in the calculation of the obligation to policyholders.*
- *Checking the completeness of the data used to calculate the technical reserve balance by reconciling management's actuarial reports, general ledger and sub-ledgers as at 31 December 2024;*
- *By involving our actuarial expert, performing independent mathematical recalculation, on a sample basis, of the Gross Premium Reserve ("GPV") for traditional long-term portfolios and Risk Reserves for unit-linked portfolios, reinsurance asset balances, the gross and net adequacy of Incurred but not Recorded ("IBNR") reserves and liability adequacy testing ("LAT") for traditional portfolios as at 31 December 2024; and*
- *Assessing the adequacy of the disclosures related to the liabilities to policyholders in the context of Indonesian Financial Accounting Standards disclosure requirements.*

Tanggung Jawab Manajemen dan Pihak yang Bertanggung Jawab atas Tata Kelola terhadap Laporan Keuangan Konsolidasian

Manajemen bertanggung jawab atas penyusunan dan penyajian wajar laporan keuangan konsolidasian tersebut sesuai dengan Standar Akuntansi Keuangan di Indonesia, dan atas pengendalian internal yang dianggap perlu oleh manajemen untuk memungkinkan penyusunan laporan keuangan konsolidasian yang bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan.

Dalam penyusunan laporan keuangan konsolidasian, manajemen bertanggung jawab untuk menilai kemampuan Grup dalam mempertahankan kelangsungan usahanya, mengungkapkan, sesuai dengan kondisinya, hal-hal yang berkaitan dengan kelangsungan usaha dan menggunakan basis akuntansi kelangsungan usaha kecuali manajemen memiliki intensi untuk melikuidasi Grup atau menghentikan operasi, atau tidak memiliki alternatif yang realistis selain melaksanakannya.

Pihak yang bertanggung jawab atas tata kelola bertanggung jawab untuk mengawasi proses pelaporan keuangan Grup.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take appropriate actions in accordance with Standards on Auditing established by the Indonesian Institute of Certified Public Accountants.

Responsibilities of Management and Those Charged with Governance for The Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with Indonesian Financial Accounting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Tanggung Jawab Auditor terhadap Audit atas Laporan Keuangan Konsolidasian

Tujuan kami adalah untuk memperoleh keyakinan memadai tentang apakah laporan keuangan konsolidasian secara keseluruhan bebas dari kesalahan penyajian material, baik yang disebabkan oleh kecurangan maupun kesalahan, dan untuk menerbitkan laporan auditor yang mencakup opini kami. Keyakinan memadai merupakan suatu tingkat keyakinan tinggi, namun bukan merupakan suatu jaminan bahwa audit yang dilaksanakan berdasarkan Standar Audit akan selalu mendeteksi kesalahan penyajian material ketika hal tersebut ada. Kesalahan penyajian dapat disebabkan oleh kecurangan maupun kesalahan dan dianggap material jika, baik secara individual maupun secara agregat, dapat diekspektasikan secara wajar akan memengaruhi keputusan ekonomi yang diambil oleh pengguna berdasarkan laporan keuangan konsolidasian tersebut.

Sebagai bagian dari suatu audit berdasarkan Standar Audit, kami menerapkan pertimbangan profesional dan mempertahankan skeptisisme profesional selama audit. Kami juga:

- Mengidentifikasi dan menilai risiko kesalahan penyajian material dalam laporan keuangan konsolidasian, baik yang disebabkan oleh kecurangan maupun kesalahan, mendesain dan melaksanakan prosedur audit yang responsif terhadap risiko tersebut, serta memperoleh bukti audit yang cukup dan tepat untuk menyediakan basis bagi opini kami. Risiko tidak terdeteksinya kesalahan penyajian material yang disebabkan oleh kecurangan lebih tinggi dari yang disebabkan oleh kesalahan, karena kecurangan dapat melibatkan kolusi, pemalsuan, penghilangan secara sengaja, pernyataan salah, atau pengabaian pengendalian internal.
- Memperoleh suatu pemahaman tentang pengendalian internal yang relevan dengan audit untuk mendesain prosedur audit yang tepat sesuai dengan kondisinya, tetapi bukan untuk tujuan menyatakan opini atas keefektifitasan pengendalian internal Grup.
- Mengevaluasi ketepatan kebijakan akuntansi yang digunakan serta kewajaran estimasi akuntansi dan pengungkapan terkait yang dibuat oleh manajemen.

Auditors' Responsibilities for The Audit of The Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- *Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.*
- *Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.*
- *Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.*

- Menyimpulkan ketepatan penggunaan basis akuntansi kelangsungan usaha oleh manajemen dan, berdasarkan bukti audit yang diperoleh, apakah terdapat suatu ketidakpastian material yang terkait dengan peristiwa atau kondisi yang dapat menyebabkan keraguan signifikan atas kemampuan Grup untuk mempertahankan kelangsungan usahanya. Ketika kami menyimpulkan bahwa terdapat suatu ketidakpastian material, kami diharuskan untuk menarik perhatian dalam laporan auditor kami ke pengungkapan terkait dalam laporan keuangan konsolidasian atau, jika pengungkapan tersebut tidak memadai, harus menentukan apakah perlu untuk memodifikasi opini kami. Kesimpulan kami didasarkan pada bukti audit yang diperoleh hingga tanggal laporan auditor kami. Namun, peristiwa atau kondisi masa depan dapat menyebabkan Grup tidak dapat mempertahankan kelangsungan usaha.
- Mengevaluasi penyajian, struktur dan isi laporan keuangan konsolidasian secara keseluruhan, termasuk pengungkapannya, dan apakah laporan keuangan konsolidasian mencerminkan transaksi dan peristiwa yang mendasarinya dengan suatu cara yang mencapai penyajian wajar.
- Memperoleh bukti audit yang cukup dan tepat terkait informasi keuangan entitas atau aktivitas bisnis dalam Grup untuk menyatakan opini atas laporan keuangan konsolidasian. Kami bertanggung jawab atas arahan, supervisi, dan pelaksanaan audit grup. Kami tetap bertanggung jawab sepenuhnya atas opini audit kami.

Kami mengomunikasikan kepada pihak yang bertanggung jawab atas tata kelola mengenai, antara lain, ruang lingkup dan saat yang direncanakan atas audit, serta temuan audit signifikan, termasuk setiap defisiensi signifikan dalam pengendalian internal yang teridentifikasi oleh kami selama audit.

Kami juga memberikan suatu pernyataan kepada pihak yang bertanggung jawab atas tata kelola bahwa kami telah mematuhi ketentuan etika yang relevan mengenai independensi, dan mengomunikasikan seluruh hubungan, serta hal-hal lain yang dianggap secara wajar berpengaruh terhadap independensi kami, dan, jika relevan, pengamanan terkait.

- *Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.*

- *Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.*
- *Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.*

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Dari hal-hal yang dikomunikasikan kepada pihak yang bertanggung jawab atas tata kelola, kami menentukan hal-hal tersebut yang paling signifikan dalam audit atas laporan keuangan konsolidasian periode kini dan oleh karenanya menjadi hal audit utama. Kami menguraikan hal audit utama dalam laporan auditor kami, kecuali peraturan perundang-undangan melarang pengungkapan publik tentang hal tersebut atau ketika, dalam kondisi yang sangat jarang terjadi, kami menentukan bahwa suatu hal tidak boleh dikomunikasikan dalam laporan kami karena konsekuensi merugikan dari mengomunikasikan hal tersebut akan diekspektasikan secara wajar melebihi manfaat kepentingan publik atas komunikasi tersebut.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Penawaran umum terbatas saham Bank Mandiri

Untuk penguatan struktur permodalan, Bank Mandiri meningkatkan modal ditempatkan dan disetor melalui Penawaran Umum Terbatas ("PUT") dengan Hak Memesan Efek Terlebih Dahulu ("HMETD"). Terkait dengan PUT tersebut, Bank Mandiri telah menyampaikan pernyataan pendaftaran pertama dan kedua kepada Otoritas Jasa Keuangan ("OJK"), dahulu Badan Pengawas Pasar Modal dan Lembaga Keuangan ("Bapepam dan LK"), pada tanggal 26 Desember 2010 dan tanggal 18 Januari 2011. Bapepam dan LK berdasarkan Surat Pelaksana Ketua Bapepam dan LK No. S-807/BL/2011 tanggal 27 Januari 2011 menyatakan bahwa pendaftaran PUT dengan HMETD Bank Mandiri tersebut telah efektif. Bank Mandiri juga telah memperoleh persetujuan pemegang saham sesuai hasil keputusan RUPS-LB tanggal 28 Januari 2011 sebagaimana terdapat dalam Akta Notaris Dr. A. Partomuan Pohan, S.H., LLM No. 15 tanggal 25 Februari 2011 yang telah dilaporkan kepada Menteri Hukum dan Hak Asasi Manusia Republik Indonesia dengan bukti penerimaan laporan No. AHU-AH.01.10-07446 tanggal 10 Maret 2011 dan telah didaftarkan pada Daftar Perseroan No. AHU-0019617.AH.01.09 Tahun 2011 tanggal 10 Maret 2011.

Total HMETD yang diterbitkan Bank Mandiri adalah sebanyak 2.336.838.591 lembar saham dengan harga sebesar Rp5.000 (nilai penuh) per lembar yang telah ditetapkan pada tanggal 25 Januari 2011 dan pelaksanaan periode perdagangan HMETD dimulai tanggal 14 Februari 2011 sampai dengan 21 Februari 2011.

Pemerintah Republik Indonesia sebagai pemegang saham mayoritas Bank Mandiri, tidak melaksanakan haknya untuk memperoleh HMETD, namun mengalihkannya kepada pemegang saham publik lainnya, sehingga komposisi persentase kepemilikan saham Pemerintah pada Bank Mandiri menjadi berkurang atau mengalami dilusi dari sebesar 66,68% sebelum periode pelaksanaan HMETD menjadi sebesar 60,00% setelah pelaksanaan HMETD.

Limited public offering of Bank Mandiri shares

To strengthen the capital structure, the Bank increased its issued and paid-up capital through the Limited Public Offering ("LPO") with Pre-emptive Rights ("HMETD"). Bank Mandiri had submitted the first and second registration statement regarding this LPO to the Financial Services Authority ("FSA"), previously the Capital Market Supervisory Board and Financial Institution ("Bapepam and LK") on 26 December 2010 and 18 January 2011. Capital Market Supervisory Board and Financial Institution on 27 January 2011 based on the Bapepam and LK Acting Chief Letter No. S-807/BL/2011 stated that the LPO with HMETD of Bank Mandiri had been effective. The Bank also obtained an approval from the shareholders based on the decision of Extraordinary General Meeting of Shareholder dated on 28 January 2011 as stated in Notary Deed by Dr. A. Partomuan Pohan, S.H., LLM No. 15 dated 25 February 2011 and had been reported to the Ministry of Law and Human Rights Republic of Indonesia with the receipt No. AHU-AH.01.10-07446 dated 10 March 2011. The Bank also registered it to Company Listing No. AHU-0019617.AH.01.09 Year 2011 dated 10 March 2011.

Total number of HMETD issued by Bank Mandiri was 2,336,838,591 shares at a price of Rp5,000 (full amount) per share which had been determined on 25 January 2011 and the execution period of Pre-emptive Rights trading started from 14 February 2011 until 21 February 2011.

The Government of the Republic of Indonesia as the controlling shareholder of Bank Mandiri, did not execute its right to acquire the HMETD, and transferred it to other public shareholders. As a result of this, Government's ownership in Bank Mandiri was reduced or diluted from 66.68%, prior to the execution of HMETD, to 60.00% after the execution of the HMETD.

Pada tanggal 26 Juni 2024, telah ditandatangani dokumen Akta Pengambilalihan Saham No. 88 antara Bank Mandiri dan IFG Life serta Akta Jual Beli Saham No. 89 antara Kimia Farma dan IFG Life, keduanya dibuat di hadapan Mala Mukti S.H., LL.M., notaris di Jakarta. Sejak ditandatanganinya Akta Pengambilalihan Saham dan Akta Jual Beli Saham tersebut susunan pemegang saham Mandiri Inhealth menjadi IFG Life memiliki sebesar 80% saham dan Bank Mandiri memiliki sebesar 20% saham. Dengan demikian, Bank Mandiri kehilangan pengendalian atas Mandiri Inhealth yang mengakibatkan Bank Mandiri menghentikan pengakuan terhadap aset bersih Mandiri Inhealth pada nilai tercatatnya. Pengalihan saham tersebut telah disetujui sebelumnya melalui RUPS Mandiri Inhealth yang dinyatakan dalam Akta Pernyataan Keputusan Para Pemegang Saham Mandiri Inhealth No. 90, yang dibuat di hadapan Mala Mukti S.H., LL.M., notaris di Jakarta dan pemberitaannya telah dicatat ke dalam Sistem Administrasi Badan Hukum Kementerian Hukum dan Hak Asasi Manusia Republik Indonesia sesuai surat tertanggal 27 Juni 2024 No. AHU-AH.01.09-0219371.

Transaksi pengalihan saham Mandiri Inhealth tersebut merupakan kombinasi bisnis entitas sepengendali dimana pemegang saham pengendali (ultimate shareholder) dari pemegang saham Mandiri Inhealth yaitu Bank Mandiri, Kimia Farma, dan IFG Life adalah Pemerintah Republik Indonesia. Oleh karena itu, transaksi divestasi tersebut dicatat berdasarkan metode penyatuan kepemilikan sesuai Pernyataan Standar Akuntansi Keuangan ("PSAK") No. 338 (Revisi 2014), "Kombinasi Bisnis Entitas Sepengendali".

Perbedaan antara jumlah imbalan yang diterima dan jumlah tercatat investasi dari transaksi ini diakui sebagai "Selisih Nilai Transaksi Kombinasi Bisnis Entitas Sepengendali" dan disajikan sebagai bagian "Tambahan Modal Disetor" di bagian ekuitas pada laporan posisi keuangan konsolidasian. Rincian jumlah imbalan yang diterima dan jumlah tercatat yang dialihkan adalah sebagai berikut:

	Jumlah imbalan yang diterima/ The consideration received	Jumlah tercatat investasi/ Investment carrying Amount	Tambahan modal disetor/ Additional paid-in capital
PT Asuransi Jiwa Inhealth Indonesia	1.710.000	1.257.990	452.010

Setelah pengukuran awal, nilai investasi Mandiri Inhealth kemudian ditambah atau dikurangkan bagian Bank Mandiri atas laba rugi Mandiri Inhealth sesuai dengan PSAK No. 228 "Investasi Pada Entitas Asosiasi dan Ventura Bersama".

On 26 June 2024, Bank Mandiri and IFG Life signed the Share Acquisition Deed No. 88, and Kimia Farma and IFG Life signed the Share Sale and Purchase Deed No. 89, both made before Mala Mukti S.H., LL.M., notary in Jakarta. Since the signing of the Share Acquisition Deed and Share Sale and Purchase Deed, the composition of Mandiri Inhealth's shareholders has become IFG Life owning 80% of the shares and Bank Mandiri owning 20% of the shares. Thus, Bank Mandiri lost control over Mandiri Inhealth which resulted in Bank Mandiri derecognizing Mandiri Inhealth's net assets at their carrying value. The transfer of shares was previously approved through the Mandiri Inhealth General Meeting of Shareholders as stated in the Deed of Decision Statement of Mandiri Inhealth Shareholders No. 90, made before Mala Mukti S.H., LL.M., notary in Jakarta and the notification has been recorded in the Legal Entity Administration System of the Ministry of Law and Human Rights of the Republic of Indonesia according to letter dated 27 June 2024 No. AHU-AH.01.09-0219371.

The share transfer transaction of Mandiri Inhealth is a business combination of entity under common control where the ultimate shareholder of Mandiri Inhealth's shareholders, namely Bank Mandiri, Kimia Farma, and IFG Life, is the Government of the Republic of Indonesia. Therefore, the divestment transaction is recorded using the pooling of interest method in accordance with the Statement of Financial Accounting Standards ("SFAS") No. 338 (Revised 2014), "Business Combinations of Entity under Common Control".

The difference between the consideration received and the carrying amount of the investment from this transaction is recognised as "Difference in Value from Transactions of Business Combinations of Entity under Common Control" and presented as part of "Additional Paid-in Capital" in the equity section of the consolidated statement of financial position. The details of the consideration received and the carrying amount transferred are as follows:

After initial measurement, the value of the investment in Mandiri Inhealth is then adjusted by adding or subtracting Bank Mandiri's share of Mandiri Inhealth's profit or loss in accordance with PSAK No. 228 "Investments in Associates and Joint Ventures".

c. Instrumen keuangan

A. Aset keuangan

Grup mengklasifikasikan aset keuangannya dalam kategori (a) aset keuangan yang diukur pada nilai wajar melalui laba rugi, (b) aset keuangan yang diukur pada nilai wajar melalui penghasilan komprehensif lain dan (c) aset keuangan yang diukur pada biaya perolehan diamortisasi.

Grup memiliki instrumen keuangan utang dan instrumen keuangan ekuitas. Grup selanjutnya mengukur semua investasi ekuitas pada nilai wajar. Saat pengakuan awal, Grup dapat membuat pilihan yang tak terbatal untuk menyajikan perubahan selanjutnya pada nilai wajar investasi dalam instrumen ekuitas dalam penghasilan komprehensif lain.

Grup menggunakan 2 (dua) dasar untuk mengklasifikasikan aset keuangan yaitu model bisnis Grup dalam mengelola aset keuangan dan karakteristik arus kas kontraktual pembayaran pokok dan bunga (*Solely Payment of Principal and Interest ("SPPI")*) dari aset keuangan.

Pengujian SPPI

Sebagai langkah pertama dari proses klasifikasi, Grup menilai persyaratan kontraktual keuangan untuk mengidentifikasi apakah mereka memenuhi pengujian SPPI.

Pokok pinjaman untuk tujuan pengujian ini didefinisikan sebagai nilai wajar dari aset keuangan pada pengakuan awal dan dapat berubah selama umur aset keuangan (misalnya, jika ada pembayaran pokok atau amortisasi premi/diskon).

Elemen bunga yang paling signifikan dalam perjanjian kredit biasanya adalah pertimbangan atas nilai waktu dari uang dan risiko kredit. Untuk membuat penilaian SPPI, Grup menerapkan pertimbangan dan memperhatikan faktor-faktor yang relevan seperti mata uang dimana aset keuangan didenominasikan dan periode pada saat suku bunga ditetapkan.

c. Financial instruments

A. Financial assets

The Group classified its financial assets in the following categories (a) financial assets measured at fair value through profit or loss, (b) financial assets measured at fair value through other comprehensive income, and (c) financial assets measured at amortised cost.

The Group has debt financial instruments and equity financial instruments. The Group further measures all equity investments at fair value. On initial recognition, the Group may make an irrevocable choice to subsequent changes in the fair value of investments in equity instruments in other comprehensive income.

The Group used 2 (two) methods to classify its financial assets, which based on the Group's business model in managing the financial asset, and the contractual cash flow of the financial assets *Solely Payment of Principal and interest ("SPPI")*.

SPPI test

As a first step of its classification process, the Group assesses the contractual terms of financial to identify whether they meet the SPPI test.

Principal, for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant element of interest within a credit contract are typically the consideration for the time value of money and credit risk. To perform the SPPI assessment, the Group applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

Penilaian model bisnis

Grup menentukan model bisnisnya berdasarkan tingkat yang paling mencerminkan bagaimana Grup mengelola kelompok atas aset keuangannya untuk mencapai tujuan bisnisnya.

Model bisnis Grup tidak dinilai berdasarkan masing-masing instrumennya, tetapi pada tingkat portofolio secara agregat yang lebih tinggi dan didasarkan pada faktor-faktor yang dapat diamati seperti:

- Bagaimana kinerja model bisnis dan aset keuangan yang dimiliki dalam model bisnis tersebut dievaluasi dan dilaporkan kepada personel manajemen kunci;
- Risiko yang mempengaruhi kinerja model bisnis (dan aset keuangan yang dimiliki dalam model bisnis tersebut) dan khususnya, bagaimana cara risiko tersebut dikelola;
- Bagaimana manajer bisnis dikompensasi (misalnya, apakah kompensasi didasarkan pada nilai wajar dari aset yang dikelola atau pada arus kas kontraktual yang tertagih);
- Frekuensi, nilai dan waktu penjualan yang diharapkan, juga merupakan aspek penting dari penilaian Grup.

Penilaian model bisnis didasarkan pada skenario yang diharapkan secara wajar tanpa mempertimbangkan skenario "worst case" atau "stress case". Jika arus kas setelah pengakuan awal direalisasikan dengan cara yang berbeda dari yang diharapkan, Grup tidak mengubah klasifikasi aset keuangan dimiliki yang tersisa dalam model bisnis tersebut, tetapi memasukkan informasi tersebut dalam melakukan penilaian atas aset keuangan yang baru atau yang baru dibeli selanjutnya.

- (a) Aset keuangan yang diukur pada nilai wajar melalui laba rugi

Aset keuangan diukur pada nilai wajar melalui laba rugi kecuali tes model bisnis dan tes arus kas kontraktual menunjukkan bahwa aset keuangan masuk ke dalam klasifikasi diukur pada biaya perolehan diamortisasi atau nilai wajar melalui penghasilan komprehensif lain.

Business model assessment

The Group determines its business model at the level that best reflects how the group manages a group of financial assets to achieve its business objective.

The Group's business model is not assessed by each instrument, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular the way those risks are managed;
- How business managers are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- The expected frequency, value, and timing of sales are also important aspects of the Group's assessment.

The business model assessment is based on reasonably expected scenarios without taking "worst case" or "stress case" scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Group's initial expectations, the Group does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

- (a) Financial assets measured at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless the business model test and the contractual cash flow test show that financial assets entering into classifications are measured at amortised cost or fair value through other comprehensive income.

B. Liabilitas keuangan (lanjutan)

- (b) Liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi

Grup mengklasifikasikan seluruh liabilitas keuangan sehingga setelah pengakuan awal liabilitas keuangan diukur pada biaya perolehan diamortisasi, kecuali:

1. Liabilitas keuangan yang diukur pada nilai wajar melalui laba rugi;
2. Liabilitas keuangan yang timbul ketika pengalihan aset keuangan tidak memenuhi syarat penghentian pengakuan atau ketika pendekatan keterlibatan berkelanjutan diterapkan;
3. Kontrak jaminan keuangan;
4. Komitmen untuk menyediakan pinjaman dengan suku bunga di bawah pasar;
5. Imbalan kontijensi yang akan diselesaikan dengan kas, dimana Grup bertindak selaku pihak pengakuisisi dalam kombinasi bisnis.

Pada saat pengakuan awal, liabilitas keuangan yang diukur dengan biaya perolehan diamortisasi diukur pada nilai wajar dikurangi biaya transaksi. C. Penghentian pengakuan

Penghentian Pengakuan Aset Keuangan

Penghentian pengakuan aset keuangan dilakukan ketika hak kontraktual atas arus kas yang berasal dari aset keuangan tersebut berakhir, atau ketika aset keuangan tersebut telah ditransfer dan secara substansial seluruh risiko dan manfaat atas kepemilikan aset tersebut telah ditransfer (jika, secara substansial seluruh risiko dan manfaat tidak ditransfer, maka Grup melakukan evaluasi untuk memastikan keterlibatan berkelanjutan atas kendali yang masih dimiliki tidak mencegah penghentian pengakuan).

2. *Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach is applied;*
3. *Financial guarantee contracts;*
4. *Commitment to provide loans at below market interest rates;*
5. *Contingent reward recognised by the acquirer in the business combination.*

At initial recognition, financial liabilities at amortised cost measured at fair value are deducted by transaction cost. After initial recognition, the Group measures all financial liabilities at amortised cost using the effective interest rate method. Effective interest rate amortisation is recognised as "Interest expense".

C. Derecognition

Derecognition of Financial Assets

Financial assets are derecognised when the contractual rights to receive the cash flows from these assets have expired or matured or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred (if substantially all the risks and rewards have not been transferred, the Group evaluates to ensure that continuing involvement on the basis of any retained powers of control does not prevent derecognition).

Aset keuangan yang dialihkan kepada pihak ketiga tetapi tidak memenuhi syarat penghentian pengakuan disajikan di dalam laporan posisi keuangan konsolidasian sebagai "Aset lain-lain - Tagihan atas efek-efek dan obligasi pemerintah yang diagunkan", dimana pihak penerima memiliki hak untuk menjual atau mentransfer kembali.

**Penghentian Pengakuan Liabilitas
Keuangan**

Penghentian pengakuan liabilitas keuangan dilakukan jika liabilitas keuangan tersebut telah berakhir karena kewajiban yang ditetapkan dalam kontrak telah dilepaskan, dibatalkan atau kedaluwarsa atau apabila terdapat perubahan yang substansial dalam persyaratan suatu liabilitas keuangan, maka kontrak liabilitas keuangan sebelum perubahan akan dihapus dan Grup akan mengakui liabilitas keuangan baru.

Hapusbuku

Dalam hal penghapusbukuan aset keuangan merupakan kelanjutan dari tindakan penyelesaian aset keuangan dengan cara pengambilalihan agunan, maka jumlah yang dihapusbuku adalah sebesar selisih kurang antara nilai wajar agunan yang diambil alih setelah memperhitungkan taksiran biaya penjualan dengan nilai tercatat aset keuangan.

Aset keuangan dapat dihapusbuku apabila cadangan kerugian penurunan nilai telah dibentuk 100%.

Penghapusbukuan dilakukan secara keseluruhan terhadap nilai tercatat aset keuangan dengan mendebit cadangan kerugian penurunan nilai.

Financial assets that are transferred to third parties but do not qualify for derecognition criteria are presented in the consolidated statements of financial position as "Other assets - Receivables from securities and government bonds pledged as collateral", which the recipient has the right to sell or transfer back.

Derecognition of Financial Liabilities

Financial liabilities are derecognised when the financial liabilities have expired because the obligations specified in the contract have been released, canceled or expired or if there is a substantial change in the terms of a financial liability, the financial liability contract before the change will be written off and the Group will recognize the new financial liability.

Write-offs

In the case of financial assets' write-off is a continuation of the financial assets' settlement by taking over collaterals, the written-off amount is approximately equal to the difference between the fair value of repossessed assets after taking into account the financial assets' cost of sales and carrying amount.

Financial assets can be written-off when the allowance for impairment losses have been 100% established.

Full write-off is done to the financial assets' carrying amount by debiting the allowance for impairment losses.

D. Modifikasi atas arus kas aset keuangan

Penilaian apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan, dilakukan oleh unit bisnis yang berwenang melakukan restrukturisasi aset keuangan tersebut.

Grup mengakui aset keuangan dimodifikasi atau direstrukturisasi secara substansial dan menghasilkan penghentian pengakuan ketika:

- (a) aset keuangan (atau bagiannya) berakhir, yaitu jika debitur secara hukum dibebaskan dari tanggung jawab utama atas aset tersebut (atau bagiannya), baik melalui proses hukum maupun oleh kreditur pembuatan kontrak kredit baru (sebagai contoh, opsi *equity conversion*); atau
- (b) terdapat konversi mata uang.

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut:

- (a) Modifikasi aset keuangan yang menghasilkan penghentian pengakuan aset keuangan
 - 1. Saat arus kas kontraktual atas aset keuangan direstrukturisasi atau dimodifikasi (antara lain ketika kredit direstrukturisasi) dimana restrukturisasi atau modifikasi tersebut menghasilkan penghentian pengakuan aset keuangan, Grup akan mencatat aset keuangan tersebut sebagai aset keuangan baru/modifikasi pada tanggal modifikasi/restrukturisasi.
 - 2. Selisih nilai tercatat aset keuangan sebelum modifikasi/restrukturisasi dengan nilai wajar aset setelah modifikasi/restrukturisasi diakui di laba rugi.
 - 3. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai bagian dari keuntungan atau kerugian atas modifikasi tersebut.
 - 4. Grup melakukan penilaian apakah aset keuangan baru/modifikasi merupakan aset yang berasal dari aset keuangan memburuk atau *Purchased or Originated Credit-Impaired ("POCI") Financial Asset*.
 - 5. Pengakuan pendapatan bunga atas aset yang berasal dari aset keuangan memburuk ditentukan berdasarkan suku bunga efektif yang telah disesuaikan dengan risiko kredit (*risk-adjusted effective interest rate*) untuk mendiskontokan arus kas aset keuangan yang telah dimodifikasi.

D. Modification of financial assets cash flow

An assessment of whether a financial asset has been modified or restructured substantially or not substantially derecognised is carried out by a business unit whose authorised to modify or restructure financial assets.

Modifications or restructuring to financial assets are considered substantial and the Group will cease to recognize the original financial assets when:

- (a) *the financial asset (or portion thereof) expires, that is, if the debtor is legally released from primary responsibility for the asset (or any portion thereof), either by legal process or by the creditor entering into a new credit contract (for example, the equity conversion option); or*
- (b) *there is a currency conversion.*

The Group will measure the substantially and not substantially modified financial assets as follows:

- (a) *Substantial Modification of Financial Assets*
 - 1. *When the contractual cashflow on a financial asset is restructured or modified (including when a credit is restructured) and the restructuring or modification results in derecognition of the financial asset, therefore the Group will record the financial asset as a new/modified financial asset on the modification/restructuring date.*
 - 2. *The difference between the gross amount of the initial financial assets and the fair value of the modified or restructuring assets recorded as profit or loss.*
 - 3. *Transaction income or costs incurred in connection with a modification event recognised as part of gain or loss on the modification.*
 - 4. *Group assess whether new/modified financial assets are assets originating from impaired financial assets or Purchased or Originated Credit-Impaired ("POCI") Financial Asset.*

Grup menilai apakah modifikasi atau restrukturisasi atas suatu aset keuangan menghasilkan atau tidak menghasilkan penghentian pengakuan dengan cara berikut (lanjutan):

(b) Modifikasi aset keuangan yang tidak menghasilkan penghentian pengakuan aset keuangan

1. Saat Grup melakukan renegotiasi atau modifikasi arus kas kontraktual atas aset keuangan (antara lain ketika kredit direstrukturisasi) yang tidak memenuhi kriteria modifikasi aset keuangan yang substansial di atas, maka restrukturisasi atau modifikasi tersebut tidak menghasilkan penghentian pengakuan aset keuangan.
2. Jumlah tercatat bruto aset keuangan dihitung sebesar nilai kini (*net present value*) dari arus kas neto kontraktual yang telah dimodifikasi atau direstrukturisasi yang didiskontokan menggunakan suku bunga efektif awal.
3. Grup kemudian mengakui keuntungan atau kerugian dari modifikasi (yaitu sebesar perubahan jumlah tercatat bruto aset keuangan) dalam laporan laba rugi.
4. Pendapatan atau biaya transaksi yang terjadi sehubungan dengan kejadian modifikasi diakui sebagai penyesuaian terhadap jumlah tercatat aset keuangan yang telah dimodifikasi dan diamortisasi selama sisa jangka waktu aset keuangan modifikasian tersebut dengan menggunakan suku bunga efektif awal.
5. Selisih antara jumlah tercatat bruto aset keuangan sebelum dan sesudah modifikasi atau restrukturisasi diakui sebagai kerugian atau keuntungan aset keuangan modifikasian, yang merupakan penyesuaian terhadap jumlah tercatat bruto awal dan diamortisasi selama sisa jangka waktu aset keuangan dengan menggunakan suku bunga efektif awal (*unwinding interest*).

(b) Non-Substantial Modification of Financial Assets

1. When the Group renegotiates or modifies contractual cash flows of financial assets (including when loans are restructured) that do not meet the criteria for substantial modification of financial assets above, the restructuring or modification does not result in derecognition of the financial assets.
2. The gross carrying amount of financial assets is computed at the net present value of modified or restructured contractual cash flows, discounted at the initial effective interest rate.
3. The Group then recognizes the gain or loss from the modification (i.e the change in the gross carrying amount of the financial asset) in the profit or loss.
4. Transaction income or costs incurred in connection with a modification event are recognised as an adjustment to the carrying amount of the modified financial asset and amortised over the remaining term of the modified financial asset using the initial effective interest rate.
5. The difference between the gross carrying amount of a financial asset before and after modification or restructuring is recognised as a gain or loss of the modified financial asset, which is an adjustment to the initial gross carrying amount and is amortised over the remaining term of the financial asset using the initial effective interest rate (*unwinding interest*).

E. Reclassification of financial assets

d. Jika aset keuangan terbukti berdasarkan fakta atau informasi yang relevan bahwa aset keuangan membaik, maka Grup akan mencatat di laporan laba rugi sebagai pengurang "Beban Pembentukan Cadangan Kerugian Penurunan Nilai".

e. Jika kondisi aset keuangan terbukti memburuk, maka Grup akan mencatat di laporan laba rugi sebagai penambah "Beban Pembentukan Cadangan Kerugian Penurunan Nilai".

Grup menggunakan kriteria untuk menentukan kategori aset keuangan yang mengalami penurunan nilai berdasarkan pengelompokan tingkat risiko aset keuangan di atas. Aset keuangan pada kelompok *stage 3* dan POCI merupakan aset keuangan yang mengalami penurunan nilai.

3. Metode penurunan nilai

Grup melakukan evaluasi penurunan nilai dengan metode sebagai berikut:

a) Metode Individual

1) Kriteria Individual

Grup mengevaluasi penurunan nilai secara individual apabila Grup memiliki informasi yang wajar dan didukung untuk mengukur kerugian kredit ekspektasian sepanjang umurnya pada instrumen secara individual dan aset keuangan memiliki kriteria sebagai berikut:

- a. Aset keuangan per debitur memiliki nilai *outstanding* kumulatif lebih dari Rp25.000 (dua puluh lima miliar Rupiah);
- b. Kredit segmen *Corporate, Kelembagaan, Financial Institutions, Commercial, dan SME Banking*; dan
- c. Aset keuangan termasuk dalam kategori *stage 2* akibat dari restrukturisasi, *stage 3*, atau *POCI*.

Grup juga dapat menetapkan aset keuangan untuk dievaluasi secara individual meskipun aset keuangan dimaksud belum memiliki kriteria untuk dievaluasi secara individual.

- 2) Jika aset keuangan terdapat bukti objektif penurunan nilai dari aset keuangan yang dievaluasi secara individual namun tidak terdapat kerugian penurunan nilai, maka aset keuangan tersebut tetap dimasukkan ke dalam klasifikasi aset keuangan yang akan dievaluasi penurunan nilainya secara individual. Namun, Grup membentuk cadangan kerugian penurunan nilai atas aset keuangan tersebut berdasarkan *probability of default* yang dihasilkan dari evaluasi penurunan nilai kredit secara kolektif.

3. Impairment method

The Group evaluates the impairment using the following methods:

a) Individual Method

1) Individual Criteria

The Group evaluates impairment individually when the Group has reasonable and supportable information to measure the lifetime expected credit losses on an individual instrument and the financial assets have the following criteria:

- a. Financial assets per debtor with a cumulative outstanding amount of more than Rp25,000 (twenty five billion Rupiah);
- b. Loans for the *Corporate, Institutional, Financial Institutions, Commercial, and SME Banking segments*; and
- c. Financial assets fall into the *stage 2* category as a result of a restructuring, *stage 3*, or *POCI*.

The Group may also designate financial assets to be evaluated individually even though the financial assets have not yet meet criteria for individual evaluation.

- 2) If a financial asset has objective evidence of impairment from a financial asset that is evaluated individually but there is no impairment loss, the financial asset is still classified as a financial asset that will be assessed for impairment individually. However, the Group establishes allowance for impairment losses on these financial assets based on the probability of default resulting from a collective evaluation of loans impairment.

3) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara individual didasarkan pada konsep estimasi jumlah probabilitas tertimbang kerugian aset keuangan. Konsep tersebut menggunakan pembobotan masing-masing dari 3 (tiga) skenario yaitu skenario optimis, skenario normal, dan skenario pesimis.

1. Optimis

Skenario dengan asumsi terdapat kenaikan atau ekspansi dalam perekonomian yang berakibat pada menguatnya nilai variabel seperti pertumbuhan ekonomi meningkat atau apresiasi nilai tukar.

2. Normal

Skenario yang memiliki peluang terbesar untuk terjadi dibandingkan 2 (dua) skenario lainnya. Nilai variabel dalam skenario *baseline* adalah hasil proyeksi dengan asumsi pergerakan ekonomi tanpa adanya peristiwa luar biasa, guncangan atau gejolak ekonomi.

3. Pesimis

Skenario dengan asumsi terdapat pelemahan atau kontraksi dalam perekonomian yang berakibat melemahnya nilai variabel seperti penurunan pertumbuhan ekonomi atau depresiasi nilai tukar.

3) Impairment Evaluation

Individual impairment evaluation is based on the concept of an estimated weighted probability of loss of financial assets. This concept uses the weighting of each of the 3 (three) scenarios, which are the optimistic scenario, the normal scenario, and the pessimistic scenario.

1. Optimistic

A scenario with the assumption that there is an increase or expansion in the economy which results in the strengthening of variable values such as increased economic growth or exchange rate appreciation.

2. Normal

The scenario that has the greatest chance of occurring compared to the other 2 (two) scenarios. The variable value in the baseline scenario is the projection result assuming economic movements without any extraordinary events, shocks or economic turmoil.

3. Pessimistic

Scenarios with the assumption that there is a weakening or contraction in the economy that results in weakening of variable values such as a decrease in economic growth or depreciation of the exchange rate.

Setiap skenario menghasilkan nilai kini arus kas yang didiskontokan, di mana arus kas tersebut didasarkan pada seluruh informasi yang tersedia dengan *experienced credit judgement* serta mencerminkan seluruh informasi yang memperhatikan berbagai faktor seperti:

1. Kekuatan finansial dan kemampuan debitur untuk membayar kembali kewajiban (*repayment capacity*).
2. Jenis dan jumlah agunan.
3. Ketersediaan garansi.
4. Prospek usaha nasabah di masa datang.
5. Probabilitas penjualan agunan.
6. Kerugian historis.
7. Faktor makroekonomi yang relevan.

Selisih estimasi jumlah probabilitas tertimbang dengan jumlah *outstanding* aset keuangan mencerminkan jumlah kerugian penurunan nilai individual.

Metode evaluasi penurunan nilai secara individual didasarkan pada 2 (dua) konsep, yaitu estimasi jumlah kerugian aset keuangan dan estimasi jumlah yang dapat diperoleh kembali. Metode yang digunakan adalah *discounted cash flow* atau metode *fair value of collateral*. Bank menggunakan metode *fair value of collateral* sebagai arus kas masa datang apabila memenuhi salah satu kondisi berikut:

1. Kredit bersifat *collateral dependent*, yaitu jika pelunasan kredit hanya bersumber dari agunan;
2. Sulit untuk menentukan jumlah dan waktu penerimaan estimasi arus kas yang berasal dari pokok kredit dan/atau bunga dengan andal; dan/atau
3. Pengambilalihan agunan kemungkinan besar terjadi dan didukung dengan aspek legal pengikatan agunan.

Each scenario provides a discounted present value of cash flows, where the cash flows are based on all available information with experienced credit judgment and reflect all information that takes into account various factors such as:

1. Financial strength and the debtor's repayment capacity.
2. Type and amount of collateral.
3. Availability of warranty.
4. Customers' future business prospects.
5. Probability of collateral sale.
6. Historical losses.
7. Relevant macroeconomic factors.

The difference between the weighted probability and the total outstanding of financial assets reflects the amount of the individual impairment loss.

The individual impairment evaluation method is based on 2 (two) concepts, which are the estimated amount of loss on financial assets and the estimated amount that can be recovered. The method used are discounted cash flow or fair value of collateral method. The Bank uses the fair value of collateral method as future cash flows if it meets one of the following conditions:

1. Loans is collateral dependent, if loans repayment source only from collateral;
2. It is difficult to reliably determine the amount and timing of receipt of the estimated cash flow from loan principal and/or interest; and/or;
3. Foreclosure of collateral is likely to occur and is supported by legal binding aspects of collateral.

1) Kriteria Kolektif

Bank mengevaluasi penurunan nilai secara kolektif apabila aset keuangan memiliki kesamaan dalam karakteristik risiko aset keuangan dengan tujuan untuk memfasilitasi analisis yang didesain untuk memungkinkan peningkatan risiko kredit secara signifikan dapat diidentifikasi tepat waktu. Kriteria aset keuangan yang dievaluasi secara kolektif adalah sebagai berikut:

- a. Aset keuangan per debitur merupakan aset keuangan *non-performing* atau memiliki *days past due* > 90 hari dan memiliki nilai kumulatif sebesar ≤ Rp25.000 (dua puluh lima milyar rupiah) untuk Segmen *Corporate, Kelembagaan, Financial Institutions, Commercial* dan *SME Banking*;
- b. Aset keuangan *performing* atau memiliki *days past due* ≤ 90 hari dan tidak direstrukturisasi untuk segmen *Corporate, Kelembagaan, Financial Institutions, Commercial* dan *SME Banking*; dan
- c. Seluruh kredit segmen *Micro Banking* dan *Consumer*.

Secara garis besar, seluruh portofolio kredit yang evaluasi penurunan nilainya tidak dihitung menggunakan metode individual, akan dievaluasi menggunakan metode kolektif.

2) Evaluasi Penurunan Nilai

Evaluasi penurunan nilai secara kolektif didasarkan pada konsep *Probability of Default (PD)*, *Loss Given Default (LGD)* dan *Exposure at Default (EAD)* yang mempertimbangkan informasi masa lalu, terkini, dan masa mendatang.

The Bank assesses impairment collectively if the financial assets share the same risk characteristics of the financial assets with the purpose of facilitating analysis which is designed to allow a significant increase in credit risk to be identified in a timely manner. The criteria for financial assets that are evaluated collectively are as follows:

- a. Financial assets per debtor are non-performing financial assets or have days past due > 90 days and have a cumulative value of ≤ Rp25,000 (twenty five billion rupiah) for the *Corporate, Institutional, Financial Institutions, Commercial, and SME Banking* segments;
- b. Performing financial assets or having days past due ≤ 90 days and were not restructured for the *Corporate, Institutional, Financial Institutions, Commercial, and SME Banking* segments; and
- c. All loans in the *Micro Banking* and *Consumer* segments.

In general, all loan portfolios for which impairment evaluation is not calculated using the individual method will be evaluated using the collective method.

2) Impairment Evaluation

The evaluation of collective impairment is based on the concepts of *Probability of Default (PD)*, *Loss Given Default (LGD)*, and *Exposure at Default (EAD)* which consider past, current, and future information.

Bank menggunakan metode *Basel* dan *Historical* dalam menentukan nilai LGD dari setiap debitur. LGD menggambarkan persentase nominal fasilitas yang tidak akan dapat dipulihkan oleh Bank terhadap debitur default. LGD biasa dihitung dengan formula *1-Recovery Rate*. *Recovery rate* dihitung mempertimbangkan *Time Value of Money* dari pengembalian kewajiban yang telah default. Tingkat suku bunga yang digunakan untuk menghitung *Time Value of Money* dari *Recovery* adalah *Effective Interest Rate* (EIR).

The Bank uses *Basel* and *Historical* methods in determining the LGD value of each debtor. LGD describes the nominal percentage of the facility that the Bank will not be able to recover against the default debtor. Regular LGD is calculated with formula *1-Recovery Rate*. The recovery rate is calculated by considering the *Time Value of Money* from the recovery of the default obligation. The interest rate used to calculate the *Time Value of Money* of *Recovery* is the *Effective Interest Rate* (EIR).

Metode *Basel* dilakukan dengan menentukan hubungan antara LGD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan. Model *Basel* yang telah didapatkan digunakan sebagai dasar penentuan nilai LGD dari setiap debitur.

The *Basel* method is carried out by determining the relationship between a debtor's LGD and the internal characteristics of the debtor concerned. The *Basel* model that has been obtained is used as the basis for determining the LGD value of each debtor.

Jika tidak didapatkan hubungan antara makroekonomi dengan nilai LGD Bank, maka Bank tidak dapat menggunakan *Forward-Looking* dalam penentuan nilai LGD.

c. *Exposure at Default*

Dalam menentukan nilai EAD dari setiap debitur, Bank menggunakan metode *Basel, Prepayment Rate* dan *Expected Lifetime*. EAD menggambarkan *exposure* yang akan ditanggung Bank jika terdapat debitur yang *default*.

Metode *Basel* dalam perhitungan EAD dilakukan dengan menentukan hubungan antara EAD suatu debitur dengan karakteristik internal dari debitur yang bersangkutan.

Forward-Looking Macro Adjustment in LGD is a method used to determine the forward looking LGD value based on the historical relationship between macroeconomics and the Bank's LGD value. If there is no relationship between macroeconomics and the Bank's LGD value, the Bank may not use Forward-Looking in determining the LGD value.

c. *Exposure at Default*

In determining the EAD value of each debtor, the Bank uses the Basel, Prepayment Rate, and Expected Lifetime method. EAD describes the exposure that will be borne by the Bank if there is a debtor become defaults.

The Basel method in calculating EAD is performed by determining the relationship between a debtor's EAD and the internal characteristics of the respective debtor.

The Prepayment Rate method is a method that studies the behavior of the debtor's payment rate that is bigger than the scheduled facility payment amount.

**4. Interest income before and after
impairment (continued)**

Interest income from impaired financial assets (*stage 3* or *POCI*) is calculated by applying an effective interest rate on the net carrying amount of financial assets, which is the outstanding amount after deducting losses due to impairment for:

a) Financial Assets Purchased or Originated Credit-Impaired Financial Assets ("POCI")

For these financial assets, the Group applies a risk-adjusted effective interest rate on the amortised cost of the financial assets since initial recognition.

b) Stage 3

For these financial assets, the Group applies an effective interest rate on the amortised cost of financial assets in the reporting period, which is the amount that has been reduced by any impairment losses.

Interest income is subsequently recognised based on of the interest rate used to discount future cash flows in measuring impairment losses or what is known as *unwinding interest*.

5. Allowance for possible losses on earning assets of Subsidiary based on sharia

Allowance for impairment losses on *murabahah* receivable is calculated based on collective method according to SFAS 402 "Accounting for *Murabahah*" and Interpretation of Financial Accounting Standard ("IFAS") 402 "Impairment Loss for *Murabahah* Receivables".

Entitas Anak menetapkan piutang *murabahah* yang harus dievaluasi penurunan nilainya secara individual, jika memenuhi salah satu kriteria di bawah ini:

- 1) Piutang *murabahah* memiliki kolektibilitas kurang lancar, diragukan dan macet, dan memiliki saldo nilai piutang secara individual di atas atau sama dengan Rp10.000; dan
- 2) Piutang *murabahah* yang direstrukturisasi atau pernah direstrukturisasi dan yang secara individual memiliki saldo nilai piutang di atas Rp10.000.

- (b) Aset keuangan yang tersedia untuk dijual

Pada setiap tanggal laporan posisi keuangan konsolidasian, Grup mengevaluasi apakah terdapat bukti objektif bahwa aset keuangan atau kelompok aset keuangan mengalami penurunan nilai. Lihat Catatan 2c.(H).(2) untuk kriteria bukti objektif adanya penurunan nilai.

Penurunan yang signifikan atau penurunan jangka panjang atas nilai wajar dari investasi dalam instrumen utang di bawah biaya perolehannya merupakan bukti objektif terjadinya penurunan nilai dan menyebabkan pengakuan kerugian penurunan nilai. Ketika terdapat bukti tersebut di atas untuk aset keuangan yang tersedia untuk dijual, kerugian kumulatif, yang merupakan selisih antara biaya perolehan dengan nilai wajar kini, dikurangi kerugian penurunan nilai aset keuangan yang sebelumnya telah diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, dikeluarkan dari ekuitas dan diakui pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian.

Jika, pada tahun berikutnya, nilai wajar aset keuangan yang diklasifikasikan dalam kelompok tersedia untuk dijual meningkat dan peningkatan tersebut dapat secara objektif dihubungkan dengan peristiwa yang terjadi setelah pengakuan kerugian penurunan nilai pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian, maka kerugian penurunan nilai tersebut harus dipulihkan melalui laba rugi dan penghasilan komprehensif lain konsolidasian.

- (b) Financial assets classified as available for sale

The Group assesses at each date of the consolidated statement of financial position whether there is objective evidence that a financial asset or a group of financial assets is impaired. Refer to Note 2c.(H).(2) for the criteria of objective evidence of impairment.

A significant or prolonged decline in the fair value of the debt investments below its cost is objective evidence of impairment resulting in the recognition of an impairment loss. If any such evidence exists for available for sale financial assets, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in consolidated statement of profit or loss and other comprehensive income is removed from equity and recognised in the consolidated statement of profit or loss and other comprehensive income.

If, in a subsequent period, the fair value of a financial asset classified as available for sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in the consolidated statement of profit or loss and other comprehensive income, the impairment loss is reversed through the consolidated statement of profit or loss and other comprehensive income.

Kontrak jaminan keuangan adalah kontrak yang mengharuskan penerbit untuk melakukan pembayaran yang ditetapkan untuk mengganti uang pemegang kontrak atas kerugian yang terjadi karena debitur tertentu gagal untuk melakukan pembayaran pada saat jatuh tempo, sesuai dengan ketentuan dari instrumen utang. Jaminan keuangan tersebut diberikan kepada bank-bank, lembaga keuangan dan badan-badan lainnya atas nama debitur untuk menjamin kredit dan fasilitas-fasilitas perbankan lainnya.

Jaminan keuangan awalnya diakui dalam laporan keuangan konsolidasian sebesar nilai wajar pada tanggal jaminan diberikan. Nilai wajar dari jaminan keuangan pada saat dimulainya transaksi pada umumnya sama dengan provisi yang diterima untuk jaminan diberikan dengan syarat dan kondisi normal. Setelah pengakuan awal, liabilitas Bank atas jaminan tersebut diukur pada jumlah yang lebih tinggi antara jumlah awal, dikurangi amortisasi provisi dan estimasi terbaik dari jumlah yang diharapkan akan terjadi untuk menyelesaikan jaminan tersebut. Estimasi ini ditentukan berdasarkan pengalaman transaksi yang sejenis dan kerugian historis masa lalu, dilengkapi dengan penilaian manajemen. Pendapatan provisi yang diperoleh diamortisasi selama jangka waktu jaminan dengan menggunakan metode garis lurus.

Bank menentukan cadangan kerugian penurunan nilai aset keuangan atas kontrak jaminan keuangan yang memiliki risiko kredit dan komitmen berdasarkan nilai yang lebih tinggi antara nilai amortisasi (nilai tercatat) dan nilai kini atas pembayaran liabilitas yang diharapkan akan terjadi (ketika pembayaran atas jaminan tersebut menjadi probable) atau nilai cadangan kerugian penurunan nilai yang dihitung berdasarkan data kerugian historis untuk evaluasi penurunan nilai secara kolektif.

- (c) Financial guarantee contracts and commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the contracts holder for a loss incurred because a specified debtor defaulted to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and other institutions on behalf of customers to secure loans and other banking facilities.

Financial guarantees are initially recognised in the consolidated financial statements at fair value on the date which the guarantee was given. The fair value of a financial guarantee at inception is likely to equal with the provision received because all guarantees are agreed on arm's length terms. Subsequent to initial recognition, the Bank's liabilities under such guarantees are measured at the higher amount between the initial amount, less amortisation of provision recognised, and the best estimates of the amount required to settle the guarantee. These estimation are determined based on experience of similar transactions and history of past losses, supplemented by the judgement from management. The provision income earned is amortised over the period of guarantees using the straight-line method.

The Bank determines impairment losses on financial assets of financial guarantee contracts that have credit risk and commitment based on the value that is higher between the amortised value (carrying value) and the present value of the liabilities that are expected to occur (when payment under the guarantee has become probable) or impairment losses that are calculated based on historical loss data for a collective evaluation of impairment.

Biaya perolehan sukuk *ijarah* dan sukuk *mudharabah* termasuk biaya transaksi. Selisih antara biaya perolehan dan nilai nominal diamortisasi secara garis lurus selama jangka waktu sukuk.

I. Investment in sukuk

Before the initial recognition, the Group determines the classification of investment in sukuk based on the Group's investment objective. Investment in sukuk can be measured as follows:

- Acquisition cost

If the investment is held within a business model that aims to collect contractual cash flows and there is a contractual requirement to determine the specific date of principal payments and/or the returns. The acquisition cost for sukuk *ijarah* and sukuk *mudharabah* includes transaction cost. The difference between acquisition cost and nominal value is amortised using straight-line method during the period of the sukuk instrument.

- Measured at fair value through other comprehensive income

If the investment is held within a business model which its primary purpose is to obtain contractual cash flows and sell off sukuk and there is a contractual requirements determined by specific date of payment of principal and/or results. The acquisition cost of sukuk *ijarah* and sukuk *mudharabah* includes transaction costs. The difference between the acquisition cost and nominal value is amortised on straight-line basis over the terms of sukuk. The changes in fair value are recognised in other comprehensive income. At the time of derecognition, the changes in fair value in other comprehensive income are reclassified to profit or loss as a reclassification adjustment.

- Measured at fair value through profit or loss

The acquisition cost of sukuk *ijarah* and sukuk *mudharabah* is measured at fair value through profit or loss excluding transaction costs. J. Sukuk *mudharabah* yang diterbitkan

Sukuk *mudharabah* yang diterbitkan disajikan sebesar nilai nominal. Biaya-biaya yang timbul dari penerbitan surat berharga dicatat sebagai beban yang ditangguhkan yang disajikan dalam akun "Aset lain-lain" dan diamortisasi secara garis lurus selama jangka waktu sukuk *mudharabah*.

K. Penentuan nilai wajar

Nilai wajar adalah pengukuran berbasis pasar. Pengukuran/penetapan nilai wajar bertujuan untuk mengestimasi harga dimana transaksi teratur (*orderly transaction*) untuk menjual aset atau mengalihkan liabilitas akan terjadi antara pelaku pasar (*market participants*) pada tanggal pengukuran.

Ketika tidak terdapat pasar aktif atau harga suatu instrumen keuangan yang identik tidak dapat diobservasi, Grup dapat mengukur nilai wajar menggunakan teknik penilaian sesuai jenis instrumen keuangan.

Grup dapat melakukan pengukuran nilai wajar, dengan hirarki sebagai berikut:

1. Input Level 1, yaitu harga kuotasian (tanpa penyesuaian) di pasar aktif untuk aset atau liabilitas yang identik yang dapat diakses Grup pada tanggal pengukuran.
2. Input Level 2, yaitu input selain harga kuotasian yang termasuk dalam level 1 yang dapat diobservasi untuk aset atau liabilitas, baik secara langsung atau tidak langsung.
3. Input Level 3, yaitu input yang tidak dapat diobservasi untuk aset atau liabilitas.

Pengukuran nilai wajar mengasumsikan bahwa transaksi untuk menjual aset atau mengalihkan liabilitas terjadi:

- Di pasar utama untuk aset dan liabilitas tersebut; atau
- Jika tidak terdapat pasar utama, di pasar yang paling menguntungkan untuk aset atau liabilitas tersebut.

c. Financial instruments (continued)

J. Sukuk *mudharabah* issued

Sukuk *mudharabah* issued is recognised at nominal amount. Transaction costs from the issuance of sukuk *mudharabah* are recognised as deferred expense and presented as "Other assets" and amortised using straight-line over the terms of sukuk *mudharabah*.

K. Determination of fair value

Fair value is a market based measurement. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction among market participants at the measurement date.

When there is no active market or the price of an identical financial instrument cannot be observed, the Group can measure fair value using valuation techniques according to the type of financial instrument.

The Group can measure fair value, with the following hierarchy:

1. Input Level 1, the quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.
2. Input Level 2, the input other than quoted price included in level 1 that can be observed for assets or liabilities, either directly or indirectly.
3. Input Level 3, the unobservable input for an asset or liability.

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

K. Penentuan nilai wajar (lanjutan)

Nilai wajar suatu aset atau liabilitas diukur menggunakan asumsi yang akan digunakan pelaku pasar ketika menentukan harga aset dan liabilitas tersebut dengan asumsi bahwa pelaku pasar bertindak dalam kepentingan ekonomi terbaiknya.

Pengukuran nilai wajar aset non-keuangan memperhitungkan kemampuan pelaku pasar untuk menghasilkan manfaat ekonomi dengan menggunakan aset dalam penggunaan tertinggi dan terbaiknya atau dengan menjualnya kepada pelaku pasar lain yang akan menggunakan aset tersebut dalam penggunaan tertinggi dan terbaiknya.

Nilai wajar untuk instrumen keuangan yang diperdagangkan di pasar aktif, seperti efek-efek dan obligasi pemerintah, ditentukan berdasarkan nilai pasar yang berlaku pada tanggal laporan posisi keuangan konsolidasian menggunakan harga yang dipublikasikan secara rutin dan berasal dari sumber yang terpercaya, seperti Bloomberg, Reuters atau harga yang diberikan oleh broker (harga kuotasian). Investasi dalam unit reksa dana dinyatakan sebesar nilai pasar sesuai nilai aset bersih dari reksa dana pada tanggal laporan posisi keuangan konsolidasian.

Instrumen keuangan dianggap memiliki kuotasi di pasar aktif, jika harga kuotasi tersedia sewaktu-waktu dan dapat diperoleh secara rutin dari bursa, pedagang efek (*dealer*), perantara efek (*broker*) dan harga tersebut mencerminkan transaksi pasar yang aktual dan rutin dalam suatu transaksi yang wajar. Jika kriteria di atas tidak terpenuhi, maka pasar aktif dinyatakan tidak tersedia. Indikasi-indikasi dari pasar tidak aktif adalah terdapat selisih yang besar antara harga penawaran dan permintaan atau kenaikan signifikan dalam selisih harga penawaran dan permintaan dan hanya terdapat beberapa transaksi terkini.

Untuk efek-efek yang tidak mempunyai harga pasar, estimasi atas nilai wajar efek-efek ditetapkan dengan mengacu pada nilai wajar instrumen lain yang substansinya sama atau dihitung berdasarkan arus kas yang diharapkan terhadap aset bersih efek-efek tersebut.

K. Determination of fair value (continued)

The fair value of an asset or a liability should be measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset at its highest and best use or by selling it to another market participant that would use the asset at its highest and best use.

The fair value of financial instruments traded in active markets, such as marketable securities and government bonds, is determined based on quoted market prices at the consolidated statement of financial position date using price that published regularly and from credible sources such as quoted market prices from Bloomberg, Reuters or broker's quoted price. Investments in mutual fund units are stated at market value, in accordance with the net value of mutual fund assets at the consolidated statement of financial position date.

A financial instrument is deemed to be quoted in an active market if quoted prices are available at any time and can be obtained regularly from stock exchanges, dealers, and brokers. These prices reflect actual and regular market transactions in a fair transaction. If the criteria above are not met, the active market is declared unavailable. Indications of an inactive market are that there is a large gap between the bid and ask prices or a significant increase in the difference between the bid and ask prices, and there are only a few recent transactions.

For marketable securities with no quoted market price, a reasonable estimate of the fair value is determined by reference to the current market value of another instrument which substantially has the same characteristic or calculated based on the expected cash flows of the underlying net asset base of the marketable securities.

c. Instrumen keuangan (lanjutan)

K. Penentuan nilai wajar (lanjutan)

Untuk obligasi pemerintah yang tidak memiliki nilai pasar, estimasi nilai wajar ditentukan dengan menggunakan model internal berdasarkan nilai kini dari arus kas masa depan yang diharapkan (pendekatan *next-repricing method*) dengan menggunakan faktor *deflator*.

L. Reformasi acuan suku bunga

Untuk pengukuran instrumen keuangan yang menggunakan biaya perolehan diamortisasi (aset keuangan instrumen utang yang diklasifikasikan sebagai biaya perolehan diamortisasi dan nilai wajar melalui penghasilan komprehensif lain, serta liabilitas keuangan yang diukur pada biaya perolehan diamortisasi), perubahan arus kas kontraktual masa depan dari instrumen keuangan tersebut yang terjadi akibat reformasi suku bunga (perubahan suku bunga acuan kontraktual dari sebelumnya suku bunga LIBOR menjadi suku bunga acuan alternatif) akan mengubah tingkat suku bunga efektif instrumen keuangan tersebut. Perubahan arus kas kontraktual tersebut tidak mempengaruhi biaya perolehan diamortisasi instrumen keuangan dimaksud, dan tidak berdampak pada laba atau rugi (penerapan praktis). Penerapan praktis tersebut dapat diterapkan jika dan hanya jika 2 (dua) persyaratan berikut terpenuhi:

1. Perubahan arus kas kontraktual tersebut diperlukan sebagai akibat langsung dari reformasi acuan suku bunga; dan
2. Suku bunga acuan alternatif pengganti secara ekonomis setara (*economically equivalent*) dengan suku bunga acuan yang digunakan sebelumnya.

d. Prinsip-prinsip konsolidasian

Laporan keuangan konsolidasian meliputi laporan keuangan Bank Mandiri dan Entitas Anak yang mayoritas sahamnya dimiliki atau dikendalikan oleh Bank Mandiri.

Pengendalian didapat ketika Bank terekspos atau memiliki hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak dan memiliki kemampuan untuk mempengaruhi imbal hasil tersebut melalui kekuasaannya atas Entitas Anak.

c. Financial instruments (continued)

K. Determination of fair value (continued)

For government bonds with no quoted market prices, a reasonable estimate of the fair value is determined using the internal model based on the present value of expected future cash flows using the next-repricing method approach with a deflator factor.

L. Interest rate benchmark reform

For the measurement of financial instruments using amortised cost (financial assets of debt instruments classified as amortised cost and fair value through other comprehensive income, as well as financial liabilities measured at amortised cost), changes in the future contractual cash flows of those financial instruments occurs as a result of interest rate reform (change in the contractual benchmark interest rate from the previous LIBOR interest rate to an alternative benchmark interest rate) will change the effective interest rate of the financial instrument. The change in contractual cash flows does not affect the amortised cost of the financial instrument, and has no impact on profit or loss (practical expedient). Such practical expedient can be applied if and only if the following 2 (two) requirements are met:

1. *The change in contractual cash flows is necessary as a direct result of the reform of benchmark interest rates; and*
2. *The alternative reference interest rate is economically equivalent to the previously used benchmark interest rate.*

d. Principles of consolidation

The consolidated financial statements include the financial statement of Bank Mandiri and its Subsidiaries in which the majority shares are owned or controlled by Bank Mandiri.

Control is presumed to exist where the Bank is exposed, or has rights, to variable returns from its involvement with the Subsidiaries and has ability to use its power to affect its returns from its involvement with the Subsidiaries.

d. Prinsip-prinsip konsolidasian (lanjutan)

Bank mengendalikan Entitas Anak jika dan hanya jika Bank memiliki hak berikut ini:

- a) Kekuasaan atas Entitas Anak (hak yang ada saat ini yang mempengaruhi kemampuan kini untuk mengarahkan aktivitas relevan yang secara signifikan mempengaruhi imbal hasil Entitas Anak).
- b) Eksposur atau hak atas imbal hasil variabel dari keterlibatannya dengan Entitas Anak.
- c) Kemampuan untuk menggunakan kekuasaannya atas Entitas Anak untuk mempengaruhi jumlah imbal hasil Bank.

Pada laporan keuangan konsolidasian Bank Mandiri, semua saldo dan transaksi yang signifikan antar perusahaan yang dikonsolidasi telah dieliminasi. Kepentingan non-pengendali atas laba bersih Entitas Anak disajikan sebagai pengurang dari laba bersih konsolidasian untuk mendapatkan jumlah laba yang menjadi hak pemilik entitas Bank. Kepentingan non-pengendali dalam aset bersih disajikan sebagai bagian dari ekuitas kecuali kepentingan non-pengendali yang berasal dari konsolidasi atas reksa dana disajikan sebagai bagian dari liabilitas dalam laporan posisi keuangan konsolidasian.

Laporan keuangan konsolidasian disusun dengan menggunakan kebijakan akuntansi yang sama untuk peristiwa dan transaksi sejenis dalam kondisi yang sama. Kebijakan akuntansi yang digunakan dalam laporan keuangan konsolidasian telah diterapkan secara konsisten oleh Entitas Anak, kecuali bila dinyatakan lain.

Bila pengendalian atas suatu entitas diperoleh atau berakhir dalam tahun berjalan, hasil usaha entitas tersebut dimasukkan dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian sejak tanggal pengendalian dimulai atau sampai dengan tanggal pengendalian berakhir.

Transaksi kombinasi bisnis entitas sepengendali, berupa pengalihan bisnis yang dilakukan dalam rangka reorganisasi entitas-entitas yang berada dalam suatu kelompok usaha yang sama, bukan merupakan perubahan kepemilikan dalam arti substansi ekonomi, sehingga transaksi tersebut tidak dapat menimbulkan laba atau rugi bagi kelompok usaha secara keseluruhan ataupun bagi entitas individual dalam kelompok usaha tersebut.

Oleh karena transaksi kombinasi bisnis entitas sepengendali tidak mengakibatkan perubahan substansi ekonomi kepemilikan atas bisnis yang dipertukarkan, maka transaksi tersebut diakui pada jumlah tercatat berdasarkan metode penyatuan kepemilikan.

d. Principles of consolidation (continued)

The Bank controls the Subsidiaries if and only if the Bank acquires these rights:

- a) *Power over the Subsidiaries (has existing rights that affect the current ability to direct the relevant activities, that significantly affect the Subsidiaries' returns).*
- b) *Exposure or rights of variable returns from its involvement with the Subsidiaries.*
- c) *The ability to use its power over the Subsidiaries to affect the amount of the Bank's returns.*

In the consolidated financial statements of Bank Mandiri, all significant inter-company balances and transactions have been eliminated. The non-controlling interest net income of Subsidiaries is presented as a deduction to consolidated net income in order to present the Bank's income. Non-controlling interest in net assets is presented as part of equity in the consolidated statement of financial position, except for non-controlling interest from mutual fund consolidation is presented as part of liabilities in the consolidated statement of financial position.

The consolidated financial statements are prepared using a consistent accounting policy for transactions and events in similar circumstances. The accounting policies adopted in preparing the consolidated financial statements have been consistently applied by the Subsidiaries, unless otherwise stated.

If the control on an entity is obtained or ends in the current year, the entity's net income is included in the consolidated statement of profit or loss and other comprehensive income from the date of acquisition of the control or until the date the control ceased.

Business combination transaction amongst entities under common control, in the form of transfer of business conducted for the reorganisation of entities under common control, does not represent a change of ownership in terms of economic substance, therefore, there shall be no gain or loss recognised by the group as a whole and by individual entities within the group.

Since the business combination transaction amongst entities under common control does not cause any change in the economic substance of ownership of the transferred business, therefore the transaction is recognised at book value using the pooling interest method.

Changes in the Bank's ownership interest in Subsidiaries that do not result in a loss of control are accounted for as an equity transaction, in this case a transaction with owners in their capacity as owners. The entity that accepts/releases a business in a combination/separation of business amongst entities under common control, shall recognise the difference between benefits being transferred or received and the recorded amount of every business combination transaction as equity and present it under additional paid-in capital/share premium.

Based on SFAS No. 338 (Revised 2012), the elements of the financial statements of the merged entities, for the period in which the business combination merged entities under common control occurred and for the comparative period presented, are presented in such a way as if the combination had occurred since the beginning of the period when the entities were under common control.

Pada tanggal 1 April 2016, Grup melakukan perubahan kebijakan akuntansi atas tanah dari model biaya menjadi model revaluasi. Tanah disajikan sebesar nilai wajar.

Penilaian terhadap tanah dilakukan oleh penilai independen eksternal yang memiliki sertifikasi. Penilaian atas aset tersebut dilakukan secara berkala untuk memastikan bahwa nilai wajar aset yang direvaluasi tidak berbeda secara material dengan nilai tercatatnya.

Jika nilai wajar dari aset yang direvaluasi mengalami perubahan yang signifikan dan fluktuatif, maka perlu direvaluasi secara tahunan, sedangkan jika nilai wajar dari aset yang direvaluasi tidak mengalami perubahan yang signifikan dan fluktuatif, maka perlu dilakukan revaluasi minimal 3 tahun sekali.

Penurunan nilai tercatat yang timbul dari revaluasi dicatat sebagai beban pada tahun berjalan. Apabila aset tersebut memiliki saldo "Selisih bersih revaluasi aset tetap" yang disajikan sebagai "penghasilan komprehensif lain", maka selisih penurunan nilai tercatat tersebut dibebankan terhadap "Selisih bersih revaluasi aset tetap" dan sisanya diakui sebagai beban tahun berjalan.

Grup telah menerapkan PSAK No. 116 "Sewa" sejak tanggal 1 Januari 2020.

Berbeda dengan akuntansi penyewa, persyaratan untuk akuntansi pesewa sebagian besar tidak berubah.

PSAK No. 116 menentukan apakah kontrak merupakan, atau mengandung sewa atas dasar jika penyewa memiliki hak untuk mengendalikan penggunaan aset selama suatu jangka waktu tertentu untuk dipertukarkan dengan imbalan.

Land rights in the form of right to cultivate, right to build and use rights are not amortised, unless there is evidence to indicate that the extension or renewal of land rights is likely to or definitely not obtained.

SFAS No. 236 (Revised 2014) regarding "Impairment of Assets" requires that the carrying amounts of fixed assets are reviewed at each consolidated statement of financial position date to assess whether they are recorded in excess of their recoverable amounts of the fixed assets. If the carrying value exceeds this estimated recoverable amount, assets are written down to their recoverable amounts of the fixed assets.

ii. Leased assets and liabilities

The Group has implemented SFAS No. 116 "Lease" since 1 January 2020.

SFAS No. 116 applies new or amended requirements with respect to lease accounting. This standard introduces significant changes to lessee accounting by eliminating the distinction between operating and financing leases, and requires recognition of right-of-use assets and recognition of lease liabilities at lease inception for all leases, except for short-term leases and leases of low-value assets. In contrast to lessee accounting, the requirements for lessor accounting are mostly unchanged.

SFAS No. 116 determines whether a contract is, or contains a lease on the basis that the lessee has the right to control the use of the asset for a specified period of time in exchange for certain consideration.

The Group uses a single discount rate for lease portfolios with similar characteristics.

ii. Aset dan liabilitas sewa (lanjutan)

Grup menerapkan pendekatan pengukuran dan pengukuran tunggal untuk seluruh sewa, kecuali untuk sewa jangka pendek dan sewa aset bernilai rendah. Grup mengakui liabilitas sewa untuk melakukan pembayaran sewa dan aset hak guna yang mewakili hak untuk menggunakan aset pendasar.

Grup mengakui aset hak guna pada tanggal dimulainya sewa. Aset hak guna diukur pada biaya perolehan, dikurangi akumulasi penyusutan dan kerugian penurunan nilai, dan disesuaikan untuk setiap pengukuran kembali liabilitas sewa. Liabilitas sewa merupakan jumlah pembayaran sewa yang masih harus dibayar hingga akhir masa sewa yang didiskontokan dengan menggunakan suku bunga pinjaman inkremental. Biaya aset hak guna mencakup jumlah liabilitas sewa yang diakui, biaya langsung awal yang dibayarkan, biaya pemulihan dan pembayaran sewa yang dilakukan pada atau sebelum tanggal mulai sewa dikurangi insentif sewa yang diterima. Aset hak guna disusutkan dengan metode garis lurus selama jangka waktu yang lebih pendek antara masa sewa dengan estimasi masa manfaat aset, sebagai berikut:

- Bangunan	: 20 tahun/years	Buildings	-
- Mesin kantor	: 5 tahun/years	Office machines	-
- Komputer perangkat keras	: 5 tahun/years	Computer hardware	-
- Komputer perangkat lunak	: 5 tahun/years	Computer software	-
- Inventaris kantor	: 5 tahun/years	Office equipment	-
- Inventaris rumah dinas dan mess	: 5 tahun/years	Equipment of official houses and mess	-
- Kendaraan bermotor	: 5 tahun/years	Motor vehicle	-

Jika kepemilikan aset sewa dialihkan ke Grup pada akhir masa sewa atau pembayaran sewa mencerminkan pelaksanaan opsi pembelian, penyusutan dihitung menggunakan estimasi masa manfaat ekonomis aset. Aset hak guna diuji penurunan nilainya sesuai dengan PSAK No. 236 "Penurunan Nilai Aset".

Pada tanggal dimulainya sewa, Grup mengakui liabilitas sewa yang diukur pada nilai kini dari pembayaran sewa masa depan yang akan dilakukan selama masa sewa. Pembayaran sewa termasuk pembayaran tetap (termasuk pembayaran tetap secara-substansi) dikurangi piutang insentif sewa, pembayaran sewa variabel yang bergantung pada indeks atau suku bunga, dan jumlah yang diharapkan akan dibayar dalam jaminan nilai residu. Pembayaran sewa juga termasuk harga eksekusi opsi pembelian yang wajar jika dipastikan akan dilakukan oleh Grup dan pembayaran penalti untuk mengakhiri sewa, jika jangka waktu sewa mencerminkan Grup mengeksekusi opsi penghentian sewa. Pembayaran sewa variabel yang tidak bergantung pada indeks atau suku bunga diakui sebagai beban pada periode di mana peristiwa atau kondisi yang memicu pembayaran terjadi.

(continued)**

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

ii. Leased assets and liabilities (continued)

The Group applies a single recognition and measurement approach to all leases, except for short-term leases and low-value asset leases. The Group recognises a lease liabilities to make lease payments and rights of use assets that represent the right to use the underlying asset.

The Group recognised the rights of use assets at the inception date of the lease. The rights of use assets are measured at cost, less accumulated depreciation and impairment losses, and adjusted for any remeasurement of the lease liabilities. Lease liabilities are the amount of lease payments accrued until the end of the lease term, discounted using the incremental loan interest rate. The cost of right of use assets includes the amount of lease liability recognised, initial direct costs paid, recovery costs and lease payments made on or before the start date of the lease less lease incentives received. Rights of use assets are depreciated using the straight-line method over the shorter period between the lease term and the estimated useful life of the asset, as follows:

If the ownership of the leased asset is transferred to the Group at the end of the lease term or the lease payments reflect the exercise of the purchase option, depreciation is calculated using the estimated useful life of the asset. Rights of use assets are assessed for impairment in accordance with SFAS No. 236 "Impairment of Assets".

At the inception date of the lease, the Group recognises lease liabilities which measured at the present value of future lease payments to be made over the lease term. Lease payments include fixed payments (including substantially fixed payments) less lease incentive receivables, variable lease payments that are index or interest rate dependent, and the amount expected to be paid in a residual value guarantee. Lease payments also include the reasonable exercise price for the purchase option if it is determined to be made by the Group and the payment of a penalty to terminate the lease, if the lease term reflects the Group exercising the lease termination option. Variable lease payments that are not dependent on an index or interest rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

ii. Aset dan liabilitas sewa (lanjutan)

Dalam menghitung nilai kini dari pembayaran sewa, Grup menggunakan suku bunga pinjaman inkremental penyewa pada tanggal dimulainya sewa karena suku bunga implisit dalam sewa tidak dapat ditentukan. Setelah tanggal dimulainya sewa, jumlah liabilitas sewa ditingkatkan untuk mencerminkan pertambahan bunga dan dikurangi pembayaran sewa yang dilakukan. Selain itu, jumlah tercatat liabilitas sewa diukur kembali jika terdapat modifikasi, perubahan jangka waktu sewa, perubahan pembayaran sewa, atau perubahan dalam penilaian opsi untuk membeli aset pendasar.

Sewa jangka pendek dengan durasi kurang dari 12 bulan dan sewa aset bernilai rendah, serta elemen-elemen sewa tersebut, sebagian atau seluruhnya tidak menerapkan prinsip-prinsip pengukuran yang ditentukan oleh PSAK No. 116. Grup akan mengakui pembayaran sewa tersebut dengan dasar garis lurus selama masa sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Beban ini ditunjukkan pada beban umum dan administrasi dalam laporan laba rugi.

Penerapan pencatatan PSAK No. 116 berlaku untuk seluruh sewa (kecuali sebagaimana yang disebutkan sebelumnya), yaitu sebagai berikut:

- (a) Menyajikan aset hak-guna sebagai bagian dari aset tetap dan liabilitas sewa disajikan sebagai bagian dari liabilitas lain-lain dalam laporan posisi keuangan konsolidasian, yang diukur pada nilai kini dari pembayaran sewa masa depan;
- (b) Mencatat penyusutan aset hak-guna dan bunga atas liabilitas sewa dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian; dan
- (c) Memisahkan jumlah pembayaran ke bagian pokok (disajikan dalam kegiatan pendanaan) dan bunga (disajikan dalam kegiatan operasional) dalam laporan arus kas konsolidasian.

r. Fixed assets, leased assets and liabilities, and intangible assets (continued)

ii. Leased assets and liabilities (continued)

In calculating the present value of lease payments, the Group uses the incremental loan interest rate of the lessee at the inception date of the lease because the interest rate implicit in the lease cannot be determined. After the inception date of the lease, the amount of the lease liability is increased to reflect the increase in interest and less lease payments made. In addition, the carrying amount of the lease liability is remeasured if there are modifications, changes in the term of the lease, changes in lease payments, or changes in the valuation of the option to purchase the underlying asset.

Short-term leases with a duration of less than 12 months and leases of low value assets, as well as elements of such leases, partially or wholly do not apply the recognition principles prescribed by SFAS No. 116. The Group will recognise the lease payment on a straight-line basis over the lease term in the consolidated statement of profit or loss and other comprehensive income. This expense is shown under general and administrative expenses in the income statement.

The implementation of SFAS No. 116 payment applies to all leases (except as stated earlier), as follows:

- (a) Present right of use assets as part of fixed assets and leased liabilities are presented as part of other liabilities in the consolidated statement of financial position, measured at the present value of future lease payments;
- (b) Record the depreciation of right of use assets and the interest of lease liability in the consolidated statement of profit or loss and other comprehensive income; and
- (c) Separating the total payment into principal (presented in financing activities) and interest (presented in operating activities) in the consolidated statement of cash flows.

z. Insurance contract (continued)

The Subsidiaries issue insurance contracts for traditional insurance product and investment-linked insurance product. Both of these products have significant insurance risk.

The Subsidiaries' products are divided into the following main categories:

- *Traditional non-participating life insurance*, provide protection to cover the risk of death, accident, critical illness, and health of the insured. The basic of sum insured will be paid upon the occurrence of the risks covered.
- *Unit-link*, insurance product with single or regular premium payment which is linked to investment products, which provides a combined benefit of protection and investment.

Once a contract has been classified as an insurance contract, no reclassification could be performed subsequently unless the terms of the agreement are later amended. All insurance products issued by the Subsidiaries have significant insurance risk.

The Subsidiaries separate the deposit component from unit-link contract as required by SFAS No. 104 when both the following conditions are met:

- *The Subsidiaries can measure separately the "deposit" component (including any embedded submission option, i.e. without taking into account the "insurance" component);*
- *The Subsidiaries' accounting policies do not require to recognise all rights and obligations arising from the "deposit" component.*

The Subsidiaries do not separate the deposit component because only one of the above conditions is met.

Liability adequacy test

Liability adequacy testing is performed at reporting date for contract individually or group of products determined in accordance with the Subsidiaries' method of acquiring, servicing and measuring the profitability of its insurance contracts.

Pengujian kecukupan liabilitas (lanjutan)

Untuk asuransi jiwa, liabilitas kepada pemegang polis khususnya liabilitas untuk klaim masa depan diuji untuk menentukan apakah liabilitas tersebut cukup untuk menutupi semua arus kas keluar di masa depan termasuk semua manfaat yang dijamin dan manfaat tambahan yang dijamin, manfaat partisipasi yang tidak dijamin (jika ada), semua biaya untuk penerbitan polis dan pemeliharaan polis, serta mencerminkan arus kas masuk masa depan yaitu penerimaan premi masa depan, yaitu premi yang diterima di masa depan. Liabilitas dihitung berdasarkan diskonto dari arus kas untuk semua arus kas yang terkait yaitu arus kas keluar dan arus kas masuk seperti yang disebutkan di atas dengan menggunakan seperangkat asumsi estimasi terbaik terkini yang ditetapkan oleh aktuaris Entitas Anak, termasuk asumsi tingkat mortalita, morbidita, tingkat pembatalan polis, biaya, tingkat inflasi dan tingkat suku bunga, serta asumsi marjin atas risiko pemburukan. Entitas Anak yang bergerak dalam bidang asuransi jiwa menerapkan metode *Gross Premium Reserve* dalam perhitungan cadangan premi atas manfaat polis masa depan kepada pemegang polis dengan menggunakan asumsi aktuarial berdasarkan asumsi estimasi terbaik dan marjin atas risiko pemburukan, sehingga pengujian kecukupan liabilitas tidak diperlukan lagi.

Reasuransi

Entitas Anak mereasuransikan sebagian porsi risikonya kepada perusahaan reasuradur. Jumlah premi yang dibayar atau porsi premi atas transaksi reasuransi prospektif diakui selama periode kontrak asuransi sesuai dengan proporsi jumlah proteksi reasuransi yang diterima.

Aset reasuransi termasuk saldo yang diharapkan dibayarkan oleh perusahaan reasuransi untuk *ceded* liabilitas manfaat polis masa depan, *ceded* estimasi liabilitas klaim dan *ceded* cadangan atas premi yang belum merupakan pendapatan. Jumlah manfaat yang ditanggung oleh reasuradur diperkirakan secara konsisten sesuai dengan liabilitas yang terkait dengan polis reasuransi.

Entitas Anak menyajikan aset reasuransi secara terpisah sebagai aset atas liabilitas manfaat polis masa depan, cadangan atas premi yang belum merupakan pendapatan dan estimasi liabilitas klaim.

Jika aset reasuransi mengalami penurunan nilai, Entitas Anak mengurangi nilai tercatat dan mengakui kerugian penurunan nilai tersebut dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian. Aset reasuransi mengalami penurunan nilai jika ada bukti objektif, sebagai akibat dari suatu peristiwa yang terjadi setelah pengakuan awal aset reasuransi, bahwa Entitas Anak tidak dapat menerima seluruh jumlah karena di bawah syarat-syarat kontrak dan dampak pada jumlah yang akan diterima dari reasuradur dapat diukur secara andal.

Liability adequacy test (continued)

For life insurance, the liabilities to policyholder in particular the liabilities for future claim are tested to determine whether the liabilities sufficient to cover all related future cash out flow including all guaranteed benefit and guaranteed additional benefit, non-guaranteed participation benefit feature (if any), all expenses for policies issuance and maintenance, as well as reflecting the future cash inflow, i.e. future premium receipt. The liabilities are calculated based on discounted cash flow basis for all related cash flows i.e. both of cash outflows and cash inflows as mentioned above using a set of most recent best estimate assumptions set by the Subsidiaries' appointed actuary, includes mortality, morbidity, lapses, expenses, inflation rates, and interest rate, assumptions as well as margin for adverse deviation assumptions. Subsidiaries operate in life insurance use Gross Premium Reserve in the premium allowance calculation for future policy benefits to the policyholders using actuary assumptions with best estimate and margin for adverse deviation, therefore liability adequacy test is not required.

Reinsurance

The Subsidiaries reinsure a portion of its risk to reinsurance companies. The amount of premium paid or portion of premium from prospective reinsurance transactions is recognised over the reinsurance contract in proportion with the protection received.

Reinsurance assets include balances expected to be recovered from reinsurance companies for ceded liability for future policy benefits, ceded estimated claim liabilities and ceded unearned premiums allowance. Recovery amount from reinsurers are estimated in a consistent manner with the liability associated with the reinsurance policy.

Subsidiaries present separately reinsurance asset of future policy benefit liabilities, unearned premium allowance, and estimated claim liabilities.

If a reinsurance asset is impaired, the Subsidiaries deducted the carrying amount accordingly and recognise that impairment loss in the consolidated statement of profit or loss and other comprehensive income. A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after initial recognition of the reinsurance asset, that the Subsidiary may not receive all amounts due to it is below the requirement of the contract, and the impact on the amounts that the Subsidiary will receive from the reinsurer can be reliably measured.

Liability for future policy benefits

The liabilities for future policy benefits represent the present value of estimated future policy benefits to be paid to policyholders or their heirs less present value of estimated future premiums to be received from the policyholders and recognised consistently with the recognition of premium income. The liabilities for future policy benefits are determined and computed based on certain formula by the Subsidiaries' actuary.

The Subsidiaries calculate the liability for future policy benefits using Gross Premium Reserve method that reflect the present value of estimated payments of all the guaranteed benefits including all the embedded options available, the present value estimated of all handling costs incurred and also considering the future premium receipt.

Unexpired risk reserve

A liability for contractual benefits that are expected to be incurred in the future is recorded when the premiums are recognised. Manajemen Grup mengevaluasi secara periodik implementasi terhadap peraturan perpajakan yang berlaku terutama yang memerlukan interpretasi lebih lanjut mengenai pelaksanaannya termasuk juga evaluasi terhadap surat ketetapan pajak yang diterima dari kantor pajak. Lebih lanjut, Bank Mandiri membentuk cadangan, jika dianggap perlu berdasarkan jumlah yang diestimasikan akan dibayarkan ke kantor pajak.

Bank Mandiri dan Entitas Anak menerapkan metode liabilitas laporan posisi keuangan (*balance sheet liability method*) untuk menentukan beban pajak penghasilan. Menurut metode liabilitas laporan posisi keuangan, aset dan utang pajak tangguhan diakui untuk semua perbedaan temporer antara nilai aset dan liabilitas yang tercatat di laporan posisi keuangan dengan dasar pengenaan pajak atas aset dan liabilitas tersebut pada setiap tanggal pelaporan. Metode ini juga mensyaratkan adanya pengakuan manfaat pajak di masa datang yang belum digunakan apabila besar kemungkinan bahwa manfaat tersebut dapat direalisasikan di masa yang akan datang.

Aset pajak tangguhan diakui apabila terdapat kemungkinan besar bahwa jumlah laba fiskal pada masa datang akan memadai untuk mengkompensasi aset pajak tangguhan yang muncul akibat perbedaan temporer.

Pajak tangguhan dihitung dengan menggunakan tarif pajak yang berlaku atau secara substansial diberlakukan pada periode dimana aset tersebut direalisasi atau liabilitas tersebut diselesaikan. Perubahan nilai tercatat aset dan liabilitas pajak tangguhan yang disebabkan oleh perubahan tarif pajak dibebankan pada laporan laba rugi dan penghasilan komprehensif lain konsolidasian tahun berjalan, kecuali untuk transaksi-transaksi yang sebelumnya telah langsung dibebankan atau dikreditkan ke ekuitas.

Koreksi atas liabilitas pajak diakui pada saat surat ketetapan pajak diterima, atau apabila diajukan keberatan dan/atau banding, maka koreksi diakui pada saat keputusan atas keberatan dan/atau banding tersebut diterima. Manajemen juga dapat membentuk pencadangan terhadap liabilitas pajak di masa depan sebesar jumlah yang diestimasikan akan dibayarkan ke kantor pajak jika berdasarkan evaluasi pada tanggal laporan posisi keuangan konsolidasian terdapat risiko pajak yang *probable*. Asumsi dan estimasi yang digunakan dalam perhitungan pembentukan cadangan tersebut memiliki unsur ketidakpastian.

The Group's management periodically evaluates the implementation of prevailing tax regulations especially for those that are subject to further interpretation for its implementation, including evaluation on tax assessment letters received from tax authorities. Furthermore, the Bank establishes provisions based on the necessary amounts expected to be paid to the tax authorities.

Bank Mandiri and Subsidiaries apply the balance sheet liability method to determine income tax expense. Under the balance sheet liability method, deferred tax assets and liabilities are recognised for all temporary differences arising between the tax base of assets and liabilities and their carrying amount in the consolidated statement of financial position at each reporting date. This method also requires the recognition of unused future tax benefits, to the extent that realisation of such benefits are probable in the future.

Deferred tax assets are recognised only to the extent that is probable that future taxable income will be sufficient to compensate deferred tax asset arising from temporary differences.

Deferred tax is calculated using tax rates enacted or substantively applied to the period during which the asset is realised or the liability is settled. The changes to the carrying value of deferred tax assets and liabilities due to the changes of tax rates are charged in the current year, consolidated statement of profit or loss and other comprehensive income except for transactions which previously have been directly charged or credited to equity.

Adjustments to taxation obligations are recognised when tax assessment letter is received or, if objection/appeal is submitted, adjustments are recognised when the result of objection/appeal is received. Management provides provision for future tax liability at the estimated amount that will be payable to the tax office if there is a probable tax exposure, based on management's assessment as of the date of consolidated statement of financial position. Assumptions and estimation used in the calculation of provision may involve element of uncertainty.

Dana *syirkah* temporer adalah dana yang diterima oleh Entitas Anak. Entitas Anak mempunyai hak untuk mengelola dan menginvestasikan dana, baik sesuai dengan kebijakan Entitas Anak atau kebijakan pembatasan dari pemilik dana, dengan keuntungan dibagikan sesuai dengan kesepakatan.

Hubungan antara Entitas Anak dan pemilik dana *syirkah* temporer merupakan hubungan kemitraan berdasarkan akad *mudharabah muthlaqah*, *mudharabah muqayyadah* atau *musyarakah*. Contoh dari dana *syirkah* temporer adalah penerimaan dana dari investasi *mudharabah muthlaqah*, *mudharabah muqayyadah* dan akun lain yang sejenis.

Dana *syirkah* temporer tidak dapat digolongkan sebagai ekuitas karena mempunyai waktu jatuh tempo dan pemilik dan tidak mempunyai hak kepemilikan yang sama dengan pemegang saham seperti hak *voting* dan hak atas realisasi keuntungan yang berasal dari aset lancar dan aset non investasi.

The examples of temporary syirkah funds are investment funds received from mudharabah muthlaqah, mudharabah muqayyadah and other similar accounts.

- 1) *Mudharabah muthlaqah* represents *mudharabah* in which the fund owner (*shahibul maal*) entrusts the fund manager (*mudharib/Subsidiary*) in managing its investment.
- 2) *Mudharabah muqayyadah* represents *mudharabah* in which the fund owner sets restrictions to the fund manager regarding, among others, the place, the means and/or the object of investment.

Temporary syirkah funds cannot be classified as liability because the Subsidiary does not have any liability to return the fund to the owners when experience losses, except for losses due to the Subsidiary's management negligence or default. On the other hand, temporary syirkah funds also cannot be classified as equity, because of the existence of maturity period and the depositors do not have the same rights as the shareholders, such as voting rights and the rights of realised gain from current asset and other non-investment accounts.

af. Pendapatan dan beban bunga serta pendapatan dan beban syariah

(i) Konvensional

Pendapatan dan beban bunga untuk semua instrumen keuangan dengan *interest bearing* dicatat dalam "Pendapatan bunga" dan "Beban bunga" di dalam laporan laba rugi dan penghasilan komprehensif lain konsolidasian menggunakan metode suku bunga efektif.

Metode suku bunga efektif adalah metode yang digunakan untuk menghitung biaya perolehan diamortisasi dari aset keuangan atau liabilitas keuangan dan metode untuk mengalokasikan pendapatan bunga atau beban bunga selama periode yang relevan. Suku bunga efektif adalah suku bunga yang secara tepat mendiskontokan estimasi pembayaran atau penerimaan kas di masa datang selama perkiraan umur dari instrumen keuangan, atau jika lebih tepat, digunakan periode yang lebih singkat untuk memperoleh nilai tercatat bersih dari aset keuangan atau liabilitas keuangan. Pada saat menghitung suku bunga efektif, Grup mengestimasi arus kas dengan mempertimbangkan seluruh persyaratan kontraktual dalam instrumen keuangan tersebut, namun tidak mempertimbangkan kerugian kredit di masa datang. Perhitungan ini mencakup seluruh komisi, provisi dan bentuk lain yang diterima oleh para pihak dalam kontrak yang merupakan bagian tak terpisahkan dari suku bunga efektif, biaya transaksi dan seluruh premi atau diskon lainnya.

Jika aset keuangan atau kelompok aset keuangan serupa telah diturunkan nilainya sebagai akibat kerugian penurunan nilai, maka pendapatan bunga yang diperoleh setelahnya diakui atas bagian aset keuangan yang tidak mengalami penurunan nilai dari aset keuangan yang mengalami penurunan nilai, berdasarkan suku bunga yang digunakan untuk mendiskonto arus kas masa datang dalam menghitung kerugian penurunan nilai.

ae. Temporary syirkah funds (continued)

Temporary syirkah funds represent one of the consolidated statement of financial position accounts which is in accordance with sharia principle that provide right to the Subsidiary to manage fund, including to combine the funds with the other funds.

The owner of temporary syirkah funds receive parts of profit in accordance with the agreement and receive loss based on the proportion to the total funds. The profit distribution of temporary syirkah funds might be based on profit sharing or revenue sharing concept.

af. Interest income and expense and sharia income and expense

(i) Conventional

Interest income and expense for all interest-bearing financial instruments are recognised as "Interest income" and "Interest expense" in the consolidated statement of profit or loss and other comprehensive income using the effective interest method.

The effective interest method is a method used for calculating the amortised cost of financial assets and liabilities and method for allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to obtain the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, the Group estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all commissions, provision and other fees received between parties in the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, subsequently, interest income is recognised for the non-impaired portion of the impaired financial assets using the interest rate used to discount the future cash flows for measuring the impairment loss.

Liabilitas pensiun

Bank Mandiri menyelenggarakan program pensiun iuran pasti yang pesertanya adalah pegawai aktif Bank Mandiri sejak tanggal 1 Agustus 1999, serta program pensiun manfaat pasti yang berasal dari masing-masing dana pensiun Bank Peserta Penggabungan. Program ini didanai melalui pembayaran kepada pengelola dana pensiun sebagaimana ditentukan dalam perhitungan aktuaria yang dilakukan secara berkala.

Liabilitas imbalan pensiun Bank Mandiri dan Entitas Anak dihitung dengan membandingkan manfaat yang akan diterima oleh karyawan dari program pensiun pada usia pensiun normal dengan manfaat yang akan diterima berdasarkan UU Ketenagakerjaan No. 13/2003 dimana telah diperbaharui menggunakan UU Cipta Kerja No. 11/2020 sebagaimana diubah dengan UU No. 6/2023 tentang Penetapan Peraturan Pemerintah Pengganti Undang-Undang No. 2 Tahun 2022 Tentang Cipta Kerja Menjadi Undang-Undang berdasarkan Perjanjian Kerja Bersama yang telah diperbaharui pada akhir 2021 setelah dikurangi dengan akumulasi kontribusi karyawan dan hasil investasinya. Apabila manfaat pensiun lebih kecil dari pada manfaat menurut UU Cipta Kerja No. 11/2020, maka Bank dan Entitas Anak membayar kekurangan tersebut.

Program pensiun berdasarkan UU Ketenagakerjaan adalah program imbalan pasti karena UU Ketenagakerjaan menentukan rumus tertentu untuk menghitung jumlah minimum imbalan pensiun. Program pensiun iuran pasti adalah program pensiun yang iurannya ditetapkan dalam peraturan dana pensiun dan seluruh iuran serta hasil pengembangannya dibukukan pada rekening masing-masing peserta sebagai manfaat pensiun sebagaimana tercantum dalam UU No. 4 tahun 2023 tanggal 12 Januari 2023 tentang Pengembangan dan Penguatan Sektor Keuangan.

Nilai kini liabilitas manfaat pasti ditentukan dengan mendiskontokan estimasi arus kas keluar masa depan dengan menggunakan tingkat diskonto imbal hasil obligasi pemerintah dalam mata uang yang sama dengan mata uang imbalan yang akan dibayarkan dan waktu jatuh tempo yang kurang lebih sama dengan waktu jatuh tempo imbalan yang bersangkutan.

ai. Employee benefits

Pension liability

Bank Mandiri established a defined contribution pension plan covering substantially all of its eligible active employees since 1 August 1999 and also defined benefit pension plans, which were derived from each of the Merged Banks' pension plan. This program is funded through payment to pension fund's management as defined in the actuarial calculation which done regularly.

Bank Mandiri and Subsidiaries' pension liability have been calculated by comparing the benefit that will be received by an employee at normal pension age from the Pension Plans with the benefit that will be received as stipulated under the Employment Law No. 13/2003 which has been updated using the Employment Regulations No. 11/2020 as amended by UU No. 6/2023 concerning Government In Lieu Of Law No. 2 Of 2022 Concerning Stipulation Employment Regulations Become Law based on the Collective Labor Agreement which was renewed at the end of 2021 after deducting accumulated employee contributions and the results of its investments. If the pension benefit from the Pension Plans is less than the benefit as required by the Employment Regulations No. 11/2020, the Bank and Subsidiaries will have to pay such shortage.

The pension plan based on the Labor Law is a defined benefit plan because the Labor Law sets a certain formula to calculate the minimum pension benefit. A defined contribution plan is a pension plan that defines an amount of pension contribution based on pension fund regulation and all contribution including investment return are recorded in its account's member as pension benefit as stated in Law No. 4 year 2023 dated 12 January 2023 regarding Development and Strengthening Financial Sector.

The defined benefit pension liability recognised in the consolidated statement of financial position is the present value of the defined benefit obligation at the consolidated statement of financial position date less the fair value of plan assets, adjusted with unrealised actuarial gains or losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method on a regular basis for periods not exceeding one year. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using the discount rate of government bonds' yield that are denominated in the currency in which the benefit will be paid, and that have terms to maturity approximating the terms of the related pension liability.

Non-current assets (or disposal groups) held for sale are not depreciated or amortised while classified as held for sale. Impairment losses on non-current assets (or disposal groups) held for sale are recognised in the income statement as the difference between the carrying amount and the fair value less costs to sell. Gains on the difference between the carrying amount and the fair value, less costs to sell, are recognised in the income statement up to the amount of any previously recognised impairment loss.

Non-current assets (or disposal groups) held for sale are presented separately from other assets in the statement of financial position, and liabilities (or disposal groups) held for sale are presented separately from other liabilities in the statement of financial position.

**3. USE OF CRITICAL ACCOUNTING ESTIMATES AND
JUDGEMENTS**

Several estimates and assumptions are created in the preparation of the consolidated financial statements in which management judgment is required in determining the methodology in the valuation of assets and liabilities.

Management makes estimation and assumptions that affect the reported amounts of assets and liabilities within the one next financial year. All estimation and assumptions required in conformity with Statement of Financial Accounting Standard are the best estimation undertaken in accordance with the applicable standards. Estimation and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Although these estimates and assumptions are based on management's best knowledge of current events and activities, actual results may differ from those estimates and assumptions.

Sumber utama ketidakpastian estimasi

**a. Cadangan kerugian penurunan nilai aset
keuangan**

Evaluasi atas kerugian penurunan nilai aset keuangan yang dicatat pada biaya perolehan diamortisasi dan efek utang yang diklasifikasikan sebagai nilai wajar melalui pendapatan komprehensif lain dijelaskan di Catatan 2c.

Cadangan kerugian penurunan nilai terkait dengan pihak lawan spesifik dalam seluruh cadangan kerugian penurunan nilai dibentuk atas tagihan yang penurunan nilainya dievaluasi secara individual berdasarkan estimasi terbaik manajemen atas nilai tunai arus kas yang diharapkan akan diterima. Dalam menghitung cadangan kerugian penurunan nilai, manajemen membuat pertimbangan mengenai kondisi keuangan dari pihak lawan dan nilai neto yang dapat direalisasi dari agunan yang diterima. Setiap aset yang mengalami penurunan nilai dievaluasi dan strategi penyelesaiannya serta estimasi arus kas yang dinilai dapat diperoleh kembali dan disetujui secara independen oleh Credit Risk Management Unit.

Evaluasi cadangan kerugian penurunan nilai secara kolektif meliputi kerugian kredit yang melekat pada portofolio tagihan dengan karakteristik ekonomi yang serupa ketika terdapat kenaikan risiko kredit yang signifikan atau terdapat bukti objektif bahwa telah terjadi penurunan nilai tagihan dalam portofolio tersebut, namun penurunan nilai secara individu belum dapat diidentifikasi. Dalam menentukan perlunya untuk membentuk cadangan kerugian penurunan nilai secara kolektif, manajemen mempertimbangkan faktor-faktor seperti kualitas kredit, besarnya portofolio, konsentrasi kredit dan faktor-faktor ekonomi. Dalam mengestimasi cadangan yang dibutuhkan, asumsi-asumsi dibuat untuk menentukan model kerugian ekspektasian dan untuk menentukan parameter input yang diperlukan, berdasarkan pengalaman historis, kondisi ekonomi saat ini, dan prakiraan kondisi ekonomi di masa mendatang (*forecasting*). Ketepatan dari cadangan ini bergantung pada seberapa tepat estimasi arus kas masa depan untuk menentukan cadangan individual serta asumsi model dan parameter yang digunakan dalam penentuan cadangan kolektif.

b. Menentukan nilai wajar instrumen keuangan

Dalam menentukan nilai wajar aset dan liabilitas keuangan yang tidak mempunyai harga pasar, Grup menggunakan teknik penilaian seperti yang dijelaskan dalam Catatan 2c untuk instrumen keuangan yang tidak diperdagangkan secara aktif dan memiliki informasi harga yang terbatas, nilai wajar yang kurang objektif dan membutuhkan berbagai tingkat penilaian tergantung pada likuiditas, konsentrasi, faktor ketidakpastian pasar, asumsi harga dan risiko lainnya.

**a. Allowances for impairment losses of financial
assets**

Evaluation of impairment losses on financial assets which is recognised at amortised cost and debt securities classified as fair value through other comprehensive income are described in Note 2c.

Allowance for impairment losses related to a specific counterparty as part of the entire allowance for impairment losses are established for receivables that are individually evaluated for impairment based on management's best estimate of the present value of cash flows expected to be received. In calculating the allowance for impairment losses, management makes judgements regarding of the financial condition of the counterparty and the net realizable value of the collateral received. Each impaired asset is evaluated, and its settlement strategy and estimation of cash flows considered recoverable are independently approved by the Credit Risk Management Unit.

*Collectively assessed impairment allowances cover credit losses inherent in portfolios with similar economic characteristics when there is a significant increase in credit risk or objective evidence to suggest the impairments are exist within the portfolio, but the individual impaired items cannot yet be identified. In determining the need to establish allowance for collective impairment, management considers factors such as credit quality, size of portfolio, credit concentrations, and economic factors. In estimating the required allowance, the assumptions made to determine expected default and loss model and to determine the required input parameters which are based on historical experience and estimated future economic conditions (*forecasting*). The accuracy of this allowance depends on how precise the estimated future cash flows to determine the individual allowance and the model assumptions and parameters used in determining collective allowance.*

b. Determining fair values of financial instruments

In determining the fair value for financial assets and financial liabilities for which there is no observable market price, the Group uses the valuation techniques as described in Note 2c for financial instruments that are traded infrequently and have limited pricing information, fair value is less objective and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks.

c. Imbalan pensiun

Program-program pensiun ditentukan berdasarkan perhitungan dari aktuaria. Perhitungan aktuaria menggunakan asumsi-asumsi seperti tingkat diskonto, tingkat pengembalian investasi, tingkat kenaikan gaji, tingkat kematian, tingkat pengunduran diri dan lain-lain (Catatan 2ai dan 51). Perubahan asumsi ini akan mempengaruhi nilai liabilitas pensiun.

Grup menentukan tingkat diskonto yang sesuai pada akhir periode pelaporan, yakni *zero coupon bond* yang digunakan untuk menentukan nilai kini arus kas keluar masa depan estimasian yang diharapkan untuk menyelesaikan liabilitas pensiun. Dalam menentukan tingkat suku bunga yang sesuai, Grup mempertimbangkan imbal hasil obligasi pemerintah yang didenominasikan dalam mata uang imbalan akan dibayar dan memiliki jangka waktu yang serupa dengan jangka waktu liabilitas pensiun yang terkait. Asumsi kunci liabilitas pensiun lainnya sebagian ditentukan berdasarkan kondisi pasar saat ini.

d. Liabilitas asuransi untuk kontrak asuransi

Liabilitas kepada pemegang polis (manfaat polis masa depan dari produk *non-unit link* dan estimasi liabilitas klaim) Entitas Anak dicatat di laporan posisi keuangan konsolidasian sebagai bagian dari "Liabilitas lain-lain" berdasarkan perhitungan aktuaris dengan menggunakan asumsi aktuarial yaitu asumsi estimasi terbaik dan margin atas risiko pemburukan.

e. Aset pajak tangguhan

Aset pajak tangguhan diakui atas seluruh perbedaan temporer yang dapat dikurangkan, sepanjang besar kemungkinannya bahwa penghasilan kena pajak akan tersedia sehingga perbedaan temporer tersebut dapat digunakan. Estimasi signifikan oleh manajemen disyaratkan dalam menentukan jumlah aset pajak tangguhan yang dapat diakui, berdasarkan saat penggunaan dan tingkat penghasilan kena pajak serta strategi perencanaan pajak masa depan. Bank tidak memperhitungkan sebagian manfaat aset pajak tangguhan karena manajemen Bank berpendapat bahwa aset pajak tangguhan tersebut tidak dapat terpulihkan di masa yang akan datang.

c. Pension benefits

Pension programs are determined based on actuarial valuation. The actuarial valuation uses assumptions such as discount rate, expected rate of return on investments, future salary increases, mortality rate, resignation rate and others (refer to Note 2ai and 51). Any changes in those assumptions will impact the liability balance of employee benefit obligations.

The Group determines the appropriate discount rate at the end of each year, which is the zero coupon bond that used to determine the present value of estimated future cash outflows expected to settle the pension obligations. In determining the appropriate discount rate, the Group considers the government bonds' yields denominated in currency and have similar period with payments that will be made and have terms to maturity approximating the terms of the related employee benefit liability. Other key assumptions for pension obligations mostly are determined based on current market conditions.

d. Insurance liabilities on insurance contracts

Liabilities to policyholders (future policy benefits from non-unit linked products and estimated claim liabilities) of Subsidiaries are recorded in the consolidated statement of financial position as part of "Other liabilities" based on actuarial calculations using actuarial assumptions, which is the best estimate assumptions and margin for risk of deterioration.

e. Deferred tax assets

Deferred tax assets are recognised for all deductible temporary differences, as long as taxable income most likely will be available so that the temporary differences can be utilised. Significant estimation by management are required in determining the amount of deferred tax assets that can be recognised, based on utilisation period and the level of taxable income and future tax planning strategies. The Bank does not consider some of the benefits of deferred tax assets as management believes that those part of deferred tax assets will not be recoverable in the future.

f. Penyusutan dan estimasi umur manfaat aset tetap

Biaya perolehan aset tetap disusutkan dengan menggunakan metode garis lurus berdasarkan taksiran masa manfaat ekonomisnya. Manajemen Bank mengestimasi masa manfaat ekonomis aset tetap antara 4 (empat) sampai dengan 20 (dua puluh) tahun.

Perubahan tingkat pemakaian dan perkembangan teknologi dapat mempengaruhi masa manfaat ekonomis dan nilai sisa aset, dan karenanya biaya penyusutan masa depan mungkin direvisi.

Nilai tercatat atas aset tetap Bank diungkapkan pada Catatan 18.

g. Penurunan nilai aset non-keuangan

Bank Mandiri dan Entitas Anak mengevaluasi penurunan nilai aset non-keuangan apabila terdapat kejadian atau perubahan keadaan yang mengindikasikan bahwa nilai tercatat aset non-keuangan tidak dapat dipulihkan kembali. Faktor-faktor penting yang dapat menyebabkan penurunan nilai aset non-keuangan adalah sebagai berikut:

- Performa yang tidak tercapai secara signifikan terhadap ekspektasi historis atau proyeksi hasil operasi di masa yang akan datang;
- Perubahan yang signifikan dalam cara penggunaan aset atau strategi bisnis secara keseluruhan; dan
- Industri atau tren ekonomi yang secara signifikan bernilai negatif.

Manajemen Bank dan Entitas Anak mengakui kerugian penurunan nilai apabila nilai tercatat aset melebihi nilai terpulihkannya. Nilai terpulihkan adalah nilai yang lebih tinggi antara nilai wajar dikurangi biaya pelepasan dengan nilai pakai aset (atau unit penghasil kas). Nilai terpulihkan diestimasi untuk aset individual atau, jika tidak memungkinkan, untuk unit penghasil kas yang mana aset tersebut merupakan bagian daripada unit tersebut.

h. Revaluasi atas nilai wajar tanah

Grup menggunakan spesialis penilai independen untuk menilai nilai wajar atas tanah. Tanah dinilai berdasarkan referensi atas bukti berdasarkan pasar, menggunakan nilai yang dapat diukur setelah disesuaikan dengan faktor pasar spesifik seperti lokasi dan kondisi dari tanah.

f. Depreciation and estimated useful life of fixed assets

Cost of acquisition of fixed assets are depreciated using the straight-line method based on their estimated economic useful life. Bank's management estimates the useful lives of the fixed assets between 4 (four) to 20 (twenty) years.

Changes in the level of usage and technological developments could affect the economic useful lives and residual value of assets, and therefore future depreciation charges may be revised.

The carrying value of the Bank's fixed assets is disclosed in Note 18.

g. Impairment of non-financial assets

Bank Mandiri and its Subsidiaries assess impairment of non-financial assets whenever there are events or changes in circumstances indicate that the carrying value of non-financial assets cannot be recovered. Important factors that could cause impairment of non-financial assets are as follows:

- Performance is not achieved significantly against historical expectations or projected operating results in the future;*
- A significant change in the way of the asset usage or the overall business strategy; and*
- Industry or economic trends are significantly negative.*

The Management of the Bank and its Subsidiaries recognise an impairment loss if the carrying amount of the asset exceeds its recoverable amount. Recoverable amount is the higher value between the fair value minus costs of disposal and the value in use of the asset (or cash-generating unit). Recoverable amount is estimated for individual assets or, if not possible, for the cash-generating unit in which the asset is part of the unit.

h. Revaluations of land

The Group engaged independent valuation specialists to assess fair value of land. Lands were valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as location and condition of land.

i. Menentukan jangka waktu kontrak dengan opsi perpanjangan dan penghentian kontrak - Grup sebagai penyewa

Grup menentukan jangka waktu sewa sebagai jangka waktu sewa yang tidak dapat dibatalkan, bersama dengan periode yang dicakup oleh opsi untuk memperpanjang masa sewa jika dipastikan akan dilaksanakan, atau periode apa pun yang dicakup oleh opsi untuk menghentikan sewa, jika cukup wajar untuk tidak dilakukan.

Grup memiliki beberapa kontrak sewa yang mencakup opsi perpanjangan dan penghentian jangka waktu sewa. Grup menerapkan penilaian dalam mengevaluasi apakah dapat dipastikan jika akan menggunakan opsi untuk memperpanjang atau menghentikan sewa. Hal tersebut dilakukan dengan mempertimbangkan seluruh fakta dan keadaan yang relevan yang memberikan insentif ekonomi untuk melakukan perpanjangan atau penghentian sewa. Setelah tanggal dimulainya, Grup menilai kembali masa sewa, jika terdapat peristiwa atau perubahan signifikan dalam keadaan yang berada dalam kendali dan mempengaruhi apakah penyewa cukup pasti untuk mengeksekusi opsi memperpanjang atau menghentikan sewa.

Pertimbangan akuntansi yang penting

Pertimbangan akuntansi yang penting dalam menerapkan kebijakan akuntansi Bank dan Entitas Anak meliputi:

a. Usaha yang berkelanjutan

Manajemen Bank dan Entitas Anak telah melakukan penilaian atas kemampuan Bank dan Entitas Anak untuk melanjutkan kelangsungan usahanya dan berkeyakinan bahwa Bank dan Entitas Anak memiliki sumber daya untuk melanjutkan usahanya di masa mendatang. Selain itu, manajemen tidak mengetahui adanya ketidakpastian material yang dapat menimbulkan keraguan yang signifikan terhadap kemampuan Bank dan Entitas Anak untuk mempertahankan kelangsungan hidupnya. Oleh karena itu, laporan keuangan konsolidasian telah disusun atas dasar usaha yang berkelanjutan.

i. Determine the contract term with options for extension and termination of the contract - the Group as lessee

The Group determines the lease term as the term of the lease that cannot be canceled, together with the period covered based on the option to extend the lease if it is determined to be exercised, or any period covered by the option to terminate the lease, if it is reasonably not to do so.

The Group has several lease contracts that include options for extension and termination of the lease terms. The Group applies its judgment in evaluating whether it is certain to exercise the option to extend or terminate the lease. This is done by considering all relevant facts and circumstances that provide economic incentives to extend or terminate the lease. After the commencement date, the Group reassesses the lease term, if there is a significant event or change in circumstances which is under its control and affects whether the lessee is certain enough to exercise the option to extend or terminate the lease.

Significant accounting judgements

Accounting judgements that are important in applying accounting policies of the Bank and its Subsidiaries include:

a. Going concern

The Management of the Bank and its Subsidiaries have assessed the ability of the Bank and its Subsidiaries to continue its business and believes that the Bank and Subsidiaries have the resources to continue their business in the future. In addition, management is not aware of any material uncertainties that may cause significant doubt on the ability of the Bank and Subsidiaries to maintain its viability. Therefore, the consolidated financial statements have been prepared on the basis of a going concern.

4. Nilai wajar tingkat 2 dari tanah dihitung dengan menggunakan pendekatan perbandingan harga pasar dan estimasi pendapatan dan biaya yang dihasilkan oleh aset. Harga pasar dari tanah yang paling mendekati disesuaikan dengan perbedaan atribut utama seperti ukuran aset, lokasi dan penggunaan aset. Input yang paling signifikan dalam pendekatan penilaian ini adalah asumsi harga per meter.

5. Hak atas tanah diperoleh berdasarkan Sertifikat Hak Guna Bangunan ("HGB") yang dapat diperbaharui dengan masa yang akan berakhir antara tahun 2024 sampai tahun 2053. Mengacu pada praktik di masa lampau, Grup memiliki keyakinan dapat memperpanjang HGB tersebut.

Aset tetap yang telah terdepresiasi penuh namun masih digunakan oleh Bank Mandiri antara lain berupa mesin-mesin kantor, peralatan percetakan, peralatan kantor dan perumahan.

7. Manajemen berpendapat tidak terdapat indikasi penurunan nilai atas aset tetap tanggal 31 Desember 2024 dan 2023.

a. Modal dasar, ditempatkan dan disetor (lanjutan)

Penetapan modal ditempatkan dan disetor sebesar Rp4.000.000 oleh Pemerintah Republik Indonesia pada tanggal pendirian Bank Mandiri, telah dilaksanakan sebagai berikut:

- Pembayaran secara tunai melalui Bank Indonesia sejumlah Rp1.600.004.
- Penempatan dalam saham yang dicatat sebagai penyertaan saham pada Bank Peserta Penggabungan sejumlah Rp599.999 untuk setiap Bank atau jumlah keseluruhannya Rp2.399.996, melalui pengalihan saham milik Pemerintah Republik Indonesia pada setiap Bank Peserta Penggabungan kepada Bank Mandiri, seperti yang telah disebut dalam Rapat Umum Pemegang Saham Luar Biasa dari Bank Peserta Penggabungan. Berdasarkan perjanjian *inbreg* yang telah diaktakan dengan Akta No. 9 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 2 Oktober 1998, Bank Mandiri dan Pemerintah Republik Indonesia setuju untuk mengalihkan saham-saham tersebut sebagai pembayaran untuk saham baru yang akan dikeluarkan oleh Bank Mandiri.

Berdasarkan perubahan anggaran dasar Bank Mandiri yang dituangkan dalam Akta No. 98 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 24 Juli 1999, pemegang saham memutuskan untuk meningkatkan modal disetor (modal saham) Bank Mandiri dari Rp4.000.000 menjadi Rp4.251.000 dan jumlah tersebut akan dibayar oleh Pemerintah Republik Indonesia. Penambahan sebesar Rp251.000 merupakan hasil konversi dari tambahan modal disetor menjadi modal saham akibat dari adanya kelebihan obligasi rekapitalisasi yang diterbitkan dalam Program Rekapitalisasi Pertama berdasarkan Peraturan Pemerintah No. 52 Tahun 1999.

Berdasarkan keputusan RUPS-LB tanggal 29 Mei 2003 yang dituangkan dalam Akta No. 142 yang dibuat oleh Notaris Sutjipto, S.H., tanggal 29 Mei 2003, pemegang saham Bank Mandiri antara lain menyetujui:

- Pelaksanaan *Initial Public Offering* (IPO).
- Perubahan struktur permodalan Bank Mandiri.
- Perubahan anggaran dasar Bank Mandiri.

Sehubungan dengan keputusan perubahan struktur permodalan di atas, modal saham ditempatkan dan disetor Bank Mandiri dinaikkan menjadi Rp10.000.000 serta dilakukan *stock split* saham Bank Mandiri yang semula dengan nilai nominal Rp1.000.000 (nilai penuh) per lembar menjadi Rp500 (nilai penuh) per lembar saham. Dengan dilakukannya *stock split* tersebut, jumlah lembar saham modal dasar Bank Mandiri meningkat dari 16.000.000 lembar saham menjadi 32.000.000 lembar saham, sedangkan jumlah lembar saham modal ditempatkan dan disetor meningkat dari 10.000.000 lembar saham dengan nilai nominal Rp1.000.000 (nilai penuh) menjadi 20.000.000 lembar saham dengan nilai nominal Rp500 (nilai penuh) terdiri dari 1 Saham Seri A Dwiwarna dan 19.999.999.999 Saham Biasa Seri B yang dimiliki oleh Negara Republik Indonesia.

40. EQUITY (continued)

a. Authorised, issued and fully paid capital (continued)

The determination of issued and fully paid capital amounted to Rp4,000,000 by the Government of the Republic of Indonesia at the date of establishment of Bank Mandiri was carried out as follows:

- Cash payment through Bank Indonesia amounted to Rp1,600,004.
- Placements in shares recorded as investments in shares of the Merged Banks amounted to Rp599,999 each or totaling Rp2,399,996, through the transfer of shares of the Government of the Republic of Indonesia in each of the Merged Banks to Bank Mandiri, as resolved during the respective Extraordinary General Shareholders' Meetings of the Merged Banks. Based on the *inbreg* agreement approved by Notarial Deed No. 9 of Notary Sutjipto, S.H., dated 2 October 1998, Bank Mandiri and the Government of the Republic of Indonesia agreed to transfer those shares as payment for new shares to be issued by Bank Mandiri.

Based on the amendments to the Articles of Association of Bank Mandiri which stated in the Notarial Deed No. 98 of Notary Sutjipto, S.H. dated 24 July 1999, the shareholders resolved to increase the paid-in capital (share capital) of Bank Mandiri from Rp4,000,000 to Rp4,251,000 to be entirely paid by the Government of the Republic of Indonesia. The increase of Rp251,000 was a conversion from additional paid-in capital to share capital as a result of an excess from recapitalisation bonds issued under the First Recapitalisation Program based on Government Regulation No. 52 year 1999.

Based on the RUPS – LB decision dated 29 May 2003, which was documented in Notarial Deed No. 142 of Notary Sutjipto, S.H., dated 29 May 2003, the shareholders approved these following matters:

- Execution of *Initial Public Offering* (IPO).
- Changes in capital structure of Bank Mandiri.
- Changes in articles of association of Bank Mandiri.

In relation to the shareholders decision to change the capital structure, Bank Mandiri increased its issued and fully paid capital to Rp10,000,000 and stock split from Rp1,000,000 (full amount) per share to Rp500 (full amount) per share. Accordingly, the number of authorised shares increased from 16,000,000 shares to 32,000,000 shares, and the number of issued and fully paid shares increased from 10,000,000 shares with a nominal value of Rp1,000,000 (full amount) to 20,000,000 shares with a nominal value of Rp500 (full amount) which consists of 1 Dwiwarna Series A share and 19,999,999,999 Series B common shares which owned by the Republic of Indonesia.

d. Saham treasury

Bank melakukan pembelian kembali saham Bank yang dipicu oleh perlambatan dan tekanan ekonomi baik secara regional dan nasional yang antara lain disebabkan oleh wabah Covid-19. Selanjutnya, kondisi perdagangan saham di Bursa Efek Indonesia sejak awal tahun 2020 sampai dengan tanggal 9 Maret 2020 mengalami tekanan yang signifikan yang diindikasikan dari penurunan Indeks Harga Saham Gabungan ("IHSG") sebesar 18,46%. Selanjutnya, untuk memberikan stimulus perekonomian dan mengurangi dampak pasar yang berfluktuasi secara signifikan maka OJK mengeluarkan SEOJK No. 3/SEOJK.04/2020, yang bertujuan untuk memberi kemudahan bagi Emiten atau Perusahaan Publik untuk melakukan aksi korporasi pembelian saham kembali tanpa melanggar peraturan perundang-undangan yang berlaku. Hal ini menjadi salah satu pertimbangan bagi Bank untuk melakukan proses pembelian kembali saham (buyback).

Dalam hal pembelian kembali saham, Bank mengacu pada Peraturan OJK No. 2/POJK.04/2013 tentang Pembelian Kembali Saham Yang Dikeluarkan Oleh Emiten atau Perusahaan Publik Dalam Kondisi Pasar Yang Berfluktuasi Secara Signifikan ("POJK No. 2/POJK.04/2013") sebagaimana diubah dengan POJK No. 13 Tahun 2023 Tentang Kebijakan Dalam Menjaga Kinerja Dan Stabilitas Pasar Modal Pada Kondisi Pasar Yang Berfluktuasi Secara Signifikan. d. Treasury stock

The Bank buyback its shares which was triggered by a slowdown and economic pressure both regionally and nationally, among others, was caused by the Covid-19 outbreak. Furthermore, the condition of stock trading on the Indonesia Stock Exchange from the beginning of 2020 to 9 March 2020 experienced significant pressure as indicated by a decrease in the Composite Stock Price Index ("IHSG") of 18.46%. Furthermore, in order to provide an economic stimulus and reduce the impact of a significantly fluctuating market, Financial Service Authority (FSA) issued SEOJK No. 3/SEOJK.04/2020, to ease Issuers or Public Companies to carry out corporate action to buy back shares without violating applicable laws and regulations. This is one of the considerations for the Bank to carry out the buyback process.

For the share buyback, the Bank also refers to FSA Regulation No. 2/POJK.04/2013 regarding the Buyback Shares Issued by Issuers or Public Companies in Market Conditions that Fluctuate Significantly ("POJK No. 2/POJK.04/2013") as amended by POJK No. 13 Year 2023 regarding Policy in Maintaining Performance And Capital Market Stability In Significantly Fluctuating Market Conditions. A. Risiko kredit (lanjutan)

Dalam menyalurkan kreditnya, Bank Mandiri senantiasa mengedepankan prinsip kehati-hatian yang tercermin di beberapa aspek antara lain sebagai berikut (lanjutan):

2. Aktivitas-aktivitas terkait Pengelolaan Risiko Kredit

A. Segmen Wholesale

Proses pengelolaan kredit di segmen *Wholesale* diawali dengan menentukan target pasar melalui *Loan Portfolio Guideline* yang menetapkan *Industry Classification* (menarik, netral, dan selektif) dan *Industry Limit* yang sesuai, serta memilih dan menyaring target nasabah melalui *Industry Acceptance Criteria* dan *Name Clearance* untuk menghasilkan *pipeline* debitur yang berkualitas.

Proses selanjutnya adalah melakukan *credit risk assessment* menggunakan serangkaian *credit risk tools* (*credit risk rating, spreadsheet, CPA, NAK*, dan sebagainya) yang kemudian diputus oleh Pemegang Kewenangan Memutus Kredit (melalui Rapat Komite Kredit) dengan *four-eyes principle* yang melibatkan *Business Unit* dan *Credit Risk Management Unit* secara independen. Mekanisme *four-eyes principle* dilakukan oleh *Credit Committee* sesuai limit kewenangan, dimana proses pemutusan kredit dilaksanakan melalui mekanisme.

Setelah proses *disbursement* kredit, risiko kredit dan potensi kegagalan debitur harus senantiasa dimonitor dan dideteksi secara dini khusus untuk debitur berpotensi bermasalah maka perlu dilakukan penanganan lebih lanjut antara lain mencakup aktivitas restrukturisasi, *collection*, maupun *recovery*.

B. Segmen Retail

Dengan mempertimbangkan karakteristiknya yang *mass market*, maka proses kredit dilakukan secara lebih otomatis menggunakan *credit risk scorecard*, dengan mengacu pada *Risk Acceptance Criteria* setiap produk, serta diproses melalui *work-flow* yang terotomasi (*loan factory*). Proses monitoring dilakukan secara portofolio.

Pemberian kredit di segmen *Retail* khususnya pada kredit produktif juga mengacu kepada *Loan Portfolio Guideline*.

62. RISK MANAGEMENT (continued)

A. Credit risk (continued)

In distributing its credit, Bank Mandiri always prioritizes the prudential principle which is reflected in several aspects, including the following (continued):

2. Activities related to Credit Risk Management

A. Wholesale Segment

The credit management process in the Wholesale segment begins with determining the target market through the Loan Portfolio Guideline which determines the appropriate Industry Classification (attractive, neutral, and selective) and Industry Limit, as well as selecting and filtering target customers through Industry Acceptance Criteria and Name Clearance to produce a high quality debtor pipeline.

The next process is to carry out a credit risk assessment using a series of credit risk tools (credit risk rating, spreadsheet, CPA, NAK, etc.) which is then decided by the Credit Approval Authority Holder (through a Credit Committee Meeting) with a four-eye principle involving the Business Unit and Independent Credit Risk Management Unit. The four-eye principle mechanism is carried out by the Credit Committee in accordance with the limits of authority, where the credit termination process is carried out through the RKK mechanism.

After the credit disbursement process, the debtor's credit risk and potential failure must always be monitored and detected early. Specifically for debtors with potential problems, further handling needs to be carried out, including restructuring, collection, and recovery activities.

B. Retail Segment

By considering its mass market characteristics, the credit process is carried out more automatically using a credit risk scorecard, referring to the Risk Acceptance Criteria for each product, and processed through an automated work-flow (loan factory). The monitoring process is carried out in a portfolio manner.

Lending in the Retail segment especially for productive loan also refers to the Loan Portfolio Guideline.

3. Penilaian Kelayakan Kredit

A. Rating System

Bank Mandiri memiliki *Rating System* yang dikenal dengan BMRS (Bank Mandiri *Rating System*). BMRS yang telah dikembangkan oleh Bank terdiri dari *Rating System* untuk segmen *Corporate and Commercial Banking*, *Rating System* untuk segmen SME, dan *Rating System* untuk *Financial Institution* (Bank). Dengan menggunakan *Rating System* untuk *Financial Institution* (Bank), Bank dapat melakukan identifikasi dan pengukuran risiko *Bank Counterparty* yang dapat ditoleransi dalam memberikan fasilitas *Credit Line*.

B. Credit Scoring

Bank Mandiri memiliki *Credit Scoring* yang berbeda untuk setiap segmen, terdiri dari: *SME Scoring*, *Micro Scoring*, dan *Consumer Scoring*. Bank Mandiri telah mengembangkan *generic credit scoring* untuk segmen kredit konsumtif dan mulai mengembangkan *generic credit scoring* untuk segmen kredit *micro productive* dengan menggunakan data internal (transaksi, *funding*, maupun *lending*) untuk nasabah *Existing-to-Bank* ("ETB") yang memungkinkan proses kredit secara *seamless* melalui aplikasi *Livin'* dan berbagai *channel* lainnya. Untuk nasabah *New-to-Bank* (NTB), Bank Mandiri juga telah bekerja sama dengan penyedia layanan *alternative credit scoring* yang menggunakan data eksternal. Selain itu, Bank Mandiri mulai mengembangkan *bureau credit scoring* yang menggunakan data eksternal berupa SLIK.

Model yang telah dikembangkan oleh Bank, baik itu model risiko kredit dan non kredit, divalidasi secara internal oleh *Model Validator*, yaitu fungsi yang independen dan terpisah dari fungsi pengembang model. Hal ini dilakukan untuk meyakini kualitas dan validitas model. Selain validasi, hal lainnya yang diterapkan terkait pengelolaan risiko model yaitu penerapan kerangka tata kelola pengelolaan model (*Model Risk Management*).

62. RISK MANAGEMENT (continued)

A. Credit risk (continued)

In distributing its credit, Bank Mandiri always prioritizes the prudential principle which is reflected in several aspects, including the following (continued):

3. Credit Worthiness Assessment

A. Rating System

Bank Mandiri has a Rating System known as BMRS (Bank Mandiri Rating System). The BMRS that has been developed by the Bank consists of a Rating System for the Corporate and Commercial Banking segment, a Rating System for the SME segment, and a Rating System for Financial Institutions (Banks). By using the Rating System for Financial Institutions (Banks), Banks can identify and measure the risk that Counterparty Banks can tolerate in providing Credit Line facilities.

B. Credit Scoring

Bank Mandiri has different Credit Scoring for each segment, consisting of: SME Scoring, Micro Scoring, and Consumer Scoring. Bank Mandiri has developed generic credit scoring for consumer loan segment, and has started to develop generic credit scoring for micro productive loan segment using internal data (transactions, funding and lending) for Existing-to-Bank ("ETB") customers that enables seamless credit process through Livin' application and other diverse banking channels. For New-to-Bank (NTB) customers, Bank Mandiri also work with alternative credit scoring service provider that use external data. Furthermore, Bank Mandiri has commenced the development of a bureau credit scoring utilizing SLIK as external data.

The models developed by the Bank, both credit and non-credit risk models, are validated internally by the Model Validator, which is an independent and separate function from model developer function. This is done to ensure quality and validity of model. Apart from validation, another thing that is implemented regarding model risk management is the implementation of a model management governance framework (Model Risk Management).

Manajemen Risiko Kredit dalam Kondisi Endemi COVID-19

Selama masa pandemi Covid-19 berlangsung, Bank Mandiri secara aktif berpartisipasi dalam berbagai program Pemulihan Ekonomi Nasional (PEN) yang dicanangkan Pemerintah antara lain penyaluran dana berdasarkan penempatan uang negara pada Bank, penjaminan kredit, dan subsidi bunga. Diantara program tersebut adalah program untuk debitur terdampak Covid-19 berdasarkan POJK No. 11/POJK.03/2020 serta perubahan keduanya POJK No. 17/POJK.03/2021 yang telah berakhir pada Maret 2023, maupun Keputusan Dewan Komisiner ("KDK") OJK No. 34/KDK.03/2022 terkait sektor, segmen serta wilayah yang masih memerlukan perlakuan khusus terhadap kredit atau pembiayaan bank yang berlaku sampai dengan Maret 2024.

Adapun sebagai tindak lanjut dari berakhirnya KDK OJK No. 34/KDK.03/2022 pada tanggal 31 Maret 2024, OJK menerbitkan Siaran Pers ("SP") OJK Nomor SP-41/OJK/GKPB/III/2024 perihal Pengumuman Berakhirnya Stimulus Restrukturisasi Kredit Perbankan Dalam Rangka Penanganan Pandemi Covid-19, Bank melanjutkan skema restrukturisasi kredit kepada debitur yang sudah berjalan sampai dengan pelunasan kredit.

Pasca masa pandemi Covid-19, perkembangan ekonomi menunjukkan arah pemulihan yang semakin baik disertai dengan juga penurunan portofolio Restrukturisasi COVID-19 dari posisi tertinggi sebesar Rp96.490.149 pada Juni 2021 menjadi sebesar Rp9.245.517 pada posisi Desember 2024.

Secara *bankwide*, pada Desember 2024, besarnya NPL% dan NPL *coverage* Bank Mandiri telah memadai. Memperhatikan kondisi tersebut, Bank cukup yakin telah berhasil mengelola portofolio kredit terdampak pandemi dengan baik. Hal tersebut juga tercermin saat berakhirnya relaksasi terbatas KDK OJK No. 34/KDK.03/2022 pada 31 Maret 2024 tidak menimbulkan lonjakan yang berarti bagi Bank yang menunjukkan keberhasilan Bank melakukan *soft landing* pasca relaksasi.

62. RISK MANAGEMENT (continued)

A. *Credit risk (continued)*

Credit Risk Management in Endemic COVID-19 Condition

During the Covid-19 pandemic, Bank Mandiri actively participated in various national programs initiated by the Government to boost economy recovery (Pemulihan Ekonomi Nasional (PEN)), including Government fund's distribution, loan guarantees, and interest subsidies. Among those programs was a program for debtors affected by Covid-19 which was regulated based on POJK No. 11/POJK.03/2020 as well as its second POJK No. 17/POJK.03/2021 which ended in March 2023, and also the OJK Board of Commissioners Decree ("KDK") No. 34/KDK.03/2022 regarding sectors, segments, and regions that still require special treatment for credit or bank financing that valid until March 2024.

Following the expiration of OJK Board of Commissioners Decree No. 34/KDK.03/2022 on 31 March 2024, OJK issued a Press Release ("SP") numbered SP-41/OJK/GKPB/III/2024 regarding the Announcement of the Termination of the Credit Restructuring Stimulus for Banks in the Context of Handling the Covid-19 Pandemic. Banks will continue the credit restructuring scheme for borrowers that have already commenced until the repayment of the loan.

Post-Covid-19 pandemic, economic development has shown increasingly positive signs of recovery, accompanied by a significant decrease in the COVID-19 Restructuring portfolio from its highest position of Rp96,490,149 in June 2021 to Rp9,245,517 in December 2024.

At bankwide level, in December 2024, Bank Mandiri NPL% and NPL coverage was adequate. Considering these conditions, the Bank is quite confident that it has successfully managed the pandemic-affected credit portfolio. This confidence is also reflected in the fact that the end of the limited relaxation period under KDK OJK No. 34/KDK.03/2022 on 31 March 2024 did not result in any significant spike, demonstrating the Bank's success in achieving a post-relaxation soft landing.

B. Risiko pasar dan risiko likuiditas

(i) Manajemen risiko likuiditas

Risiko likuiditas adalah risiko akibat ketidakmampuan Bank untuk memenuhi kewajiban yang jatuh tempo dari sumber pendanaan arus kas dan/atau dari aset likuid berkualitas tinggi yang dapat diagunkan, tanpa mengganggu aktivitas dan kondisi keuangan Bank.

Untuk mengukur besarnya risiko likuiditas, Bank menggunakan beberapa indikator, antara lain adalah rasio Giro Wajib Minimum ("GWM") pada Bank Indonesia dan kas, Penyangga Likuiditas Makroprudensial ("PLM"), cadangan likuiditas, Rasio Intermediasi Makroprudensial ("RIM"), *Liquidity Coverage Ratio* ("LCR"), *Net Stable Funding Ratio* ("NSFR"), dan ketergantungan terhadap pendanaan nasabah besar.

62. RISK MANAGEMENT (continued)

A. Credit risk (continued)

(ii) Financial assets quality (continued)

Standard grade

- (a) *Current accounts and placements with other banks are current accounts or placements with non-listed banks.*
- (b) *Investments in marketable securities are non-investment grade securities with a minimum rating of idBB (Pefindo), BBB- (S&P), Baa3 (Moody's) or BBB- (Fitch).*
- (c) *Financing, receivables and funds are financing, receivables and funds to debtors with a good payment history and debtors whose accounts have been restructured.*
- (d) *Other assets are financial assets other than income receivables from Government or Local Government such as other receivables to third parties.*

According to SFAS 107, past due financial assets are determined when the debtor fails to make payments on schedule. The table below shows *aging analysis* of past due but not impaired of financial assets:

B. Market risk and liquidity risk

(i) Liquidity risk management

Liquidity risk represents the risk of Bank's inability to fulfill all financial liabilities when they become due from its financing cash flows and/or high quality liquid assets that can be pledged, without negatively impacting the Bank's activities and financial condition.

The Bank's liquidity risk is measured through several indicators, which are minimum statutory reserve ratio ("GWM") in Bank Indonesia and cash, Macroprudential Liquidity Reserve ("PLM"), liquidity reserve, Macroprudential Intermediation Ratio ("RIM"), Liquidity Coverage Ratio ("LCR"), Net Stable Funding Ratio ("NSFR"), and dependency on large customer deposits.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

GWM adalah simpanan minimum yang wajib dipelihara oleh Bank dalam bentuk saldo rekening giro pada Bank Indonesia atau surat berharga yang besarnya ditetapkan oleh Bank Indonesia sebesar persentase tertentu dari dana pihak ketiga (DPK). PLM merupakan persentase kepemilikan surat berharga Rupiah yang dapat digunakan dalam operasi pasar terbuka, antara lain SBI, SDBI, SBN, dan SRBI.

Cadangan likuiditas adalah alat likuid Bank di atas GWM dengan fungsi untuk pemenuhan kebutuhan likuiditas yang tidak terjadwal. Dalam mengelola cadangan likuiditas, Bank memiliki batasan dalam bentuk limit *safety level*, yaitu proyeksi cadangan likuiditas Bank untuk 1 bulan ke depan. Pada tanggal 31 Desember 2024, cadangan likuiditas berada di atas *safety level*.

RIM adalah rasio hasil perbandingan antara kredit yang diberikan dan surat berharga korporasi yang memenuhi persyaratan tertentu yang dimiliki bank terhadap dana pihak ketiga, surat-surat berharga yang memenuhi persyaratan tertentu yang diterbitkan oleh Bank, dan pinjaman yang memenuhi persyaratan tertentu yang diterima oleh Bank. Pada tanggal 31 Desember 2024, RIM Bank Mandiri saja sebesar 94,83%.

LCR merupakan rasio antara *High Quality Liquid Assets* (HQLA) dengan estimasi total arus kas keluar bersih (*net cash outflow*) selama 30 (tiga puluh) hari ke depan dalam skenario krisis. LCR bertujuan untuk meningkatkan ketahanan likuiditas jangka pendek Bank dalam kondisi krisis. Pada tanggal 31 Desember 2024, LCR Bank Mandiri saja sebesar 139,21%.

NSFR merupakan rasio perbandingan antara pendanaan stabil yang tersedia (*available stable funding*) dengan pendanaan stabil yang diperlukan (*required stable funding*). Pada tanggal 31 Desember 2024, NSFR Bank Mandiri saja sebesar 107,60%.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

GWM is a minimum deposits required to be maintained by the Bank in the form of current accounts with Bank Indonesia or marketable securities in which the amount is determined by Bank Indonesia based on certain percentage from total deposits from customers. PLM is an ownership percentage in Rupiah marketable securities which can be used in open market operations i.e. SBI, SDBI, SBN, and SRBI.

Liquidity reserve is the Bank's liquidity on top of GWM to anticipate unscheduled liquidity needs. In managing the liquidity reserve, Bank has liquidity reserve limit in the form of safety level limit, which represents the Bank's liquidity reserve projection for one following month. As of 31 December 2024, the liquidity reserve balance is above the safety level.

RIM is a ratio of loans and qualified marketable securities owned by the Bank to the customer deposits, qualified debt securities issued by the Bank and qualified borrowing received by the Bank. As of 31 December 2024, the Banks's RIM is 94.83%.

LCR is a ratio between High Quality Liquid Assets (HQLA) with the estimation of total net cash outflow for the next 30 (thirty) days under a crisis scenario, LCR is used to improve the short-term liquidity of the Bank under a crisis conditions. As of 31 December 2024, the Bank's LCR is 139.21%.

NSFR is a ratio comparing the available stable funding to required stable funding. As of 31 December 2024, the Bank's NSFR is 107.60%.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(i) Manajemen risiko likuiditas (lanjutan)

Kondisi likuiditas Bank di masa mendatang diproyeksikan melalui metodologi *liquidity gap*, yang merupakan *maturity mismatch* antara komponen-komponen aset dan liabilitas (termasuk *off-balance sheet*), yang disusun ke dalam periode waktu (*time bucket*) berdasarkan *contractual maturity* ataupun *behavioral maturity*. Pada tanggal 31 Desember 2024, proyeksi likuiditas Bank sampai dengan 12 bulan ke depan berada dalam posisi surplus. Meskipun proyeksi likuiditas 12 bulan ke depan surplus, Bank selalu mempersiapkan alternatif *funding* apabila kondisi likuiditas pasar menjadi ketat atau tidak sesuai dengan prediksi Bank.

Untuk mengetahui dampak perubahan faktor pasar maupun faktor internal pada kondisi ekstrim (krisis) terhadap kondisi likuiditas, Bank melakukan *stress testing* risiko likuiditas secara berkala. Hasil *stress testing* yang dilakukan telah dipaparkan kepada Manajemen. Hasil *stress testing* menunjukkan bahwa Bank dapat bertahan pada kondisi krisis likuiditas.

Meskipun hasil *stress testing* menunjukkan bahwa risiko likuiditas dapat dikelola dengan baik, Bank memiliki *Liquidity Contingency Plan* (LCP) yang meliputi strategi pendanaan dan strategi *pricing* dalam kondisi krisis, antara lain pinjaman pasar uang, *repo*, pinjaman bilateral, *FX swap* dan *wholesale funding*. Dalam LCP, penetapan kondisi likuiditas dan strategi-strategi pendanaan telah mempertimbangkan kondisi internal dan eksternal.

Dalam rangka mengantisipasi timbulnya risiko likuiditas akibat adanya perubahan faktor ekonomi global, Bank Mandiri memonitor indikator - indikator eksternal di antaranya: indONIA, suku bunga kebijakan Bank Indonesia (BI Rate), *yield* SUN 10 tahun, *outstanding* likuiditas perbankan Rupiah, Indeks Harga Saham Gabungan (IHSG), *rate interbank call money*, *yield* UST 10 tahun, nilai tukar USD/IDR, *Credit Default Swap* (CDS) 5 tahun Indonesia, serta informasi pasar terkini.

Pelaporan jatuh tempo pada tanggal 31 Desember 2024 dan 2023, didasarkan pada jangka waktu yang tersisa sejak tanggal-tanggal tersebut. Secara historis, terdapat bagian dari simpanan dalam jumlah yang cukup besar yang diperpanjang pada saat jatuh tempo. Selain itu, jika terdapat keperluan likuiditas, obligasi pemerintah (portofolio diukur pada nilai wajar melalui laba rugi dan tersedia untuk dijual diukur pada nilai wajar melalui penghasilan komprehensif lain) dapat dicairkan dengan menggunakannya sebagai jaminan dalam pasar antar bank.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(i) Liquidity risk management (continued)

The Bank uses *liquidity gap methodology* to project its *liquidity conditions for the future*. *Liquidity gap* is basically a *maturity mismatch* between components of assets and liabilities (including *off-balance sheet*), which are classified into *time bucket* based on their *contractual maturity* or *behavioral maturity*. As of 31 December 2024, the Bank's *liquidity forecast* up to next 12 months is at a surplus position. Even in the surplus position for the next 12 months, the Bank always prepares for alternative *funding* to anticipate tight *liquidity* in the market or the *liquidity* is not as expected.

To determine the impact of changes in market factors and internal factors under extreme conditions (crisis) to the *liquidity*, the Bank conducts *stress testing* of *liquidity risk* on a regular basis. The results of *stress testing* performed was presented to the Management. The *stress testing* result showed that the Bank will be able to survive under *liquidity crisis* conditions.

Although the *stress testing* result showed *liquidity risk* is well managed, Bank has *Liquidity Contingency Plan* (LCP) in crisis condition which covers *funding strategy* and *pricing strategy* including money market borrowing, *repo*, bilateral borrowing, *FX swap* and *wholesale funding*. In LCP, determination of *liquidity* situations and *funding strategies* have considered internal and external conditions.

To anticipate *liquidity risks* due to volatility of global economic condition, Bank Mandiri monitors external indicators, including indONIA, BI Rate, 10-years SUN Yield, Rupiah Banking Liquidity Outstanding, Composite Stock Price Index (IHSG), Rate Interbank Call Money, 10-years UST Yield, USD/IDR Exchange Rate, Indonesia's 5-years Credit Default Swap (CDS) and the current market informations.

The maturity profile as of 31 December 2024 and 2023 are based on the remaining period from these dates. Historically, there were a large portion of deposits to be renewed upon maturity. In addition, if there is a need for *liquidity*, Government bonds (at fair value through profit or loss and fair value through other comprehensive income) can be exercised by utilising as collateral in interbank market.

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking book* (lanjutan)

Sumber risiko suku bunga *banking book* adalah *repricing risk* (*repricing mismatch* antara komponen aset dan liabilitas), *basis risk* (penggunaan suku bunga acuan yang berbeda), *yield curve risk* (perubahan bentuk dan *slope yield curve*) dan *option risk* (pelunasan kredit atau pencairan deposito sebelum jatuh tempo). Bank menggunakan *repricing gap* dan melakukan *sensitivity analysis* guna memperoleh proyeksi perubahan *Net Interest Income* ("NII").

a. Sensitivitas terhadap pendapatan bunga - neto

Tabel di bawah ini mengikhtisarkan sensitivitas pendapatan bunga - neto Bank Mandiri untuk 1 (satu) tahun ke depan terhadap pergerakan suku bunga dari portofolio aset dan liabilitas yang memiliki suku bunga pada tanggal 31 Desember 2024 dan 2023 (Bank Mandiri saja) yaitu:

	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps
31 Desember 2024		
Menambah/(mengurangi) pendapatan bunga - neto	1.198.553	(4.378.629)
	Peningkatan 400 bps/ Increased by 400 bps	Penurunan 400 bps/ Decreased by 400 bps

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

The sources of banking book's interest rate risk are repricing risk (repricing mismatch between asset and liability components), basis risk (usage of different interest rate reference), yield curve risk (changes in shape and slope of the yield curve) and the option risk (loan repayment or redeem of deposit before maturity). The Bank uses the repricing gap and performs sensitivity analysis to obtain the projected Net Interest Income ("NII").

a. Sensitivity of net interest income

The table below shows the sensitivity of net income for the next 1 (one) year to interest rate movement of interest bearing assets and liabilities of Bank Mandiri as of 31 December 2024 and 2023 (Bank Mandiri only) as follows:

62. MANAJEMEN RISIKO (lanjutan)

B. Risiko pasar dan risiko likuiditas (lanjutan)

(ii) Manajemen risiko suku bunga *portfolio banking* book (lanjutan)

Untuk mengetahui dampak perubahan suku bunga dan nilai tukar pada kondisi ekstrim (krisis) terhadap pendapatan dan modal, Bank melakukan *stress testing* risiko pasar *banking book* secara berkala.

(iii) Manajemen *pricing*

Bank menerapkan kebijakan *pricing* baik untuk produk dana maupun produk kredit. Kebijakan *pricing* merupakan salah satu strategi untuk memaksimalkan *Net Interest Margin* ("NIM") dan sekaligus mendukung Bank menguasai *market share* dengan mempertimbangkan kondisi persaingan.

Bank secara konsisten berupaya menerapkan strategi sebagai *market leader* dalam hal *pricing* pendanaan. Namun demikian, dengan mempertimbangkan kondisi likuiditas dan kebutuhan dana, Bank dapat menerapkan strategi agresif (lebih besar dari pesaing utama) atau defensif (sama atau lebih kecil dari pesaing utama).

Dalam menetapkan suku bunga kredit, Bank menerapkan *risk based pricing* yaitu pemberian suku bunga kredit kepada nasabah bervariasi berdasarkan tingkat risiko kreditnya. Dalam rangka meminimalkan risiko suku bunga, maka suku bunga kredit disesuaikan dengan suku bunga sumber dana pembiayaan. Selain biaya dana, suku bunga kredit ditetapkan dengan mempertimbangkan biaya *overhead*, premi risiko kredit dan margin keuntungan Bank dengan tetap memperhatikan *competitiveness* dengan pesaing utama. Suku bunga kredit dapat berupa suku bunga mengambang (*floating rate*) atau suku bunga tetap (*fixed rate*) untuk tenor tertentu.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(ii) Interest rate risk management on banking book *portfolio* (continued)

To assess the impact of changes in interest rates and exchange rates at extreme conditions (crisis) to earnings and capital, the Bank conducts *stress testing* on the market risk of banking book regularly.

(iii) Pricing management

The Bank implements *pricing* policy for loans or deposit products. The *pricing* policy is one of the Bank's strategy to maximise *Net Interest Margin* ("NIM") and to support the Bank to dominate the *market share* by considering the competition condition.

The Bank consistently manages to apply the strategy as *market leader* in terms of fund *pricing*. However, considering the liquidity conditions and funding needs, the Bank may implement an aggressive strategy (greater than major competitors) or defensive (equal to or smaller than major competitors).

In determine interest rates, the Bank implements *risk-based pricing* by providing a range of interest rate of loan to customers based on credit risk level. In order to minimize interest rate risk, the loan interest rate is adjusted with interest rate from cost of funds. Other than cost of funds, loan interest rates are determined with consideration to overhead costs, credit risk premiums and profit margins as well as taking into account the Bank's competitiveness with its major competitors. Interest rates for loan can be either a floating or a fixed rate for certain tenors.

(iv) Manajemen risiko nilai tukar

Risiko nilai tukar adalah potensi kerugian yang timbul akibat pergerakan nilai tukar di pasar yang berlawanan pada saat Bank memiliki posisi terbuka. Bank menerapkan manajemen risiko nilai tukar yang memadai sehingga terhindar dari kerugian akibat perubahan atau volatilitas nilai tukar. Risiko nilai tukar berasal dari transaksi valuta asing dengan nasabah atau counterparty yang menyebabkan posisi terbuka dalam valuta asing maupun posisi struktural dalam valuta asing akibat penyertaan modal. Bank mengelola risiko nilai tukar dengan melakukan pemantauan dan pengelolaan Posisi Devisa Neto ("PDN") sesuai dengan limit internal dan ketentuan Bank Indonesia.

Perhitungan PDN pada tanggal 31 Desember 2024 dan 2023 berdasarkan Peraturan Bank Indonesia No. 12/10/PBI/2010 tanggal 1 Juli 2010 yang telah diperbaharui oleh Peraturan Bank Indonesia No. 17/5/PBI/2015 tanggal 29 Mei 2015 yang mengatur mengenai penghapusan peraturan PDN 30 menit. Sesuai dengan Peraturan Bank Indonesia, rasio PDN secara keseluruhan adalah penjumlahan nilai absolut dari selisih bersih antara aset dan liabilitas dalam laporan posisi keuangan untuk setiap mata uang asing yang dinyatakan dalam Rupiah ditambah dengan selisih bersih dari tagihan dan liabilitas komitmen dan kontinjensi, yang dicatat dalam rekening administratif, untuk setiap mata uang asing, yang dinyatakan dalam Rupiah. PDN untuk laporan posisi keuangan adalah selisih bersih jumlah aset dan jumlah liabilitas dalam mata uang asing yang dinyatakan dalam Rupiah. Terhitung tanggal 20 Maret 2020 sesuai dengan Surat BI No. 22/53/DPPK/Srt/B, transaksi Domestic Non-Deliverable Forward ("DNDF") disertakan ke dalam perhitungan PDN.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(iv) Foreign exchange risk management

Exchange rate risk represents potential loss arising from unfavourable exchange rate movements in the market when the Bank has an open position. The Bank applies a proper foreign exchange risk management to avoid loss arising from exchange rate changes or volatility. Exchange rate risk arises from foreign exchange currency transactions with customer or counterparty which leads to an open position in foreign currency or structural positions in foreign currencies due to capital investment. The Bank manages exchange rate risk by monitoring and managing the Net Open Position ("NOP") in accordance with internal limits and the regulation of Bank Indonesia.

The calculation of the net open position as of 31 December 2024 and 2023 is based on Bank Indonesia's Regulation No. 12/10/PBI/2010 dated 1 July 2010 which amended by Bank Indonesia's Regulation No. 17/5/PBI/2015 dated on 29 May 2015 regarding removal implementation NOP 30 minutes. In accordance with Bank Indonesia Regulation, the overall NOP ratio is the total absolute amount from the net difference between assets and liabilities for each foreign currency on statement of financial position which presented in Rupiah added with the net difference between receivables and payables of commitments and contingencies for each foreign currency recorded in administrative which presented in Rupiah. The net open position for the statement of financial position is the net difference between total assets and liabilities for each foreign currency which presented in Rupiah. As of 20 March 2020, in accordance with BI Letter No. 22/53/DPPK/Srt/B, Domestic Non-Deliverable Forward ("DNDF") transactions are included in the NOP calculation.

(v) Fair value of financial assets and liabilities (continued)

The table below shows analysis of financial instruments carried at fair value based on method of valuation levels. The difference at each level of assessment methods is described as follows:

- Quoted prices (not adjusted) from active market for asset or liability which are the same/identical (Level 1);
- Inputs other than quoted market prices included in Level 1 that are observable for the asset and liability, either directly (as a price) or indirectly (derived from prices) (Level 2);
- Inputs for the asset or liability that are not based on observable market data (unobservable information) (Level 3).

The table below shows the Group's assets and liabilities that are measured at fair value as of 31 December 2024 and 2023:

B. Risiko pasar dan risiko likuiditas (lanjutan)

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

Pada tanggal 31 Desember 2024 dan 2023, untuk aset dan liabilitas yang dimiliki pada akhir tahun laporan diukur pada nilai wajar secara berulang, Bank dan Entitas Anak tidak memiliki transfer antara Tingkat 1 dan Tingkat 2 dari hierarki. Selain itu pada posisi tanggal yang sama, tidak terdapat Surat Berharga yang masuk ke dalam Tingkat 3.

Nilai wajar instrumen keuangan yang diperdagangkan dalam pasar aktif (misalnya efek yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain) ditentukan berdasarkan harga pasar kuotasian pada tanggal pelaporan. Suatu pasar dianggap aktif apabila informasi mengenai kuotasian dapat dengan mudah dan secara berkala tersedia dari suatu bursa, pedagang efek, atau broker, kelompok penilai harga pasar industri tertentu, regulator dan harga-harga tersebut mencerminkan transaksi pasar yang aktual dan reguler pada tingkat yang wajar. Harga pasar kuotasian untuk aset keuangan yang dimiliki Grup adalah harga penawaran sekarang. Instrumen-instrumen tersebut termasuk dalam tingkat 1 umumnya meliputi investasi ekuitas dan surat utang terdaftar di Bursa Efek Indonesia yang diklasifikasikan sebagai surat berharga yang diukur pada nilai wajar melalui laba rugi dan nilai wajar melalui penghasilan komprehensif lain.

Nilai wajar instrumen keuangan yang tidak diperdagangkan pada pasar aktif (meliputi derivatif *over the counter* dan obligasi pemerintah yang tidak aktif) ditentukan dengan teknik penilaian internal.

Teknik-teknik penilaian tersebut memaksimalkan penggunaan data pasar yang dapat diobservasi dan sedapat mungkin meminimalisir penggunaan estimasi yang bersifat spesifik dari entitas. Seluruh input yang dibutuhkan untuk menentukan nilai wajar instrumen keuangan dapat diobservasi dari pasar, oleh karena itu instrumen tersebut termasuk dalam tingkat 2. Sebaliknya, jika salah satu atau lebih data tidak didasarkan pada data pasar yang dapat diobservasi, instrumen ini termasuk dalam tingkat 3.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(v) Fair value of financial assets and liabilities (continued)

As of 31 December 2024 and 2023, assets and liabilities held at the end of the reporting year are measured at fair value on a recurring basis. The Bank and its Subsidiaries have no transfers between Level 1 and Level 2 of the hierarchy. In addition at the same date, there is no Marketable Securities included in Level 3.

The fair value of financial instruments traded in active markets (such as marketable securities which are measured at fair value through profit or loss and fair value through other comprehensive income) was determined based on quoted market prices at the reporting date. A market is considered active if the information regarding price quotations can be easily obtained and regularly available from an exchange, securities dealer or broker, the market price of a particular industry assessors, regulators and those price reflects actual and regular market transactions at a fair value. Quoted market price for financial assets owned by the Group are using current offering price. These instruments are included in level 1. The instruments included in level 1 generally include investments in shares in IDX and debt securities classified as held for trading and fair value through other comprehensive income.

The fair value of financial instruments that are not traded in an active market (include over-the-counter derivatives and inactive government bonds) are determined by internal valuation techniques.

The valuation techniques maximise the use of observable market data when available and as far as possible to minimise the use of specific estimates of the entity. If all the inputs needed to determine the fair value of financial instruments are observable from market, therefore the instrument is included in level 2. Instead, if one or more data is not based on observable market data, these instrument are included in level 3.

B. Risiko pasar dan risiko likuiditas (lanjutan)

(v) Nilai wajar aset dan liabilitas keuangan (lanjutan)

- (i) Giro pada Bank Indonesia, giro pada bank lain, penempatan pada Bank Indonesia dan bank lain, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain

Penempatan pada Bank Indonesia dan bank lain merupakan penanaman dana dalam bentuk *deposit facility*, FASBI syariah, *call money*, penempatan "fixed term", deposito berjangka dan lain-lain.

Nilai tercatat dari giro pada Bank Indonesia dan bank lain, penempatan *overnight* dengan suku bunga mengambang adalah perkiraan yang layak atas nilai wajar.

Estimasi nilai wajar terhadap penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga pasar uang yang berlaku untuk utang dengan risiko kredit dan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari penempatan dengan suku bunga tetap, tagihan lainnya - transaksi perdagangan, tagihan atas efek-efek yang dibeli dengan janji dijual kembali, tagihan akseptasi dan aset lain-lain adalah perkiraan yang layak atas nilai wajar.

- (ii) Efek-efek dan obligasi pemerintah (diukur pada biaya perolehan dan biaya perolehan diamortisasi)

Nilai wajar untuk efek-efek dan obligasi pemerintah yang diukur pada biaya perolehan dan biaya perolehan diamortisasi ditetapkan berdasarkan harga pasar atau harga kuotasi perantara (*broker*)/pedagang efek (*dealer*). Jika informasi ini tidak tersedia, nilai wajar diestimasi dengan menggunakan harga pasar kuotasi efek yang memiliki karakteristik kredit, jatuh tempo dan *yield* yang serupa atau dinilai dengan menggunakan metode valuasi internal.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(v) Fair value of financial assets and liabilities (continued)

- (i) Current accounts with Bank Indonesia, current accounts with other banks, placement with Bank Indonesia and other banks, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets

Placements with Bank Indonesia and other banks represent placements in the form of *deposit facility*, *sharia FASBI*, *call money*, *fixed-term placements*, *time deposits* and others.

The carrying amount of current accounts with Bank Indonesia and other banks, placements and overnight deposits, which uses floating rate, is a reasonable approximation of fair value.

The estimated fair value of fixed interest bearing placements, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and remaining maturity. Since the carrying amount of fixed interest bearing placements, other receivables - trading transactions, securities purchased under agreements to resell, acceptance receivables and other assets is a reasonable approximation of fair value.

- (ii) Marketable securities and government bonds (measured at cost and amortised cost)

The fair value for marketable securities and government bonds measured at cost and amortised cost is determined based on market prices or intermediary (*broker*)/dealer quotes. If this information is not available, the fair value is estimated using market prices of similar credit, maturity and yield securities or evaluated using internal valuation methods.

(iii) Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan

(iii) Loans and sharia receivables/financing, consumer financing receivables and net investment in finance leases

Kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan dinyatakan berdasarkan jumlah nilai tercatat setelah dikurangi dengan penurunan nilai. Estimasi nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan mencerminkan jumlah diskonto dari estimasi kini dari arus kas masa depan yang diharapkan akan diterima. Nilai wajar dari kredit yang diberikan dan piutang/pembiayaan syariah, piutang pembiayaan konsumen serta investasi bersih dalam sewa pembiayaan ditentukan dengan mendiskontokan arus kas yang diharapkan pada tingkat suku bunga pasar terkini.

Loans and sharia receivables/financing, consumer financing receivables and net investment in finance leases are recorded at carrying amount net of charges for impairment. The estimated fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases represents the discounted amount of estimated future cash flows expected to be received. The fair value of loans and sharia receivables/financing, consumer financing receivables, and net investment in finance leases is determined by discounting the expected future cash flows at current market interest rates.

(iv) Simpanan nasabah dan simpanan dari bank lain, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain

(iv) Deposits from customers and other banks, securities sold under agreements to repurchase, acceptance payables and other liabilities

Estimasi nilai wajar simpanan yang bisa ditarik kembali sewaktu-waktu, termasuk simpanan tanpa bunga, adalah sebesar jumlah terutang/nilai tercatat ketika utang tersebut dibayarkan.

The estimated fair value of deposits that can be withdrawn at any time, includes non-interest bearing deposits, is the payable amount/carrying amount when the payable is paid.

Estimasi nilai wajar simpanan dengan tingkat suku bunga tetap, liabilitas atas efek-efek yang dijual dengan janji dibeli kembali, liabilitas akseptasi dan liabilitas lain-lain yang tidak memiliki kuotasi di pasar aktif ditetapkan berdasarkan diskonto arus kas dengan menggunakan suku bunga utang baru dengan sisa jatuh tempo yang serupa. Dikarenakan sisa jatuh tempo di bawah satu tahun, nilai tercatat dari simpanan dengan tingkat bunga tetap, liabilitas akseptasi dan liabilitas lain-lain adalah perkiraan yang layak atas nilai wajar.

The estimated fair value of fixed interest bearing deposits, securities sold under agreements to repurchase, acceptance payables and other liabilities not quoted in an active market is based on discounted cash flows using interest rates for new debts with similar remaining maturity. As the remaining maturity is below one year, the carrying amount of fixed interest bearing deposits, acceptance payables and other liabilities is a reasonable approximation of fair value.

Sebagai tanggapan atas kondisi terbaru, pada tanggal 5 Maret 2021, FCA mengumumkan rencana penundaan sebagian penghentian publikasi suku bunga acuan LIBOR oleh IBA tersebut yang telah diadakan dalam 2 (dua) tahap sebagai berikut:

1. Pada 31 Desember 2021 untuk suku bunga acuan LIBOR semua tenor dalam mata uang GBP, EUR, CHF dan JPY serta dalam mata uang USD untuk tenor 1 (satu) minggu dan 2 (dua) bulan.
2. Pada 31 Desember 2023 untuk suku bunga acuan LIBOR dalam mata uang USD untuk tenor *overnight*, 1 (satu) bulan, 3 (tiga) bulan, 6 (enam) bulan dan 12 (dua belas) bulan.

Eksposur risiko Bank yang secara langsung terdampak dari reformasi acuan suku bunga terdiri dari *portfolio* kredit korporasi, transaksi derivatif dan *borrowing* yang menggunakan suku bunga acuan USD LIBOR.

Saat ini Bank telah menggunakan suku bunga acuan *Secured Overnight Financing Rate* (SOFR) atau suku bunga acuan lain yang disepakati untuk menggantikan suku bunga acuan USD LIBOR. Terkait suku bunga acuan SOFR, terdapat beberapa perbedaan antara USD LIBOR dan SOFR. USD LIBOR adalah "term rate", yang berarti USD LIBOR dipublikasikan untuk beberapa periode pinjaman (sebagai contoh 3 (tiga) bulanan atau 6 (enam) bulanan) dan bersifat "forward looking" (LIBOR dipublikasikan pada awal periode), sedangkan SOFR merupakan suku bunga acuan yang bersifat "backward looking", berdasarkan suku bunga *overnight* dari transaksi *actual*, dan dipublikasikan pada akhir periode *overnight*. Selain itu, LIBOR merupakan tingkat suku bunga yang telah memperhitungkan *credit spread*, sementara SOFR saat ini adalah suku bunga yang hampir *risk free* berdasarkan transaksi pasar *repurchase agreement* (repo) US Treasury. Untuk melakukan transisi atas kontrak dan perjanjian yang saat ini mengacu ke USD LIBOR menjadi mengacu ke suku bunga acuan alternatif (SOFR), diperlukan penyesuaian untuk memastikan bahwa kedua suku bunga acuan tersebut secara ekonomis setara.

Pada tahun 2020, Bank telah membentuk komite, yang terdiri dari unit kerja Treasury, Kredit, Risk, IT, Legal, Compliance, dan Keuangan untuk menyusun strategi transisi USD LIBOR. Komite Transisi LIBOR ini dibentuk untuk meminimalisasi potensi disrupti bisnis dan memitigasi risiko operasional, hukum, kepatuhan serta keuangan. Inisiatif transisi LIBOR mempertimbangkan perubahan pada sistem informasi, proses, manajemen risiko, dan model valuasi instrumen keuangan serta mengkaji dampak akuntansi dan perpajakan.

(viii) Impact of Interest Rate Benchmark Reform

In 2017, the UK *Financial Conduct Authority* (FCA) announced plans to stop using LIBOR by the end of 2020. In November 2020, the *ICE Benchmark Administration* (IBA) officially announced plans to stop publishing the LIBOR benchmark interest rate. In response to the latest conditions, on 5 March 2021, FCA announced a plan to partially suspend the publication of the LIBOR benchmark interest rate by the IBA which has held in 2 (two) stages as follows:

1. As of 31 December 2021, the reference interest rate is LIBOR for all tenors in GBP, EUR, CHF and JPY and in USD for 1 (one) week and 2 (two) months tenors.
2. On 31 December 2023, the reference interest rate is LIBOR in USD for the overnight tenor, 1 (one) month, 3 (three) months, 6 (six) months and 12 (twelve) months.

The Bank's risk exposures that are directly affected by the interest rate benchmark reform consist of a portfolio of corporate loans, derivative transactions and borrowing using the USD LIBOR benchmark interest rate.

Currently, the Bank has used to use the *Secured Overnight Financing Rate* (SOFR) benchmark interest rate or other agreed benchmark interest rate to replace the USD LIBOR benchmark interest rate. Regarding the SOFR benchmark interest rate, there are several differences between USD LIBOR and SOFR. USD LIBOR is the "term rate", which means that USD LIBOR is published for several loan periods (for example 3 (three) months or 6 (six) months) and is "forward looking" (LIBOR is published at the beginning of the period), while SOFR is the rate "backward-looking" benchmark interest rate, based on the overnight interest rate of actual transactions, and published at the end of the overnight period. In addition, LIBOR is an interest rate that has taken into account credit spreads, while SOFR is currently an almost risk free interest rate based on US Treasury *repurchase agreement* (repo) market transactions. In order to make the transition of contracts and agreements that currently refer to USD LIBOR to refer to the alternative benchmark interest rate (SOFR), adjustments are needed to ensure that the two benchmark interest rates are economically equivalent.

In 2020, the Bank has formed a committee, consisting of Treasury, Credit, Risk, IT, Legal, Compliance, and Finance work units to formulate a USD LIBOR transition strategy. The LIBOR Transition Committee was formed to minimize the potential for business disruption and mitigate operational, legal, compliance and financial risks. The LIBOR transition initiative considers changes to information systems, processes, risk management and financial instrument valuation models and examines the impact of accounting and taxation.

B. Risiko pasar dan risiko likuiditas (lanjutan)

(viii) Dampak Reformasi Acuan Suku Bunga (lanjutan)

Dari segi manajemen risiko pasar, Bank telah mengidentifikasi dan mengantisipasi perubahan yang terjadi pada aspek - aspek antara lain perubahan *market data*, yang selanjutnya berdampak pada hasil perhitungan *mark to market*, perhitungan dan monitoring VaR, dan perhitungan lain - lain terkait risiko pasar. Terhadap perubahan-perubahan yang terjadi tersebut, Bank telah melakukan penyesuaian pada sistem manajemen risiko pasar dan ketentuan internal terkait, serta telah melaporkan realisasi *enhancement* pada sistem ke regulator. Pada tahun 2024, seluruh transaksi derivatif Treasury dengan mata uang USD telah menggunakan USD SOFR sebagai suku bunga acuannya.

Dalam hal kaitannya dengan risiko likuiditas, perubahan atas suku bunga acuan LIBOR menjadi suku bunga acuan alternatif lain juga dapat berdampak pada kondisi likuiditas Bank. Dalam hal ini, perubahan nominal pembayaran bunga kredit, transaksi derivatif dan/atau bunga pinjaman dapat berpengaruh pada nilai arus kas yang diterima atau dibayarkan oleh Bank, antara lain yang terukur dalam indikator *Liquidity Coverage Ratio (LCR)* dan *Net Stable Funding Ratio (NSFR)*. Namun demikian, dampak tersebut diperkirakan tidak signifikan mempengaruhi kondisi likuiditas Bank secara keseluruhan.

Sebagai bentuk mitigasi risiko pasar, per posisi 31 Desember 2024 dan 2023, Bank telah mengidentifikasi kebutuhan perubahan pada sistem informasi dan Bank telah melakukan penyesuaian pada sistem tersebut. Bank juga telah melakukan kajian yang dibutuhkan dalam proses transisi terkait proses dan model valuasi instrumen keuangan. Pada tahun 2023, Bank telah melakukan komunikasi dengan *counterparty* dan/atau nasabah yang terdampak untuk memberikan informasi terkini terkait perubahan yang mungkin terjadi akibat dari reformasi acuan suku bunga, secara khusus USD LIBOR, baik melalui sosialisasi, diskusi maupun tertulis. Bank telah mengidentifikasi area yang memiliki risiko yang signifikan terhadap penghentian USD LIBOR, yaitu melakukan pengembangan pada sistem informasi dan penyesuaian proses bisnis untuk dapat mengakomodasi penggunaan suku bunga acuan alternatif, melakukan amendemen kontrak/*repapering* dan/atau melakukan kajian *fallback clause* pada kontrak *existing*. Selain melakukan usaha berkelanjutan dalam pemantauan kondisi terkini terkait transisi USD LIBOR, Bank juga telah melakukan diskusi lebih intensif dengan pelaku industri baik yang berasal dari dalam maupun luar negeri dalam rangka *benchmark* serta komunikasi dengan Regulator untuk memastikan transisi perubahan suku bunga acuan dari USD LIBOR ke suku bunga acuan alternatif berjalan dengan baik, sekaligus meminimalisasi risiko yang muncul dari proses transisi tersebut.

62. RISK MANAGEMENT (continued)

B. Market risk and liquidity risk (continued)

(viii) Impact of Interest Rate Benchmark Reform (continued)

In terms of market risk management, the Bank has identified and anticipated changes that occurred in aspects including changes in market data, which in turn will have an impact on the results of the mark to market calculation, VaR calculation and monitoring, and other calculations related to market risk. With regard to these changes, the Bank has made adjustments to the market risk management system and has reported system enhancement realisation to the regulator. In 2024, all Treasury derivative transactions with USD currency have used USD SOFR as benchmark interest rate.

In terms of liquidity risk, changes in the LIBOR benchmark interest rate to another alternative benchmark interest rate may also have an impact on the Bank's liquidity condition. In this case, changes in the nominal payment of credit interest, derivative transactions and/or loan interest may affect the value of cash flows received or paid by the Bank, including those measured in the Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) indicators. However, this impact is not expected to significantly affect the Bank's overall liquidity condition.

As a form of market risk mitigation, as of 31 December 2024 and 2023, the Bank has identified the need for changes to the information system and the Bank has made adjustments to the system. The Bank has also conducted studies needed in the transition process related to the process and model of the valuation of financial instruments. In 2023, the Bank has communicated with affected counterparties and/or customers to provide the latest information regarding changes that may occur as a result of the reform of the interest rate reference, specifically USD LIBOR, either through socialization, discussion or in writing. The Bank has identified areas that have a significant risk of discontinuing USD LIBOR, namely developing information systems and adjusting business processes to accommodate the use of alternative reference interest rates, conducting contract amendments/repapering and/or reviewing fallback clauses on existing contracts. In addition to carrying out continuous efforts in monitoring the latest conditions related to the USD LIBOR transition, the Bank has also conducted more intensive discussions with industry players both from within and outside the country in the context of benchmarking and communication with Regulators to ensure the transition of changes in the benchmark interest rate from USD LIBOR to alternative interest rates went well, also to minimize the risk arising from the transition process.

Terkait dengan *ORM Tools*, *ORM Tools* yang dipergunakan Bank adalah:

- (i) *Risk & Control Self Assessment (RCSA)*, merupakan sebuah register atas identifikasi risiko dan kontrol utama dari proses bisnis yang ada di Bank, yang secara periodik dilakukan penilaian/assessment terhadap *inherent risk rating* dan efektivitas kontrol baik melalui pengujian kontrol (*Control Testing*) maupun secara konsensus. Penilaian *inherent risk rating* dan *control rating* menghasilkan nilai *residual risk* dan menjadi bagian dari profil risiko operasional. Tingkat risiko residual dijaga seminimal mungkin dengan mengambil tindakan yang diperlukan untuk mitigasi sebelum risiko terjadi.
- (ii) *Loss Event Database*, merupakan *database* insiden risiko operasional yang dicatat secara *risk based* dengan tujuan sebagai *lesson learned*, pemantauan tindak lanjut perbaikan kedepannya, serta sebagai salah satu komponen untuk perhitungan modal risiko operasional (*regulatory capital charge*) metode *Standardized Approach (SA)*.
- (iii) *Key Indicator (KI)*, merupakan *early warning signal* dalam pengelolaan risiko operasional dengan tujuan agar upaya mitigasi dapat segera ditentukan dan dilaksanakan sebelum sebuah risiko terjadi. KI mengindikasikan besar kecilnya kemungkinan suatu risiko akan terjadi (*risk based*) atau mengindikasikan besar kecilnya kemungkinan suatu kontrol tidak dilaksanakan sebagaimana mestinya (*control based*). KI ditetapkan ambang batasnya (*threshold*) dan dicatat skor realisasinya secara berkala.
- (iv) *Issue & Action Management (IAM)*, merupakan perangkat untuk memantau tindak lanjut yang telah disusun atas isu-isu yang ditemukan dari berbagai sumber, seperti dari hasil *Control Testing*, hasil *monitoring Key Indicator*, terjadinya insiden, teridentifikasinya suatu permasalahan (*self-identified issue*) dan lainnya.
- (v) *Capital Modelling*, merupakan model perhitungan modal risiko operasional (*regulatory capital charge*) sesuai regulasi yang berlaku.

Sebagai *output* dari proses Manajemen Risiko Operasional, akan dihasilkan profil risiko operasional yang di-*review* oleh unit Internal Audit, dipresentasikan kepada Direksi dan Dewan Komisaris, serta dilaporkan dalam bentuk Laporan Tingkat Kesehatan Bank (*Risk Based Bank Rating*) dan Profil Risiko yang disampaikan kepada Regulator secara periodik. - (i) *Risk & Control Self Assessment (RCSA)*, is a register of risk identification and main control of the business processes within the Bank, where *inherent risk rating* and *control effectiveness* either through *control testing* or by consensus are periodically assessed. The testing of *inherent risk rating* and *control rating* generated *residual risk value* which become a component of *operational risk profile*. The *residual risk level* is minimized by taking necessary mitigations before risk occurs.
- (ii) *Loss Event Database*, is a database of *operational risk incidents* which recorded on *risk based basis* as a *lesson learned*, *remediation monitoring* and *future improvements*, also as a component for calculation of *operational risk capital calculation (regulatory capital charge)* with the *Standardized Approach (SA) method*.
- (iii) *Key Indicator (KI)*, is an *early warning signal* in *operational risk management* with the aim that *mitigation efforts* can be immediately determined and implemented before a risk occurs. KI indicates the probability that a risk will occur (*risk based*) or indicates the probability that a control is not implemented properly (*control based*). KI is set a *threshold (threshold)* and its realization score is recorded periodically.
- (iv) *Issue & Action Management (IAM)*, is a tool to monitor follow-up action that have been designed on identified issues through various activities, such as *Control Testing*, *incident*, *key indicator monitoring result*, *self identified issued* and other.
